In the Senate it was discovered that, copied from the House bill, an unfortunate expression had been used. The provision in which it occurred was that if a Chinese laborer should be arrested after the expiration of a year from the date of the passage of the act and brought before a court, he should be deported unless he could show to the satisfaction of the court that he had failed to register by reason of accident or unavoidable cause, and could further show by a white witness that he had been a resident of the United States or had been within the boundaries of the United States at the time of the passage of the act. Continued residence for a year was the only fact that was required to be proved by a white witness. I have no doubt that whoever drew that provision intended by it only to secure other testimony than Chinese testimony to the fact of residence. Undoubtedly the use of the word "white" was to distinguish the witness required from a Chinese witness, and was not intended to prevent a colored witness from testifying, although it did in fact.

Attention was called to the matter in the Senate when the conference report was under consideration, but it was too late then to correct the mistake. The Senator from Texas, speaking to me, said:

Mr. COKE. Will the Senator permit me to make a suggestion?
Mr. DOLPH. Certainly.
Mr. COKE. I suggest that as it requires one credible white witness the requirements will exclude from the witness box a very large number of citizens of the United States who are not white. I desire to ask if it was the intention to exclude them?
Mr. DOLPH. I think the intention of the conference committee was to provide a witness who should not be a Chinese witness. I presume that was it; the use of the word white was accidental. It was copied from the House bill, but I do not think any harm can arise from this provision, because all the Chinese in this country are employed by white people. If they are employed as servants there will always be some white person who can identify them. If they are employed upon public works or in large bodies, then they are always connected with some Chinese company; they are registered; the company knows just who they are, what they are doing, and what wages they are receiving, and has an interest in their wages.
Mr. KENNA. I ask the Senator if the language of the bill would not exclude the colored population as witnesses?
Mr. DOLPH. I say it was not the intention to exclude colored persons, but to provide that one witness should be some other witness than another Chinese laborer.
Mr. KENNA. I do not ask if that was the intention; I ask if that is not the express meaning of the proposed statute?
Mr. DOLPH. It would exclude colored witnesses; there is no question about that.

That was the answer I made; and, with that understanding, the conference report was agreed to, because it was too late to correct the bill in that respect. The statement was not disputed by either of the other conferees on the part of the Senate, the senior Senator from Alabama [Mr. MORGAN] or the Senator from Ohio [Mr. SHERMAN], that the use of the word "white" there was accidental.

The truth is, in the whole matter of the examination of the Geary bill the Senate was hurried, the Senate committee was hurried, and the Senate conferees were hurried, because the House had delayed to act upon the measure and to send over the bill until the eve of the time when all legislation would expire by its own limitation. I repeat, the use of the word "white" was accidental, the intention being merely to provide for a witness other than a Chinese witness, a Chinese laborer.

But, now, let me give the Senator the remainder of the history of that measure. At the last session, in order to correct that mistake, I introduced a bill in this body to strike out the word "white." It was referred to the Committee on Foreign Relations; it was there considered, and reported favorably to this body. I called it up in the Senate, and a Senator on the other side of the Chamber objected to its consideration, or, at least, if he did not object to its consideration, determined to discuss it until the morning hour was over; and so it was forced to go over in the busy portion of the session.

There was not a word of opposition on this side, every Senator on this side apparently confessing that that mistake should be corrected and the word "white" be stricken out. The Senator knows that the opposition came from the Senator from Illinois [Mr. PALMER], and that the bill was thrown over and did not receive consideration in this body at the last session.

So if there has been a mistake made, however responsible I may be for it, or any other Senator on this side of the Chamber, I have shown a disposition, the Senators on this side of the Chamber have shown a disposition, and the Senate Committee on Foreign Relations have shown a disposition to correct the mistake and strike out the word "white," but the opposition came from the other side of the Chamber and the bill failed to receive the consideration of the Senate.

Mr. CALL. Mr. President, I do not wish, as a member of this body, to allow this debate to pass away without expressing my disapproval of many of the propositions which have been made in this discussion.

While this country is almost unanimous, and there is scarcely any opposition, upon the question of the exclusion of Chinese or any other kind of immigration which is objectionable on any account to the people of the respective States, there is a feeling on the part of a large portion of the religious people of this country that this legislation has been harsh and unjustifiable; that it has had a tendency to interrupt and destroy the efforts of the humane and religious people of this country for the propagation of our ideas of religion and civilization over a large part of the human race; that it has interfered with our commercial relations, and that respect was due to this great mass of human beings and the authority constituted over them, to approach the question in the usual form of diplomatic intercourse and of proper courtesy toward them.

No one, I apprehend, thinks that to this great people of the United States, and this laboring element of ours, so intelligent, so capable in every respect, there was any danger in the delay of a few months in the passage of this legislation, or any treaty arrangements for that purpose. We all understand that this act of Congress was rushed through, not perhaps by one party or the other, but by both, upon political considerations relative to the success of parties in this country.

Mr. President, I have no objection to the exclusion of the objectionable portion of Chinese immigration, but there are two sides to this question. There is a great commercial interest and there is an interest of civilization, an interest of religion, an interest of good faith, and the good opinion of the people of the world toward this country. Therefore that legislation, in my judgment, was not only hasty, but, under the circumstances, was not justifiable.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The Chair will inquire of the Senator from Oregon what disposition he desires made of the bill which has been pending?

Mr. DOLPH. Let it be referred to the Committee on Foreign Relations for action before it goes to the Committee on Appropriations.

The PRESIDING OFFICER. That reference will be made, in the absence of objection.

EXECUTIVE SESSION.

Mr. BERRY. I renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened, and (at 2 o'clock and 52 minutes p. m.) the Senate adjourned until Monday, September 4, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate September 2, 1893.

POSTMASTERS.

William H. Macartney, to be postmaster at Oakland, in the county of Kennebec and State of Maine, in the place of Everett M. Stacy, resigned.

Edward P. Lawton, to be postmaster at Lenox, in the county of Berkshire and State of Massachusetts, in the place of Andrew T. Servin, removed.

Ruel Curtis, to be postmaster at Fowlerville, in the county of Livingston and State of Michigan, in the place of De Witt C. Carr, whose commission expired March 23, 1893.

John W. Kirtland, to be postmaster at Lake View, in the county of Montcalm and State of Michigan, the appointment of a postmaster at the said office having, by law, become vested in the President on and after July 1, 1893.

Edwin E. Taber, to be postmaster at Long Branch City, in the county of Monmouth and State of New Jersey, in the place of Charles B. Woolley, removed.

Ellis Williams, to be postmaster at Granville, in the county of Washington and State of New York, in the place of Hugh G. Thomas, whose commission expired March 27, 1893.

Daniel O. Corcoran, to be postmaster at Oxford, in the county of Butler and State of Ohio, in place of John E. Chatten, resigned.

Augustus F. Julliard, to be postmaster at Louisville, in the county of Stark and State of Ohio, in place of Lemuel P. Bissell, resigned.

James C. Kearns, to be postmaster at Niles, in the county of Trumbull and State of Ohio, in the place of Jesse H. Hunter, deceased.

David W. Struble, to be postmaster at Fredericktown, in the county of Knox and State of Ohio, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1893.

John F. Meisner, to be postmaster at Clintonville, in the county of Waupaca and State of Wisconsin, in the place of Henry Giebel, removed.

Adam Paulus, to be postmaster at Marshfield, in the county of Wood and State of Wisconsin, in the place of John B. Gill, resigned.

Andrew W. Kennedy, to be postmaster at Buffalo, in the county of Johnson and State of Wyoming, in the place of William H. Fenn, resigned.

PROMOTIONS IN THE ARMY.

Adjutant-General's Department.

Lieut. Col. Samuel Breck, assistant adjutant-general, to be assistant adjutant-general with the rank of colonel, August 31, 1893, vice McKeever, retired from active service.

Maj. Thomas Ward, assistant adjutant-general, to be assistant adjutant-general with the rank of lieutenant-colonel, August 31, 1893, vice Breck, promoted.

PROMOTIONS IN THE NAVY.

Commodore Aaron W. Weaver, to be a rear-admiral in the Navy, from the 27th June, 1893, vice Rear-Admiral D. B. Harmony, retired.

Capt. Charles C. Carpenter, to be a commodore in the Navy, from the 15th May, 1893, vice Commodore J. H. Gillis, retired.

Capt. William A. Kirkland, to be a commodore in the Navy, from the 27th June, 1893, vice Commodore William A. Weaver, promoted.

Commander John I. Read, to be a captain in the Navy, from the 27th April, 1893, vice Capt. C. G. Wiltse, deceased.

Commander Frank E. Chadwick, United States Navy, to be chief of the Bureau of Equipment in the Department of the Navy, with the relative rank of commodore, from the 1st of July, 1893, to fill a vacancy.

Medical Inspector James Rufus Tryon, United States Navy, to be surgeon-general and chief of the Bureau of Medicine and Surgery in the Department of the Navy, with the relative rank of commodore, from the 11th May, 1893, vice Medical Director J. Mills Browne, transferred to the retired list.

Naval Constructor Philip Hichborn, United States Navy, to be chief of the Bureau of Construction and Repair, and chief constructor in the Department of the Navy, with the relative rank of commodore, from the 13th July, 1893.

Medical Inspector Adolph A. Hoehling, to be a medical director in the Navy, from the 11th May, 1893, vice Medical Director J. Mills Browne, retired.

Surgeon George A. Bright, to be a medical inspector in the Navy, from the 11th May, 1893, vice Medical Inspector A. A. Hoehling, promoted.

Passed Assistant Surgeon Henry G. Beyer, to be a surgeon in the Navy, from the 11th May, 1893, vice Surgeon George A. Bright, promoted.

Passed Assistant Surgeon John M. Steele, to be a surgeon in the Navy, from the 11th May, 1893, vice Surgeon H. C. Eckstein, retired.

The following-named naval cadets, graduates of the Naval Academy, to be ensigns in the Navy, from the 1st of July, 1893, to fill vacancies in that grade, viz: Reginald R. Belknap, De Witt Blamer, Arthur L. Willard, Edwin T. Pollock, Clark D. Stearns, Henry C. Kuenzli, Henry H. Hough, Renwick J. Hartung, Harley H. Christy, Noble E. Irwin, Waldo Evans, Harry H. Caldwell, Thomas J. Senn, Jay H. Sypher, Bion B. Bierer, Horace G. Macfarland, Charles F. Preston, Richard H. Leigh, Adelbert Althouse, William D. Brotherton, James F. Carter, and Henry E. Smith.

The following-named naval cadets, graduates of the Naval Academy, to be assistant engineers in the Navy, from the 1st July, 1893, to fill vacancies in that grade, viz: John K. Robison, John H. Rowen, Milton E. Reed, Charles R. Emrich, William H. McGrann, George H. Shepard, and George W. Laws.

Passed Assistant Engineer George H. Kearny, to be a chief engineer in the Navy, from the 27th June, 1893, vice Chief Engineer George W. Magee, retired.

Assistant Engineer Charles A. E. King, to be a passed assistant engineer in the Navy, from the 27th June, 1893, vice Passed Assistant Engineer G. H. Kearny, promoted.

APPOINTMENTS IN THE NAVY.

James Farquarson Leys, to be an assistant surgeon in the Navy, from the 22d June, 1893, to fill a vacancy in that grade.

Richard Godfrey Broderick, to be an assistant surgeon in the Navy, from the 2d of August, 1893, to fill a vacancy in that grade.

MARINE CORPS.

First Lieut. Paul St. Clair Murphy, United States Marine Corps, to be a captain in said corps, from the 16th March, 1893, vice Capt. Edward P. Meeker, Marine Corps, retired.

First Lieut. Le Roy C. Webster, United States Marine Corps, to be a captain in said corps, from the 18th of April, 1893, vice Capt. Robert D. Wainwright, Marine Corps, retired.

Second Lieut. Ben H. Fuller, United States Marine Corps, to be a first lieutenant in said corps, from the 16th March, 1893, vice First Lieut. Paul St. Clair Murphy, Marine Corps, promoted.

Second Lieut. Robert R. McM. Dutton, United States Marine Corps, to be a first lieutenant in said corps, from the 17th March, 1893, vice First Lieut. H. C. Fisher, Marine Corps, promoted and retired.

Second Lieut. Edward R. Lowndes, United States Marine Corps, to be a first lieutenant in said corps, from the 18th April, 1893, vice First Lieut. Le Roy C. Webster, promoted.

Second Lieut. Albertus W. Catlin, United States Marine Corps, to be a first lieutenant in said corps, from the 19th April, 1893, vice First Lieut. Louis J. Gulick, retired.

The following-named naval cadets, graduates of the Naval Academy, to be second lieutenants in the United States Marine Corps, from the 1st July, 1893, to fill vacancies in that grade, viz: Dion Williams, Rufus H. Lane, Albert S. McLemore, Elisha Theall, George Richards, and William N. McKelvy.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 30, 1893.

ASSISTANT ATTORNEY-GENERAL.

Joshua E. Dodge, of Wisconsin, to be Assistant Attorney-General.

SURVEYOR-GENERAL OF NEW MEXICO.

Charles F. Easley, of Cerrillos, N. Mex., to be surveyor-general of New Mexico.

SUPERINTENDENT OF MINT, NEW ORLEANS.

Overton Cade, of Louisiana, to be superintendent of the United States mint at New Orleans, in the State of Louisiana.

ASSAYER OF MINT, NEW ORLEANS.

R. L. Schroeder, of Louisiana, to be assayer of the mint of the United States at New Orleans, in the State of Louisiana.

MELTER AND REFINER OF MINT, NEW ORLEANS.

Lewis Guion, of Louisiana, to be melter and refiner of the mint of the United States at New Orleans, in the State of Louisiana.

COINER OF MINT, NEW ORLEANS.

H. Gibbs Morgan, of Louisiana, to be coiner of the mint of the United States at New Orleans, in the State of Louisiana.

PRINCIPAL CLERK OF SURVEYS, GENERAL LAND OFFICE.

Frank Flynt, of Griffin, Ga., to be principal clerk of the surveys in the General Land Office.

INDIAN INSPECTORS.

Clinton C. Duncan, of Perry, Ga., to be an Indian inspector.

Province McCormick, of Berryville, Va., to be an Indian inspector.

RECEIVERS OF PUBLIC MONEYS.

Charles P. Johnston, of New Orleans, La., to be receiver of public moneys at New Orleans, La.

James C. Caldwell, of Kingfisher, Okla., to be receiver of public moneys at Kingfisher, in Oklahoma Territory.

Thomas H. Corbett, of Frankfort, Ky., to be receiver of public moneys at Guthrie, in Oklahoma Territory.

COLLECTORS OF INTERNAL REVENUE.

Edward P. Kearns, of Pennsylvania, to be collector of internal revenue for the twenty-third district of Pennsylvania.

William H. Doyle, of Pennsylvania, to be collector of internal revenue for the first district of Pennsylvania.

REGISTERS OF THE LAND OFFICE.

G. McD. Brumby, of Delhi, La., to be register of the land office at New Orleans, La.

David H. Hall, of Eureka, Nev., to be register of the land office at Eureka, Nev.

William D. Lindsay, of Guthrie, Okla., to be register of the land office at Guthrie, in Oklahoma Territory.

Bushrod M. Dilley, of Hamilton, Mo., to be register of the land office at Oklahoma, in Oklahoma Territory.

INDIAN AGENTS.

Frederick Treon, of Crow Creek, S. Dak., to be agent for the Indians of the Crow Creek and Lower Brule Agency in South Dakota.

Thomas H. Savage, of Underhill, Wis., to be agent for the Indians of the Green Bay Agency in Wisconsin.

Dew M. Wisdom, of Muscogee, Ind. Ter., to be agent for the Indians of the Union Agency in the Indian Territory.

POSTMASTERS.

Samuel Bassett, to be postmaster at New Britain, in the county of Hartford and State of Connecticut.

Julius Deming, to be postmaster at Litchfield, in the county of Litchfield and State of Connecticut.

Adrian Norman, to be postmaster at Passaic, in the county of Passaic and State of New Jersey.

Japhia Van Dyke, to be postmaster at Long Branch, in the county of Monmouth and State of New Jersey.

James Bride, jr., to be postmaster at East Haddam, in the county of Middlesex and State of Connecticut.

Patrick W. Reardon, to be postmaster at Winchester, in the county of Middlesex and State of Massachusetts.

John J. Love, to be postmaster at Webster, in the county of Worcester and State of Massachusetts.

Hanson A. Littlefield, to be postmaster at West Acton, in the county of Middlesex and State of Massachusetts.

Executive nominations confirmed by the Senate September 1, 1893.

CONSUL.

Otto Doederlein, of Chicago, Ill., to be consul of the United States at Leipsic, Germany.

INDIAN AGENTS.

W. Leven Powell, of Seattle, Wash., to be agent for the Indians at the Neah Bay Agency in Washington.

Lewis T. Erwin, of Everett, Wash., to be agent for the Indians of the Yakima Agency in Washington.

COLLECTORS OF INTERNAL REVENUE.

William Ryan, of Virginia, to be collector of internal revenue for the second district of Virginia.

Hambleton Shepperd, of Virginia, to be collector of internal revenue for the sixth district of Virginia.

RECEIVER OF PUBLIC MONEYS.

Leslie P. Ross, of Norman, Okla., to be receiver of public moneys at Oklahoma, in Oklahoma Territory.

Executive nominations confirmed by the Senate September 2, 1893.

SECRETARY OF LEGATION.

Owen McGarr, of Chattanooga, Tenn., to be secretary of the legation of the United States to Chile.

CONSULS.

C. F. Macdonald, of Massachusetts, to be consul of the United States, at Hamilton, Canada.

Francis H. Underwood, of Boston, Mass., to be consul of the United States at Leith, Scotland.

UNITED STATES ATTORNEY.

Daniel R. Murphy, of Oregon, to be attorney of the United States for the district of Oregon.

MARSHAL.

Henry C. Grady, of Oregon, to be marshal of the United States for the district of Oregon.

COLLECTOR OF CUSTOMS.

Charles H. Page, of Oregon, to be collector of customs for the district of Oregon, in the State of Oregon.

INDIAN AGENT.

John F. T. B. Brentano, of St. Paul, Oregon, to be agent for the Indians of the Grande Ronde Agency in Oregon.

REJECTION.

Executive nomination rejected by the Senate, September 2, 1893.

SECRETARY OF LEGATION AND CONSUL-GENERAL.

Henry C. Stuart, of Denver, Colo., to be secretary of legation in Guatemala and Honduras and consul-general of the United States to Guatemala.

HOUSE OF REPRESENTATIVES.

SATURDAY, *September 2, 1893.*

The House met at 12 o'clock noon, and was called to order by the Speaker.

Prayer by Rev. ISAAC W. CANTER, of Washington, D. C.

The Journal of the proceedings of yesterday was read, corrected, and approved.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. MORSE, for ten days, on account of important business.

To Mr. WAUGH, for ten days, on account of important business.

To Mr. ROBINSON of Pennsylvania, for two weeks, on account of sickness in his family.

To Mr. PIGOTT, for three days, on account of important business.

To Mr. MUTCHLER, for four days, on account of important business.

To Mr. CAUSEY, until Tuesday next, on account of important business.

To Mr. WANGER, until Tuesday next, on account of important business.

EMPLOYÉS OF POSTMASTER, CLERK, AND DOORKEEPER.

Mr. RUSK. Mr. Speaker, I offer for reference the resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Maryland [Mr. RUSK] offers for reference a resolution the title of which the Clerk will report.

The Clerk read as follows:

A resolution providing for an increase in the number of employés of the Postmaster, Clerk, and Doorkeeper of the House of Representatives.

The SPEAKER. In the absence of objection, this resolution will be referred to the Committee on Accounts.

There was no objection.

TREASURY NOTES.

Mr. McLAURIN. Mr. Speaker, I ask unanimous consent to offer a joint resolution for reference.

The SPEAKER. The Clerk will report the title of the resolution.

The Clerk read as follows:

A joint resolution authorizing the issuing of $125,000,000 of Treasury notes under the acts of 1862 and 1863.

Mr. DINGLEY. Mr. Speaker, I think that should take its regular course.

The SPEAKER. Objection is made.

SPECIAL REPORT ON DISEASES OF CATTLE, ETC.

Mr. BABCOCK. I desire to offer a resolution for reference.

The SPEAKER. The Clerk will report the title of the resolution.

The Clerk read as follows:

Joint resolution providing for the printing of 60,000 copies of the special report on the Diseases of Cattle and Cattle-Feeding.

The SPEAKER. The gentleman asks to introduce this resolution for reference.

Mr. RICHARDSON. Mr. Speaker, I object.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed with amendments the bill (H. R. 4) to provide for certain urgent deficiencies in the appropriations for the service of the Government for the fiscal year ending June 30, 1894, and for other purposes; in which the concurrence of the House was requested.

MESSAGE FROM THE PRESIDENT.

A message from the President, by Mr. PRUDEN, one of his secretaries, announced that the President had approved and signed joint resolution (H. Res. 4) to make the provisions of the act of May 14, 1890, which provides for town-site entries of lands in a portion of what is known as Oklahoma, applicable to the territory known as the "Cherokee Outlet," and to make the provisions of said act applicable to town sites in the "Cherokee Outlet."

THE RULES.

Mr. CATCHINGS. Mr. Speaker, I call up the report from the Committee on Rules.

The SPEAKER. The gentleman from Mississippi [Mr. CATCHINGS] calls up the report from the Committee on Rules.

The Clerk will report the pending amendment offered by the gentleman from Mississippi [Mr. HOOKER].

The Clerk read as follows:

Where unanimous consent is asked, the objection of no single member shall prevent the House from taking up and considering any matter; but it shall require the concurrent objection of fifteen members to prevent the consideration of any measure.

Mr. HOOKER of Misssisippi. Mr. Speaker, the opinion seems to prevail on the part of several members with whom I have conferred that the number mentioned in my original motion is a little too large, and I would, therefore, ask leave of the House to modify it, so as to require the concurrent objection of seven members.

The SPEAKER. The question is on agreeing to the amendment proposed by the gentleman from Mississippi.

Mr. DINGLEY. I would like to have the amendment read again.

The amendment as modified was read, as follows:

Where unanimous consent is asked, the objection of no single member shall prevent the House from taking up and considering any matter; but it shall require the concurrent objection of seven members to prevent the consideration of any measure.

The question was taken on the adoption of the amendment, and the Speaker announced that the noes seemed to have it.

Mr. HOOKER of Mississippi. Division.

The House divided: and there were—ayes 30, noes 84.

Mr. HOOKER of Mississippi. I ask for tellers.

Pending the count on ordering tellers,

Mr. HOOKER of Mississippi said: I make the point of no quorum. That will give us tellers.

Mr. BAILEY. Mr. Speaker, I submit that it is not in order to make the point of no quorum after the demand has been made for tellers. The demand for tellers is equivalent to a waiver of the point of no quorum.

The SPEAKER. It has several times been held, under the rules and practice of the House, when the rules have been adopted, that the demand for tellers is a waiver of the point of no quorum. But there are no rules, and, as the gentleman from Mississippi makes the point, the Chair is inclined to entertain it.

Mr. CATCHINGS. Let us have the yeas and nays, Mr. Speaker.

The yeas and nays were ordered.

The question was taken; and there were—yeas 52, nays 127, not voting 174; as follows:

YEAS—52.

Adams,	Hager,	Johnson, N. Dak.	Paschal,
Baker, N. H.	Hainer,	Kiefer,	Perkins,

Mr. ERDMAN with Mr. WANGER, until Tuesday next.

Mr. CAUSEY with Mr. BROSIUS until Tuesday next.

Mr. MCETTRICK with Mr. MORSE, until Wednesday next.

Mr. JONES with Mr. SCRANTON, until Thursday next.

For this day:

Mr. O'NEIL of Massachusetts with Mr. COGSWELL.

Mr. CRAIN with Mr. O'NEILL of Pennsylvania.

Mr. OATES with Mr. HITT.

Mr. ELLIS of Kentucky with Mr. WALKER.

Mr. MUTCHLER with Mr. HOUK of Tennessee.

Mr. ALDERSON with Mr. WADSWORTH.

Mr. REILLY with Mr. REYBURN.

Mr. BLANCHARD with Mr. HENDERSON of Illinois.

Mr. FITCH with Mr. GILLETT of Massachusetts.

Mr. COOMBS with Mr. POST.

Mr. FELLOWS with Mr. LACEY.

Mr. BERRY with Mr. WAUGH, on this vote.

The result of the vote was then announced as above recorded.

The Clerk read as follows:

2. No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress. Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as, being germane to the subject-matter of the bill, shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill: *Provided*, That it shall be in order further to

amend such bill upon the report of the committee having jurisdiction of the subject-matter of such amendment, which amendment, being germane to the subject-matter of the bill, shall retrench expenditures.

Mr. TRACEY. Mr. Speaker, I desire to offer an amendment.

The Clerk read as follows:

Strike out after the word "order," in line 3, page 22, second section of Rule XXI.

Mr. McMILLIN. Let us have it read, so that we can see what effect the amendment will have.

The language proposed to be striken out was read.

Mr. TRACEY. Mr. Speaker, this provision in Rule XXI was inserted in the Fifty-second Congress. The rules of the Fiftieth and Fifty-first Congresses did not contain it. My objection to continuing it in the rules is, that it causes a great deal of trouble in Committee of the Whole. Members are constantly offering amendments under cover of this rule which change existing law, and endless discussions occurred in the last Congress, causing a great deal of confusion. In addition to that, Mr. Speaker, great injustice is done. Laws have been made here by appropriate committees regulating the offices and the amount of salaries to be paid to officials.

Under this provision of the rule offices may be abolished without warning, so that the officials and their friends are surprised to discover that salaries which are not at all extravagant have been cut down by reason, sometimes, of a mere notion on the part of some member here. In that way very great injustice is done. There is no reason why existing laws should not be changed, when change is necessary, by the regular methods, upon the report of the proper committees, and there is no occasion whatever for such a provision as this in the rules.

Mr. DOCKERY. Will the gentleman from New York name one instance where injustice was done?

Mr. TRACEY. Well, I think one instance was the case of the cutting down of the salaries of the assistant secretaries of State, which were, I believe, cut from $4,500 to $3,500 by an amendment on an appropriation bill.

Mr. DOCKERY. Will the gentleman state also that in that case the salary allowed in the appropriation bill was exactly the amount fixed by law?

Mr. TRACEY. That may be; but I know that there have been numerous instances of what I consider gross injustice under this part of our rules. As to the point I made first, I think we all realize how the time of the House has been taken up in Committee of the Whole with discussion of amendments offered in that way. Weeks have been spent discussing amendments offered under cover of this rule, and what the ruling may be in any such case depends entirely upon who may be occupying the chair. Rulings have been made on exactly similar cases sometimes one way and sometimes the other. This part of our rule has only worked mischief from the time it was first adopted. During the Democratic caucus of the Fifty-second Congress I was absent from the city, but when I saw that this provision had been injected into our rules, I determined that at the first opportunity I would do what I could to strike it out.

Mr. REED. I will ask the gentleman from Missouri [Mr. DOCKERY] whether the salaries of the auditors have not been reduced?

Mr. DOCKERY. They have been since the Forty-fourth Congress. The statute fixed the amount of those salaries at $4,000, and that was reduced by the Forty-fourth Congress to $3,600. That amount has been appropriated by every Congress since, including the Forty-seventh and the Fifty-first Congresses, which were under Republican control.

Mr. REED. But the reduction was made under this rule?

Mr. DOCKERY. That is true; but as to the instance of injustice referred to by my friend from New York [Mr. TRACEY], if injustice has been done in that case it would not be relieved by striking this provision from the rule.

Mr. TRACEY. Well, Mr. Speaker, I will say to the gentleman from Missouri that we all know that in any case where it is deemed proper to make a change, the committee are allowed to make the change, no point of order being raised. They are sufficiently protected in that manner, and there is no occasion for keeping any such means of reduction as this in our rules.

Mr. McMILLIN. Mr. Speaker, I do not think the proposition of the gentleman from New York [Mr. TRACEY] should be adopted by the House. We are confronted with a strange and rather difficult problem at the very best. The people of this country are justly demanding at the hands of this Congress a reduction of their rate of taxation—a reduction of the taxes imposed upon the things they eat and wear, and we have to begin at a time when the Treasury is bankrupt. There is no disguising the facts. We are able to meet our current expenses, but we are barely able to meet them, at a time when there is the highest rate of taxation ever known in the history of this country; and for this Congress to begin, at the threshold of its work, by saying that we do not intend to abolish unnecessary offices, that we will fix our rules so that on an appropriation bill we must go on and appropriate whether there is any need for a given office or not; or that if we find that there has been an extravagant expenditure we can not remedy it, but must take the law as we find it, and go on and make the extravagant appropriation; or that if we find there has been colossal injustice done in any case, we shall so formulate our rules as to be unable to end it on an appropriation bill—I say that to go into the work of this Congress, with three sessions ahead of us, with such a rule would be madness. It would be an injustice to the people which we have no right to inflict.

Furthermore, Mr. Speaker, there is no reason why, on an appropriation bill, we should not be able to do justice to the people in connection with the great appropriations which we are called upon to make. If the gentleman from New York [Mr. TRACEY] had been here as long as some of us, he would hardly clamor for this change. I remember this rule as, on many occasions, the only means we have had to reduce extravagant expenditures. I hardly remember an instance of a change in the direction of economy that has come except through the beneficial operation of this rule.

Years ago, when the right to use deputy marshals and troops at the polls was asserted, in 1879, there was an extra session of Congress called on account of the failure of the Senate to agree to amendments that dispensed with their use; and in the succeeding session of Congress the only way we were able to put any restraint upon the use of force at the polls was through this salutary rule. I remember the action of the distinguished gentleman from Ohio, Gen. Garfield. I remember the fierce conflicts that we had then, and I remember the great economies, just and laudable in themselves, by which we won ourselves honor with the people, that were inaugurated in the Forty-fourth Congress.

Yet, with the Treasury in a worse condition than it has been for years, it is proposed at the beginning of this Congress to break down the rule under which that was made possible. I do not think this ought to be done. I believe that if we should do it we would be advertising ourselves as the kind of Congress that the people did not think they were electing last fall.

[Here the hammer fell.]

Mr. SIMPSON. I heartily agree with the suggestion of the gentleman from Tennessee [Mr. McMILLIN]. We were told by the advocates of the repeal of the silver-purchasing clause here that that legislation operated to increase the value of the dollar; that the purchasing power of the laboring man's dollar was very much greater than it had been; that he could buy with it very much more of the things that he needs. This being true, I think there should be a very large reduction in the salary of every employé of the Government, including some of our high-salaried officials. [Laughter.]

Mr. WILLIAM A. STONE. Mr. Speaker, I fully agree with the statement of the gentleman from Tennessee [Mr. McMILLIN] that the sentiment of the country demands from this House a safeguard of this kind, and I shall vote to retain it in this section. There was no such sentiment of the country and no occasion for such a safeguard in the Fifty-first Congress; but, inasmuch as we have so large and overwhelming a Democratic majority, I think it proper that this provision should be retained. But I wish to suggest to my friend from New York [Mr. TRACEY] that by striking out all the words following the word "order," in the third line, the objection which has been raised will not be overcome. The clause would then read "nor shall any provision in any such bill or amendment thereto changing existing law be in order."

Mr. TRACEY. That is right.

Mr. WILLIAM A. STONE. But you stop there.

Mr. TRACEY. Yes.

Mr. WILLIAM A. STONE. But what is the sense of striking out the proviso and leaving the general prohibition in the rule? The language of the rule now is, "nor shall any provision in any such bill or amendment thereto changing existing law be in order except" under such and such circumstances. Now when you strike out the exceptions you leave the broad sweeping proposition that no amendment shall be in order changing existing law. If the exceptions are struck out it occurs to me we should, in order to reach the point intended, strike out all after the word "progress."

Mr. HOLMAN. Mr. Speaker, as has been remarked by the gentleman from Tennessee [Mr. McMILLIN] this rule was adopted at the beginning of the Forty-fourth Congress; and all gentlemen are aware of the results of its adoption. During that Congress the expenses of this Government were reduced—properly reduced, without any injury to any branch of the public service—to the extent of $64,000,000 by virtue of the operation of this rule. And that reduction could not have been accom-

plished in any other way. A large number of salaries were reduced, not simply the salaries of the auditors mentioned, but a large number of others, by the legislation of the Forty-fourth Congress.

Mr. REED. Why was not the same rule as effectual in the last Congress?

Mr. HOLMAN. The Senate was against the House. The Senate was responsible.

Mr. REED. Was the Senate with the House in the Forty-fourth Congress?

Mr. HOLMAN. The expenses imposed upon the Government had been so much swollen, the contracts previously authorized were so numerous, as to render the legislation of the Fifty-second Congress exceedingly unsatisfactory to the country so far as public expenditures were concerned. Nobody has ever denied that.

Mr. DOCKERY. More than $150,000,000 of appropriations by the last Congress were made necessary by the legislation of the Fifty-first Congress.

Mr. REED. Oh, yes; it is always somebody else farther up the stream that has caused the trouble. [Laughter.]

Mr. DOCKERY. In this case there is no difficulty in fixing the responsibility.

Mr. HOLMAN. The action of the Fifty-first Congress made it impossible to reduce the expenses of our Government to the extent which was desired. But, I repeat, a large number of salaries were reduced by the action of the Forty-fourth Congress, and they have remained at the reduced amount ever since; the appropriations have been continued for those salaries upon the basis of the appropriations in the first session of that Congress. And nobody on this floor has ever seriously contended that those reductions were not proper.

Experience has demonstrated beyond all question that if you intend to retrench the expenditures of this Government you must have such a rule as this. The gentleman from Illinois [Mr. CANNON], who I see is now about to seek the floor, can not but confirm my statement that the only retrenchment we have ever been able to accomplish has been under the operation of a rule of this kind; that by direct legislation independent of appropriation bills there has never been any reduction of the expenditures of the Government.

[Here the hammer fell.]

Mr. CANNON of Illinois. Mr. Speaker, I am a little surprised that my practical friend from New York [Mr. TRACEY] should offer this amendment, because he is one of the practical legislators on this floor. I beg to call his attention to the fact that it does not make any difference whether the words included in this amendment are stricken out or not. I will say now to my friends on the other side that from the Democratic standpoint you had better retain the language to fool somebody with; because if you retain it you are not going to reduce any salaries—not one. I am not a prophet, but that will be the result. Why, sir, you did not reduce any salary while Mr. Cleveland was President before. The Senate did not stand in your way; and you had the control of the House. Now you have the whole shooting match [laughter] and the moment you undertake to reduce anybody's salary during this Administration you will find that the Democrats saying "no" to such a proposition will be as thick as robins about ripe cherry trees.

So, upon the whole, Mr. Speaker, I think you are getting right now, I will say to the gentleman from New York, all the advantage you will ever get from this clause in the rule. You had better keep it, therefore, for it may enable you to "thunder in the index" on the stump.

Mr. OUTHWAITE. I hope, Mr. Speaker, that we will have a vote on the proposition.

Mr. CRAWFORD. Let the amendment be again read.

The amendment was again reported.

Mr. HOOKER of Mississippi. Mr. Speaker, I desire to occupy the attention of the House for a few moments on this amendment.

The amendment proposed by the gentleman from New York [Mr. TRACEY], if adopted, would strike down one of the most important rules that was adopted in the Fourty-fourth Congress. The gentleman from Indiana [Mr. HOLMAN], desiring to meet what had become a very bad practice on the part of the House, by the amendments to the appropriation bills increasing the amounts of the appropriations, presented this rule, which was then adopted. It was designed and intended to limit such amendments as might be offered to appropriation bills which looked to the expenditures of the Government, and in retaining the right to offer amendments it was stipulated that the amendment should be subjected to the provisions of this rule; that is to say, that in the first place they must be germane to the subject-matter of the bill, and, second, must retrench expenditures.

The object of the adoption of the amendment offered by the gentleman from Indiana, and known generally as the Holman amendment, was to prevent appropriations on such bills which did not refer to the subject-matter of the bill, nor should such amendment be in order unless it reduced expenditures. Therefore it closed the avenue of extravagance which oftentimes crept into the appropriation bills by amendments, which amendments were designed to increase the salaries of officials or the appropriations for particular public works.

I think the rule as it now stands, guarded as it is by the Holman amendment, is a salutary rule and ought to remain the rule of the House, because it protects the Government against expenditures, allows amendments to appropriation bills only when they shall be germane to the subject-matter of the bill, and, second, only when they shall reduce expenditures.

I hope the amendment of my friend from New York will not be pressed, or that it will be voted down by the House.

Mr. TRACEY. Inasmuch as my friend from Mississippi so earnestly urges me I shall withdraw the amendment. [Laughter.]

Mr. HOOKER of Mississippi. I am very glad that my speech has had that effect on my friend from New York, and hope it will also reach the Committee on Rules, because I have never been able to reach them heretofore in any other way.

Mr. CATCHINGS. I offer the amendment I send to the desk.

The Clerk read as follows:

Amend clause 2 of Rule XXI by inserting after the word "committe," in the proviso, the words "or any joint commission authorized by law, or the House members of any such commission."

The amendment was adopted.

The Clerk read as follows:

RULE XXIII.

* * * * * * *

2. Whenever a Committee of the Whole House finds itself without a quorum, which shall consist of 100 members, the chairman shall cause the roll to be called, and thereupon the committee shall rise, and the chairman shall report the names of the absentees to the House, which shall be entered on the Journal; but if on such call a quorum shall appear, the committee shall thereupon resume its sitting without further order of the House.

Mr. KYLE. Mr. Speaker, I offer the amendment I send to the desk.

The Clerk read as follows:

Amend Rule XXIII by striking out the following words, to wit: "Which shall consist of 100 members," in lines 2 and 3 of clause 2, page 24.

Mr. KYLE. Mr. Speaker, this amendment which I offer is to prevent an innovation on the rules as they have heretofore existed in the government of the House from time immemorial except during the Fifty-first Congress. I do not think the proposition to constitute 100 members a quorum for the Committee of the Whole ought to be sanctioned by the House.

I would like to call the attention of the House to the importance of this proposed change, and to the fact that the principal business in this branch of Congress is transacted in Committee of the Whole.

When we go into Committee of the Whole the certain restrictions that are thrown around our actions in the House do not exist; for instance, you can not call the yeas and nays in Committee of the Whole. That is an important matter in the consideration of subjects that come before Congress. The Committee of the Whole is virtually the House itself. I wish to call attention, in the first place, to the fact that the framers of the Federal Constitution, when they were naming what number should constitute a quorum for the transaction of business, declared that a majority of all the members-elect to the House of Representatives should constitute a quorum. Now, what is the Committee of the Whole? It is simply the House of Representatives transformed into a committee and governed by the forms of the rule which prevail in committee.

The proposition presented is an evasion of that provision of the Constitution which requires a majority of the members of the House to be present for the transaction of business. If it is not that, what is it? A Committee of the Whole House is the House itself; simply the form is changed and that is all.

I refer to Article I, section 5, of the Constitution, which is as follows:

Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, etc.

But let me call your attention to the business that comes before the Committee of the Whole. The principal business that is transacted by the House of Representatives is there considered. And I respectfully submit to the House that, to the matters that go through the Committee of the Whole, the House proper does not give much attention. That is to say, they receive but little attention in the House after the Committee of the Whole has acted on them. We all know that to be true from experience here. Why, we come here sometimes at night with but few members, and pass bills through the Committee of the Whole, and then the next day, with possibly only a third of the

members of the House present, that action of the Committee of the Whole is taken up and ratified. When it is stated on the floor of the House that a bill, no matter what it is, has been considered in a Committee of the Whole House, members take it for granted as a rule that it is all right, and let it go without question.

But here is the business to be considered in a Committee of the Whole House:

3. All motions or propositions involving a tax or charge upon the people; all proceedings touching appropriations of money, or bills making appropriations of money or property or requiring such appropriations to be made, or authorizing payments out of appropriations already made, or releasing any liability to the United States for money or property, shall be first considered in a Committee of the Whole.

Listen to the importance of it. It is also provided that amendments from the Senate to House bills must be considered in Committee of the Whole, if having originated in the House they would be subject under the rule to that consideration. And so without taking the time of the House to name all of these things, it is only necessary to state that nearly every proposition of importance that affects the revenue of the country is required to be considered in Committee of the Whole. And yet it is proposed to constitute 100 members a quorum, 51 of whom would be a majority to do this business, and this would afford an excuse for the other 256 members of the House to be absent.

Mr. Speaker, if there is even a doubt about the constitutionality of this proposition we ought not to adopt it. We have done well with the rules as they were without it in the past, and there can be no possible good in it unless the idea prevails that a few men will look after the interest of the country better than a larger number.

It may be a convenience, Mr. Speaker, but convenience is not always safety. If this is the idea 256 of these gentlemen might remain at home and permit the 100 to do the business of the House as well as of the Committee of the Whole. The proposition is to change a rule that has been in existence upon this subject from the early days of the Republic and to transfer this important business from a committee where a majority of the members of the House have been required to constitute a quorum to a committee in which 100 shall be a quorum. I submit that this is not the time nor the occasion for such a change.

The SPEAKER *pro tempore*. The time of the gentleman has expired.

Mr. LOUD rose.

Mr. KYLE. I would like five minutes more.

Mr. DE ARMOND. I move that the gentleman's time be extended five minutes.

Mr. BELTZHOOVER. If I may be recognized, I will yield my time to the gentleman from Mississippi [Mr. KYLE].

The SPEAKER *pro tempore*. The gentleman from Mississippi [Mr. KYLE] asks five minutes more. Is there objection?

There was no objection.

Mr. KYLE. Now, Mr. Speaker, I want to call attention to the fact that the people throughout the country, where they have had opportunities to speak upon this subject, had shown themselves to be careful of their lawmakers; to provide against their escape from responsibility when dealing with the revenues and other important subjects. Nearly every State in the Union today requires its Legislature, when voting upon the subject of levying taxes upon the people or of appropriating money out of their treasuries, to have a majority of the members constituting the Legislature present and voting in the affirmative on a yea-and-nay vote.

The constitution of the State which I in part represent upon this floor, and in Ohio, the State of the gentleman [Mr. OUTHWAITE] who now advocates that 100 members shall make a quorum, as stated, provides, "That on the passage of every bill in either house the vote shall be taken by yeas and nays and entered upon the journal, and no law shall be passed in either house without the concurrence of a majority of all the members elected thereto." And the constitutions of all the States which have been adopted in the last few years contain similar provisions. I know the argument is that these matters are to be reviewed by the House after being acted upon in the Committee of the Whole; but in reply to that I will say, without any fear of contradiction, that the House usually accepts what is done in the Committee of the Whole for the action of the House. I submit that if the expressions of the people, as voiced in their constitutions of recent date, are taken as worth anything they mean that those who are charged with the duty of making laws and appropriating money out of the public Treasury and levying taxes shall show what they are doing.

It can not be denied that they have spoken against any opportunity of evading responsibility; and I say this innovation is wrong and improper, and my humble opinion is that it is fraught with danger to the revenues of this country, because measures will not receive that careful, calm, and considerate deliberation which they would receive if we were required to have a majority of the members to constitute a quorum of that committee.

I want to call your attention to this further fact, Mr. Speaker, that among the very first rules submitted by the Committee on Rules is one which requires members of this House to be present during the sittings of the House. This proposition here is not in harmony with that. When the important business of the House, affecting the revenues of the country, is under consideration, we at least give an excuse for 256 of these gentlemen to be away from here. They will say, "It is not incumbent upon me to be there. My presence is not required there, because 100 constitute a quorum, and that number is sufficient for the transaction of business." That is all I care to say now.

Mr. LOUD rose during the delivery of the foregoing remarks.

The SPEAKER *pro tempore*. The Chair will recognize the gentleman from California [Mr. LOUD].

Mr. LOUD. I do not wish to make a speech. I rose simply for the purpose of getting the gentleman's time extended, so that he might have further opportunity to call the faithful back into the fold. [Laughter.]

Mr. OUTHWAITE. Mr. Speaker, the gentleman from Mississippi [Mr. KYLE] has stated very strongly and fully the objections that may be urged to this amendment. I propose to state the reasons that moved the committee to submit this amendment, and also to consider the objections urged.

The first objection he urges is that members may think their presence is not necessary here when bills are under consideration in the Committee of the Whole. Theoretically that is less likely to occur if the number is larger, of course. There may be less danger of absenteeism when the quorum of the committee is larger. I am willing to admit that may be so; but in practical operation I never have observed any such result. Members do not feel, because they may be away, that they ought to be away. Members will come here, if they have the proper interest in the business before the House, whether the quorum of the committee is 100 or 200. The proposition is submitted for a reason which was manifest more than once on yesterday.

When there are present within the Hall here perhaps 200 members an amendment will be offered which is of no importance to the bill, or to any one except the gentleman offering it. Half a dozen members will vote one way and one or two the other. The vote does not satisfy some one member, and he immediately makes the point of no quorum.

Mr. REED. Then this is a substitute the purpose of which is to relieve the chairman of the Committee of the Whole from the necessity of counting a quorum.

Mr. OUTHWAITE. The gentleman may consider it that way if he pleases.

Mr. REED. No, I am submittting it to the House that that is the construction you rely on.

Mr. OUTHWAITE. There would not be an opportunity of counting a quorum in Committee of the Whole under the gentleman's rule.

Mr. REED. Oh, yes.

Mr. OUTHWAITE. There is no necessity for counting a quorum under the gentleman's rule. The fact is that we would be called upon perhaps to have a call of the House, and 200 members would respond to that call. Yet when we would again undertake to vote upon the amendment, the same indifference would be manifested, and members might not vote to the extent of a full quorum of a majority of the House. Yet as many men as generally participate in legislation would vote, and perhaps over 100 would vote, and so the business would go on until another such an incident would occur, and more time thus be wasted.

Another reason for the rule is this, that in the consideration of revenue bills, in which there are a multitude of items, or in the consideration of appropriation bills in which there are a multitude of items, members will look over the bill and see that it is such a measure as they would support or sustain, or that the part likely to come up is such as they find no objection to it, and withdraw from the hall of the House either to the committee rooms, to attend to some business which they think of more importance, or perhaps to go to the Departments and attend to business there. This is simply consenting to legislation, seeing beforehand that the report of the committee presenting the bill is one in which they would concur, and therefore they may absent themselves for a brief time without detriment to the good of the country. Thus, sometimes we are put to the necessity of moving along very slowly, being obstructed for hours or for days over matters of little or no importance whatever to the country generally, while we are simply preparing legislation to submit to the House.

Now, when it comes to the final vote, the vote that is of the greatest importance, the vote in the House, the yeas and nays may be demanded. It is true that the yeas and nays can not be demanded upon the several items in the bill; but it is equally true that it is the duty of every member who has any objection to any items in the bill to be present here in the Committee of the Whole. I do not see that reducing the number comprising the Committee of the Whole to 100 in anywise excuses the members from the performance of that duty, or in anywise justifies their absence or that they are likely to take advantage of it to any injurious extent.

Mr. REED. It simply excuses the chairman from the duty of counting.

Mr. OUTHWAITE. That duty is a question on which the gentleman from Maine and I differ, and the gentleman has emphasized his proposition very frequently.

Mr. DE ARMOND. Mr. Speaker, I feel that the amendment offered by the gentleman from Mississippi [Mr. KYLE] ought to be adopted. I find some strong reasons given against the course advocated by the gentleman from Ohio [Mr. OUTHWAITE] in a speech made by that gentleman when a similar rule and a similar amendment were under consideration in this House in the Fifty-first Congress, and I presume that the view taken then by the gentleman from Maine is now satisfactory to the gentleman from Ohio.

Mr. OUTHWAITE. I said that the other day; and I am four years older than I was then, and have had four more years of experience since then.

Mr. DE ARMOND. That is very true, Mr. Speaker; and that simply illustrates that a man may have increase of years and added experience without having a proper measure of gathered wisdom. [Laughter.]

Mr. Speaker, the reasons that had the support of the Democratic members of the Fifty-first Congress were no more cogent then than to-day. I am not saying that a man who voted in a certain way four years ago is bound by constituency or duty to vote the same way now; but I say that reasons which were good four years ago ought to be equally good now.

What is the Committee of the Whole, Mr. Speaker? It is the House in undress uniform; the House with its coat off; the House handling in somewhat informal way the same sort of business which the House otherwise would have to handle in a more formal way. A trivial amendment is offered, as the gentleman from Ohio said, and a lot of people drop out of the room because they do not care about it. They are not concerned about it, and nobody is bu tthe man who offers it, says he, and therefore a hundred men are enough to defeat it. As to that amendment, that particular amendment, it need not take a hundred. Fifty men are enough, two men are enough, one man is enough; but that is not the proposition.

The question is whether the House—when it is constituted in a less formal way than here to-day when it must have present, in order to do business, a majority of its members—whether the House, sitting in that informal way, shall be constituted to do business with a lesser number than one-half of its members. An amendment of great importance may be offered to a bill and the amendment rejected in Committee of the Whole without any roll call, without any man putting himself upon record whether he voted for or against it, and when you come back into the House the House is powerless, if a single man objects, to consider the amendment.

It has been throttled and strangled and killed in the Committee of the Whole by a majority in a hundred votes, if you make that number the quorum of the Committee of the Whole by the adoption of this clause. The Committee of the Whole is unlike all other committees of the House. Like the House itself, it sits in judgment upon the work of all other committees, and what is done in Committee of the Whole House is what otherwise would be done in the House itself, in formal organization. Then you have a committee of 100 in the event that this rule be adopted, doing what the House itself can not do without one-half of its members. You have 100 members just as powerful in Committee of the Whole as a quorum of 179 in the House. A little further along in this same rule there is a provision which would enable the Committee of the Whole to dispense with debate, throttle debate, shut off debate, take the House virtually by the throat, when the House is not in formal organization to discuss a measure of vital importance and dispose of it.

Mr. Speaker, to show how some men stood in the Fifty-first Congress, and by way of illustration to show what progress we have made since, as the gentleman from Maine [Mr. REED] might say, I desire to note the names of those who voted for an amendment just like the one submitted by the gentleman from Mississippi—precisely the same amendment. These gentlemen voted to strike out of the Reed rules the words which the amendment before us would eliminate, namely, "which shall consist of 100 members:"

During the reading of the names the time of Mr. DE ARMOND expired.

Mr. COX. How much time do you desire?

Mr. DE ARMOND. About five minutes more.

Mr. COX. I ask unanimous consent that the time of the gentleman be extended five minutes.

There was no objection.

The reading of the names was resumed and concluded.

Mr. CATCHINGS. Will the gentleman yield for a question?

Mr. DE ARMOND. Certainly.

Mr. CATCHINGS. Is that the vote which was had pending the discussion on the rules by the Republicans in that Congress?

Mr. DE ARMOND. Yes, sir.

Mr. CATCHINGS. Therefore it was a party vote.

Mr. DE ARMOND. Yes; the Republicans reported a rule such as has now been reported by this committee. A motion to strike out was made similar to that which the gentleman from Mississippi [Mr. KYLE] makes now in relation to this rule, and the gentlemen whose names I have recapitulated voted to support the motion to strike out; but, there being a majority of Republicans in that House, the motion was lost.

A MEMBER. Who made the motion to strike out?

Mr. DE ARMOND. It was made by the gentleman from Ohio [Mr. OUTHWAITE], if I am correct about it. At all events, he made a speech on the subject, which will be found on page 1337 of the RECORD, under date of February 14, 1890, and any gentleman who desires to know whether in four years of experience and of growing age the gentleman from Ohio has really advanced in wisdom has only to compare the speech which he made upon that occasion with the speech which he made here a few moments ago. [Laughter.]

Mr. REED. Could not the gentleman from Missouri give us some of the more salient points of the speeches that were made at that time—some of the choicer extracts? [Laughter.]

Mr. DE ARMOND. If I had the time I would be glad to do so, because some of the speeches made in support of this motion to strike out would, I think, be very good reading now; and the gentlemen who are making speeches to-day against the motion to strike out are but repeating, and feebly repeating, the arguments made by the Republicans in the House over which the gentleman from Maine presided.

Mr. REED. "Feebly" is good.

Mr. DE ARMOND. Mr. Speaker, if I have time I will have an extract read from the speech of the gentleman from Ohio.

The SPEAKER *pro tempore*. The time of the gentleman has expired.

Mr. DE ARMOND. Very well.

Mr. BRECKINRIDGE of Kentucky. Mr. Speaker, I do not desire to detain the House, but having examined this question four years ago and having now reëxamined it, my conclusion is precisely the same as it was then. That conclusion is that this provision is inexpedient, unwise, and of doubtful constitutionality; and with the consent of the House I will incorporate in my remarks what I said four years ago upon this subject, and will not occupy time in discussing that branch of the question.

Mr. TURNER. Mr. Speaker, I would be glad if the gentle-

man from Kentucky would have read at the desk the remarks he made four years ago on this subject.

Mr. BRECKINRIDGE of Kentucky. If the House will grant me the time I will do so. But I want to ask attention now to a point presented with very great ability by the gentleman from Georgia [Mr. Blount], in a speech which he made against the proposition four years ago. It tends to encourage negligence on the part of Representatives in the discharge of their duties, and that, too, in the only portion of our proceedings of which no record is made. There are usually but two subjects before a Committee of the Whole House—the consideration of bills raising revenue by the imposition of taxation, and of bills appropriating money; that is, spending the revenues which have been raised by taxation.

All other legislation, as a rule, is done in the House sitting as House. There can be no exercise of sovereign power greater than that of the Government putting its hand in the pockets of the taxpayer and taking an aliquot part of his earnings, under any form of taxation, for the purpose of carrying on the Government, and the correlative duty of expending that money within the limitations of the deed of trust under which we act, and which is called the Constitution of the United States, is equally important. Those duties are practically performed by this House while sitting as a Committee of the Whole House. Every rule, therefore, which we can adopt to require of the Representatives of the people their personal presence at the transaction of this business; every temptation that we can give to those Representatives not only to be present, but to personally understand that legislation and its details, and to act upon it with their best judgment, is a rule in the interest of economy and of the proper discharge of our highest duties.

Now, this proposed rule is a virtual announcement to Representatives that less than one-third is all that may be required in shaping that legislation, for, while the final and efficient act which gives it the force of law must be done in the House, the shaping of that legislation is done in the Committee of the Whole House. The action of that committee in rejecting amendments is practically final, for votes can not be obtained in the House on the negative action of the Committee of the Whole. What that committee does, if not conclusive in the nominal and technical sense, is conclusive in the real sense that legislation is shaped there. It seems to me, therefore, that the duty of the House is to require, as far as it can do, the presence of all its members in the transaction of that particular business. Not only is it that we give to the members a sort of official leave of absence by this rule, but we do it in the only portion of our business of which no record is made.

No record of a member's absence from the Committee of the Whole is taken, no record of his vote there is made; so that practically there is no mode by which it can be ascertained whether he was present and participating or not. I desired to say this much, Mr. Speaker, so that I might not afterwards hear it said that when this proposition passed I had changed the view I formerly held; and now, with the permission of the House, I will have read by the Clerk what I said upon this subject four years ago.

The SPEAKER *pro tempore*. The time of the gentleman has expired.

Mr. MCMILLIN. I ask unanimous consent that the time of the gentleman from Kentucky [Mr. BRECKINRIDGE] be extended so that he may have his former speech read.

There was no objection, and it was so ordered.

The Clerk read as follows:

COMMITTEE OF THE WHOLE HOUSE.

Mr. BRECKINRIDGE of Kentucky. The proposed rule which makes a quorum of the Committee of the Whole House consist of 100 members is, if possible, even more dangerous, and is equally unconstitutional. This view has been so well presented by the gentleman from Georgia [Mr. Blount] that it is unnecessary to make a further argument upon it, but it will not be improper to say that the contention that the whole House, which by the Constitution can not "do business" unless a majority of its members participate therein, can by a simple rule adopted by itself change itself from the House to a committee, and by that mere change of name and some change in the mere rules of procedure become enabled to transact business with a hundred members.

It is mere splitting at straws and haggling over words to say that what is done in the Committee of the Whole is not "to do business," in the constitutional sense of those words. The business done is of the very highest importance. The amendments passed upon, accepted, or rejected, practically commit the House to the gravest and most important legislation. Vast sums of money are taken from the public Treasury by the action of that committee. The rights of the citizen, the duties of public officers, the course of public business are settled in that committee. That committee is the House; the House is that committee. When the House is in session that committee can not sit; the House may give permission to all other committees to sit during its sittings, but in the very nature of the case it is impossible for the House to give to the Committee of the Whole House permission to sit while it is in session. If the House adjourns the committee can not sit. If the House is in recess the committee can not sit.

By the action of a quorum of the House, that House then present resolves itself into the Committee of the Whole. It does not cease to be the House; it does not adjourn; it does not take recess; it does not dissolve. It simply, for parliamentary purposes, under parliamentary rules which by the Constitution the House has the power to adopt—it passes from the forms of procedure adopted for the government of the House, sitting as the House, to those adopted for the House sitting as a Committee of the Whole. This committee when it rises necessarily resolves itself into the House without any other action; without any action of any sort, *eo instanti*, by the very act of the committee rising, the House as a House is in session.

Now, it does seem to a plain man that it is absurd to say that it is mandatory upon the House to have 166 Representatives to resolve itself into the Committee of the Whole, that it takes 166 Representatives to constitute the House into which the Committee of the Whole resolves itself by virtue of its rising, but that in the interim the same House by merely calling itself the "Committee of the Whole" can "do business" with less than one-third of the elected Representatives of the people. This Committee of the Whole House, in the English House of Commons and in our country, has been the great protection of the tax-payers of the country.

In these committees, constituted of the members elected to the different bodies, have been discussed and settled what shall be the revenues which the Empire of Great Britain and the imperial Republic of the United States may have, what taxes shall be levied upon the labor of the respective countries, and what functions shall be granted to those to whom these revenues are given. Here the representatives of the people were given the very widest latitude of debate and the wider latitude of amendment. The forms of procedure by which this latitude was guaranteed did not make this committee a different body from the House whose members composed it, but simply took from them some of those trammels of parliamentary law which it has been supposed were necessary for the transaction of the more formal and agreed-upon motions passed upon by the House.

In this committee are perfected the bills; here the real work of economy, of frugality, of impartial distribution of burdens, is done; here jobs are throttled or exposed; schemes skilifully concealed in the midst of sections are brought to light, and in that light die. All this is changed by this rule, and changed not toward greater caution, more careful deliberation, wider debate, more anxious scrutiny, but to ill-considered haste, to the easy accomplishment of precedent arrangements, to the more pliant adoption of doubtful measures, to the curtailment of troublesome debate and annoying interrogatory by which well-devised schemes might be defeated.

With the power to substantially stifle debate, to render possible logrolling by combination between various schemes, the ease of preserving so small a quorum under such a combination, this new creature misnamed the Committee of the Whole House will become the most potent and, I respectfully predict, the most dangerous factor in legislation. With such a Committee of the Whole and the power to count a quorum, this House enters upon a new era of legislation. The experiment begins with the new century of Congressional government. The practice of a hundred years, adhered to by fifty Congresses, gives place to these two new rules; and I content myself with leaving to the future to write the history of the experiment upon which we are entering.

Mr. CATCHINGS. This is a very important amendment, which I think ought to be disposed of, if possible, by a full House. I therefore ask unanimous consent that we pass over this special amendment and proceed to the consideration of the residue of these rules with the understanding that this amendment shall lie over until some day next week when there will be a full attendance.

Mr. MCMILLIN. Is it the purpose of the gentleman to have the House dispose of the rules to-day?

Mr. CATCHINGS. I desire that the residue of these rules, so far as possible, be acted on to-day.

Mr. MCMILLIN. I mean, does the gentleman expect to get a vote on the body of the rules?

Mr. CATCHINGS. I propose that this matter be laid over and that we proceed to dispose of such other amendments as may be offered.

The SPEAKER *pro tempore*. The gentleman from Mississippi [Mr. CATCHINGS] asks unanimous consent that the section of the proposed rules now under consideration be passed over to be returned to after concluding the consideration of the remainder of the rules. Is there objection?

Mr. HOOKER of Mississippi. I object.

Mr. CATCHINGS. I move, then, that the House pass over the consideration of this amendment and proceed to the consideration of the residue of the rules.

The SPEAKER. The gentleman from Mississippi moves that the House pass over clause 2 of Rule XXIII until the consideration of the remainder of the rules is finished.

Mr. HOOKER of Mississippi. I hope that proposition will be voted down. Let us dispose of this question now.

The question being taken on the motion of Mr. CATCHINGS to pass over the consideration of the amendment, it was rejected; there being—ayes 39, noes 41.

Mr. CATCHINGS. Then I ask to be recognized for some remarks on this question. I do not see why there should be objection to allowing this question to go over. I will state that I made this suggestion at the request of my friend from Indiana [Mr. HOLMAN]——

Mr. HOLMAN. I think it important that there should be a full House when we take the vote on this question.

Mr. CATCHINGS. I had no desire to avoid a vote; but this is an important amendment, and I did think the suggestion of the gentleman from Indiana a good one. I thought this amendment could be better disposed of by a full House than by a slim one.

Mr. DOCKERY. I suggest that the gentleman from Mississippi again submit the request for unanimous consent.

Mr. CATCHINGS. I do not wish to do that after the request already made has been received in the manner it has been.

Mr. HOOKER of Mississippi. I rise to a question of order. I understand that the House has already voted upon the proposition of the gentleman from Mississippi to postpone the consideration of this matter; and the question can not be again considered in this informal way. Or, is a new motion made? I did not hear any motion made by the gentleman from Mississippi. I therefore call for the regular order.

The SPEAKER. The gentleman from Mississippi [Mr. CATCHINGS] has the floor.

Mr. CATCHINGS. I did not understand what my friend from Mississippi said. I have made no motion except the one which was voted down.

The SPEAKER. The gentleman from Mississippi [Mr. CATCHINGS] is in order.

Mr. CATCHINGS. I will again state that I made my motion upon the suggestion of my friend from Indiana, who is opposed to the proposition reported by the Committee on Rules and favors the amendment offered by the gentleman from Mississippi [Mr. KYLE]. I thought it wise, inasmuch as this proposition seems to be regarded as a matter of importance, that it should be voted upon by a full House. But if gentlemen here differ from that view we can, of course, go on and dispose of the question now.

Mr. Speaker, I wish to express my surprise that so able and eminent a lawyer as my friend from Kentucky [Mr. BRECKINRIDGE] undoubtedly is, should in this presence deliberately have read an opinion expressed by him four years ago, to the effect that the proposition of the Committee on Rules is in violation of the Constitution. I have heard that suggestion made, but I never before heard it come from an eminent and distinguished lawyer.

Why, sir, there is nothing in the Constitution about a Committee of the Whole. We could dispense with a Committee of the Whole entirely if we chose to do so. That committee is a mere creation of the House, designed entirely for the purpose of aiding this House in the transaction of its business. It has no place in the Constitution. Nor, Mr. Speaker, is anything coming from the Committee of the Whole legislation. Of course, as we all understand, a majority of the membership of this House is, under the Constitution, required in order to legislate.

But, I repeat, nothing which may be done by the Committee of the Whole is in the remotest degree legislation. The action of the Committee of the Whole is a mere recommendation to the House. It has no more binding effect than the recommendations of any of the committees in this House, even the smallest. It is for the House, when such a recommendation comes before it, to reject it or approve it as may be deemed wise.

Mr. DE ARMOND. Will the gentleman allow me a question?

Mr. CATCHINGS. I will.

Mr. DE ARMOND. When the Committee of the Whole declines to recommend a particular amendment, can that amendment be considered in the House except by unanimous consent?

Mr. CATCHINGS. Of course it can not, because we have so provided in our rules.

Mr. DE ARMOND. Then, does not the Committee of the Whole practically dispose of that proposition and prevent its consideration in the House?

Mr. CATCHINGS. It does not, because it is entirely within the power of the House, if it chooses, to recommit the report to the Committee of the Whole with any instruction it may choose to give. The matter does not pass beyond the power of the House.

Mr. BYNUM. The gentleman from Mississipi will permit me to suggest that even in the House, unless the previous question is ordered, amendments are in order. So that the proceedings in the Committee of the Whole do not cut off the power of amendment in the House.

Mr. CATCHINGS. Of course that is true; but I am discussing now the question whether anything done by the Committee of the Whole can be conclusive in its character. Such conclusiveness as may be attached to any action of the Committee of the Whole does not come from the Constitution, but from our own rules. We have provided, for instance, that the yeas and nays shall not be had in the Committee of the Whole, and unless there should be some agreement to that effect they can not be taken. It is a matter for the House to determine. It is not a constitutional provision in the committee.

Mr. BRECKINRIDGE of Kentucky. Will the gentleman allow me to make this suggestion, which I think covers the whole gist of the question? The words of the Constitution are that it shall be a majority of each House to constitute a quorum to do business. Does the gentleman contend that what is done in Committee of the Whole is not business? Does it come within the prescription of the Constitution to do business?

Mr. CATCHINGS. Mr. Speaker, what I contend is this—and that, it seems to me, must be manifest to every man who considers the matter—that when the House has resolved itself into Committee of the Whole House the House is not in session at all. It is the exact equivalent of the rising of the House or a recess and a subsequent organization of the Committee of the Whole; and we might, if we chose, provide in terms that when the body desired to resolve into a Committee of the Whole House, the House should first adjourn, and then it would be in order for a member to move to proceed as a Committee of the Whole House to discuss matters bearing upon legislation. So the House is not in session at all in any shape, manner, or form.

The Committee of the Whole is entirely distinct and separate from any action on the part of the House. But, as a matter of convenience, and as a matter of practice, the motion is made in the House that the House resolve itself into Committee of the Whole. But the equivalent is that the House do now adjourn, or that the House cease its sitting, and that the Committee of the Whole shall be organized.

Mr. REED. And let me suggest to the gentleman that there is no mention made of the action of the Committee of the Whole on the Journal except where the result is reported to the House.

Mr. CATCHINGS. As a matter of course. I was coming to that in the course of my remarks. I have been trying ever since I have had any connection with the Committee on Rules to have a rule made by the House whereby the Journal Clerk should make a record of the rulings made by the chairman of the Committee of the Whole. As a matter of fact no record is made of them; and if you want to find out what a chairman of the committee has ruled upon any question you have got to search through the record of the debates. It is not journalized as a part of the proceedings of the House. The proceedings in the Committee of the Whole form no part whatever of the Journal; and I repeat I have been trying for years to get these rulings of the chairmen of committees made by the Journal Clerk, just as the rulings of the Speaker are made in the House, for the convenience and instruction of the House on these subjects when they arise.

All that the Committee of the Whole does is to consider propositions and to advise the House of its judgment upon them, and that advice can be accepted or rejected by the House. It is not binding upon anybody. It is not, in any sense, the action of the House. It binds nobody; it binds nothing; and I think my distinguished friend from Kentucky would hardly venture his opinion if he were called in his professional capacity to give it, to the effect that the work done by the Committee of the Whole, with less than a majority of the House, is no work at all, because in that event whatever is done by the Committee of the Whole under such circumstances would be null and void.

So much for the constitutional question involved.

[Here the hammer fell.]

Mr. BAILEY. Mr. Speaker, I ask unanimous consent that the time of the gentleman be extended until he can conclude his remarks.

The SPEAKER *pro tempore*. In the absence of objection the gentleman will be recognized for five minutes.

There was no objection.

Mr. CATCHINGS. Mr. Speaker, the gentleman from Missouri [Mr. DE ARMOND]—though what bearing it had on the question now before us I can not understand—gave the vote in the Fifty-first Congress, when a similar proposition was pending. Why certainly I voted against it at that time. I do not remember now whether I listened to the discussion or not. It is quite likely I did. But all the country knows that in the struggle then going on, party lines were strictly and closely drawn, and the vote on the rules on both sides of the House was on party lines, as well as on every motion presented bearing upon that question. It was not confined to the rules at all, but on every motion presented.

Mr. SIMPSON. If the gentleman from Mississippi would allow me, I am very much interested in the discussion of this question, and particularly in that part of it which relates to the organization of the Committee of the Whole providing that 100 members shall constitute a quorum. Yet, in the experience of the people of this country, as well as of other countries, because the Constitution demands that there shall be a quorum in the House when it is in session, is it not unwise, in his judgment, to depart from that principle and adopt a different plan in the Committee of the Whole? I ask the gentleman if we are justified in doing away with the principle which is embraced in the Constitution and which has met the sanction of the people of this country for so many years?

Mr. CATCHINGS. The Constitution does not fix the membership of the Committee of the Whole.

Mr. SIMPSON. But I say the experience of human beings has demonstrated that the requirements of the Constitution as to a majority of the House is a wise one. Now, I ask if it is wise to depart from that principle in organizing the Committee of the Whole?

Mr. CATCHINGS. Mr. Speaker, I must be excused from replying to the gentleman from Kansas. While I have very great respect for the gentleman, yet his inquiry has no pertinency to the point I am discussing.

But, as I was saying, the fact that we voted against this provision in the Fifty-first Congress is offered now as an argument why we should vote this recommendation down. But I presume there is no man here who has so little respect for himself and his own opinions that he would be influenced by any such suggestion. There is but one question before us and that is the question, is it right or expedient to adopt this change in the rules. It matters not how we voted in the past. The question has nothing to do with what is before us. The question is, is it wise to accept the modification? If it is not, vote it down; if it is, let us adopt it.

We have had a practical test, Mr. Speaker, of the operation of this rule making 100 a quorum in the Committee of the Whole, and I challenge any man on either side of this House—even my friend, the gentleman from Indiana [Mr. HOLMAN], who is bitterly opposed to it—to rise in his place and name one single, solitary instance in which the least harm, even indirectly or inferentially, ever resulted from the quorum of 100 in Committee of the Whole.

I pause, Mr. Speaker, to allow some gentleman to rise in his place and indicate some single instance in which the least harm, even in the operation of the most vivid imagination, ever resulted to the public business by reason of 100 being made a quorum in Committee of the Whole.

Nobody answers, Mr. Speaker, because nobody can.

Mr. MCMILLIN. Will the gentleman permit me to interrupt him?

Mr. CATCHINGS. I will.

Mr. MCMILLIN. If it is so expedient now, and if the experience of the Fifty-first Congress proved that it was expedient, why was it not adopted in the last Congress, and what injury came from the want of it in the last Congress?

Mr. CATCHINGS. The gentleman from Tennessee [Mr. MCMILLIN] is the last person who should ask that question, because he knows that there were a great many amendments which, if we could have had his coöperation, would have been put into these rules, which were not put in because he was so opposed to any amendments.

Mr. MCMILLIN. This is not one of them, and the gentleman will not intimate that it is.

Mr. CATCHINGS. I do say that the Speaker of the House and myself, before we had ever conferred with the gentleman from Tennessee [Mr. MCMILLIN] at all, had agreed that this was advisable; but the gentleman from Tennessee [Mr. MCMILLIN] was so indisposed to make any amendments at all that we never pressed them.

Mr. MCMILLIN. I am not responsible for what you and the Speaker did privately, but nothing of the kind was ever intimated to me, and you will not state that it was.

Mr. CATCHINGS. I never said it was. The gentleman was asking why this amendment was not suggested, and I am giving the reason, which is, that the gentleman was so opposed to any sort of amendment to the rules that we did not present amendments which we otherwise would have presented.

Mr. MCMILLIN. Then you hold me responsible for the failure to adopt a clause which was never proposed to me, do you?

Mr. CATCHINGS. I do not hold you responsible for anything. You were asking why it was not done.

Mr. MCMILLIN. I do not understand the gentleman's reasoning, then.

Mr. CATCHINGS. You asked me a question, and I am endeavoring to answer it. There is no question of responsibility about it.

Now, Mr. Speaker—I repeat it again—I want some gentleman to get up here and point to some single instance in which the fact that 100 was made a quorum in the Committee of the Whole in the Fifty-first Congress ever operated harmfully. I say it resulted in great expedition of the transaction of the public business, and I say to gentlemen present now, that if this amendment shall be voted down they will regret it before this Congress is over; because, whether it is right or wrong, the fact is that gentlemen will not attend sessions regularly and constantly when we are at work on appropriation bills in Committee of the Whole.

Mr. MCMILLIN. Is this change suggested in order to get rid rid of the attendance of members in the House?

Mr. CATCHINGS. No, sir; it is not, because members can come if they choose. It is to provide for the expedition of business. It is not binding or conclusive upon anybody in case members do not choose to absent themselves. It is not designed at all as a bid for absenteeism. The object of it was simply that the House, while it was acting merely in this advisory capacity, which binds and concludes nobody, should be allowed to go on with its business whether members choose to attend or not, provided 100 members were present.

Now, Mr. Speaker, many times since I have been a member of the House I have seen the public business obstructed for hours at a time because there was not a quorum present in Committee of the Whole. Some gentleman present would offer some amendment, important to him but trifling to the balance of us, and it would be voted down; and in the anger of the moment I have seen gentlemen make the point that no quorum was present. Then we have had the Sergeant-at-Arms with his deputies scurrying all over this town drumming up members so that we could get a majority of the whole membership here; and after several hours had been consumed in that way, and a quorum was brought here at last, we have seen the action of those present confirmed by the amendment still being rejected.

Mr. BAILEY. Will the gentleman from Mississippi allow me to ask him a question?

Mr. CATCHINGS. Certainly.

Mr. BAILEY. I desire to ask the gentleman if the fact that the members now have clerks to attend to their correspondence and their Department work will not insure a larger attendance? If it does not, we made a mistake to give them clerks.

Mr. CATCHINGS. Mr. Speaker, that is a question which I can not answer.

Mr. HENDERSON of Iowa. That is in the field of speculation yet.

The SPEAKER *pro tempore*. The time of the gentleman from Mississippi [Mr. CATCHINGS] has expired.

Mr. BRECKINRIDGE of Kentucky. I ask that the gentleman's time be extended five minutes.

There was no objection.

Mr. CATCHINGS. As I was observing when my friend from Texas [Mr. BAILEY] interrupted me, I have seen the business of the House obstructed for several hours at a time in the way that I have stated; and after the attendance of a quorum had finally been secured, through the efforts of the Sergeant-at-Arms and his assistants, and we had proceeded again with the consideration of a further paragraph of the same appropriation bill, I have seen the same snag struck again, and the consideration of the bill obstructed because gentlemen had again dispersed to their committee rooms or to the Departments, or at all events because gentlemen had absented themselves from this Hall. Then we have had the same process repeated, and I have seen it take two or three weeks to pass a bill here which could have been passed, and would easily have been passed, in one week, if the provision now suggested had been a part of the rules. This proposition is in the interest of economy of the public time, and it is economy in every sense of the word.

Mr. MALLORY. I would inquire of the gentleman from Mississippi if it is not a fact that the basis of argument in favor of this quorum of a hundred in Committee of the Whole is that it will facilitate business?

Mr. CATCHINGS. Yes, sir.

Mr. MALLORY. The gentlemen who are opposing the amendment of the gentleman's colleague [Mr. KYLE] base their opposition on the ground that if we are to have what would be a House quorum that will necessitate a delay of business. I can not understand how it is that gentlemen who are occupying that side can make such an argument when only on yesterday and the day before they opposed the proposition of the gentlemen from Louisiana [Mr. BOATNER] on the ground that it would facilitate the passage of measures before the House, by enabling a committee or a member of a committee, after two hours of debate, to close debate. It seems to me there is a little inconsistency in the gentlemen who are advocating this measure.

Mr. CATCHINGS. I am very sorry that the gentleman from Florida did not listen to what I said when I opposed the amendment of the gentleman from Louisiana [Mr. BOATNER], for if he had his imagination could not have drawn any parallel between that case and this. There is no parallel between them.

Now, Mr. Speaker, I want to say, in conclusion, that this amendment was offered in good faith by the Committee on Rules, believing that it would tend to expedite the consideration of public business, and the members of the Committee on Rules have no greater or less interest in this matter than other members on this floor; and if it is the wish of members here that it shall go out, they have it in their power to vote it out, and it will be all right, so far as the Committee on Rules are concerned.

We have discharged our duty and have reported such rules as we thought were best. We have no pride of opinion in the matter, but we thought that this amendment would have commended itself to the judgment of every member, and I am surprised that such opposition should be manifested to it, because it seemed to us so just and so proper that we had supposed it would be accepted without question.

Mr. COX. Will the gentleman allow me to ask him a question about just one matter?

Mr. CATCHINGS. Certainly.

Mr. COX. Now, is there any necessity for a rule that the

Committee of the Whole shall consist of 100 members only if every member attends in the Committee of the Whole to transact public business?

Mr. CATCHINGS. Of course not.

Mr. SNODGRASS. If you make the Committee of the Whole only 100 members the New York members and others will be enabled to be out all of the time and leave us to furnish the quorum. [Laughter.]

Mr. CATCHINGS. Of course there would be no necessity for the rule if every member attended in Committee of the Whole.

Mr. COX. Then there can be no necessity for reducing the number to 100, except to excuse the nonattendance of members here in the discharge of their duties.

Mr. CATCHINGS. I have stated that oftentimes. I have stated that the object of the committee is to enable us to proceed with our business, and enable as many as 100 members here to do the business work of the House. But the action of the Committee of the Whole is not final. It is simply a recommendation to the House, and the House can accept its recommendation or reject it. If it wants to add other amendments, it can recommit the work to the Committee of the Whole or to any other committee.

Mr. BRECKINRIDGE of Kentucky. I desire only to take up a moment or two of the time of the House upon the single proposition which my friend has criticised. The words in the Constitution are that a majority of each House shall constitute a quorum to do business. The two propositions involved in the controversy between the gentleman from Mississippi [Mr. CATCHINGS] and myself are, first, that the Committee of the Whole House, under the rule as reported, is practically and substantially the House, and that the Committee of the Whole House does "do business," in the meaning of the language of the Constitution. I affirm both propositions: That this House in the Committee of the Whole House is the House, and what is done in and by the Committee of the Whole House is doing "business."

The House does not adjourn. A member moves to go into Committee of the Whole; it is carried; the Speaker vacates the chair; the Chairman called by the Speaker assumes the chair, and the "business" goes on; and it is doing "business." It is not final, no more than even the business of the House is final, until the last vote upon a bill when the motion to reconsider is laid upon the table finally. But it is doing business beyond all question. Appropriations are put upon a bill; appropriations are stricken out of a bill. If it be a bill raising revenue, taxation is imposed; taxation is reduced; the objects of taxation are diminished; the subjects of taxation are increased. It is, therefore, "doing business."

Now, these are simple propositions. Whatever the power of the House may be, to adopt other rules or create another committee and call it the Committee of the House, is not involved; and therefore the illustration of the gentleman does not strike me as pertinent in the controversy between us. The simple question is: Does the Committee of the Whole House under these rules in the true sense of the words constitute the House? Secondly: Does what that committee does fairly come within the words of the Constitution "doing business?" If so, the proposition I have submitted seems to be persuasive, if not conclusive.

As to what has fallen from the gentleman as to the practical results of this rule in the Fifty-first Congress, I have to say that whatever may have been the part I bore, or whatever my views might have been in the discussion of the rules of the Fifty-first Congress, or whatever criticism upon the action of the Fifty-first Congress I may have heretofore made, is not relevant to this discussion, have passed into history, and I have no partisan comment to make on its action. I am considering these rules in a nonpartisan spirit. Whether the appropriations of that Congress in that Committee of the Whole meet the approval of the gentleman from Mississippi or not does not matter. It is not the question in dispute to-day. That the business ought to be facilitated I agree with him, with the single observation, however, that facilitating business is not by any means so important as doing well the business that is done. And there can be nothing that will give us more hope of having business well done than to have as full an attendance of the Representatives of the people as can be obtained in the transaction of whatever business we undertake.

Now, so far as I am concerned, I beg the gentleman from Mississippi to understand that I make these criticisms in no spirit of antagonism to the Committee on Rules. If nobody else had offered the amendment I would not have offered it, because my judgment was that in a House with so large a Democratic majority as we have here the party would be responsible for that which was done; that no rules would relieve it of that responsibility, and that, having both branches of Congress and the President, the responsibility to which we would be held at the bar of public opinion would give us the best inducement to legislate well without much regard to the rules under which we might legislate.

But as this question has been called up, and as some gentlemen have changed their opinion about it within the last four years, as my own judgment was that it was not wise, as my own remembrance of what was done under it in a former Congress led me to think that it was not expedient, it seemed to me to be not improper that I should make these few observations at this time. [Applause.]

Mr. OUTHWAITE. Mr. Speaker, in commenting upon this proposition in the rules a day or two ago, I called attention to the fact that I had made some remarks against a similar proposition in the Fifty-first Congress, so that the gentleman from Missouri [Mr. DE ARMOND], in directing attention to my speech made at that time, has not unearthed anything. I also stated that I thought I had good reason for changing the views which I had expressed on this subject at the beginning of the Fifty-first Congress. One of the views which I entertained and expressed four years ago was that the proposition was of doubtful constitutionality.

Since that time I have very carefully examined the question, and I have concluded that I was mistaken. Other gentlemen still entertain the opinion that there is doubt about its constitutionality, but there is no occasion for any great contention upon that point. There is no mention of the Committee of the Whole anywhere in the Constitution. That committee is a device for preparing business for the House, not a method of doing the business of the House. In that respect it is like the Committee on Appropriations or the Committee on Ways and Means.

The business reported from those great committees is now referred to the Committee of the Whole and there considered, for convenience, to give an opportunity for amendments and for extended discussion, but if this House chose to proceed to consider the measures reported from those committees directly in the House there would be nothing unconstitutional about that.

Mr. MCMILLIN. If the Committee of the Whole is the same as the Committee on Appropriations or the Committee on Rivers and Harbors or any of the other great committees of the House, why do you propose to increase the membership of those committees and at the same time to diminish the membership of the Committee of the Whole?

Mr. OUTHWAITE. Because of the increase in the membership of the House, and the desire of members to be upon those several committees. Besides, the membership of those committees is restricted; nobody can participate in their proceedings unless by appointment upon the several committees, whereas the Committee of the Whole is open to every member of the House and all can participate.

Mr. Speaker, as I have said, there is nothing in the Constitution that would prevent us from abolishing the Committee of the Whole. It is a mere matter of convenience.

Its duties are not to do business, but to consider or prepare business for the House. When that business is reported to the House, the House votes upon it, either accepting or rejecting it, and it is then the business is done.

Mr. DINGLEY. I call my friend's attention to the fact that the form of the report of the Committee on the Whole is always that of a simple recommendation.

Mr. OUTHWAITE. I thank the gentleman from Maine for reminding me of that, because members who are new to the business of the House might suppose from some of the statements made here that the report of the Committee of the Whole was a finality. It is nothing of the kind. It is nothing but a recommendation.

Mr. SNODGRASS. It is very persuasive, though. [Laughter.]

Mr. OUTHWAITE. Well, persuasiveness does not make constitutionality.

Mr. OATES. Mr. Speaker, I quite agree with my friend from Ohio that there is no constitutional question here, but I will ask him whether the practice of considering business in Committee of the Whole House is not derived from the immemorial practice of the British Parliament?

Mr. OUTHWAITE. That is true; but I am now answering a speech which I made four years ago. [Laughter.]

Another proposition which I made at that time, in my ignorance, was that the Committee of the Whole in the English House of Commons required a majority. Very soon afterwards I learned that it required only 40 members, with a membership of nearly 700.

Another proposition I laid down on that occasion, as I recall it, was that the reduction of the number of the Committee of the Whole to 100 would induce absenteeism, or might do so. I stated here the other day that my observation was that it had not had

that effect in any degree. I will go further to-day, and say that the attendance in the Committee of the Whole, during the Fifty-first Congress, when we had this provision in our rules, was quite as good as it was during the Fifty-second Congress when there was no such provision; that there was no more absenteeism resulting from the existence of this rule during the Fifty-first Congress than was induced by the absence of this rule during the Fifty-second Congress; and to sustain that proposition I simply appeal to the record.

Now, having observed those things and having observed furthermore that there was no perceptible falling off in the amount of the appropriations in the Fifty-second Congress as the result of the change in this respect——

Mr. McMILLIN. Does not the gentleman know, however, that many of the appropriations which swelled the aggregate of expenditures during the Fifty-second Congress were made necessary because the Fifty-first Congress had passed continuing appropriations which we could not reach but by a change in the law.

Mr. OUTHWAITE. I know that; but I know also that when any bill was passed making those continuing appropriations there was about as large a vote in this House as there ever is, for those matters were made questions of party politics, and the two sides of the House were arrayed against each other in as full force as could be commanded.

Mr. KILGORE. Will the gentleman from Ohio allow me a moment?

Mr. OUTHWAITE. Yes, certainly.

Mr. KILGORE. The gentleman has said that the Committee of the Whole simply prepares legislation. Now, after the Committee of the Whole has reported an appropriation bill to the House is it competent or in order to offer an amendment in the House enlarging or diminishing the appropriations as agreed to in Committee of the Whole?

Mr. OUTHWAITE. If upon a motion for the previous question to promote the passage of the bill in the House a majority of members are ready to vote down the previous question, they may take possession of the bill and amend it as they may desire.

Mr. KILGORE. One further question. Suppose in the House, the previous question not having been ordered, an amendment is offered to enlarge some appropriation. How under the rules can that amendment be considered in the House if a point of order is raised against it that it must first be considered in Committee of the Whole?

Mr. OUTHWAITE. As to the rules of order, they are the same in the House as in Committee of the Whole; and the same point would lie against an amendment in the House as in Committee of the Whole, or vice versa.

Mr. KILGORE. Would not that sort of an amendment compel the sending of the bill back to the Committee of the Whole?

Mr. HOLMAN. Certainly.

Mr. REED. Certainly not.

Mr. OUTHWAITE. Is it contended that an amendment proposing to increase in the House an appropriation in a bill reported from the Committee of the Whole would be subject to the point of order that it must receive its first consideration in Committee of the Whole?

Mr. HOLMAN. Yes, sir; it would have to be first considered, under the rules, in Committee of the Whole.

Mr. DINGLEY. Oh, no.

Mr. HOLMAN. Undoubtedly it would; because under the rules any proposition increasing the amount of appropriation must receive its first consideration in Committee of the Whole.

Mr. OUTHWAITE. Not necessarily.

Mr. HOLMAN. That has been the ruling repeatedly.

[Here the hammer fell.]

Mr. OUTHWAITE. I ask that my time be extended.

The SPEAKER *pro tempore*. If there be no objection, the gentleman from Ohio will proceed.

There was no objection.

Mr. SNODGRASS. I would like to ask the gentleman from Ohio a question. He has said that in the Fifty-first Congress the attendance was ordinarily as large as in the Fifty-second——

Mr. OUTHWAITE. In proportion to the number of members.

Mr. SNODGRASS. And that this attendance was on account of the partisan feeling——

Mr. OUTHWAITE. No, sir; I said that on certain legislation—the legislation which the gentleman from Tennessee [Mr. McMILLIN] had in his mind, which made it necessary to increase appropriations—both sides were here.

Mr. SNODGRASS. Now I wish to ask the gentleman whether it has not been the object and purpose of a great portion of the Democratic members in this House to have no partisan legislation, to bring all parties into harmony with each other? [Laughter.]

Mr. OUTHWAITE. I have no doubt such a purpose may have been in the heart of the gentleman from Tennessee [Mr. SNODGRASS].

Mr. SNODGRASS. On a partisan quesion I am accustomed to act as a partisan.

Mr. OUTHWAITE. I have had no partisan feelings in any legislation we have had up to this time.

Now, Mr. Speaker, I have spoken with some earnestness in favor of this report, and also in defense of my change of views on this question. The gentleman from Missouri [Mr. DE ARMOND] questions my right to change my views, or holds that if I did so it should be made a matter of criticism. For that reason I have submitted these remarks. As a legislator, I believe the proposition of the Committee on Rules now under discussion would promote the transaction of business as against unnecessary and factious delay.

Mr. HOLMAN. It would make legislation easy.

Mr. OUTHWAITE. Well, I do not know that there is any objection to "making legislation easy," if the minds of the legislators approve the proposed legislation.

Mr. LOUD. The gentleman concedes that four years ago he was expressing his political views?

Mr. OUTHWAITE. I admit that my views at that time may have been slightly tinged with partisanship. [Laughter.]

Mr. LOUD. Did not the gentleman believe himself right four years ago?

Mr. OUTHWAITE. My convictions then were as honest and sincere as they are now.

Mr. Speaker, when the gentleman from Indiana [Mr. HOLMAN], a few moments ago, suggested to the Committee on Rules that so important a matter as this had better go over to be voted on in a full House, when there would be no danger that the vote would disclose the want of a quorum, I was a little surprised to find gentlemen who now oppose the reduction of a quorum in Committee of the Whole to 100, insisting that this House, with barely a quorum, should go on and consider this important rule which is to govern the transactions of this House for the rest of the Congress.

Sir, it matters nothing to me personally what disposition may be made of this question when the House shall vote upon it. Though I am chairman of the Committee on Military Affairs, which is charged with the preparation of one of the appropriation bills, that bill is usually so nearly in conformity to the estimates that there is little contention about it; so that I have not the least personal interest in the question how this rule may affect legislation coming from either of these great committees.

I simply wanted to give the Committee of the Whole an opportunity to go on under the five-minute rule and consider a revenue bill or an appropriation bill without a chance for the exercise on the part of a few members of petty and factious opposition. I do not like to see a disappointed member keep 150 men here doing nothing, as has often been the case. The men who are willing to stay here and do their duty, the men who are here every day to respond to their names or to vote on all questions in Committee of the Whole, are to be kept here doing nothing unless the full number of a quorum of the House is present in that committee, if this amendment of the gentleman from Mississippi [Mr. KYLE] prevails. When those who constantly attend and are desirous of promoting the preparation of business for the House, I say they ought not to be kept here by factious opposition until gentlemen who seem to think that their duties of another character require their presence elsewhere are brought back again into the House.

Mr. COX. Can you give now a solid reason for reducing the quorum of the Committee of the Whole to 100 when it is assumed that every member of Congress will be here and attending to his duty?

Mr. OUTHWAITE. Well, I do not know who assumes that. I do not, certainly. I take the experience of the past as my guide, and to assume such a thing as that is too violent for my wildest imagination. Therefore, I can not answer the question.

Mr. COX. Then your argument is that you are proposing a rule to relieve men from the duty of being here.

Mr. OUTHWAITE. It will not drive them away——

Mr. COX. Hold on; I have not finished—and legalize the absence of members of the House whose duty it is to be here.

Mr. OUTHWAITE. The members of the House understand their duty. This does not legalize their absence. It makes it convenient for the transaction of business. It does not matter what the number of the committee may be, the members will be here or elsewhere, according to their own judgment.

Mr. COX. Would it not be better, if it be a mere matter of the convenience of members, to put the number down to 50?

Mr. OUTHWAITE. If the gentleman assumes that to be the object he can adopt that view. But the object of the committee is to facilitate the transaction of business for submission to the House and not force men who are in their seats day after day to sit here idly waiting for a quorum. Reducing the number which may constitute a quorum in the Committee of the Whole to 100 does not invite or excuse the absence of members, unless

the constitutional provision that a majority of the House shall constitute a quorum to do business invites the absence of all the members above a quorum. I challenge members who oppose the proposition submitted by the Committee on Rules to point to a single instance where the rule was the instrument through which harm came to the country, and sustain his claim by a showing from the record.

[Here the hammer fell.]

Mr. TURNER. Mr. Speaker, I usually accept without question the rules of procedure proposed by my party associates on the proper committees, but I deprecate so profoundly the proposition to reduce the quorum of the Committee of the Whole to 100, that I beg to say a word on this fundamental departure from the practice of the fathers.

The Committee of the Whole House was a device intended to delay legislation. It was an invention intended to secure deliberate action by a deliberate body. It was a scheme designed to afford to all the members a wider opportunity to confer with each other, and to express their opinion upon matters under consideration. If the purpose of the Committee on Rules is carried out by the adoption of the change here recommended, instead of its original purpose and design being preserved, the Committee of the Whole will become a machine by which to expedite and facilitate the business of the House.

Mr. CATCHINGS. That is on the assumption that members do not come here.

Mr. TURNER. In other words, it will be easier to get propositions through the Committee of the Whole than through the House itself.

Mr. HOLMAN. That is the point.

Mr. TURNER. It is therefore a complete reversal of the purpose of the fathers who invented and followed it.

It may, Mr. Speaker, look like an idle ceremonial to take down the mace, and that the Speaker shall descend from his chair and a private member take it as Chairman of the Committee of the Whole; it may be a mere formality, as the gentleman from Missouri [Mr. DE ARMOND] has well stated; but it is the means by which fuller and better opportunities are afforded to the Representatives of the people for the discussion and molding of public measures. There is not in the committee, as in the House, any previous question to cut off debate and amendments.

I belong to that class of men which inclines to the belief that the practice of our fathers in this respect was the wisest, and I believe the opinions expressed by my friend from Ohio [Mr. OUTHWAITE] four years ago, with all due deference to him now, were better founded than those he has uttered here to-day.

Now, Mr. Speaker, I want to recall to members the principles on which the argument of those who agree with me in opinion are founded. In the first place the Committee of the Whole House, in my opinion, is the House of Representatives itself. Every member of the House of Representatives is a member of that committee. Where is the House when this grand committee is sitting? Is it dispersed, is it dissolved, has it adjourned or taken a recess?

On the contrary, sir, the Committee of the Whole itself can not adjourn; and in order to reach that end and terminate its session, it is necessary to recall the Speaker to the chair. It is the House itself. The Constitution provides that a majority of the members of the House shall constitute a quorum to do business. Can the House resolve itself into a quorum in which less than a majority can do business?

But suppose there is doubt on this subject. What is there in our present Constitution that takes us out of that great rule of liberty, the rule of that general parliamentary law of which we have heard so much in recent years that requires a majority of a deliberate body to constitute a quorum?

That is fundamental law. It is part of the unwritten constitution of parliaments that a majority of any body is necessary to do business and to constitute a quorum. If that were not the case this proposed change in the rules would have been unnecessary.

If that change proposed here is stricken out of these rules, then by the operation of the general law of parliaments, to say nothing of the Constitution, a majority of the members of this House will be necessary to constitute a quorum in this great committee.

Why should we depart from this institution of the majority? I beg to cite here the tendency of the better opinion now prevailing in this country, to require a larger number of the members elected to do business, rather than a smaller number. In many of the States this new tendency is to require even a majority of all the members elected to affirmatively agree to any legislative proposition, instead of a mere majority of a quorum. Such is the case in Georgia.

The SPEAKER *pro tempore*. The time of the gentleman has expired.

Mr. McMILLIN. I ask unanimous consent that the gentleman from Georgia be allowed to proceed.

There was no objection.

Mr. TURNER. I may be pardoned if I make allusion to a matter which has some weight with me. I belong to a school of opinion that insists upon a rigid construction of the Constitution. I also believe in that school of opinion which interprets the Constitution in such a way as to confer upon every member of the House the largest liberty. I believe in no stretching of the Constitution.

I believe it is of the utmost significance that this fundamental departure was first made on that side of the House which has never entertained these scruples concerning constitutional construction. I remember that it was first engrafted into our proceedings at the instance of those gentlemen who now constitute the minority of the House, those gentlemen who were then led with so much ability and with so much intrepidity by the gentleman from Maine [Mr. REED].

I would like to know if our opinions change with our accession to power? How have our circumstances been altered that we, who denounced him and his methods in the Fifty-first Congress, should be so ready to unite with him in the adoption of rules of practice which we then inveighed against with all our might?

I have noticed that gentlemen on that side are piling over one another in order to induce us to fetter them, and they are like the gentleman from Maine himself, holding up hands and feet, begging to be bound and manacled and gagged by the rules of the House of Representatives. [Laughter and applause on the Democratic side.]

Mr. CATCHINGS. Will my friend allow me to ask him a question? Did he notice that gentlemen on the other side were very earnestly supporting the amendment offered by the gentleman from Louisiana [Mr. BOATNER] which was intended to take all fetters off entirely?

Mr. TURNER. I did not observe the incident which the gentleman from Mississippi has mentioned. We will see about that later.

Now, Mr. Speaker, I am endeavoring to discuss this matter with entire kindness and deference to gentlemen who differ with me—gentlemen who differed with me then as well as gentlemen who differ with me now. It is a fundamental difference of opinion.

I can understand why gentlemen who concurred then with the gentleman from Maine [Mr. REED] should desire now to perpetuate in our rules the practice which he established. Consistency requires it; and then no one who has been an observant listener to these debates has failed to notice with what keen relish the gentleman from Maine [Mr. REED] has watched every tendency or disposition on our part to vindicate the propriety of the rules which he then put upon us, and which we then so fiercely denounced.

Mr. Speaker, there is not only this matter of consistency involved in the policy of the opposition to-day; but if I could get down to the bottom, and interrogate these gentlemen as to their anticipations for the future, I could find the key to their present conduct in the hope that at some time—I trust in the far-distant future—they may have the gentleman from Maine [Mr. REED] in the stirrups and holding the reins.

With the highest respect to my honorable colleagues on this side, and in a spirit of entire deference to the fairness of the gentlemen who have supported it, I think this proposition is bad in theory, and will be of dangerous tendency. If we adopt this view in the matter of constituting the quorum the next step may come in the form of a proposition to adopt the method of the gentleman from Maine in counting the quorum itself. [Applause on the Democratic side.]

Mr. Speaker, repeating the assurances of my entire confidence in the gentlemen who constitute this important Committee on Rules, and my entire respect for their sincerity and honesty, I should deplore this departure from the practice of our fathers; and instead of rushing legislation, as is proposed here, by making it easier to get a measure through the Committee of the Whole, rather than reduce the number of the Committee of the Whole I would abolish that grand committee altogether, and rely upon the larger body, to wit, the House of Representatives itself. [Loud applause on the Democratic side.]

Mr. CURTIS of New York. Mr. Speaker, like my friend from Georgia [Mr. TURNER], I have been educated in a school that believes in a strict construction of the Constitution. But I do not believe in extending, or attempting to extend, the provisions of the Constitution to other subjects than those to which they necessarily apply. There have been many crimes perpetrated in the name of liberty, and many mistakes committed in the business management of this House in the name of the Constitution. On assembling, we organize with a Speaker, who appoints a number of committees under order of the House. These several

committees have charge of bills relating to specific objects, and before these committees persons interested in the legislation contemplated by them may appear to present their views.

The Committee of the Whole is provided for by the rules of the House, to which reports upon bills from these general committees are sent for consideration before they are ordered to a third reading. Every member of the House is a member of the Committee of the Whole, and in the consideration of the bills before it he has an opportunity of expressing his views; but what is done in the Committee of the Whole is only advisory. As clearly stated by my friend from Georgia [Mr. TURNER], it has no power to legislate. He states it has not the power to adjourn the House, and admits its absolute inability to perform the essential powers pertaining to legislation. Its whole power consists in recommending to the House favorable or unfavorable action when it rises from the consideration of the bill or reports having come to no resolution thereon.

My friend from Indiana [Mr. HOLMAN], who insists upon the Committee of the Whole having a quorum of the House to consider appropriation bills, will admit, I believe, that should a bill be reported from the Committee on Appropriations to the House and sent to the Committee of the Whole so as to comply with the rules of the House and not the provisions of the Constitution, that immediately after going into Committee of the Whole, the title of the bill having been reported by the Clerk, without reading a single line of the bill, my honorable friend could move that the committee rise and report progress; and this procedure would meet the rule of the House requiring a bill to be considered in Committee of the Whole. The moment the Speaker announces to the House that the chairman of the Committee of the Whole has reported, it matters not which of the three reports he [the Chairman] is authorized to make to the House, the bill may be ordered to engrossment and third reading, notwithstanding objections thereto.

Mr. HOLMAN. Has it ever been done?

Mr. CURTIS of New York. I am speaking of what might be done, and not speaking of the custom. We are seeking to correct a custom which has been shown to impede the progress of business. In the ordinary course of business in the Committee of the Whole every member has an opportunity to speak, as there is no previous question by which he may be cut off from debate in the House. It is a matter of convenience to provide that 100 shall constitute a quorum of the Committee of the Whole. It will facilitate the business of the House. If members will not come here to make a quorum for the dispatch of business, it is useless to bring others here, because when they do come you have no power to retain them or to compel them to vote while here.

All the steps in the progress of legislation, from the introduction of a bill, its reference to a committee, its consideration by the committee, a subcommittee, or a single member of it, including the hearing of those interested in the measure sought to be enacted, to the reporting of the same to the House and its consideration in Committee of the Whole, are all to be provided for by the rules of the House. The provision of the Constitution that a bill, to be enacted into law, shall secure a majority of the House relates only and entirely to its third reading and passage. Whatever will facilitate the work of the House in reaching its final consideration is wise, and ought to be provided for by the rules.

Mr. HOOKER of Mississippi. Mr. Speaker, I had occasion in the general debate on these rules the other day to express my opinion upon the question involved in the motion of my colleague [Mr. KYLE] to strike out the provision of this rule that 100 members shall constitute a quorum in the Committee of the Whole. I will not, therefore, repeat what I then said, but will simply add that this proposition, if it goes into effect, relegates the whole power of the House into the hands of 51 members.

Our total membership here is 356; a quorum of the House is 179; but 51 is a majority of 100, and the proposition which comes to us from the Committee on Rules is to clothe 51 members of this House, a majority of this Committee of the Whole, with these extraordinary powers. I agree with my friend from Georgia [Mr. TURNER], who has just spoken on the other side of the Chamber, that when the House resolves itself, by motion and by vote, into a Committee of the Whole, it is still the House, governed by the rules of the House and by the methods of procedure of the House, as is indicated and enforced by the concluding paragraph of this rule, which provides that—

> The rules of proceeding in the House shall be observed in Committee of the Whole House so far as they may be applicable.

The vast importance of having a quorum of the House present in Committee of the Whole is shown by another paragraph of this same rule (paragraph 3), which provides that—

> 3. All motions or propositions involving a tax or charge upon the people; all proceedings touching appropriations of money, or bills making appropriations of money or property, or requiring such appropriation to be made, or authorizing payments out of appropriations already made, or releasing any liability to the United States for money or property, shall be first considered in a Committee of the Whole.

The singular importance of the Committee of the Whole and of the functions which it performs in our legislation is made manifest by the fact that none of the important classes of measures here enumerated can be considered by the House itself until they have been first referred to the Committee of the Whole. This paragraph of the rule, after providing, as I have read, that bills of this important character shall first be considered in a Committee of the Whole, goes on to say:

> and a point of order under this rule shall be good at any time before the consideration of a bill has commenced.

So that, in point of fact, until the Committee of the Whole has passed upon these measures, a point of order may be raised against their being considered by the House itself. Will any member say that when the House resolves itself into Committee of the Whole for the consideration of important measures of legislation which, under the rules of the House, can only be considered in that committee, that is a proceeding in which you ought not to have a full quorum of the House, or that the proceedings of that committee are not as important as those of the House, or ought not to be conducted as systematically, with as much circumspection, and with as many safeguards as the proceedings of the House? On the contrary, every rule of the House prevails in Committee of the Whole as far as it is applicable there, as is made manifest by the provisions contained in the several paragraphs of this very Rule XXIII. Paragraph 6 provides that:

> The committee may, by the vote of a majority of the members present, at any time after the five minutes' debate has begun upon proposed amendments to any section or paragraph to a bill, close all debate upon such section or paragraph, or, at its election, upon the pending amendments only (which motion shall be decided without debate); but this shall not preclude further amendment, to be decided without debate.

And paragraph 8, as I have already said, provides that:

> The rules of proceeding in the House shall be observed in Committee of the Whole House so far as they may be applicable.

Further, Mr. Speaker, it is well known to members who have had experience here that when the House resolves itself into Committee of the Whole to consider an appropriation bill, or any other bill, if that measure is voted down in the Committee of the Whole—and under this proposed rule it may be voted down by 51 members, less than one-sixth of your whole membership—if it is voted down in Committee of the Whole you can never get a hearing on that measure at all in the House itself. Therefore, I say, sir, that the Committee of the Whole House, clothed with the extraordinary powers conferred by these rules, as by the former rules of the House, is as important as the House itself, and I hold that it is fully as important to have a quorum there, and a full expression of opinion there as in the House itself. My honorable friend and colleague from Mississippi [Mr. CATCHINGS] and the gentleman from Ohio [Mr. OUTHWAITE] say that they have changed their opinions upon this question. Well, Mr. Speaker, it is said that "the greatest rival of a great man is himself," and these gentlemen are merely paying the penalty of rivaling what they have hitherto said and voted upon this question.

For my own part, I prefer to abide by the deliberate judgment expressed by those gentlemen by vote and speech three or four years ago, rather than to take their newly formed opinion resulting from this change of view. Mr. Speaker, there are a good many distinguished gentlemen now in the United States who are having to confront opinions which they had previously expressed, and who are realizing the truth of the declaration to which I have referred, that the greatest rival of a great man is himself. [Laughter and applause.]

[Here the hammer fell.]

ADJOURNMENT.

Mr. CATCHINGS. Mr. Speaker, I move that when the House adjourns to-day it be to meet on Wednesday next.

The motion was agreed to.

THE RULES.

Mr. CATCHINGS. Mr. Speaker, I desire to make a very few remarks in reply to those submitted by my distinguished friend from Georgia [Mr. TURNER]. The gentleman from Georgia is always strong, but I do not think he did himself quite justice in appealing to this House to sustain this amendment on the ground that if the rule as reported was agreed to, the House would be in the attitude of adopting one portion of the rules of the Fifty-first Congress. Now, Mr. Speaker, we live to learn, and if we are wise men we draw from the experience of the past, and, waiving the question of constitutionality, the only question to be considered is whether this is a safe and wise provision, which will

result in the expedition of public business. If it is, we should adopt it, whether it had its origin as suggested by the gentleman from Georgia or not.

I do not know any spirit of partisanship, Mr. Speaker, which should prevent us from availing ourselves of the benefit of anything that is good in parliamentary law, no matter where it may have had its origin. I am sure the distinguished gentleman from Georgia would not desire us to go back to the ancient method of introducing bills and resolutions in the House. Prior to the Fifty-first Congress the States were called on every Monday morning for the introduction of bills. It was a tedious and time-wasting operation. It did not conduce in the slightest degree to inform any member in regard to matters of legislation. Hence it was provided by a rule of the Fifty-first Congress that all bills, whether public or private, might be introduced by handing them to the Speaker in the one case or to the Clerk in the other.

Now, in the portion of these rules already passed upon we have assented to the readoption of that rule. There was no reason why we should not adopt it. Experience has shown us that it saves a great deal of trouble, that it is a great convenience to members to have the privilege of introducing their bills in this way. Hence we adopted that rule in the last Congress and have adopted it for the present Congress. Yet, if the argument of my distinguished friend is good at all, the fact that that rule was among those of the Fifty-first Congress was a sufficient reason why we should have refused to insert it in the present code.

Mr. Speaker, when the gentleman states that our friends on the other side of the Chamber have been inviting us to tie their hands and have shaped their methods with that object, I beg to differ with him. If he had been present during the discussion, or if being present he had listened to the discussion, on the amendment offered by my friend from Louisiana, which was supported by the Republicans *in solido* under the leadership of the distinguished gentleman from Maine, he would have seen that they were endeavoring not to get their hands tied, but to strike off absolutely all fetters; that they were attempting to have us adopt something which was more radical in the way of throwing aside the safeguards of our business than anything which was in their rules. Hence on that point I think my friend is mistaken. But all such argument is in my view not pertinent to the question. I think my distinguished friend from Georgia would have made his argument stronger if he had confined himself to the first part of his statement, which had reference to the constitutional view and to the practicability of the proposed rule.

Mr. Speaker, the gentleman said that the Committee of the Whole is the House, because it can not entertain a motion to adjourn. But, Mr. Speaker, that is so, not because the Constitution has so provided, but because this House in creating the Committee of the Whole has provided how it shall assemble, under what rules its proceedings shall be conducted, and how it shall cease to exist. We may alter those rules at any time if we choose to do so. There is nothing in the Constitution making it impossible for this House by its rules to provide that when it is desired that the Committee of the Whole shall assemble, the House shall first adjourn or take a recess; that then the Committee of the Whole as a separate and independent body shall convene; that it shall on finishing its business adjourn and make report to the House after the House has again assembled.

There is only one reason why the Committee of the Whole can not adjourn, and that is by reason of the very rules of its creation, prescribed by us, and not by the Constitution.

Why, sir, we all know that when a message comes here from the Senate or from the President, if the Committee of the Whole is sitting, such message can not be received; we, as a Committee of the Whole, can not perform a single function with reference to the matter; and hence when the message is announced the committee rises, the House resumes its session, the message is received, and when that legislative act has been performed the House again resolves itself into Committee of the Whole.

There is not a single act done by the Committee of the Whole which can be called a legislative act. It passes nothing. It has no legislative function. It is an advisory body created by the House, because experience has shown that the House can discharge its duty better when it is thus advised by the members sitting as a Committee of the Whole. We have freer debate in Committee of the Whole. Nobody is bound by anything the Committee of the Whole does. What it does has no significance, no validity, no capacity of enforcement in itself, but only becomes effective when it has been reported to, accepted, and confirmed by the House as a House.

Mr. BOATNER. Has not the gentleman known the House frequently to be detained for a half day or a day in the effort to obtain a quorum for the Committee of the Whole?

Mr. CATCHINGS. I have, many times.

Mr. BOATNER. Then, does not the gentleman think that he will be taking away one of the most valuable "rights of the minority" when he takes away from any obstructionist the right to make the point of no quorum in the Committee of the Whole, and to detain the House half a day or a day in the effort to get a quorum?

Mr. CATCHINGS. Very likely that would be the effect.

Now, Mr. Speaker, when I had the floor a few moments ago I asked some gentleman to stand here and show this House a solitary instance in which the rules which prevailed during the Fifty-first Congress had operated in the least degree to the detriment of the right of any member or of the public service. I have yet to hear some gentleman make response to that request.

[Here the hammer fell.]

Mr. McMILLIN. Mr. Speaker, there is no need of my assuring the gentlemen in charge of this report that my purpose in everything I do in connection with it is to try to secure the best rules possible for the government of the House in this Congress. Every amendment that has been offered that, in my judgment, ran counter to that purpose I have antagonized and have been with the committee in opposing. But when they come to propose a radical change such as this, which no Democratic House has had and no Republican but once for more than a hundred years, I am inclined to think that much better reasons will have to be given for its support than have been given on this floor during the discussion, before the House should adopt it.

Now, the gentleman from Mississippi asks some one to point out some instance of evil that came from the adoption of that rule in the Fifty-first Congress reducing the quorum to 100 members. The gentleman from Mississippi will not deny, the gentleman from Ohio will not deny—because they were both here at the time struggling against the adoption of that rule—that the object of the rule then was to facilitate the party then in power in this House in passing their appropriations and in getting through their revenue bill, and the divers obnoxious bills they passed. Will either of them deny that? Never.

The gentleman from Mississippi will not be rash enough to risk his reputation in the denial of that proposition. The sole object was not to insure deliberate action, but to railroad their measures through. Now, if it did assist, as all who were here know it did, in passing through the House these measures that were obnoxious to the people, and which have been condemned by the people since, against which we inveighed at the time and against which we inveigh now, that of itself, Mr. Speaker, is evidence—evidence against the gentleman. The object was to get through the revenue bill, which was wrong, and it did get it through; to get through their bounty bills and various other measures which were condemned by the people, and it aided in getting them through.

Mr. BYNUM. Let me interrupt the gentleman to ask if it would not be well to avail ourselves of the same rule to facilitate the repeal of the obnoxious measures to which he refers?

Mr. McMILLIN. No, sir; if the principle was wrong then it is wrong now. There are other ways of correcting the wrong. We can not advocate doing two wrongs to get one right result out of it. It was wrong then, and the gentleman from Indiana himself said it was wrong. It was wrong then, and the gentleman from Ohio [Mr. OUTHWAITE], with all due deference to his speech to-day, said it was wrong, and made a much stronger presentation of that side of the question four years ago in declaring the wrong that was sought to be perpetrated upon the House and country than he has done to-day in advocacy of it. If I remember correctly one of his arguments was, and a forcible one, that the Speaker then, the distinguished gentleman from Maine, had just appointed fifty-one committees, and that his fifty-one chairmen, if the rule was adopted as proposed, could get together and control legislation.

Now, sir, what is the object of this rule if it is not to enable less than a quorum to do the work? We all know what practical legislation is. We know that to all intents and purposes the bill is finished—that revenue bills are finished, that tariff bills are finished, all great measures that come before the Committee of the Whole are practically finished before they are reported to the House for action. Their consideration is completed in Committee of the Whole in every detail, and there is no one time when we can secure the change of any one line or letter after it gets back to the House. You can not add an amendment, you can not strike out a clause. True, you may reject amendments which have been offered and accepted by the Committee of the Whole, but in other respects the bill is sacred from the touch of the House. It is not even read.

The report must be taken as an entirety. You can not change it. You can offer no amendment. You can only proceed by committing the whole bill, and can then get but one instruction on it. Your proposition now is to adopt a means by which only

two-fifths of the membership of this House shall be the membership of the committee. What new argument has the gentleman from Ohio presented to-day? Four years ago he thought it would not be well to encourage absenteeism. Now he tells us that one of the beauties of this rule is that it will afford opportunity for gentlemen, after getting through with the particular parts of the bill they are interested in, to go out and to attend to other business! Is it laudable to try to induce a legislator to desert the House? Is that a reason why we ought to adopt this rule?

Mr. OUTHWAITE. Will the gentleman allow a suggestion?

Mr. McMILLIN. With pleasure.

Mr. OUTHWAITE. In that view of the case the Constitution itself encourages absenteeism because it only requires a majority.

Mr. McMILLIN. No, sir; not at all. The provision of the Constitution is that the House may force every member to be present. And further, that you can not move an inch in a single action without a majority.

Mr. OUTHWAITE. But you admit that the Constitution provides simply that a majority can do business?

Mr. McMILLIN. Yes; it provides that a quorum can do business, and that less than a quorum can enforce the attendance of every man who was elected a member of that body. But it also provides that less than half the members elected can not take a step in legislation.

Now, if the object is to encourage absenteeism, you have devised the right means. At the very time when Congress has voted clerks to members to enable them to sit here and do their work, and let the clerk go to the Departments and transact that part of the work heretofore done by members, it seems to me that no announcement ought to be made to the public that the Fifty-third Congress has been elected to do business and proposes not to do it. All the other important committees of the House have been increased by this Congress. I do not stop to argue that question, but simply to say that if it is necessary to increase the other committees, I do not see any reason for making a radical reduction in this one.

The SPEAKER *pro tempore*. The time of the gentleman is expired.

Mr. McMILLIN. I would like a few minutes more.

The SPEAKER *pro tempore*. In the absence of objection the time of the gentleman will be extended.

Mr. McMILLIN. Now, what is the effect of this rule? There are 356 members constituting this present House of Representatives. One hundred of them are enabled to do business. Therefore, your 100 can assemble and 256 can go fishing, and you can go on with the work of acting on bills to deplete the Treasury.

Mr. HOOKER of Mississippi. And 51 of these 100 can do the business.

Mr. McMILLIN. And 51 of these 100, acting as a majority, can determine important questions, can fix it so you can not vote on an amendment to a bill, can fix it so you can not offer an amendment to a bill, can fix it so you can not change the bill anywhere from beginning to end.

Therefore, you are enabled by one-seventh of the members elected, acting affirmatively, to transact the important business of this House. Five-sevenths of Congress away and two-sevenths only attending.

Now, our fathers never submitted to any such methods. Gentlemen have spoken of the British Parliament. I hope, Mr. Speaker, that the British Parliament is not to be a model for this body. We have a constitutional inhibition against less than a majority doing the business of this Congress; but the British Parliament, whose members are not paid a salary, having to look after their private business, and also to look after the means of support at the same time, have adopted a different rule.

Our fathers thought, when we were elected, that we were elected to stay and do the work. So thinking they provided in the Constitution that the British method of having members serve gratis should not become a part of our law, and provided a salary for the members. They are paid to come here and do the work, and, as far as the gentleman's argument goes to the encouragement of men to absent themselves from this House, his argument ought not to prevail.

Sir, I agree with my friend from Georgia [Mr. TURNER] that this rule with reference to going into Committee of the Whole was adopted for the purpose of giving calm and deliberate consideration to measures.

It was not supposed that the Committee of the Whole would accelerate the passage of a measure. It was intended to give that one more means of calmly considering the questions that involve the taxes of the people and the payment out of their taxes, that is, their expenditures. There has been, it seems to me, no sufficient reason shown why we should run counter to those who framed the Constitution, and by contemporaneous action construed it. The men who were contemporaneous with those who framed the Constitution certainly knew as much about what its purport was as we do. It was never even suggested then that it would be proper to make a quorum of the Committee of the Whole consist of less than the number that constitute a quorum in the House of Representatives.

Mr. HOLMAN. Will my friend yield to me for a question?

Mr. McMILLIN. With great pleasure.

Mr. HOLMAN. It is known to the gentleman from Tennessee [Mr. McMILLIN] that the Fifty-first Congress increased the expenditures of the Government, as against the Fiftieth Congress, to the extent of $217,733,061.40. Is not this rule a part of the system devised which rendered it possible with facility to impose that unexampled burden upon the people of this country?

Mr. McMILLIN. There is no question about the truth of Judge HOLMAN'S statement. You can not point to a single questionable measure that went through that Congress, which was not accelerated in its speed and facilitated in its passage by the adoption of that rule. It was intended to facilitate and put through. It did it, and I am surprised that any gentleman should question that fact. Not only were these excessive appropriations passed, but they were made continuing—placed beyond Congressional appropriation—and posterity is to be taxed because of the action of that Congress, which was facilitated in this way. And strange to say we are called upon to follow in the wake of those prodigies.

Mr. HOLMAN. Yes, and more than $50,000,000 were imposed in the way of additional appropriations in the Fifty-second Congress, which appropriations were made necessary by the action of the Fifty-first Congress.

Mr. KYLE. Will the gentleman from Tennessee yield to me for a question?

Mr. McMILLIN. With pleasure.

Mr. KYLE. I desire to put this question to my friend from Tennessee with a view to getting information upon it: Suppose the Committee of the Whole, sitting here, should find itself without a quorum of 100, and the committee then rose and went back into the House, and the Sergeant-at-Arms was directed to go and bring in enough members to constitute a quorum. How many should he bring in in order to make up a quorum? Should he bring in enough to make 100, or enough to make a quorum of the House?

Mr. McMILLIN. In order to get back into the Committee of the Whole, if the question were raised, he would have to bring in a majority of the House; because when the Committee resolved itself back into the House, it would take a quorum of the House to take any step except to bring in absent members; and hence when the absent members are brought in, and the proposition was made to go back into Committee of the Whole, the constitutional provision which we can not override, which provides in express terms that a majority of the members of the House shall be necessary to constitute a quorum, would make it necessary to have a majority of all the members in order to get back into Committee of the Whole. That would be the operation of it as I understand it, although I frankly say to my friend from Mississippi I do not remember a decision on the question.

Mr. KYLE. Then we could not proceed without having a majority of the House here—if the objection was made—in order to get into Committee of the Whole.

Mr. McMILLIN. That is true.

Mr. OUTHWAITE. You can not do any business in the House without the presence of a majority of the membership of the House, if the point of no quorum is made.

Mr. SNODGRASS. You can not get into the committee of 100, without having a majority of the House present, in order to take that action.

Mr. McMILLIN. That is true.

Now, Mr. Speaker, I hope I may be pardoned for stating that my sole purpose is to try to get the adoption of the best code of rules that we can adopt for the transaction of the public business. I am willing to be guided in a large measure is arriving at what is best by the experience of our fathers for a hundred years; and even if we did not have that experience shedding its light upon our pathway, with the experience of the Fifty-first Congress before me I would be slow to adopt a code of rules which I know full well was the means by which were adopted the very measures for the repealing of which we are called in in extra session.

Why, the silver bill was put through in that way.

Mr. OUTHWAITE. It was passed under a special order.

Mr. McMILLIN. I know it was passed under a special order.

Mr. BYNUM. And all those bills were passed by special orders.

Mr. McMILLIN. There was a special rule made for its passage, it is true; but it was considered first under this rule, if I

remember correctly. The McKinley bill was first considered under this rule.

Mr. BYNUM. It was passed under a special rule.

Mr. McMILLIN. I know it was finally passed under a special rule. I know how it was done, but it was considered here for days under the rule constituting a hundred a quorum.

Mr. BYNUM. And as there was no progress made by that committee, the special rule was brought in and adopted.

Mr. McMILLIN. I remember what was done. I was a little engaged in that matter at that time. Now, if you are going to argue that this would not assist you, that this will not facilitate you, then it is useless for your purpose.

Mr. BYNUM. The gentleman is necessarily aware that the McKinley bill was not considered in Committee of the Whole under the rule, but under special order.

Mr. McMILLIN. I say it was considered in the Committee of the Whole, but finally, not being able to get it out of the committee in the time they wanted to pass it, they adopted a special rule, and it was passed under a special rule. In that sense the gentleman is correct.

[Here the hammer fell.]

URGENT DEFICIENCY.

Mr. SAYERS. Mr. Speaker, I ask unanimous consent that the consideration of the report of the Committee on Rules be suspended for the purpose of enabling me to call up for consideration the Senate amendments to the urgent deficiency bill. There are but two amendments, and I think the House can dispose of them very easily.

The SPEAKER *pro tempore*. The Clerk will report the amendments, after which the Chair will ask if there be objection to their consideration.

The amendments of the Senate were read.

Mr. SAYERS. Mr. Speaker, the first amendment of the Senate provides for the expenditure of an appropriation already made to pay certain employés of the Senate from the 1st to the 15th of April last. The amendment contains no appropriation. The second amendment is to provide for the repair of the old Ford's Theater building; and I have the assurance of the chairman of the Committee on Appropriations of the Senate that the Architect of the Capitol [Mr. Clark] has investigated the condition of the building and gives it as his opinion that $6,000 will be sufficient to repair it and make it entirely safe.

The House will observe that after the $6,000 has been expended under the supervision of the Chief of Engineers a board of engineers is to be constituted by the Secretary of War to examine into its safety before it shall be used at all. The Government is now paying something over $12,000 a year for the rent of a building necessary for the accommodation of those who were employed in the old Ford Theater building. I believe that both of these amendments should be concurred in.

The SPEAKER *pro tempore*. Is there objection to the consideration of the Senate amendments? [After a pause.] The Chair hears none.

The question was taken, and the amendments were concurred in.

On motion of Mr. SAYERS, a motion to reconsider the vote by which the Senate amendments were concurred in was laid on the table.

HUNDREDTH ANNIVERSARY OF LAYING THE CORNER STONE OF THE CAPITOL.

Mr. BYNUM. Mr. Speaker, I ask unanimous consent for the introduction of a couple of resolutions and their present consideration.

The SPEAKER *pro tempore*. The Clerk will report the resolution, after which the Chair will ask if there be objection to its consideration.

The Clerk read as follows:

A joint resolution (H. Res. 6) to make the 18th day of September, 1893, a holiday within the District of Columbia.

Be it resolved, etc., That there be added to the days by law declared to be holidays within the District of Columbia the 18th day of September, 1893, the same being the one hundredth anniversary of the laying of the corner-stone of the Capitol of the United States.

The SPEAKER *pro tempore*. Is there objection to the present consideration of the resolution? [After a pause.] The Chair hears none.

The joint resolution was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time, and passed.

Mr. BYNUM. I also ask for the consideration of the other resolution.

The SPEAKER *pro tempore*. The Clerk will report the resolution, after which the Chair will ask if there be objection to its consideration.

The Clerk read as follows:

A joint resolution (H. Res. 7) to permit the use of certain ensigns, flags and signal numbers to decorate the Capitol and its approaches, 1893.

Be it resolved, etc., That the Secretary of War and the Secretary of the Navy be, and they are hereby, authorized to deliver to the Architect of the Capitol, for the purpose of decorating the Capitol, its approaches, and grand stands to be erected in the Capitol grounds on the occasion of the centennial celebration of the laying of the corner stone of the Capitol, such of the United States ensigns, flags (except battle flags), signal numbers, and other flags as may be spared, the same to be so delivered to said Architect not prior to the 10th day of September, and to be returned by him by the 30th day of September, 1893.

The SPEAKER *pro tempore*. Is there objection to the present consideration of this resolution? [After a pause.] The Chair hears none.

The joint resolution was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time, and passed.

On motion of Mr. BYNUM, a motion to reconsider the several votes by which the joint resolutions were passed was laid on the table.

DISTRIBUTION OF DOCUMENTS.

Mr. GROSVENOR. Mr. Speaker, I ask unanimous consent to introduce a resolution for reference to the Committee on Printing.

The resolution was read, as follows:

Resolved, That all documents and books ordered by the Fifty-second Congress which were not actually printed and distributed on the — day of August, 1893, and which remain at this time undistributed, shall be allotted to members of the present Congress, and transmitted to their residences as fast as printed, or distributed through the folding room of the House, as has been customary; and the resolution of this House dated February 27, 1893, be, and the same is hereby, rescinded in so far as the same is inconsistent herewith.

The SPEAKER *pro tempore*. The gentleman from Ohio asks unanimous consent to introduce this resolution for reference. Is there objection?

Mr. CANNON of Illinois. Why not adopt the resolution now?

The SPEAKER *pro tempore*. The gentleman has only asked to introduce it for reference.

Mr. GROSVENOR. I have no objection to its present consideration.

Mr. OUTHWAITE. I object to present consideration.

The resolution was referred to the Committee on Printing.

MONETARY COMMISSION.

Mr. McCREARY of Kentucky. Mr. Speaker, I ask unanimous consent to introduce a joint resolution, for reference to the Committee on Banking and Currency.

The joint resolution was read, as follows:

Resolved by the Senate and House of Representatives, etc., That a commission is hereby authorized and constituted, to consist of three Senators, to be appointed by the President of the Senate, three Representatives, to be appointed by the Speaker of the House of Representatives, and three experts, to be selected by the President of the United States; with authority to determine the time and place of meeting, and to take evidence in Washington or any other city of the United States, before the whole committee or before subcommittees, and to inquire into, and report:

First. On the change which has taken place in the relative value of gold and silver, and whether the change is due to the depreciation of silver or to the appreciation of gold; the cause of the change, whether permanent or temporary; the effect thereof upon finance, trade, commerce, agriculture, labor, and other interests of the country, and upon the standard of value in this and other countries.

Second. On the policy of maintaining the double standard in the United States, and what should be the legal ratio between silver and gold, when coined.

Third. On the best means of reorganizing the banking system, and of restoring confidence in commercial and financial circles, and promoting international bimetallism.

Fourth. The report of the commission shall be presented to the Senate and House of Representatives not later than the 1st day of January, 1894.

The SPEAKER *pro tempore*. Is there objection to the introduction of this joint resolution for reference to the Committee on Banking and Currency?

Mr. COX. I object.

THE BELKNAP-RICHARDSON CONTEST.

Mr. BROWN. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution from the Committee on Elections which I send to the desk.

The resolution was read, as follows:

Resolved by the House of Representatives, That there be printed 500 copies of the resolution passed on the 25th day of August, 1893, by the House of Representatives relative to the Belknap-Richardson contest from the State of Michigan, for the use of the Committee on Elections, together with any papers bearing on the case that may now be in the hands of the Clerk of the House of Representatives, under the direction of the Committee on Elections.

The SPEAKER *pro tempore*. Is there objection to the present consideration of this resolution?

There was no objection, and the resolution was adopted.

Mr. OUTHWAITE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and the House accordingly (at 3 o'clock and 28 minutes p. m.) adjourned until Wednesday next at 12 o'clock m.

SENATE.

MONDAY, *September 4, 1893.*

Prayer by Rev. J. G. BUTLER, D. D., of the city of Washington.

The Journal of the proceedings of Saturday last was read and approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. T. O. TOWLES, its Chief Clerk, announced that the House had passed the following joint resolutions; in which it requested the concurrence of the Senate:

A joint resolution (H. Res. 6) to make the 18th day of September, 1893, a holiday within the District of Columbia; and

A joint resolution (H. Res. 7) to permit the use of certain ensigns, flags, and signal numbers to decorate the Capitol and its approaches, September 18, 1893.

ANNIVERSARY OF LAYING THE CAPITOL CORNER STONE.

Mr. VOORHEES. I ask that the joint resolutions which have just come from the House of Representatives be laid before the Senate and put on their passage. I will state that the first is a joint resolution passed by the other House, making the 18th of September a holiday in the District of Columbia. It is a centennial day of the laying of the corner stone of the Capitol. The other joint resolution authorizes the use of certain flags and ensigns by the Architect of the Capitol on that day. I should be very glad to have the Senate concur with the action of the House of Representatives and let the matter go along.

There being no objection, the joint resolution (H. Res. 6) to make the 18th day of September, 1893, a holiday within the District of Columbia was read twice and considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The joint resolution (H. Res. 7) to permit the use of certain ensigns, flags, and signal numbers to decorate the Capitol and its approaches, September 18, 1893, was read twice and considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PETITIONS AND MEMORIALS.

Mr. VANCE presented a petition of the Farmers' Alliance of Iredell County, N. C., praying that the so-called Sherman silver law be not repealed unless the free coinage of silver be substituted therefor; which was ordered to lie on the table.

Mr. COKE presented memorials of citizens of Clay and Coleman Counties, in the State of Texas, remonstrating against the repeal of the silver-purchasing clause of the so-called Sherman act, unless a law providing for the free coinage of silver be substituted therefor; which was ordered to lie on the table.

Mr. HARRIS. I present a communication addressed to my colleague and myself, praying for the immediate repeal of the silver-purchasing clause of the Sherman act, signed by twenty-odd citizens of Chattanooga, Tenn.

I also present the stereotyped printed Wall street form of petition, praying for the unconditional repeal of the Sherman act. I move that the petitions lie on the table.

The motion was agreed to.

Mr. LINDSAY presented a petition of citizens of Boone County, Ky., praying that the purchasing clause of the so-called Sherman silver law be unconditionally repealed; which was ordered to lie on the table.

He also presented a petition of officers and stockholders of the four national banks of Richmond, Ky., praying for the passage of what is known as the Voorhees bill, to increase the circulation of national banks to the full value of the bonds deposited by them; which was ordered to lie on the table.

Mr. MILLS presented a petition of citizens of Fayette County, Tex., praying for the repeal of the so-called Sherman silver law; which was ordered to lie on the table.

Mr. BUTLER presented petitions of D. C. Buff, R. E. Hook, and 22 other citizens of Lexington, of W. P. Ruth, H. E. Drafts, and 23 other citizens of Lexington, of D. B. Duncan, J. F. Brown, and 26 other citizens of Columbia, and of F. C. Corley, G. W. Reeder, and 28 other citizens of Lexington, all in the State of South Carolina, praying that an appropriation be made for the further improvement of the Congaree River, in South Carolina; which were referred to the Committee on Commerce.

Mr. PASCO presented a petition of the Fort Meade (Fla.) Board of Trade and 58 others, business men and citizens of Fort Meade, Fla., praying for the repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

Mr. PROCTOR presented a petition of sundry citizens of Montpelier, Vt., praying for the repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

Mr. LODGE presented the petition of Daniel J. Poore and other citizens of Merrimac, Mass., praying for the repeal of the silver-purchasing clauses of the so-called Sherman law; which was ordered to lie on the table.

Mr. KYLE presented a memorial of citizens of Aberdeen, S. Dak., remonstrating against the repeal of the so-called Sherman silver law, and praying for the free coinage of silver at a ratio of 16 to 1; which was ordered to lie on the table.

He also presented two petitions of citizens of Aberdeen, S. Dak., and a petition of citizens of Brown County, S. Dak., praying for the free coinage of silver at a ratio of 16 to 1; which were ordered to lie on the table.

Mr. ALLEN presented a petition of citizens of Washington County, Ind., praying for the reopening of the mints to the free and unlimited coinage of both gold and silver on equal terms at a ratio of 16 to 1; which was ordered to lie on the table.

Mr. VOORHEES presented the petition of Edward Lautenschlaeger, late private Company H, Seventh United States Infantry, praying to be compensated for imprisonment in the Kansas State penitentiary for a period of five days during the month of November, 1887; which was referred to the Committee on Military Affairs.

He also presented a petition of business men, merchants, and others of New Harmony, Ind., praying for the unconditional repeal of the purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

Mr. VEST presented a petition of the Mississippi and Missouri Valley Hardware Association, praying for the immediate and unconditional repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

He also presented the petition of Q. A. Smith and other citizens of Lansing, Mich., praying for the repeal of the so-called Sherman silver law, and for the free coinage of silver; which was ordered to lie on the table.

Mr. CAREY presented two petitions of citizens of Rock Springs, Wyo., praying for the passage of what is known as the Stewart bill, providing for the free and unlimited coinage of silver at a ratio of 16 to 1; which were ordered to lie on the table.

Mr. BLACKBURN presented a petition of sundry citizens of Kentucky, praying for the repeal of the so-called Sherman silver law; which was ordered to lie on the table.

Mr. MANDERSON. I present a petition, signed very numerously by hardware merchants of Omaha, Sioux City, Dubuque, and St. Paul, constituting the Mississippi and Missouri Valley Hardware Association, praying for the immediate repeal of the silver-purchasing clause of the so-called Sherman law.

I also present a petition of like import, very numerously signed, of citizens of Blue Hill, Nebr.

I move that the petitions lie on the table.

The motion was agreed to.

Mr. MITCHELL of Oregon. I present resolutions adopted by a convention of the people of Wallowa County, Oregon, which met August 19, 1893, at Lortine, Oregon, in which they resolve in favor of the repeal of the silver-purchasing clause of the so-called Sherman law, and favor the free coinage of silver at the ratio of 16 to 1.

I also present resolutions adopted by Local Assembly No. 4898, Knights of Labor, of Albina, Oregon, to the same effect.

I move that the resolutions lie on the table.

The motion was agreed to.

REPORTS OF COMMITTEES.

Mr. PETTIGREW, from the Committee on Public Lands, to whom was referred the bill (S. 171) granting to the State of North Dakota certain lands heretofore set apart as a wood reservation for Fort Totten military reservation, for the use of the militia of North Dakota, and for other purposes, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 140) to aid the State of South Dakota to support a school of mines, reported it without amendment.

Mr. BERRY, from the Committee on Public Lands, to whom was referred the bill (S. 75) for the relief of Thomas Guinean, reported it without amendment.

He also, from the same committee, to whom was referred the bill (S. 460) granting to the State of California 5 per cent of the net proceeds of the cash sales of public lands in said State, reported it without amendment.

Mr. DOLPH, from the Committee on Public Lands, to whom was referred the bill (S. 79) to authorize a corrected patent to be issued for the donation land claim of Wheelock Simmons and wife, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the

bill (S. 73) for the relief of William J. Cornell and Joseph M. Cornell, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 69) to grant to the State of Oregon townships 27, 28, 29, 30, and 31 south, in ranges 5 and 6 east of the Willamette meridian, in the State of Oregon, for a public park, reported it without amendment.

He also, from the same committee, to whom was referred the bill (S. 71) for the relief of John W. Lewis, of Oregon, reported it without amendment, and submitted a report thereon.

BILLS INTRODUCED.

Mr. HUNTON introduced a bill (S. 826) to remit the penalties on the dynamite-gun cruiser Vesuvius; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. TELLER introduced a bill (S. 827) to aid the State of Colorado to support a school of mines; which was read twice by its title, and referred to the Committee on Public Lands.

He also introduced a bill (S. 828) granting a pension to Julia E. Lock, formerly a widow of the late Gen. Daniel McCook; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 829) granting an honorable discharge to Cyrus Payne; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

Mr. CULLOM introduced a bill (S. 830) to amend an act entitled "An act to provide for the adjudication and payment of claims arising from Indian depredations," approved March 3, 1891; which was read twice by its title, and referred to the Committee on Indian Depredations.

Mr. DAVIS introduced a bill (S. 831) for the relief of Anna W. Osborne; which was read twice by its title, and referred to the Committee on Claims.

Mr. HARRIS (by request) introduced a bill (S. 832) to simplify the form of deeds of conveyance, trust, and releases of land in the District of Columbia, and for other purposes; which was read twice by its title, and, with the accompanying letter of the Commissioners of the District of Columbia, referred to the Committee on the District of Columbia.

Mr. CALL introduced a bill (S. 833) granting a pension to J. L. Nash; which was read twice by its title, and referred to the Committee on Pensions.

Mr. MANDERSON introduced a bill (S. 835) providing for the filing of transcripts of judgments of the courts of the United States; which was read twice by its title, and referred to the Committee on the Judiciary.

Mr. FAULKNER introduced a bill (S. 836) to remove the charge of desertion from John Lyon; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. VOORHEES introduced a joint resolution (S. R. 26) to remit the duties on ammunition for naval ordnance imported by the Secretary of the Navy; which was read twice by its title, and, with the accompanying memorandum and letter of the Secretary of the Navy, referred to the Committee on Finance, and ordered to be printed.

SUSP NSION OF PENSIONS.

Mr. GALLINGER introduced a bill (S. 834) supplemental to an act entitled "An act granting pensions to soldiers and sailors who are incapacitated for the performance of manual labor, and providing for pensions to widows, minor children, and dependent parents," approved June 27, 1890, and for other purposes; which was read the first time by its title.

Mr. GALLINGER. I ask that the bill be read at length, and if there be no objection I should like to detain the Senate a short time in submitting some observations on the subject-matter of the bill.

The bill was read the second time at length, as follows:

Be it enacted, etc. SECTION 1. That in the administration of the act of June 27, 1890, by the Secretary of the Interior and the Commissioner of Pensions and in the rating of pensions thereunder, all claimants, showing a mental or physical disability of a permanent character, not the result of their own vicious habits, and which incapacitates them from the performance of manual labor, rendering them unable to earn a support from such manual labor, in such a degree as would be rated, under former laws and the rules and regulations of the Pension Office existing at the date of the passage of said act of June 27, 1890, at or above $6 per month, shall be rated proportionally in the same manner as like disabilities of service origin are proportionally rated; and all claimants showing a pensionable disability, which, if of service origin, would be rated at or above $12 per month, shall be rated at $12 per month.

SEC. 2. Whenever, in consideration of pension claims under the act of June 27, 1890, the claimant has shown that he is disabled by more than one wound, injury, or disease, pensionable under said act, the accumulated degree of disability arising from all of said separate disabilities shall be the measure of the rating of the pension granted, as provided in the preceding section.

SEC. 3. The Commissioner of Pensions shall have power as heretofore to establish at points most convenient for pensioners and applicants for pension examining boards of three surgeons each for the examination of applicants for pension. In selecting the members for said board, surgeons having had military or naval service in the Army or Navy of the United States shall be preferred for appointment as far as practicable: *Provided, however*, That such boards shall be constituted as far as practicable of surgeons who belong to different political parties.

SEC. 4. That whenever the certificate of a board of examining surgeons shall show that a claimant for pension under the act of June 27, 1890, is suffering from disabilities which, in their opinion, probably resulted from the vicious habits of the claimant, such case shall be placed in the hands of a special examiner of the Pension Bureau, who shall make an impartial examination into the facts of the case, at which special examination the claimant shall have full opportunity of being present, confronting and cross-examining the witnesses against him, and of introducing witnesses in his own behalf. When the report of the board of examining surgeons shall show that the disabilities found are, in their opinion, the result of causes not referable to the claimant's vicious habits, such disabilities shall be presumed to be resultant from pensionable causes.

SEC. 5. Except in case of established fraud, no pension shall be suspended, withheld, withdrawn or reduced, except after ninety days' written notice served upon the pensioner and a full and impartial hearing and investigation had upon sworn testimony: *Provided, however*, That the certificate of a duly appointed medical examining board may be used in evidence without the same being verified by the oaths of the members of such board signing the same.

The VICE-PRESIDENT. Is there objection to the request of the Senator from New Hampshire? The Chair hears none, and the Senator from New Hampshire will proceed.

Mr. GALLINGER said:

Mr. PRESIDENT: The bill which has just been read is designed to remove every possible difficulty that now stands in the way of the administration of the pension law of July 27, 1890, and to secure its administration precisely as Congress intended that it should be administered. I will not take time to analyze the bill, as its provisions are so plain as to be readily understood.

On the 17th day of August I introduced a resolution directing the Committee on Pensions to inquire and report whether, in suspending and dropping pensioners from the rolls, the Secretary of the Interior and the Commissioner of Pensions were conforming to the provisions of existing law. That resolution is now on the table, and I propose to ask that, with this bill, the resolution be referred to the Committee on Pensions for their consideration. I am aware that since that time the Commissioner has greatly modified his former order, but notwithstanding that I am inclined to the view that even now he is outside of the law, and that great injustice may be done to pensioners under the operations of the modified order.

To place in the hands of one man the power to arbitrarily suspend or permanently drop from the pension rolls the names of soldiers duly enrolled thereon would be an act of folly, to say the least. It is indisputable that if one name can be suspended or dropped, as has been done in thousands of cases of late, every name on the pension roll can be dealt with in the same way, and all legislation relating to pensions be thus nullified by an administrative officer. Congress certainly never intended to confer upon either the Secretary of the Interior or the Commissioner of Pensions any such sweeping and arbitrary power, the recent exercise of which properly alarmed every man on the pension rolls of the United States.

Mr. President, I find no warrant of law for the suspension from the pension roll of the names of men duly enrolled thereon unless the element of fraud is first proved against them. In a recent newspaper article I discussed this matter, the substance of which I will repeat.

ONLY FOR FRAUD.

The Commissioner of Pensions has great discretion in the matter of granting pensions, and under the provisions of section 4739, Revised Statutes, the Secretary of the Interior has power to strike from the rolls the names of pensioners upon proof that the pensions were fraudulently obtained. But it will be noted that the element of fraud must enter into the case, and the decision, presumably, can not be reached until after the accused has had the opportunity to make defense. It does not seem to me that the suspension of a pensioner on the ground that the proof submitted to a former Commissioner was insufficient, is at all warranted by that or any other section of the statute. Indeed, I know of no legal ground upon which the present Commissioner can review and annul the action of his predecessor. If the doctrine of *stare decisis* does not apply here, then it is impossible to know under what circumstances it can be made applicable.

Let us carefully look at

THE LAW ON THE SUBJECT.

Section 4720, Revised Statutes, authorizes the Commissioner "upon satisfactory evidence that fraud was perpetrated in obtaining" a special act of Congress, to "suspend payment thereon until the propriety of repealing the same can be considered by Congress." This is the only statute which in terms authorizes the "suspension" of payment of a pension, and this is limited (1) to special acts, (2) where fraud was perpetrated, (3) after satisfactory evidence has been obtained, (4) and then only until Congress can consider the propriety of a repeal.

Section 4692, Revised Statutes, provides for pensions for disabilities less than total and variable in degree, and is the foundation of subsequent laws and practice in regard to the increase

and reduction of ratings. Sections 4771, 4772, and 4773, providing for biennial examinations, was repealed by section 3 of the act of June 21, 1879 (appropriation bill), which provided instead:

That the Commissioner of Pensions shall have the same power as heretofore to order special examinations whenever in his judgment the same may be necessary, or to increase or reduce the pension according to right and justice, but in no case shall a pension be withdrawn or reduced except upon notice to the pensioner, and a hearing upon sworn testimony, except as to the certificate of the examining surgeon.

Section 4698½, Revised Statutes (section 4, act of March 3, 1873), provides that—

Except in cases of permanent specific disabilities no increase of pension shall be allowed to commence prior to the date of the examining surgeon's certificate establishing the same, made under the pending claim for increase, and in this, as well as in all other cases, the certificate of an examining surgeon or of a board of examining surgeons shall be subject to the approval of the Commissioner of Pensions.

As the latter provision was the law when the former was passed, they must be construed together, and they provide that whenever a pensioner applies for increase the Commissioner may order a special medical examination, and if he approves the surgeon's certificate he may increase or reduce the rating according to right and justice; but he shall not withdraw or reduce a pension otherwise on a surgeon's certificate under a pending claim for increase except upon notice to the pensioner, and after he or she has been heard on sworn testimony. No power is here given to "suspend payment of a pension" pending such hearing, and the pensioner must be notified, heard, and sworn testimony taken before the Commissioner has lawful power to reduce, suspend, or withdraw a pension.

Section 4774, Revised Statutes, was amended by section 3, pension appropriation act of July 25, 1882, as follows:

The Commissioner of Pensions is authorized to detail from time to time clerks or persons employed in his office to make special examinations into the merits of such pension or bounty land claims, whether pending or adjudicated, as he may deem proper, and to aid in the prosecution of any party appearing on such examinations to be guilty of fraud either in the presentation or in prosecuting the allowance of such claims; and any persons so detailed shall have the power to administer oaths and to take affidavits and depositions in the course of such examinations, and to orally examine witnesses, etc.

It is clear from the statutes that before pension is suspended or dropped the pensioner

MUST HAVE A HEARING.

The original provision was "detail clerks to investigate any suspected fraud and to aid in prosecuting," etc. Under the original provision a "special examination division" was organized in the office to whom suspicious cases were referred, and the scope of whose duties was enlarged by the act of 1882. In the laws and practice of the Pension Office the phrase "special examination" has as definite and certain a meaning as has that of "trial by jury" in the laws and practices of courts.

Analyzing the foregoing, we find that the Commissioner of Pensions has lawful authority to make special examinations into the merits of pension and bounty land claims, as well those already allowed as those pending; that he must do this by detailing clerks or persons for this express purpose who are clothed with special power to administer oaths, etc., and who are entitled to "such additional compensation as is customary in cases of special service."

As neither this act nor the section which it amends authorizes the Commissioner to reduce, suspend, or withdraw a pension so investigated, but only to "assist in prosecuting frauds," we have to fall back on the proviso of section 3 of the act of June 21, 1879, for this power. When he has made the special examination in the manner and by the machinery provided in these acts he can then, and not until then, "reduce" or "withdraw" a pension.

Section 4719 provides that failure to claim pension for three years shall be "presumptive evidence that such pension was legally terminated, and the pensioner's name shall be stricken from the list."

Sections 4736, 4737, 4738, and 4739 relate to the war of 1812, and provide that "the Secretary of the Interior shall cause to be stricken from the pension roll the name of any person whenever it appears by proof satisfactory that such name was put upon such roll through false or fraudulent representations."

Act of January 29, 1887, granting pensions to soldiers and sailors of the Mexican war, section 3, contains the same provision, with the addition, "and that such person is not entitled to a pension under this act."

The manner of ascertaining whether pensions have or have not been obtained by fraud and the requirement that claimant shall be notified and heard, and action taken on sworn testimony, has been pointed out; and these restrictions would seem to apply here as well as elsewhere.

The suggestion has been made that the recent action of the Pension Office in making wholesale suspensions of pensions heretofore allowed under the act of June 27, 1890, and the calling upon such pensioners, without notice to the pensioners and a hearing upon sworn testimony to show that they are disabled, before ordering such pensioners for medical examination, is based upon an alleged previous practice of the Pension Office under former administrations. This claim is unwarranted by the facts, and although such suspensions may have been made in isolated cases, the plain fact is that the majority of such suspensions (which at most were few) under former administrations have been based upon charges of fraud made by persons residing in the same community with the pensioners.

Upon the receipt of such charges it has been the practice of the Commissioner of Pensions, if he was convinced that the charge was made by a reputable person, whose statement was worthy of consideration, to suspend the pension and give the pensioner an opportunity to rebut such charge; but action in these cases was taken cautiously, and as long ago as May 5, 1874, in the case of Lemon A. Simmons—Delano, Secretary—we find the Commissioner of Pensions directed not to order the suspension of a pension upon unsworn statements, and in the case of William W. Calhoun, under date of January 4, 1876, Secretary Chandler laid down the rule that in the suspension of a pension upon charges of fraud based upon the ground of nondisability or other grounds "the same degree of caution should be observed which obtains in the allowance of a pension."

It is a well settled principle of law that a judgment of an administrative officer under a construction of law duly announced and under which a claimant has established rights under the forms and regulations prescribed by a previous administration must stand, unless upon newly discovered evidence or unquestioned fraud. The cases sustaining this view of the law are too numerous to be cited individually. It is sufficient, however, to say that, as I understand the matter, it has heretofore been the settled rule in the Interior Department, and that it relates to all kinds of claims arising in that Department.

A pension duly granted under the terms and regulations prescribed, and upon due proof made in accordance therewith, which, under the construction of the Commissioner and Secretary of the Interior has been duly announced, is an established right, which may not be invaded by a successor to either the Commissioner or the Secretary, unless it can be clearly shown that manifest error has been committed, or new evidence is brought forward, the existence of which was not known at the time of the adjudication, or it shall appear from the face of the papers that fraud has been perpetrated in connection therewith.

In the case of the United States *vs.* Bank of the Metropolis, 13 Peters, 377, the rule is laid down that—

The head of a department has not a right to review the decision of his predecessor allowing a credit, except to correct some error or calculation. If he is of opinion that the allowance was wrongful he must have a suit brought.

In the case of the United States *vs.* Stone, 2 Wallace, 525, involving the question of the propriety of the issue of a patent for land, the court held "that one officer of the Land Office was not competent to cancel or annul the act of his predecessor."

The decisions of the Secretary of the Interior are binding upon his successors.

See opinions of the Attorney-General, volume 2, page 463; volume 5, pages 29 and 63; volume 5, pages 240 and 284; volume 7, page 701; volume 9, page 100; volume 12, page 355.

In the case of Thomas Riley—Bell, Secretary—November 19, 1878, volume 6, page 161, it was held that—

Reconsiderations of decisions of former administrations of the Department is declined in cases wherein title to pension is affected, and where in the original settlement all the facts were presented, there having been no change in the facts or law. The decision should not be reversed even though the incumbent believes his predecessor committed an error in judgment.

See also Hiram C. Shouse—Kirkwood, Secretary—December 20, 1881.

The deliberate decision of a former administration "of a question involving private rights and interests (no new facts being shown to exist when that decision was made) can not with propriety be reconsidered by its successors."

See opinion of the Attorney-General, April 26, 1869. Also opinion of March 7, 1871.

In the case of the United States *vs.* Arredondo, 6 Peters, page 729, the court held:

It is a universal principle that, where power or jurisdiction is delegated to any public officer or tribunal over a subject-matter, and its exercise is confided to his or their discretion, the acts so done are binding and valid as to the subject-matter, and individual rights will not be disturbed collaterally for anything done in the exercise of that discretion. The only questions which can arise between an individual claiming a right under the acts done and the public, or any person denying its validity, are power in the officer and fraud in the party. All other questions are settled by the decision made or the act done by the tribunal or officer, whether executive (1 Cranch, 170-171), legislative (4 Wheat, 423; 2 Peters, 412; 4 Peters, 563), judicial (11 Mass., 227; 11 S. R., 429; 2 Peters, 167, 168), or special (20 J. R., 739, 740; 2 Dow., Peters Cas., 521, etc.), unless an appeal is provided for, or other revision, by some appellate or supervisory tribunal, is prescribed by law.

The power of the officers to deal with the whole subject of pensions is just such as is conferred upon them by statute, either

by express terms or by necessary implication, and, in the discharge of their duties they are required to comply strictly with the provisions and directions of the statutes regulating the exercise of their powers; otherwise their acts or decisions will be nullities. Such officers exercise a naked statutory authority, and have no powers, except such as are granted to them by statute expressly or by necessary implication. These rules are stated by all the authorities. (See Throupe on Public Officers, section 556; Sutherland on Statutory Construction, section 390.)

Where a rule is laid down by a statute for the government of officers, we are not at liberty to inquire whether it can be departed from with safety, or whether the mode actually pursued is equally as beneficial to the party concerned as that prescribed by the statute. The answer to arguments of this kind is that the law has prescribed the manner in which the duty shall be performed, and that there is no superior power to direct otherwise. (See Sutherland on Statutory Construction, section 390.)

A statutory proceeding or a right given by statute is confined to the very cases provided for, and it extends to no other. It can not be enlarged by construction, nor be made available or valid except on the statutory conditions; that is, by strictly following the directions of the law. A party or officer, seeking the benefit or protection of such a statute must bring himself strictly not only within the spirit, but within its letter, and he can take nothing by intendment. (See Sutherland on Statutory Construction, sections 391, 392, 393, 398, and 399.)

Mr. President, I do not want to utter a word that can be construed into partisanship on this question. The matter is too serious for that. All over our land men are dreading misfortune. They are the men who for four long years bravely battled to save the Union and to preserve our tottering nationality. They are poor men, broken in health, and looking forward to an early release from their misfortunes and sufferings. For the first time in the history of the Government the Pension Bureau is apparently in hostility to their interests. Instead of bending its energies to settle unsettled cases, that great Bureau is giving its time to unsettle settled cases. It is a serious and an alarming condition. Every pensioner is apparently under suspicion. To be a pensioner is to invite sneers and derision; and besides this, the vast amount of work thrown upon the several divisions—notably the medical department—in the investigation of suspended cases has greatly congested the office so far as current work is concerned. I presume that at least ten thousand names have been arbitrarily and, as I believe, illegally dropped from the rolls, every one of which has diverted from the regular work of the Bureau a portion of the force which should be engaged in adjusting claims in process of consideration.

Mr. President, we are frequently reminded in the Halls of Congress that "the war is over." That is true; but, while the ranks of the country's defenders are being rapidly thinned, there yet remain with us a noble army of men who fought the good fight to preserve constitutional government and to forever establish the liberties of our people. The debt we owe these men can never be repaid. They may be sneered at here or elsewhere, but a grateful people will not forget their sacrifices or their sufferings, and the pittance that the Government has granted them in the way of pensions will not be taken from them without my protest. As an added and necessary protection to them, I trust that the bill that I have presented may meet the approval of the Committee on Pensions and be speedily enacted into law.

Mr. President, I ask the reference of the bill to the Committee on Pensions, and also the reference of the resolution which I submitted in August last.

The VICE-PRESIDENT. The bill and resolution will be referred to the Committee on Pensions.

REPEAL OF TAX ON STATE-BANK CIRCULATION.

Mr. BUTLER submitted the following amendment, intended to be proposed by him to the bill (H. R. 1) to repeal a part of an act approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes;" which was read and ordered to lie on the table and be printed:

SEC. —. That section 3412 of the Revised Statutes of the United States, the same being section 122 of the national-bank act, imposing a tax of 10 per centum upon the amount of notes of any person or of any State bank or State banking association used for circulation and paid out by them, be, and the same is hereby, repealed: *Provided*, That such State banks of circulation only as secure their circulation by coin or approved State or municipal bonds shall receive the benefit of this act.

SILVER COINAGE.

Mr. KYLE submitted the following amendment intended to be proposed to the bill (H. R. 1) to repeal a part of the act, approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes;" which was read and ordered to lie on the table and be printed:

At the end of line 13 of the amendment of the Committee on Finance insert:

That holders of silver bullion of the value of $50 or more, and not too base for the operations of the mints, shall be entitled to deposit the same for coinage at the mints of the United States, and to have the same coined into legal-tender standard silver dollars of 412½ grains standard silver to the dollar, on the same terms and conditions on which gold bullion is now deposited and coined: *Provided*, That in the coinage of all silver presented at the mints, the Government shall receive the seigniorage, or difference between the bullion and coin value of said metal; that silver certificates shall be issued on such dollars in the manner now provided by law for the issuing of certificates on standard silver dollars.

AMENDMENT OF THE RULES.

Mr. MILLS submitted the following resolution; which was referred to the Committee on Rules:

Resolved, That Rule XXII of the Senate be so amended as to read as follows:

"PRECEDENCE OF MOTIONS.

"When a question is pending no motion shall be received, but—
"To adjourn to a day certain, or that when the Senate adjourn it shall be to a day certain;
"To adjourn;
"To take a recess;
"To proceed to the consideration of executive business;
"To lay on the table;
"To postpone indefinitely;
"To postpone to a day certain;
"To commit;
"To amend; which several motions shall have precedence as they stand arranged, and the motions relating to adjournment, to take a recess, to proceed to the consideration of executive business, to lay on the table shall be decided without debate."

LABOR DAY—PROPOSED ADJOURNMENT.

Mr. ALLEN. I offer, and desire to have immediately considered, the resolution which I send to the desk.

The VICE-PRESIDENT. The resolution will be reported.

The Secretary read as follows:

Whereas it is due that Congress take cognizance of the labor organizations and industrial interests of the nation by observing this day, commonly known as Labor Day: Therefore be it

Resolved, That as a mark of respect for the labor organizations and industrial interests of the nation, the Senate do now adjourn.

Mr. VOORHEES. I am in favor of all the jubilees and holidays for labor——

The VICE-PRESIDENT. The Chair will state to the Senator from Indiana that the motion is not debatable, except by unanimous consent.

Mr. VOORHEES. I was born in the ranks of labor, and I think the best tribute we can pay to labor is to go on to a conclusion with the business of the Senate as rapidly as possible. I say this with the utmost respect for my friend from Nebraska, and for his resolution, but I see no way in which we can contribute more to the interest of labor than to relieve the present situation of affairs.

The VICE-PRESIDENT. Debate is by unanimous consent.

Mr. VOORHEES. I object to the resolution.

The VICE-PRESIDENT. The Senator from Nebraska moves that the Senate do now adjourn. (Putting the question.) The noes appear to have it.

Mr. ALLEN. I ask for the yeas and nays on the resolution.

Mr. FAULKNER. I desire to inquire of the Chair if the Senator from Illinois [Mr. CULLOM] had not given notice that he desired to speak after the morning business, and I ask whether the Senator from Illinois was not really on the floor for that purpose?

The VICE-PRESIDENT. The Chair will state that the Senator from Illinois has given such notice, but the Chair entertained the motion to adjourn, which he understood to be in order.

Mr. FAULKNER. Under such circumstances I think the Senator from Illinois should be permitted to proceed, and I shall vote against the resolution.

Mr. CULLOM. I wish to say that before proceeding with my remarks I was waiting until the measure on which I desired to speak was properly laid before the Senate.

The VICE-PRESIDENT. The Chair so understood.

Mr. STEWART. I should like to hear the resolution offered by the Senator from Nebraska read.

The VICE-PRESIDENT. The resolution will be again read.

The Secretary read the resolution of Mr. ALLEN.

The VICE-PRESIDENT. The yeas and nays are demanded on the resolution.

The yeas and nays were ordered.

Mr. ALLEN. Mr. President, ——

Mr. ALDRICH, Mr. HALE, and others. Regular order!

Mr. ALLEN. I am perfectly willing that the resolution which I offered shall be temporarily laid aside until the Senator from Illinois addresses the Senate, but I should like to call it up immediately after the conclusion of his remarks.

Mr. FRYE and others. Let us have the vote now.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. HARRIS (when his name was called). I am paired with the Senator from Vermont [Mr. MORRILL]. I do not know how he would vote if here, but I should vote "nay," if at liberty to vote.

Mr. LODGE (when his name was called). I am paired with the junior Senator from Kansas [Mr. MARTIN]. I do not know how he would vote if he were present, but I should vote "nay."

Mr. PUGH (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR].

Mr. STOCKBRIDGE (when his name was called). I am paired with the junior Senator from Maryland [Mr. GIBSON], but I am satisfied if he were present he would vote "nay;" I therefore vote "nay."

The roll call was concluded.

Mr. MANDERSON. I have received a telegram from the Senator from Connecticut [Mr. HAWLEY], stating that he is detained from the Senate by a death in his family, and for that reason will not be here to-day. On this and all other questions during the day I shall endeavor to see that the Senator is paired. On this vote I will pair him with the Senator from Kentucky [Mr. BLACKBURN].

Mr. DIXON. The Senator from Kentucky is paired.

Mr. MANDERSON. Then the Senator from Connecticut will have to remain unpaired on this vote.

Mr. HUNTON. I have a general pair with the Senator from Connecticut [Mr. PLATT]. I believe if he were here he would vote "nay" on this question, and I shall record my vote "nay."

Mr. CALL. I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were here, I should vote "yea."

The result was announced—yeas 8, nays 41; as follows:

YEAS—8.

Allen,	Peffer,	Power,	Vance,
Irby,	Pettigrew,	Shoup,	Vest.

NAYS—41.

Aldrich,	Dixon,	McMillan,	Squire,
Allison,	Faulkner,	McPherson,	Stockbridge,
Bate,	Frye,	Manderson,	Vilas.
Berry,	Gallinger,	Mills,	Voorhees,
Blackburn,	Gorman,	Mitchell, Oregon	Walthall,
Butler,	Gray,	Mitchell, Wis.	Washburn,
Caffery,	Hale,	Palmer,	White, Cal.
Camden,	Hansbrough,	Pasco,	White, La.
Carey,	Higgins,	Perkins,	
Coke,	Hunton,	Roach,	
Cullom,	Lindsay,	Smith,	

NOT VOTING—36.

Brice,	Dubois,	Jones, Nev.	Pugh,
Call,	George,	Kyle,	Quay,
Cameron,	Gibson,	Lodge,	Ransom,
Chandler,	Gordon,	Martin,	Sherman,
Cockrell,	Harris,	Morgan,	Stewart,
Colquitt,	Hawley,	Morrill,	Teller,
Daniel,	Hill,	Murphy,	Turpie,
Davis,	Hoar,	Platt,	Wilson,
Dolph,	Jones, Ark.	Proctor,	Wolcott.

So the Senate refused to adjourn.

REDEMPTION IN SILVER.

Mr. ALLEN submitted the following resolution; which was read:

Resolved, That the Secretary of the Treasury be directed to furnish to the Senate, without unnecessary delay, full information on the following subjects:

1. Whether the Treasury Department has, at any time, redeemed any portion of the silver or coin certificates in silver coin, as provided by the act of July 14, 1890, commonly known as the Sherman act, and if so, when and what amount has been thus redeemed.

2. What amount, in coinage value, of silver bullion purchased by the Treasury Department under the act of July 14, 1890, and subject to coinage, in the discretion of the Secretary of the Treasury, remains uncoined, and why said silver bullion has not been coined and paid out, in accordance with the provisions of said act.

3. Whether any part, and, if so, what part, of the paper money redeemed in gold by the Treasury Department since March 4, 1893, was canceled after redemption or in any manner withheld from general circulation.

Mr. ALLEN. I desire to have the resolution considered at this time.

Mr. VOORHEES. Let it go over until to-morrow.

Mr. McPHERSON. And be printed.

The VICE-PRESIDENT. The resolution will go over under the rules, and be printed.

PURCHASE OF SILVER BULLION.

Mr. CULLOM. Mr. President——

The VICE-PRESIDENT. Concurrent and other resolutions are still in order. If there be none, that order of business is closed, and the Chair lays before the Senate the unfinished business, the title of which will be reported.

The SECRETARY. A bill (H. R. 1) to repeal a part of an act, approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes."

Mr. CULLOM. Mr. President——

Mr. PEFFER. I ask that the pending amendment may be stated before the Senator from Illinois proceeds.

Mr. CULLOM. The amendment may be laid before the Senate later.

Mr. PEFFER. I offered an amendment to the bill, which is the pending amendment, as I think the Journal will show, and I ask that it be stated as the pending amendment.

Mr. VOORHEES. I will suggest to the Senator from Kansas that at 2 o'clock this measure will be laid before the Senate as the regular order of business, and at that time, or a little later, it might be well to read his amendment, but not in connection with the remarks of the Senator from Illinois.

The VICE-PRESIDENT. The amendment of the Senator from Kansas to the amendment of the Committee on Finance is pending.

Mr. CULLOM. Mr. President, the questions now engrossing the attention of the country and especially of Congress surpass in importance any which have been the subject of Congressional action since slavery was abolished and the perpetuity of the Union secured. The determination of great financial questions affect beneficially or disastrously not only the people of one country, but, to an extent, all the nations.

Opinion is unanimous that the condition of affairs in this country now demands immediate attention and prompt action by Congress; all agree that commerce is stagnant in all the geographical divisions of our country; that banks and commercial houses are failing; that factories and mines are closed, and that within the last six months perhaps a million wage-earners have been thrown out of employment.

But, unfortunately for the country, there is no such agreement of opinion among the people or in Congress as to the cause of the distress that has so swiftly and unexpectedly come upon us, or, as to what is of paramount importance, the remedy for it. No such peculiar condition as exists in America to-day was ever known in our history. The people have suddenly found themselves in changed circumstances—the merchant without customers; the factory closed for lack of orders; the bank losing its deposits; the farmer without price for the products of the soil; the laboring man without work; all classes without confidence, and the entire country appealing to Congress for speedy relief.

We have been admonished by the public press and from sundry other sources, that in the present emergency patriotism should be superior to partisan politics, and sectional interests should yield to the common weal. Sir, if I believed it necessary that such admonitions should be given to the American Congress, I should regard a seat in this body as without honor, and should deplore the decadence of national spirit. Conscious of no purpose on my part other than that of securing the greatest stability to our Government, the highest prosperity, consistent with conservatism, to the nation, and the largest sum of happiness to the individual, I am unwilling to believe that other motives actuate my colleagues.

The chairman of the Committee on Finance has reported a bill allowing national banks to secure and issue circulation to the par value of the bonds deposited by them with the Treasury Department. The cry comes from the people for more money. This bill, if enacted into law, would result in an increase of our circulating medium, and as good money as the world affords. The measure is recommended by the Secretary of the Treasury, and yet, before a vote can be had on it, the whole national-banking system, which has been discussed for more than twenty-five years, must be discussed again in the same old strain and with the same arguments that have been heard at every crossroads from the time the act was passed. Why not give the country this crumb of relief, and when the people have emerged from their present distressed condition, take up the bank act, discuss it, and amend it if that is deemed wise?

The amendment offered by the Senator from Missouri [Mr. COCKRELL], while it is of no great consequence in itself, yet if it should be adopted is to be the entering wedge which will result in the retirement of the national-bank notes now in circulation, and the issuance in their place of an equal amount of greenback promises to pay on demand in gold, added to nearly one thousand millions of paper already issued, which the Government is pledged to maintain. To what port are we, as a nation, drifting? Is it not time to stop and take our bearings, if it is not the purpose of the movers of such amendments to wreck the national Treasury, as I am sure it is not?

I favor the passage of the bill as it is, but think I do not object to the amendment of the Senator from Maryland.

The chairman of the Finance Committee, in response to the message of the President, has reported a bill to repeal the clauses of the act of July 14, 1890, providing for the monthly purchase of 4,500,000 ounces of silver. I shall vote for the bill.

I am not one of those who believe that the act of 1890 is in a great degree responsible for the existing financial condition. I am for its repeal, however, for the reason that it was passed as an expedient, and was not expected to remain on the statute book very long, and because the Government can not afford to

buy silver and coin or issue paper on it and call it a dollar when in fact the silver in the dollar or deposited as security for the dollar is worth less than 60 cents. Such a performance long continued would embarrass any government. The reason the people are satisfied with silver certificates now is because the Government stands behind them and is pledged to take care of them; but the Government is not called upon to continue such a policy.

Other causes have aided in producing the distrust. I shall refer to them later. The act of 1890 was not intended to represent the well-defined and permanent financial policy of the United States, but it was passed as the lesser of two evils—the purchasing of bullion and the issuance of paper money based on it, or the free and unlimited coinage of silver. It was a compromise measure to avert what a majority of our friends on the other side now will admit would have been a calamity—the free coinage of silver. The abuse and condemnation which have been heaped upon it are not justified by the facts. Fearful that the United States alone could not maintain silver at a parity with gold, with its mints open to the coinage of the silver of the world, and hopeful of a fruitful result from the then approaching monetary conference, the act was passed. It has at least given more money to our people, and if, as has been stated, it has at times driven gold from the country, the experience of the last few weeks demonstrates that while it is yet in force the yellow metal under the operation of trade comes to our shores.

I am not a monometallist; I do not believe in the disuse of either of the two metals named in the Constitution. There is no considerable number of men in this country who demand the ostracism of silver or of gold; on the contrary, all concede the utility of both as money metals. But the closer commercial relations of nations which marks the advance of civilization makes international concurrence in the free and unlimited use of both metals as money more desirable, if not absolutely necessary.

I favor the free use of silver which comes from international coinage upon a common basis or agreed ratio. Gold has no money function inherent in itself any more than has silver. Both metals are the creation of nature, while money is the creature of law. There are no natural laws which govern the science of money, and there is no theory in the science which is capable of mathematical demonstration. All that we know pertaining to the science is the result of experiments and experience, and it is not certain that what may to-day seem a well-defined principle in monetary science will very long remain so.

The people want silver; so do I. The people first of all want all our circulating medium, whether gold, silver, or paper, of equal value; so do I. The people are more interested in knowing that their money is all good and that it will continue so than they are to know the material out of which it is made.

I will insert as part of my remarks a table showing the amount of gold and silver coins and certificates, United States notes, and national-bank notes in circulation August 1, 1893.

The table is as follows:

Statement showing the amounts of gold and silver coins and certificates, United States notes, and national-bank notes in circulation August 1, 1893.

Gold coin	$416,909,941
Standard silver dollars	56,223,989
Subsidiary silver	64,007,129
Gold certificates	87,611,029
Silver certificates	330,188,390
Treasury notes, act July 14, 1890	143,774,138
United States notes	324,394,404
Currency certificates, act June 8, 1872	7,855,000
National-bank notes	180,134,997
	1,611,099,017

Taking the Treasury Department's estimate of population in the United States on the same date, August 1, 1893 (67,066,000), we have a per capita circulation of $24.02, which is about as much as we have ever had, and more than we had until recent years. The Senator from Iowa [Mr. ALLISON] suggests to me that we have added $69,000,000 during the month of August just passed, and that would be, as is suggested to me by the Senator from Rhode Island [Mr. DIXON], an increase of over a dollar per capita.

There would, therefore, seem to be no ground for believing that the present situation has been brought about by a scarcity of money in the country. It is in the country, but it is not in circulation. The trouble is serious impairment of confidence, which has caused the hoarding of money, and it will remain out of circulation until in some way confidence is reëstablished.

I may be allowed to digress sufficiently to say that I am gratified to learn that a very prominent gentleman in Chicago, Mr. Armour, is reported in the dispatches in the morning papers as saying that money is now coming, not only out of the pockets of individuals, but out of the banks in loans, and that the probabilities are that there will be an abundance of money very soon.

The amount of deposits in the national banks of the United States July 12, 1893, was $1,556,761,230. This vast sum belongs in large part to individuals and corporations; it lies in the banks idle, the banks holding it for the owners, and they do not withdraw it because they are afraid to use it. Many men who have money are not only afraid to leave it in the banks but they are equally afraid to use it in business.

The proposition to repeal the act of 1890 would not be opposed by the silver men but for the reason that they believe that such repeal, without some other legislation being at once enacted in lieu thereof, means the end of silver as money in this country. I do not believe, if we discontinue the purchase of silver bullion now, that it will be long before some more satisfactory plan for its use will be devised. So long as the act of 1890 remains on the statute books we will surely come no nearer free coinage than we are now. I suppose, as a matter of fact, if the question were now settled, there would be no one in the Senate, perhaps, who would be in favor of the retention longer on the statute book of the so-called Sherman act passed in 1890.

The American people do not desire a policy in reference to silver, either by continuing the purchase of silver bullion or by the adoption of free coinage, which will result in driving all the gold out of the country and making this a silver nation. This the majority will and ought not to submit to. I am inclined to believe that I state the fact truthfully when I say that there are not a dozen Senators on this floor who are to-day ready to vote in favor of making this a silver nation and driving gold out of the country.

The repeal of the act of 1890 does not make gold the standard money of the country. It is the unit of value now. Section 3511 of the Revised Statutes reads as follows:

> The gold coins of the United States shall be a one-dollar piece, which, at the standard weight of 25.8 grains, shall be the unit of value.

Then follows the description of other gold pieces. The statute of 1873 made gold the standard. I refer to this because many people believe that the repeal of the act of 1890 will in some way make gold the standard, and that it is not now the standard of value. We are not doing any such thing; we are not seeking to make gold the standard; we are simply seeking to repeal the Sherman act, which is an act for the purchase of silver bullion, and then coining a part of it or issuing silver certificates upon it. It has no reference whatever to the legal-tender quality of the money, and there is nothing in the act which in any way either interferes with the standard or makes gold or silver the standard money.

Mr. MITCHELL of Oregon. Will the Senator allow me there?

Mr. CULLOM. Yes.

Mr. MITCHELL of Oregon. The Senator will admit, however, that if the Sherman act be repealed and nothing else is done, there will be no law at all on the statute book by which another silver dollar can be coined.

Mr. CULLOM. I understand that was the condition of the country up to the time of the passage of the Bland act—that then there were no silver dollars coined. But what I insist upon is that the repeal of the Sherman act has no reference whatever to the question as to whether silver or gold shall be the standard.

Mr. MITCHELL of Oregon. The repeal of the Sherman act would leave us with one hundred and forty or one hundred and fifty million ounces of silver bullion on hand, with no provision whatever for its coinage.

Mr. CULLOM. I assume that the party in power in the Senate will take such action with reference to the bullion we have on hand as will be wise and proper in the premises.

Mr. ALDRICH. If the Senator from Illinois will allow me, the repeal of the purchasing clause of the act of 1890 would not repeal the provisions of that act which authorize the coinage of the bullion on hand or the redemption of the Treasury notes issued in accordance therewith.

Mr. CULLOM. I am obliged to the Senator from Rhode Island for the suggestion. The bill does not deal with that question at all. Therefore that subject stands as it was before any effort was made to repeal any portion of the act, and when we pass the repealing act, if we ever do, it will simply apply to the purchase of silver bullion, and stop there.

England adopted the gold standard in 1816, and has maintained it ever since. Germany suspended the free coinage of silver in 1871; the United States in 1873, when we adopted the gold standard. In the same year France limited the amount of silver to be accepted. Sweden and Norway demonetized silver in 1874. Holland suspended free coinage and established a gold standard in 1875. France stopped the mintage of silver in 1876, in which year Russia and Spain stopped the coinage of silver. Austria-Hungary adopted the gold standard in 1892, and, finally, this year India stops the coinage of silver, I believe, on private account, though I am not positive that it absolutely stops it.

Now, Mr. President, can we alone maintain bimetallism, for we are practically alone, so far as the great powers are concerned. The United States can not, in my opinion, alone maintain free coinage of silver unless we are willing to become a silver nation and drive the gold out. What we want is an international

agreement securing the use of both metals and free coinage on an agreed ratio, and if we repeal the act of 1890 and stop the purchase of silver I believe we will get it. The policy of piling up silver bullion is not wise statesmanship, and in a little time it will surely be stopped. The special friends of silver may as well realize this. The people will not continue indefinitely the business of buying and cording up silver bullion and issuing paper to represent it and make the Government responsible for its redemption. Why not, then, let it be stopped now and make another effort in favor of an international agreement?

England adopted the gold standard in 1816, doubtless because by so doing she could secure an advantage over other nations which owed her and were silver nations. She did secure an advantage. She made the silver nations in debt to her pay her in gold or its equivalent when they did not have the gold. There is now, however, a strong party in England in favor of bimetallism and the remonetization of silver. Before the disastrous failure of Baring Brothers a British commission was appointed to inquire into the depression of trade, and it reported that it was caused by the demonetization of silver by England and other nations; and on the question of restoring silver to its ancient use as money, remonetizing it, the commission divided equally—six to six. When England finds that she no longer derives an advantage by maintaining the single gold standard I trust and believe she will join other nations in favor of the restoration of silver and the maintenance of a bimetallic standard.

But we are told by gold monometallists that bimetallism is impracticable; that it is impossible to establish a permanent ratio between the two metals. I remember reading the observation of some student of the science, who, in dealing with this very dictum, compared it with the doctrine, "it is impossible for a man to draw a line absolutely straight, or to show two things that are exactly alike." He said:

> This so-called impossibility of a fixed ratio between the two metals is as unworthy to support a statesman in denying the possibility or desirability of a successful establishment of a fixed ratio as the impossibility of making anything straight, or of making two things alike, is unworthy to prevent the construction of machinery and works of engineering. Machinery and engineering works all demand for their perfection straight lines and identity between different parts. At the same time substantial straightness, substantial identity will suffice. In practice the infinitely small can be neglected by the engineer and mechanician; why not by the statesman, why not by the economist?

The United States must adopt a financial policy which will do even justice between all classes and all geographical divisions, between debtors and creditors, between employers and employés. It should be borne in mind that universal bankruptcy, which for some time has threatened the country, is as fatal to the creditor classes as to the debtor classes, and that the safety of the money interests of commerce lies in keeping money under the constant protection of wise laws.

Mr. President, I sympathize with that section of our Union which has been found to be so rich in minerals—copper, lead, silver, and gold—and which has contributed so many millions of the money metals to the world, and the people of those States may well be excused for their manifestation of intense anxiety.

The hardships overcome and the wonderful progress made by the patriotic settlers of that great region west of the Missouri, if written up, as it will be, will form one of the most thrilling stories in the whole progress of our race. In all their achievements they have been actuated by the thought that civilization has the right of way to the future on this continent. All the advantages that follow in the track of civilization now prevail over that vast area, through the persistent faith and dauntless energy of our citizens in that great section. As one humble representative of the Commonwealth of Illinois, the richest, most populous, and, commercially, the most powerful of the Central States of the Union, closely identified in its commerce with all the States west of it, as well as with those of the East, North, and South, I shall regret if any action we may take on this or any other question shall prove to be in any degree injurious to those brave and patriotic people.

But it seems to me more important to secure a settlement of the silver question upon some enduring basis, rather than leave it with the act of 1890 in force, which surely can not long stand. Secure free coinage, if possible, through an international agreement, and you will be on a basis which will endure.

Free coinage by the United States alone means monometallism; it means all silver and no gold. I am against making this a silver nation. I desire the free use of both silver and gold at a parity, which we can have if other nations will join with us, but which we can not have with safety without such concurrence of action.

Mr. PEFFER. Will the Senator allow me a moment?

Mr. CULLOM. I do not care to be interrupted.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The Senator from Illinois declines to be interrupted.

Mr. CULLOM. The question now is distinct from the question of free coinage—shall we repeal the act of 1890 or the silver-purchasing clause of it? Some of our Democratic friends seem more especially anxious for repeal; because, in the first place, they did not vote for the bill when it passed; and secondly, because they were profuse in the denunciations of the act in their national convention, which, in the language of the platform, "should make all of its supporters," meaning friends of the act, "anxious for its speedy repeal."

Mr. President, in my action I am not prompted by any political platform. I shall act as my judgment dictates is best. I will vote for repeal because it may help to restore confidence, even though the act did not have much part in producing the lack of it.

Mr. President, there are other causes for the present situation. The Senator from New York in his remarks the other day suggested that the question should be discussed in all its bearings. I shall ask the Senate to look at the subject from another standpoint. I do not regard it as out of place to look at the commercial questions which bear upon the general situation. A year ago the financial condition of the Government and its Treasury was satisfactory, and the credit of the nation at the highest point ever attained in our history. A year ago the gold bags of the world were ready to be poured into the United States Treasury in exchange for United States bonds at 2 per cent—certainly at 2½ per cent. Whether our credit still remains as good I am in doubt. I make no mistake when I say that the credit of the nation was higher and better a year ago than that of any other government or financial institution on the globe.

A year ago our internal and foreign commerce was larger than ever in our history. A year ago the manufacturing and mining industries were turning out a larger product than ever; a greater number of laborers were employed than ever, and the rate of wages was higher than ever. What is the spectacle which confronts us now and commands our attention? The credit of our National Government called in question for the first time since the outbreak of the war, and the commerce of the country reduced; factories closed or running on half time, mines shut up, and a million of men unemployed and willing to work for even half the wages they received a year ago.

Mr. President, my object is to seek the cause of all this untoward condition of affairs.

When Abraham Lincoln was inaugurated President of the United States, in 1861, it was the end of a period of hard times. It may be said to mark the end of an epoch in American history and the beginning of a new one. The old one went out leaving the people poor, with no money and no work. The new one was inaugurated in a period of extreme financial depression among the people, with no national credit, and the country soon involved in the most expensive war ever waged on this planet.

I shall not stop now to describe the financial processes by which the National Treasury was abundantly replenished, the expenditures of a great war met, and the national credit lifted to the high plane which it occupied a year ago. It may be of interest to state that the expenses growing out of the civil war up to June 30, 1893, amounted to the enormous sum of $8,000,000,000. The bonded debt reached its highest point in August, 1865, now twenty-eight years ago. On the 30th of June last it had been reduced to about $841,000,000. I state these facts to show the financial power of this Government when properly administered.

At the beginning of this epoch in which the Republican party held substantial control a policy of taxation was inaugurated, both internal and customs, having one great object in view, the preservation of the life of the nation. The people bore taxation as the soldiers bore arms—to save the Union.

Money flowed into the National Treasury through the channels of internal taxation and customs duties. The nation entered upon a career of commercial and industrial vigor never before experienced. Protective-tariff laws had taken their place upon the statute books. Prior to the war no tariff law had been pronounced in favor of protection, and neither did a very long period elapse under a protective tariff to test its influence in favor of national prosperity or to demonstrate its influence in favor of American labor. Under the assurance that the needs of the Government would cause the policy of protection to be steadfastly maintained, there was seen an advance in every commercial and industrial pursuit, the like of which the world had never seen. I will not stop to give the statistics to prove what I state; they can be easily procured. I will say that the total value of the property devoted to manufactures and mining in 1892 amounted to nearly $9,000,000,000, the result in large measure of the financial policy of the Government prevailing for the last thirty years.

In November, 1892, an election came on and the party now in full possession of the executive and legislative branches of the Government triumphed. It came in, as speakers on the opposite side of this Chamber have repeatedly said, pledged to the

repeal of the protective-tariff laws of the country; pledged to overturn the policy under which our industries and resources had been developed; pledged to the proposition that any protective tariff is unconstitutional and is a robbery of the many for the benefit of the few; pledged to overturn the national banking system, which had furnished the best paper currency to the people the country ever had, by the repeal of the 10 per cent tax on State-bank circulation, and the establishment of State banks with a paper currency different and peculiar to every State and current nowhere except in the neighborhood of its issue and at a discount everywhere, if history repeats itself, and it surely will.

Down with the tariff; up with the reform tariff, whatever that may mean. Down with the Sherman law; up with free coinage. Down with the national banks; up with State banks. This is the bill of fare which will be put before the people if the history of the dominant party in the Senate and the utterances of its national conventions are an index of its future conduct. What wonder, Mr. President, when the country realized what had been done in securing this change of policy, by the election of a Democratic President and a Congress Democratic in both branches, distrust, hesitation, want of confidence seized the people, which has resulted in an almost complete paralysis of business and the hiding away of the circulating medium of the country, and finally in the President calling Congress together.

We will repeal the act of 1890, because it is not wise to continue in force a statute providing for the purchase of 4,500,000 ounces of silver per month and issuing paper which the Government is bound to protect. I hope its repeal will be of service in removing the paralysis now upon business; but we will not soon have good times and good wages again if all the pledges made by the party now in power are redeemed in good faith. I hope I am mistaken. I am as anxious as any man to see confidence restored: to see the hundreds of thousands of idle men given a chance to earn good wages. If the people could be assured of the policy that is to prevail for the next four years they would know what they had to meet.

Mr. President, what is to be the policy of the Administration party on financial questions? I speak of the Administration party, because there are now two wings of Democracy in the Senate. Is the party simply to repeal the silver-purchasing act of 1890 and then take a rest? Are we to have the national banking system swept away, the circulation (the best we ever had) taken up, and greenback promises to pay substituted? The chairman of the Committee on Appropriations is headed in that direction. If these things are to come to pass you will find that instead of a renewal of the good times we had less than a year ago, that the gloom of stagnation, poverty, and distress will settle down upon the country for years to come.

Agriculture, manufactures, commerce, and navigation, the four pillars of our prosperity, as Jefferson once said, will continue to languish.

Our friends on the other side in this discussion have given much attention to the question of the construction of the money plank of their national platform, one side insisting that it meant unconditional repeal of the silver act of 1890, the other that it meant conditional repeal. Strong arguments have been made on both sides of the question. The Senator from North Carolina [Mr. VANCE], on Friday last, made the very potent argument, from a Democratic standpoint, that by conditional repeal that party would be united. I infer that he regards it as divided if unconditional repeal of the silver act is accomplished. This, Mr. President, would be a calamity the country could easily bear.

Mr. President, the platforms of the two parties on the money question are not very unlike in either language or meaning, and the prominent feature of each was that every dollar, whether of paper or coin, issued by the Government should be as good as any other and at all times equal.

And that is what the country wants. It wants whatever circulating medium we have, whether gold, silver, greenbacks, certificates, national-bank notes, or what not, the best. As we have all these forms of currency, the policy of the Government ought to be, and must be, if we treat the people right, that every dollar of whatever kind shall be as good as the best.

Each of the two platforms recognized the importance of securing an international conference to adopt measures to insure a parity between the two metals. The special champions of the silver-purchase act say that act must not be repealed, because to repeal it would be the end of silver as a money metal in this country. Of what value is the law now? The silver mines are closed; the smelters are reported to be shut down, while the silver-purchasing act still remains in force. Why? Because the product of the mines has become so cheap, notwithstanding the fact that the Government has been buying 4,500,000 ounces per month, that it does not pay to produce silver at its present price.

In the face of this, while the mines are closed up, as reported, and the smelters are shut down, we are appealed to by the silver men to insist that the act of 1890 shall stay upon the statute book unless we are ready to give them free coinage. I want to say that free coinage will not be given to them, if I am any judge of the public sentiment of this country, until some arrangement is made by which, when we authorize the issuance of silver dollars, they will be as good as gold dollars or any other dollars in the world.

If the Government continues the purchase of silver bullion under the law it will be mainly foreign silver instead of our own.

Mr. President, the interests of the people require a sound, stable currency. We can not afford to experiment in the adoption of doubtful policies. We want no fiat money. We want a dollar which is intrinsically worth 100 cents the world over.

I wish to say that there seems to be a growing disposition on the part of everybody apparently to find out some new financial scheme which he can thrust upon the country and disturb the business of the country, because that is the effect when such theories are thrown upon the country and have any particular following.

We want a system of finance which will not involve the Treasury Department in constant danger. We want to rid ourselves of the idea that all that is necessary to make money for the people is to print a promise to pay and put the Government stamp upon it. We want to secure to the country a sound currency and put it beyond danger of becoming debased. We will thus be serving the Government faithfully, and we will equally well serve the business men, the toilers, and all classes of our people.

Mr. President, the business men of all classes appeal to us to pass the bill for the repeal of the silver act of 1890. Multitudes of laborers are pleading for work.

If there is anything we as legislators can do, consistent with national honor and financial safety, to lift the clouds that darken the situation, remove the difficulties and start the wheels of commerce which are now rusting on the railroad tracks, in the shops, mills, factories, and mines, let us do it at once.

Mr. PEFFER. I desire to continue the discussion of the pending measure by advocating the pending amendment to the amendment of the committee. I understood that the Senator from Texas [Mr. COKE] is anxious to address the Senate upon the same subject, but I do not see him in his seat. Therefore I will proceed, and when the Senator arrives, if it is his desire, I will yield to him and conclude my remarks afterwards.

Mr. COKE entered the Chamber.

Mr. ALLISON. The Senator from Texas is coming in now.

Mr. PEFFER. I see the Senator from Texas is now in his place.

Mr. COKE. Mr. President, the message of President Cleveland on the financial condition of the country is in effect a clear, unambiguous, and urgent recommendation of such legislation by Congress as will establish and maintain the single gold standard as the basis of our financial system, discarding silver except in a limited amount and as a subsidiary coinage. With characteristic boldness and directness, this utterance of the President sharply and forcefully presents the issue between gold monometallism and the bimetallic currency of the Constitution and the Democratic platform, championing the former in terms about which there can be neither mistake nor misconception.

This country can not afford to be held in suspense over such an issue thus presented. The highest public interest demands its determination and settlement; and that it can be settled finally and conclusively, and peace and rest, prosperity and stability restored to the business and commerce of the country only by the establishment of a bimetallic currency as it existed prior to 1873, when silver was demonetized, the temper of the country based on a maturely formed judgment abundantly shows. A decision falling short of this consummation will not be a settlement, nor will it be a postponement of the contest. The agitation, unrest, discontent, and demoralization will continue to vex and harass the country and disturb and unsettle business.

The people will never be content until the wrong of 1873, through which one-half of the money of this country was stamped out in order to double the purchasing power of the other half, has been undone and reversed. Since the demonetization of silver in this country, prosperity, which until that time blessed the agricultural people of the South and West, has departed, and their labors have met the poorest recompense they have ever known. They have in large part fed and clothed the world, and their exported products have maintained the balance of trade with foreign countries in our favor, and have brought to our Treasury the gold on which specie payments were resumed after the civil war and have been maintained.

Nearly 80 per cent of the exports of this country have been of agricultural products, while silver, the great factor which produced and sustained remunerative prices in foreign and domestic markets, making our agricultural communities the most pros-

perous in the world, has been pursued with hostile legislation until the American Congress has been brought face to face with the proposition to perform the last act which shall expunge from the statute book all recognition of it as money. The great agricultural staples, cotton and wheat, have declined as silver has gone down; and to-day silver bullion, degraded as it has been, will buy in the markets of the world as much or more of either as it did in 1873 before it was demonetized, thus showing conclusively, if proof were needed, that it is not silver which has fallen in value, but gold which under the influence of legislation has risen.

In the striking down of silver in 1873, twenty long years ago, the values of houses and lands, of cattle and horses, of flocks and herds, of all the products of the farm throughout the South and West were likewise stricken down and have remained down ever since. Who can estimate the loss which has accrued to these people in all these years from this cause, a loss almost fabulous in amount, all inflicted upon the great mass of the people for the purpose of enriching inordinately a comparatively small number. These things have been burned into the minds and memories of the people as they have passed through the fiery ordeal of adversity, and can never be forgotten or forgiven.

Hence I repeat, Mr. President, if the power of gold—of which it has been said that "Philip of Macedon refuted by it all the wisdom of Athens, confounded their statesmen, struck their orators dumb, and at length argued them out of their liberties"—shall again succeed, as it has heretofore done, in defeating the demand of the American people for a full and complete restoration of silver to free coinage and full money power, the financial question which now agitates this country will remain with us, and this Congress will have done all in its power to perpetuate it; for the people will never cease to resist the attempt to fasten upon them gold monometallism with its inevitable consequence of chronic money famine.

The constitutional right of our people to a gold and silver currency can not be gainsaid or questioned. Gold and silver are the money of the Constitution. The States are expressly prohibited to make any other a legal tender in payment of debts. To the National Government has been granted the power "to coin money, regulate the value thereof, and of foreign coin;" in other words, to create, from gold and silver bullion, coins of prescribed weight and fineness, and to stamp their values and designations upon them. The power to give the legal-tender quality to any money other than this thus coined or to foreign coin, the value of which has been regulated by Congress, has been expressly prohibited to the States.

The Constitution grants to the National Government the exclusive power to coin and declare the value of money, and reserves to the States, respectively, the absolute right to make gold and silver coin, and prohibits them absolutely from making any other money a legal tender. The power of the National Government to coin money and the power of the States to make gold and silver coin legal tender are correlative powers. The enjoyment by the States of the rights reserved to them in this regard, the right to make gold and silver coin a legal tender, is dependent upon the due performance by the National Government of its duty to coin these metals—not gold alone, but gold and silver.

All the recognized rules of construction require that the clauses of the Constitution be construed together, giving the National Government the full measure of power granted and the States the full measure of power reserved, and imposing upon each the corresponding duties in respect to the subject-matter. If silver can be demonetized, so can gold. If either can be demonetized, on the same principle both may be demonetized. It would be no more a violation of the Constitution to demonetize both gold and silver, and thereby deprive the States of the power to invest coins of these metals with the legal-tender quality, than it is to deprive them of silver when the Constitution reserves to them the right to both gold and silver.

Nor would the force of this argument be weakened if it be admitted that the National Government can constitutionally make other money than gold and silver coin a legal tender, for whatever power the National Government may possess in this regard can not impair the absolute recognition in the Constitution of the right of the States to make both gold and silver coin a tender; and as long as that right is recognized and the exclusive right of the National Government to coin money for their use or that of the people is admitted, so long of necessity must it be the duty of that Government to coin both gold and silver. In other words, the Constitution itself, in express terms, establishes bimetallism.

The alleged excessive production of silver is now the argument of those who would destroy that metal as money, creating, as they say, a greater supply than the demand, resulting in its depreciation. In 1873, when silver demonetization was consummated in the United States, we heard nothing of the staple argument of to-day against silver, that it is a cheap dollar, a 70-cent or a 60-cent dollar, a dishonest dollar. Nothing of the sort was said or could be said, because a silver dollar of 412½ grains, exactly the dollar we have now, commanded a premium of 3 per cent over what is now called the standard gold dollar. Silver was more valuable than gold, yet the bankers and capitalists of Europe and America engineered its demonetization with the same earnestness and zeal which now characterizes their opposition to its restoration to free coinage and full money power.

Since 1873, when silver was stripped of its legal-tender power and of all its money functions, except that of a subsidiary coinage, and relegated to the list of commodities as bullion, it has declined largely when compared with gold, say from 45 to 50 per cent. Gold monometallists, virtually abandoning their old sophistries on which they procured the demonetization of silver in 1873, have planted themselves on the depreciation of silver, ascribing it to the increased production of that metal, ignoring the fact that the coined silver dollar, possessed of full legal-tender power, is the equal in purchasing power of gold.

Having shifted their ground, their European allies have come to their aid in the very nick of time, just before the meeting of this Congress called to act on this subject, by closing the mints of India to silver coinage except on government account. Aided by the most powerful forces that ever combined in this country for the accomplishment of any purpose, the great combined money power of Europe and America hope and are striving, by the passage of the bill now pending in the Senate, to expunge from our statute book any recognition of silver as money, and thereby reduce the bullion value so low in the markets of the world that its competition with gold as a money metal will not be feared again.

The great argument now heard against silver is overproduction. An examination of well-authenticated figures showing the production of gold and silver from the year 1493 up to and inclusive of the year 1892 will puncture the argument most effectively. I invite attention to Senate Miscellaneous Document No. 17, Fifty-third Congress, first session, giving a statement of the production of gold and silver since the discovery of America, which I ask be published at this point in my remarks:

Statement of the production of gold and silver in the world since the discovery of America.

[From 1493 to 1885 is from table of averages for certain periods compiled by Dr. Adolph Soetbeer. For the years 1886–1892 the production is the annual estimate of the Bureau of the Mint.]

Period.	Gold.				Silver.				Percentage of production.

1889	5,746,950	118,800,000	5,746,950	118,800,000	125,830,000	162,690,000	125,830,000	162,690,000	4.4	95.6	42.2	57.8
1890	5,473,631	115,450,000	5,473,631	113,150,000	133,213,000	172,235,000	133,213,000	172,235,000	4.0	96.0	39.7	60.3
1891	5,830,107	120,519,000	5,830,107	120,519,000	144,426,000	186,733,000	144,426,000	186,733,000	3.9	96.1	39.2	60.8
1892	6,328,272	130,817,000	6,328,272	130,817,000	152,062,000	196,605,000	152,062,000	196,605,000	4.0	96.0	40.0	60.0
Total			397,191,823	8,204,303,000			7,522,507,716	9,726,072,000	5.0	95.0	45.8	54.2

It will be seen from this table that from 1801 to 1820 the average yearly yield of gold was $9,710,500; silver, $29,823,500. From 1821 to 1840 the average yearly yield of gold was $11,466,000; silver, $21,968,500. From 1841 to 1860 the average annual yield of gold was $101,019,000; silver, $35,660,000. From 1861 to 1880 the average annual yield of gold was $120,691,500; silver, $71,287,500. From 1881 to 1892 the average annual yield of gold was $113,200,500; silver, $153,036,000. It will be seen from this table that the average yearly production of the two metals for four hundred years run closely together, the estimated production in the world for that period standing thus: Gold, $8,204,303,000; silver, $9,726,072,000.

The experience of the world for so great a period should exempt us from any fear of an undue production of either metal. During all the mutations of time and circumstance and of varying production of the two metals for four hundred years, gold and silver were held in parity without disturbance throughout the world by the legal-tender money function which both possessed, until silver was demonetized in 1873, and at that time silver outvalued gold. The people who have no access to the truth as exhibited in correct statistical figures are led to believe we are about being inundated with silver when nothing can be further from the truth. Relatively to gold, the production of silver was much greater from 1801 to 1840 than it is now.

From the beginning of the present century up to 1820 three times as much silver as gold was produced, and from 1821 to 1840 the production of silver was double that of gold. In the next period of twenty years, however, the conditions were reversed and the output of gold was three times as great as of silver. From 1861 to 1880 the production of gold exceeded that of silver by two-thirds; while in the last twelve years, 1881-1892, the total yield of silver is only about one-fourth greater than that of gold. The production of silver in later years has increased as compared with gold production, but the ratio of increase is insignificant compared with the ratio of earlier years, from which no disturbance of its relationship with gold as a money metal resulted. The world's coinage of silver now exceeds that of gold only about 16 per cent, when, as I have shown, the production of silver has repeatedly been in excess to 50, 100, 200, and as high as 500 per cent, to be succeeded in turn by like increase in the production of gold.

But it is said that this country under free coinage would become the "dumping ground" of the world for all cast-off silver. A brief statement of facts which are not controverted will refute this theory. It is agreed by all the writers on this subject, and notably by the late Secretary Windom, in his report to the Fifty-first Congress, that there is no known accumulation of silver bullion in the world, and that all the silver coin in Europe is doing duty as money in circulation. Our ratio of 16 of silver to 1 of gold is the highest silver ratio of any country in the world except Mexico, whose ratio is 16½ to 1, and Japan, with a ratio of 16.18 to 1.

In the gold-using countries, whether monometallic, like England, Germany, and Russia, or bimetallic, like France, Italy, Spain, and others, their silver circulates side by side at par and is exchangeable with gold. Any man desiring in any of these countries to exchange his silver for gold can make the exchange in the ordinary course of business at home, without expense or discount. No reason can be perceived why he should prefer to bring it to the United States, where the standard ratio of silver to gold is greater in our silver coin, and where, consequently, his silver must be sold at a discount.

All such silver coins, of course, would have to be melted and recoined, so that all loss by handling and abrasion would be deducted here. The loss from this source and from the discount by reason of the smaller silver ratio, the expense of shipment, insurance, etc., has been estimated by experts to be from 6 to 8 per cent, when without this loss this silver is being exchanged every day at home at par with gold, of course it will not be brought here. European silver would not be "dumped" into this country for the all-sufficient reason that it is needed there to do the very thing it is doing—that is, to circulate as money.

All the gold-standard countries use silver. Gold-standard England circulates $100,000,000 of it, of limited-tender power. Germany uses $103,000,000 full legal-tender silver, and $108,000,000 of limited-tender silver. Austria-Hungary, like England and Germany, a gold standard country, uses $90,000,000 full legal-tender silver, while the bimetallic countries like France, Belgium, and others, circulate great quantities of silver. Gold can never be used for the every-day purposes to which silver coins are applied throughout the world. Its subdivisions would be too minute for pocket use.

So, Mr. President, the fear of an inundation of foreign coin, if our mints should be thrown open, is groundless and illusory. This is one of the chimeras conjured up to frighten people into the belief that we should abandon silver and rely solely upon gold as a money metal, in opposition to the experience of the world that during all the ages it has been the great factor in the preservation of the equities between debtor and creditor, in holding down gold to a fair and just standard of valuation, in securing to labor fair and reasonable wages, and to the products of labor and all commodities just estimates of value.

In other words, silver and gold being mutual checks upon each other when both possess the full money function, preventing an undue fluctuation of either metal, they make conjointly a standard of value steady, conservative, and reliable in their relations to commodities, wages, and property exchanges. The very best evidence of the truth of this proposition is to be found in the universal fall of prices since 1873 when silver was demonetized, and gold unchecked began to rise in value and continues to rise, commodities falling in the same proportion, until $1 possesses now the purchasing power over cotton and wheat which required $2 to command in 1873, and all other commodities being affected, not to the same extent possibly, but heavily in the same direction.

Not only is this true in the United States, but it is equally true throughout Europe, in consequence of the destruction of silver as money, as is shown by the following extract from the Economic Crisis, an able work by Mr. Morton Frewen, of London, on encomic questions. He says:

It may, indeed, be affirmed without fear of contradiction, the legislation arranged in the interest of a certain class, first by Lord Liverpool in this country, and again by Sir Robert Peel at the instigation of Mr. Jones Loyd and other wealthy bankers, which was supplemented recently by simultaneous antisilver legislation in Berlin and Washington at the instance of the great financial houses. This legislation has about doubled the burden of all national debts by an artificial enhancement of the value of money.

The fall of all prices induced by this cause has been on such a scale that while in twenty years the national debt of the United States quoted in dollars has been reduced by nearly two-thirds, yet the value of the remaining one-

third, measured in wheat, in bar iron, or bales of cotton, is considerably greater, is a greater demand on the labor and industry of the nation than was the whole debt at the time it was contracted.

The aggravation of the burdens of taxation induced by this so-called "appreciation of gold," which is no natural appreciation, but has been brought about by class legislation to increase the value of gold which is in few hands, requires but to be explained to an enfranchised democracy, which will know how to protect itself against further attempts to contract the currency and force down prices to the confusion of every existing contract.

Of all classes of middlemen, bankers have been by far the most successful in intercepting and appropriating an undue share of produced wealth. While the modern system of banking and credit may be said to be even yet in its infancy, that portion of the assets of the community which is to-day in the strong boxes of the bankers, would, if declared, be an astounding revelation of the recent profits of this particular business; and not only has the business itself become a most profitable monopoly, but its interests in a very few hands are diametrically opposed to the interests of the majority. By legislation intended to contract the currency and force down all prices, including wages, the price paid for labor, the money owner has been able to increase the purchase power of his sovereign or dollar by the direct diminution of the price of every kind of property measured in money.

This writer graphically describes the origin of the policy sought to be engrafted on the institutions of this country by the gold monometallists, its methods, and results. It is not difficult to understand why England, Germany, and Russia (said now to be going to the gold standard), and the lesser powers should be wedded to the gold standard; all of them monarchies, buttressed by hereditary and moneyed aristocracies, nonproducers, all of them, living in luxury and splendor through pensions and annuities, offices and other forms of fixed incomes, on the products of the labor of the common people.

The gold standard doubles the value and purchasing power of their incomes, while it reduces by half the prices of the products of labor. The ruling classes, clothed in purple and fine linen, exhaust every form of luxurious living, while the great mass of the common people are bowed down with the merciless exactions of unrequited labor, to which they submit with the best grace they may, under the persuasive influence of fixed bayonets and double-shotted Gatling guns. This is a fair statement of the results of the European monometallic financial policy now sought to be forced on the American people.

Every political party in this country, without exception, has repeatedly, over and over again, declared for and pledged to the American people the bimetallic policy, the free coinage of both gold and silver, with full money power to each, without discriminating against either. Our response to these pledges solemnly made is in a bill now pending before the Senate for the unconditional repeal of the only law on our statute books authorizing the coinage of another silver dollar, placing the country avowedly on the single gold standard.

If this bill shall pass as introduced, and the vast power of the Administration is behind it urging its passage, the free men of America will have bowed their necks to the yoke of European domination in their foreign and domestic financial affairs. Rothschild's and the Bank of England, with their retainers, dictate the financial policies of Europe; and if the single gold standard is established in America, then Rothschild's and the Bank of England, with their New York associates, will become the arbiters of American finance and the dictators of our financial policies, because they control the gold we will be compelled to have.

The Director of the Mint in his latest report, of date February 16, 1893, referring to the world's product of gold for the years 1890, 1891, and 1892, says that according to the revised totals the amount was as follows: 1890, $113,149,600; 1891, $120,518,800; 1892, $130,816,600.

The gold product of the United States for the year 1892 is estimated by the Director of the Mint to be $33,000,000. For the year 1891 he estimates that $16,616,408 was used in the industrial arts, and for 1892, $16,644,953 was used in the arts in the United States—about half of the product, leaving the other half for coining. The Director of the Mint a few years ago estimated that $46,000,000 of the world's annual gold product was consumed in the arts in the manufacture of jewelry, gold plate, in dentistry, etc.

The gold product of the world has been for many years dwindling, being about $100,000,000, until in the last two years there has been a slight increase. Deducting the Director's estimate of the world's consumption of gold in the arts from the gold product of 1892, the largest in many years, and we have left for coinage $84,816,600 to recruit the losses of the original stock by abrasion, handling, and accident, and meet the necessities of the world arising from the growth of population, business, and commerce.

Over this the nations of the earth must struggle and scramble for accessions to their present stock. It is the European policy that this shall be so, because Europe already holds possession of it and can fix the price upon it. There all development is completed and finished, population is stationary or declining, and production, if not receding, is at least not advancing. Stagnation is the order of the day. Our country is young, full of vigor, growing rapidly in population, both from natural causes and from immigration. New States, new communities are being founded, great tracts of new country being populated and opened to production, new enterprises and new industries are being incepted and pushed, and general progressive development the leading characteristic of the people, the country, and the times.

A people and country like this will starve, will languish under suppressed development when held down to a volume of money circulation allowed by the aristocratic rulers of Europe to their overcrowded, underpaid, and overworked people. Yet this is what is proposed for our people in the pending bill. It will be said in reply to this that we have silver certificates, Treasury notes, national-bank notes, greenback notes, and other forms of money in addition to gold. There is one conclusive answer to all such assertions, and it is that all our paper money of every sort, kind, and description is held to be ultimately redeemable in gold, and, therefore, the volume of our money must be estimated on the breadth of the metallic redemption fund on which it rests.

Before silver was demonetized the volume of money rested on the broad basis of both gold and silver, which was not more than ample for its redemption, but was deemed sufficiently safe for a reasonably abundant circulation; but since silver demonetization, the metallic basis for paper money having been reduced one-half, the volume of paper, in order to be safe, had to be reduced and adjusted to the smaller metallic basis on which it rested for redemption. It is this reduction which has forced down the prices of commodities and all the products of labor, which have fallen because the volume of money in which all values are measured has been contracted one-half.

Our experience since 1873 in the fall of prices consequent upon the destruction of silver money establishes this proposition. The insufficiency of the gold basis sought to be forced upon our people by their European and American financial masters is thus made plainly apparent. That our volume of paper and credit money is a large overissue and is outstanding greatly in excess of a safe proportion to the gold redemption fund is made manifest by existing financial disturbances. The temptation to overissue has always been regarded as one of the principal dangers of the single standard. England has, since her adoption of the gold standard, been called "the land of panics."

With a bimetallic currency firmly established, both metals, under the friendly and fostering care of the Government and banks alike, instead of having silver boycotted and discriminated against as it has been by the banks and the Government, in defiance of the people's demand that it should be otherwise, with our paper and credit bottomed on the two metals instead of being confined to one, we would now be enjoying peace and prosperity instead of being threatened with universal bankruptcy by the greatest financial disturbance that has ever occurred during this generation.

The gold basis on which our credit paper has been resting has proved too narrow; and it has been an easy matter for the conspirators who have produced the existing crisis to topple over the paper superstructure, producing chaos and confusion. We vividly remember the widespread destruction resulting from silver demonetization and the resulting contraction of money circulation in 1873. We now have the same experience in the contemplation of the sweeping away of the partial remonetization of silver by the act of 1878, known as the Bland act, which the repeal of the Sherman act will complete.

As before remarked, notwithstanding a slight increase in the production of gold for the last two or three years, the production of that metal has been declining throughout the world for many years. The product of the mines of the United States, which has been between one-third and one-fourth of the world's entire production, has been derived almost entirely from the silver mines as an incident of silver-mining; and the closing down largely of these mines by reason of the great depreciation of silver, will greatly diminish the supply of gold in the United States, still further reducing the already confessedly inadequate supply of that metal.

Gold and silver are precious metals the world over, and have been so through all the ages and will continue to be, silver as fully as gold. These metals have in all ages been yielded by mother earth in quantities and proportions adapted to the wants and necessities of mankind. Notwithstanding the estimate of the aggregate of both metals in the world shows nearly equal proportions of gold and silver, it is a fact of their history that their relation to each other has constantly been changing by reason of the changing proportion of their production.

At one time gold has been produced largely in excess, and at another silver; but it has been the unvarying history of these metals that an excess of either has always been corrected by a corresponding increase in the production of the other in its turn, and that the supply of both has kept pace with the growth of busi-

ness and commerce of the world. The flood of gold which was poured from the mines of California, Australia, and Russia between 1850 and 1856, estimated at $900,000,000, which caused a decline of more than 5 per cent in that metal and moved alarmists to advocate its demonetization, as they do now of silver, as we all know has been corrected by the more recent discoveries of silver; and so it has been for all time.

A law of nature seems to have joined these metals together and to have denied perfect efficacy to their functions as money except as coöperative forces. Under the double standard, they support each other. If gold is scarce and high, silver becomes more abundant; if silver disappears, gold flows into its place. The people who have both to rely on can depend with absolute certainty on the presence at all times of one of them—a corner on both is impossible. It is through this coöperative action of the two metals under the double standard that a sufficient circulation is assured for the demands of trade and commerce, for living wages to labor, for fair valuations in the transfers of property, and a safeguard is furnished, as far as human wisdom can devise one, against crises and panics and the loss and ruin they entail.

The centralization of capital in the hands of a few men is impossible with the double standard of gold and silver, while with gold alone a few bankers and capitalists become the lords and masters of the people, as history shows is the condition throughout Europe, where the single gold standard prevails. Gold being concentrated in value, less in weight and bulk, and almost exactly one-half of the money of the world, is so much more easily handled, possessed, and cornered than silver that the great money barons of Europe and their coadjutors in America, designing to rule this country as Europe is ruled by the power of money, and to reduce our people to the same condition in which the common people of Europe, under the power of a great monied aristocracy, now exist, are moving heaven and earth to destroy silver, the only obstacle which stands in the way.

If the Sherman act shall be repealed without being substituted by some other which shall provide for the free coinage of silver, what will become of the silver already coined and the bullion now in the Treasury? There are of coined standard silver dollars $419,335,450, and enough of bullion in the Treasury when coined to swell this amount to about $600,000,000. What under these circumstances would be the status of this silver? That with the unconditional repeal of the Sherman act silver will fall heavily, nobody doubts. The depth to which it will tumble must be a mere matter of conjecture.

Producing, as this country does, 47 per cent of the silver produced in the world, its public sentiment the strongest of that of any one of the great powers of the earth in favor of its equal use with gold as a money metal, its abandonment by us will be its death knell so far as respects its use as money, except in such subordinate ways and such limited quantities as obtain in all gold-standard countries.

Our experience since 1878, when the Bland act was passed, as silver has been hammered down and boycotted by the national banks, by the officers of the executive department of our Government without regard to party, who in every conceivable way, in the execution of the laws, have discriminated against and prejudiced our silver money, would be worth very little if it did not teach us that the same arguments and agencies which assailed the silver dollar all along the line as it was made to decline, first as a 90-cent dollar, then as an 80-cent dollar, a 70-cent, and a 60-cent dollar, down as low as silver has fallen, would be used with tenfold greater effect against the coined silver dollar when its intrinsic bullion value has been reduced to 30, 40, or 50 cents. To stop the coinage of silver in the United States is the object of the present contest, and to remove from our statute book any recognition of it as money. The success of monometallism on this point will be insured by the passage of the bill for the unconditional repeal of the so-called Sherman act.

Our coined silver, reduced to a mere bagatelle in intrinsic value, compared with its legal value as a dollar, will be scoffed at as a dishonest, base, depreciated coin, worthless in itself unless made redeemable in gold. Those who have been able to bring down silver from a premium over gold, to its present depreciated condition as a commodity, and against the protest of two-thirds of the American people shall pass the pending bill abolishing its coinage, will find no difficulty in getting rid of the silver they have succeeded in making intrinsically worthless.

It is true that the legal-tender quality and the debt-paying power may preserve the silver dollar at par; but this will not prevent its persecution by the monometallists, who are bent upon its destruction, in order to supply its place with bank paper. The issuance of bonds to raise gold to redeem these discredited silver dollars will then be in order; and these bonds, of course, will be a basis for the perpetuation of the national banks, whose present lease of life is nearly exhausted. The purpose of the money power of this country has been for years past, and is now, to make gold and national bank notes the currency of the country.

On the 6th day of December, 1886, in his report to Congress, Daniel Manning, then Secretary of the Treasury of Mr. Cleveland's first Administration, used this language:

> The act making compulsory post-redemption issues and reissues of United States notes, and the act making compulsory Treasury purchases of silver, are each a separate menace to the public tranquility, are each injurious to the public morals, the public faith, and the public interest.

Secretary Manning simply reiterated the recommendations of his Republican predecessors. The scheme to fund the United States notes or greenbacks went hand in hand with that of demonetizing silver.

These notes, so embedded in the confidence and favor of the people, are too suggestive of the supreme excellence of a uniform national currency, issued directly by the Government, backed by its power and credit, redeemable at the will of the holder in coin, as are the United States notes, not to have incurred the deadly hostility of the national banking interest. A currency issued by themselves, put out and called in, expanded or contracted at their pleasure, is the object of their desire. Control of all the fiscal affairs of this Government and country they have constantly aspired to and hoped to achieve.

While not mooting the subject to any great extent in the last few years, the recent financial discussion through the press has developed the fact that this design is as vigorous and unyielding as ever. Having accomplished the demonetization of silver, if this bill passes, with renewed strength and prestige and assurance, they will address themselves to the accomplishment of their cherised purpose. We have, Mr. President, to deal with the exigencies of the present, but our action should be so framed as to provide well against the dangers of the future.

Our people demand bimetallism almost with one voice. All the organized political parties in the United States, without a single exception, demand bimetallism. Yet we are urged to pass the pending bill, which places the country avowedly on the single gold standard. We are promised bimetallism in the distant future on the impossible condition of an international agreement—a condition demonstrated by actual experience to be impossible. England must be a party to any international agreement, and England has repeatedly, over and over again, refused to be a party to such an agreement.

English capital, English diplomacy, English intrigue, coöperating with allied conspirators in the United States, have produced this panic, this financial convulsion, which now paralyzes the business of this country, for the purpose of coercing the people of the United States into the adoption of the monometallic policy, which the pending bill, if passed, will inaugurate. The $2,000,000,000 due from corporations in the United States to Europe, nearly all of it in England, and the annual interest accruing thereon, will be paid in gold if England can compel it so paid; and, in order to do this, England must defeat bimetallism in this country.

Mr. Gladstone, in a speech delivered in the British Parliament in February last, and reported March 1 in the London Times, scouts the idea that England, a great creditor nation, owing nothing to other nations, would ever consent to an agreement for bimetallism and thereby reduce the value of the great debts due from this and other countries to England, by allowing them paid in a cheaper money than gold. Mr. Gladstone knows if this country is forced to the gold basis, gold will rise in value, that the burden of all debts will be increased, and the profits of all creditors will be increased in the same proportion.

England, because she is a great creditor nation, and also Germany, who allies herself with England, has always been an immovable obstruction in the way of an international agreement for bimetallism, and always will be, because gold flowing into her coffers from all the nations of the world is more valuable, will buy more of the products of labor the scarcer and higher it is. If additional evidence of England's determination that bimetallism shall not be established in the United States, if she can prevent it, were needed, the recent action of the British Government in stopping silver coinage in India except on government account, the severest blow yet stricken the silver interest, on the eve of the meeting of this special session of Congress called to consider this subject, ought certainly to be conclusive.

We have no hope of an international agreement. There is no idea entertained anywhere that one is possible. We must depend on ourselves if we expect ever to have bimetallism. Our people have demanded the restoration of gold and silver coinage as they existed prior to 1873—both free and on an exact equality at the mints and before the law. In the language of

the distinguished Senator from New York [Mr. HILL], in his learned and able speech delivered a few days ago in this body:

Bimetallism does not mean the stoppage of further silver coinage while maintaining our present silver currency intact, but it means the free coinage of silver and gold by the Government either under an international agreement or independently.

The stoppage of further silver coinage, but the maintenance of existing silver currency, accompanied by the free coinage of gold, is not bimetallism, but it is what the famous French financier, Mr. Cernuschi, called "humped-back monometallism," such as exists in France and Germany to-day.

This definition of the distinguished Senator is an accurate and felicitous one, and is in strict accord with the popular signification of the word "bimetallism."

The Democratic party, in the Chicago platform, on which the present Administration came into power, pledged itself to the people on this subject in the following emphatic language:

SILVER PLANK.

We denounce the Republican legislation known as the Sherman act of 1890 as a cowardly makeshift, fraught with possibilities of danger in the future, which should make all of its supporters, as well as its author, anxious for its speedy repeal. We hold to the use of both gold and silver as the standard money of the country, and to the coinage of both gold and silver without discriminating against either metal or charge for mintage, but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value, or be adjusted through international agreement, or by such safeguards of legislation as shall insure the maintenance of the parity of the two metals, and the equal power of every dollar at all times in the markets, and in payment of debts; and we demand that all paper currency shall be kept at par with and redeemable in such coin. We insist upon this policy as especially necessary for the protection of the farmers and laboring classes, the first and most defenseless victims of unstable money and a fluctuating currency.

In response to the solemn pledge given in this platform, it is proposed by the pending bill to repeal unconditionally the only law authorizing the coinage of a dollar of silver to be found on our statute book, and in doing so, to erect the single gold standard, discarding and rejecting silver. Pledged to bimetallism, we propose to establish monometallism. Pledged to the equal use of gold and silver, and paper redeemable at par in the coins of both metals, we deliberately falsify the pledge by abolishing the coinage of silver and providing for that of gold alone. We are driven by no necessity to thus violate the solemn promises of the Democratic party to the people. If they are thus violated and broken, the act is a purely voluntary one, and utterly without justification or palliation.

There are well-established precedents in the history of this Government under which our platform pledges can be surely and safely redeemed. The free coinage of silver as it existed prior to 1873, at the present ratio, it is believed by the great majority of the best thinkers in this country, would in a very short time, by bringing down the value of gold and raising that of silver, bring these metals together in substantial parity. Safeguards of legislation, it is confidently believed, could be brought to the aid of such an act in a way to insure the desired result.

A decrease in the number of grains of gold in the gold coin, or an increase in the number of grains of silver in the silver coin, or a decrease in the weight of the gold and an increase in the weight of the silver coin, would bring them to parity. The gold eagle (ten-dollar piece) as established in 1792, containing 270 grains of standard gold, was in 1834 reduced to 258 grains of standard gold. The silver dollar established as the unit of value in 1792, containing 416 grains of standard silver, was in 1837 changed to a dollar, the same we now have, of 412½ grains of standard silver.

It is no new thing to change the ratio of the metals to each other. Why can we not change it now, and for convenience reduce the number of grains in the gold coin, leaving the silver dollar, as at present, with 412½ grains of standard silver? Gold is overvalued about 40 per cent as compared with silver and other commodities, and a subtraction of a part of this overvaluation, by reducing its weight, would restore the proper equities between debtors and creditors, and raise the prices of all commodities from their depression to a fair and conservative level, while producing parity between the metals, as the party is pledged to do.

When Congress possesses the power, and the Democratic party holds the majority to do, and do surely and well, that which the American people have been promised shall be done, shall the wishes and demands of the people not be considered and some effort made to comply with the promise? It seems not. I warn Democrats that the people will be heard from later. We are told by the advocates of this bill, or at least by the leading ones among them, that we must pass this bill and adjourn and go home; that nothing more is needed to be done, except to pass a bill already favorably reported providing for the issuance by the national banks of $20,000,000 bank notes, which many believe will be locked up in their vaults as soon as issued, where all the other money in the country is hoarded instead of being put in circulation.

No need, say they, to press tariff reform and a repeal of the McKinley bill. True it is that manufacturers, producers of raw material, importers and consumers alike, are vitally interested in knowing what changes are to be made in the tariff, in order to intelligently and properly conduct their business, which is languishing almost to the point of paralysis for want of this information. We are told that it is too hot now, we must wait until the regular session in December next before taking hold of the subject. All that these gentlemen desire, if the pending bill passes, will have been secured in the destruction of silver and the inauguration of gold as the crowned despot of our monetary system. That accomplished, their labors are finished.

It is all they want, except that Congress shall adjourn. The $50,000,000 of legal-tender Treasury notes required under the Sherman act each year to be paid out for silver bullion, which goes out into circulation, and is the only source of increase in the volume of money to meet increased demands from increased population and business, will be cut off by the passage of this bill; and to this extent currency will be contracted, in addition to the universal shrinkage inevitably to occur from the adoption of the gold standard. The Secretary of the Treasury is reported by the daily papers of this city, in interviews, as saying that the country needs no addition to its circulation, that we have money enough, and that all we need is confidence. The President, in his message, makes but one recommendation, and that is to repeal the Sherman act.

The bankers, capitalists, and goldmongers, whose wealth is to be largely increased if not doubled by the repeal of the Sherman act, are using all their power over merchants and the interior bankers, resorting to every form of coercion. Printed petitions, with printed letters of instructions, have been showered over the country from New York and other Eastern cities, to be filled out with signatures and forwarded to Washington for effect upon members of Congress. The pressure through the national banks, machine petitions, the metropolitan press, and the vast power of the executive department of the Government for the passage of this bill is the most tremendous ever before known.

The House, unable to withstand it, has succumbed, and the United States Senate stands to-day the only barrier between the people and spoliation. Thrown into dire distress and rendered utterly helpless by a panic conceived, excited, produced, and, manipulated by the New York national banks and their co-conspirators in other Eastern cities and in England for the purpose of coercing their consent to the passage of this bill, the people of the United States have a right to expect Congress to protect them against the gigantic combination which is assailing them. Do Senators doubt the existence of this combination? I call to the stand Hon. John G. Carlisle, Secretary of the Treasury, who in 1878, on the floor of the House, of which he was then a member, in a speech of remarkable power, used the following language. It has been heard before, but will bear repetition:

I know that the world's stock of precious metals is none too large, and I see no reason to apprehend that it ever will be so. Mankind will be fortunate indeed if the annual production of gold and silver coin shall keep pace with the annual increase of population, commerce, and industry. According to my views of the subject, the conspiracy which seems to have been formed here and in Europe to destroy by legislation and otherwise from three-sevenths to one-half the metallic money of the world is the most gigantic crime of this or any other age. The consummation of such a scheme would ultimately entail more misery upon the human race than all the wars, pestilences, and famines that ever occurred in the history of the world.

The absolute and instantaneous destruction of half the entire movable property of the world, including houses, ships, railroads, and other appliances for carrying on commerce, while it would be felt more sensibly at the moment, would not produce anything like the prolonged distress and disorganization of society that must inevitably result from the permanent annihilation of one-half the metallic money of the world.

Mr. President, this testimony of Mr. Carlisle needs no comment. He denounces the conspiracy, formed "here and in Europe," to destroy by legislation or otherwise from three-sevenths to one-half of the metallic money of the world as the greatest crime of this or any other age. The same men, or their successors, animated by the purpose which moved the conspirators in 1873 to demonetize silver, are the conspirators of to-day, seeking the repeal of the Sherman bill, and, through that, the destruction of silver as a money metal. They are doubtless amused to hear gentlemen who vote for the unconditional repeal of the Sherman bill, and thereby vote against the coinage of another dollar of silver, claim to be bimetallists. They know that the power which destroyed silver in 1873, and is able to sweep it from the statute book in 1893, can and will never be overcome for the establishment of bimetallism by anything short of a financial and political revolution.

Those who cast such votes, honest and conscientious as I admit them to be, will have the consolation (if it be a consolation) of knowing that they have done all in their power to strike down silver as a money metal, to banish bimetallism from our system, and to establish gold as our sole primary metallic money; for

our silver coin is, by the bill passed by the House and now before us, in legal effect, made redeemable in gold.

I make no apology, Mr. President, for reading here an extract from the very able speech of Hon. WILLIAM H. HATCH, of Missouri, recently made in the House of Representatives, giving valuable information on the subject of the present panic, its origin, etc:

And if you desire to know the present, direct, and most potential cause of the present panic and money famine, it can be traced directly to the action and declared purposes of the bankers of New York City and other large money centers of the Government. And shrewd, astute, and able as they arrogantly claim to be, their babbling and bullying declarations furnish the most damaging testimony against them.

I will read some extracts from a great New York paper, one which is at the very head of New York journalism—my friend from New York [Mr. CUMMINGS] will not controvert that statement—a paper that claims to have the courage of its own convictions, a paper independent in all things, consistent in but few [laughter], though claiming to be in the main Democratic. I read from the New York Sun of Friday, April 28. After reciting some of the incidents of the enjoyable conference between Secretary Carlisle and the bankers, it says:

"As the Secretary outlined the policy of the Government, it was that nothing would be done that in any way would retard or check the determination of the Cleveland Administration concerning the repeal of the Sherman law. The Secretary went over the currency laws of the country, and said that they were in bad shape, and needed revision. He said the revision should start with the Sherman law. There is a determination, also, to show to the miners of silver the evil effects of the Sherman law on their fortunes.

"President Cleveland's advisers have told him that the only way to induce the Western and Southwestern Senators and Congressmen to consent to the repeal of the Sherman law, is to demonstrate to their constituents that they are losing money every day that this law is in operation. The missionary work in that direction has been started by a number of the banks in the solid communities of the East. They are daily refusing credits to the South, Southwest, and West, fearing the effects of the Sherman law.

"The Chicago bankers, it was said, are carrying out the same line of policy. Secretary Carlisle, in his talk with the bank presidents, made his stand very clear. It is to be heroic treatment all the way through on the Sherman law, and possibly by the next session of Congress the silver mine owners and the adherents of silver in the Senate and House will be ready to consent to a repeal of the law.

"The bank presidents, replying to Secretary Carlisle, cordially informed him that they would be ready at all times to coöperate with him in the successful administration of the financial policy of the Government. Everybody shook hands, and there was harmony all round." [Laughter.]

The New York Sun of Saturday, April 29, in its financial column, says:

"The conference yesterday between Secretary Carlisle and a number of the bankers of this city was of great value in that it resulted in a definite understanding of the financial policy of the Administration, as indicated in this column last Tuesday. That policy is to interpose no obstacle to the natural operations and logical results of the Sherman law. In a word, the Administration proposes to allow the people to reap the rewards of their own folly."

Was my friend from New York [Mr. CUMMINGS] in the city of Washington on the first day of May last?

Mr. CUMMINGS. I was.

Mr. HATCH. I thank the gentleman for giving me that information, because it furnishes a key to the whole situation. The New York Sun, in its Washington letter, published May 1, 1893, says——

Mr. CUMMINGS. Will the gentleman permit an interruption?

Mr. HATCH. Yes, sir.

Mr. CUMMINGS. The gentleman's statement is correct, but his assumption is erroneous. [Laughter.]

Mr. HATCH. That remark is simply evoked by the gentleman's modesty. [Laughter.] I will read this statement:

"The statement of Mr. Carlisle to the New York bankers makes it clear that, while Mr. Cleveland works in Congress, the bankers will be expected to work, not in New York only, but throughout the country, doing their utmost to pinch business everywhere in the expectation of causing a money crisis that will affect Congress powerfully from every quarter. There is an explicitness in these declarations and a boldness in making them that would be astounding were not the country too familiar with Mr. Cleveland and his methods to be astonished by anything from him."

The circulation and importance of this paper warrant the assertion that Mr. Carlisle read these statements. I have watched in vain for any denial or even modification of them. On the contrary, proofs as strong as Holy Writ are accumulating to justify and prove their correctness.

Now, my friends, there is the beginning of this money crisis.

The publication quoted by Mr. HATCH has been quoted from New York to San Francisco and has never been controverted or denied. The proofs piled up in this debate, both in the Senate and House, in support of the truth of the proposition, that this panic was deliberately brought about for the purpose of placing the people in duress, in order to compel their assent to the repeal of the Sherman bill and their acceptance of all its consequences in the revolutionary and radical changes in our monetary system, is so conclusive as to leave no room for doubt.

I take the liberty of using here again a quotation from the Philadelphia Press, one of the great newspapers of the country, which has been adverted to here and in the other House, as follows:

The New York banks for several days have been endeavoring to bring a home influence on United States Senators to induce them to vote for the repeal of the July silver law.

To this end correspondents of the New York banks in the West and South have been told that they need not expect to get money from New York until the purchasing clause was repealed, and the Southern and Western bankers have been strongly urged to write to their Senators and to insist that they work and vote for immediate repeal. This movement has given rise to the recent feeling in New York that the silver majority in the Senate could be overcome, as the influence of the banks of the metropolis, when concentrated on any object, is regarded as invincible. There is a feeling that the strain is not as great as it was, and improvement is hoped for. Some anxiety exists as to the action of savings-bank depositors when the thirty and sixty day limit expires next month. The requirements of money for the crops will also be a potent factor, but no one is disposed to contemplate future conditions, especially if they are likely to be unpleasant.

Mr. VANCE. If it would not interrupt the Senator from Texas, while he is on that point I will state that I received a letter this morning from a very respectable business gentleman in Salisbury, N. C., inclosing a letter from a New York banker, which is very short, and with his permission I should like to read it.

Mr. COKE. Certainly.

Mr. VANCE. The letter is as follows:

NO. 3 BROAD STREET, NEW YORK, *August 31, 1893.*

DEAR SIR: We are obliged to you for your favor of the 29th instant offering loan on your mills—

This gentleman is connected with a large cotton mill at Salisbury—

which appears to be very good. It is not in our line, however, and we don't know any parties here who could handle the paper. We hardly think that the times have sufficiently improved to warrant negotiations.

The Senators from your country are not looked upon as promoters of the general welfare. If their stand represents the views of your people on financial matters, it will be very difficult for you to secure any accommodation from capitalists in this section until there is a decided change.

Yours, truly,

E. D. SHEPARD & CO.

I. H. FOUST, Esq.,
Secretary, Salisbury, N. C.

Mr. COKE. I take the following from the New York Sun of April 29:

Let us point to another fact, and we are done. Never before have the large banking institutions of Chicago and the West ordered their gold in such large quantities direct from Europe, and in this fact is found one reason why our bankers are puzzled over the anomaly that although all these millions are coming to the country they experience little or no relief therefrom. The other reason, gentlemen, is, in order to force the repeal of the Sherman act and to quickly establish your power over the plain people of this land, you first sent out of the country one hundred and ten millions of the people's currency in order to assist the Rothschilds to demonetize silver in Austria and elsewhere, and then let it remain there, to teach the West and South an "object-lesson," as the President called it, until you found it was necessary to recall it in order to save your own house from destruction. Now, you have not only taught the West and the South an object-lesson, but yourselves one as well, and you can be sure of it.

These quotations from the leading papers of the country could be extended greatly beyond the time I can give to them, all establishing the existence of the great conspiracy.

Mr. President, when the Sherman act was on its passage through the Senate I voted and spoke against it, believing it a bill that should not pass. That bill repealed the Bland act of 1878, which partially remonetized silver and provided for the coinage of not less than two nor more than four million legal-tender silver dollars monthly. It is now proposed to repeal the Sherman act, without restoring the Bland act or in any other way providing for silver coinage.

The House bill now before us, as well as the substitute reported from the Finance Committee, provides for the unconditional repeal of the Sherman act, making no provision for or recognition of silver coinage. The House bill is, in my judgment, the more direct and manly mode of dealing with the subject. It repeals the Sherman act, destroys silver without making any apology for it, and makes provision for disposing of the remains (the coined silver) by making them redeemable in gold, if this is necessary to preserve their parity with that metal. It disposes of the silver question and leaves nothing undone that is demanded by the gold monometallists.

The empty declaration of the Senate substitute in favor of bimetallism, in the same enactment that destroys bimetallism and establishes gold monometallism, is so grotesquely inconsistent as to need no comment.

I shall cast my vote against either or both of these bills. It is generally agreed that the Sherman act has had little or nothing to do with bringing about the present financial disturbance, and that the exportation of gold attributed to it is for the most part a natural and legitimate outflow for the liquidation of a large trade balance existing against the United States, which is now and for some time, notwitstanding the Sherman act, has been rapidly returning for the purchase of our agricultural and other products.

The legal-tender Treasury notes paid out under that act for silver bullion, amounting to about $50,000,000 each year, has been a much-needed accession to our volume of circulation. Its operation in this respect has been most beneficent. This act has been made a stalking-horse, behind which the plans for the demonetization of silver and the issuance of gold bonds for the benefit of the national banks have been perfected and pushed by a band of reckless and unscrupulous conspirators against the peace, welfare, and prosperity of the people of the United States.

The President of the United States and his Secretary of the Treasury are honest, patriotic men, devoted to what they conceive to be the best interests of the country, but they have been deceived, duped, and imposed on, and their confidence betrayed by the bold, bad men, who, on a cold calculation of enormous profit to themselves and their confederates, backed by unlimited wealth, have been able to control the influences which have pre-

cipitated the present unhappy monetary conditions upon the country.

Mr. President, the victory of organized capital against the people, if this bill shall pass, will be a memorable one. But the people have been taken unawares. They have been deceived and betrayed. Solemn pledges made to them have been broken and trodden under foot. They will never submit to the domination of the money-changers. The day the pending bill becomes law, if it shall pass, will mark a renewal of the contest, to be fought to a finish. The supremacy of the American people in the administration and control of their own Government will yet be vindicated.

Mr. BERRY. The Senator from Kansas [Mr. PEFFER] desires to take the floor on this question for the purpose of making some remarks. I have asked him to yield to me to make a motion to go into executive session for a short time, for the reason that it is absolutely important certain officers should be confirmed to-day in order that they may take possession of the offices and that the Outlet may be opened on the 16th of September, as has been announced by proclamation of the President. I therefore move that the Senate proceed to the consideration of executive business, with the understanding that we shall go into legislative session again and the Senator from Kansas will then take the floor.

Mr. ALLISON. I rose merely to call attention to the fact that the Senator from Nevada (Mr. STEWART) gave notice some days ago that he would like to take the floor to-morrow morning. I hope that there will be nothing done to interfere with that arrangement.

Mr. ALDRICH. We shall go back into legislative session to-day.

Mr. ALLISON. Oh, to-day. I did not understand.

Mr. VOORHEES. I will state to the Senator from Iowa that I expect to move to go back into legislative session this afternoon. This is not to be the close of to-day's legislative session.

Mr. ALLISON. Very well.

EXECUTIVE SESSION.

Mr. BERRY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After thirty-five minutes spent in executive session the doors were reopened.

PURCHASE OF SILVER BULLION.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to repeal a part of an act, approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes," the pending question being on the amendment proposed by Mr. PEFFER to the amendment of the Committee on Finance.

The VICE-PRESIDENT. The Senator from Kansas [Mr. PEFFER] is entitled to the floor.

Mr. PEFFER. I ask that the pending amendment to the amendment of the committee may be read.

The VICE-PRESIDENT. The amendment to the amendment will be read.

The SECRETARY. At the end of line 13, in the amendment reported by the Committee on Finance, it is proposed to insert:

That the standard for both gold and silver coins of the United States shall hereafter be such that of one thousand parts by weight nine hundred shall be of pure metal and one hundred of alloy; and the alloy of the silver coins shall be of copper; and the alloy of the gold coins shall be of copper and silver: *Provided*, That the silver do not exceed one-half of the whole alloy.

SEC. 2. That of the silver coins the dollar shall be of the weight of 412½ grains; the half dollar of the weight of 206¼ grains; the quarter dollar of the weight of 103⅛ grains; the dime, or tenth part of a dollar, of the weight of 41¼ grains. And that dollars, half dollars, and quarter dollars, and dimes shall be legal tenders of payment, according to their nominal value, for any sums whatever.

SEC. 3. That of the gold coins the weight of the eagle shall be 258 grains; that of the half eagle 129 grains; and that of the quarter eagle 64½ grains. And that for all sums whatever the eagle be a legal tender of payment for $10, the half eagle for $5, and the quarter-eagle for $2.50.

SEC. 4. That the silver coins heretofore issued at the Mint of the United States and the gold coins issued since the 31st day of July, 1834, shall continue to be legal tenders of payment for their nominal values on the same terms as if they were of the coinage provided for by this act.

SEC. 5. That gold and silver bullion brought to the Mint for coinage shall be received and coined, by the proper officers, for the benefit of the depositor: *Provided*, That it shall be lawful to refuse, at the Mint, any deposits of less value than $100 and any bullion so base as to be unsuitable for the operations of the Mint: *And provided also*, That when gold and silver are combined, if either of these metals be in such small proportion that it can not be separated advantageously, no allowance shall be made to the depositor for the value of such metal.

SEC. 6. That when bullion is brought to the mint for coinage it shall be weighed by the treasurer, in the presence of the depositor, when practicable, and a receipt given which shall state the description and weight of the bullion: *Provided*, That when the bullion is in such a state as to require melting before its value can be ascertained, the weight after melting shall be considered as the true weight of the bullion deposited.

SEC. 7. That all provisions of existing laws relating to coinage which are not inconsistent with the provisions of this shall be construed in aid of the execution of this act.

SEC. 8. That all provisions of law in conflict with the provisions of this act are hereby repealed.

SEC. 9. That this act shall take effect and be in force immediately.

Mr. PEFFER. As it is late, if it be not the disposition of the Senate to remain in session an hour, I have no objection to yielding for the present and continuing my remarks at another time. I do not wish to be placed in the position of obstructing the discussion, but I simply suggest, as a matter of convenience to the Senate, that I am ready to proceed now if it be the pleasure of the Senate to hear me, and shall probably occupy an hour.

Mr. HARRIS. Does the Senator from Kansas prefer that the matter should go over until to-morrow?

Mr. PEFFER. I can not say, Mr. President, that I prefer it to go over. I simply make this suggestion for the Senate to consider and act upon. I do not desire to have Senators sit longer, unless they are entirely willing to do so. I do not wish to speak to empty seats.

Mr. VOORHEES. Under ordinary circumstances it would afford me absolute pleasure to respond to the Senator from Kansas by asking that the bill may go over until to-morrow; but, under the circumstances, I am not at liberty to do so. Much as I regret to incommode and interfere with the Senator's personal accommodation, I do not feel that I am at liberty at present to consent to an adjournment. The Senator will secure as patient and candid a hearing at this hour as at any other; but I am not at liberty to do otherwise than economize time. I trust the Senator will understand that this is with the utmost respect for him, and, with regret on my part that the condition of business is such that I feel warranted in pursuing no other course, I shall ask the Senate to continue in session.

Mr. JONES of Nevada (at 3 o'clock and 57 minutes p. m.). If the Senator from Kansas will permit me, I move that the Senate do now adjourn.

Mr. HALE. Let us have the yeas and nays on that.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BUTLER (when his name was called). I have a general pair with the Senator from Pennsylvania [Mr. CAMERON], but, as I believe he would vote "yea" on this question if present, I vote "yea."

Mr. HARRIS (when his name was called). I am paired with the Senator from Vermont [Mr. MORRILL]. I should vote "yea" if that Senator were present.

Mr. WALTHAEL (when his name was called). I am paired with the Senator from Rhode Island [Mr. DIXON].

The roll call was concluded.

Mr. DOLPH (after having voted in the negative). Has the Senator from Mississippi [Mr. GEORGE] voted?

The VICE-PRESIDENT. He is not recorded.

Mr. DOLPH. Then I withdraw my vote, as I am paired with that Senator. I did not observe that he was not in the Chamber.

The VICE-PRESIDENT. The vote of the Senator from Oregon will be withdrawn.

Mr. DOLPH. Has a pair been announced with the Senator from Connecticut [Mr. HAWLEY]?

The VICE-PRESIDENT. No pair has been announced with that Senator, as the Chair is advised.

Mr. DOLPH. Then I will take the liberty of transferring my pair with the Senator from Mississippi [Mr. GEORGE] to the Senator from Connecticut [Mr. HAWLEY], and shall vote. I vote "nay."

Mr. VANCE (after having voted in the affirmative). I am paired with the Senator from Michigan [Mr. MCMILLAN], who, I understand, has not voted. I therefore withdraw my vote.

The VICE-PRESIDENT. The vote of the Senator from North Carolina is withdrawn.

The result was announced—yeas 20, nays 31; as follows:

YEAS—20.

Allen,	Call,	Irby,	Pugh,
Bate,	Carey,	Jones, Ark.	Roach,
Berry,	Coke,	Jones, Nev.	Shoup,
Blackburn,	Daniel,	Mitchell, Oregon	Teller,
Butler,	Dubois,	Pasco,	White, Cal.

NAYS—31.

Aldrich,	Gallinger,	McPherson,	Stockbridge,
Allison,	Gibson,	Manderson,	Turpie,
Caffery,	Gorman,	Mills,	Vest,
Cullom,	Gray,	Palmer,	Vilas,
Davis,	Hale,	Peffer,	Voorhees,
Dolph,	Hoar,	Perkins,	Washburn,
Faulkner,	Hunton,	Proctor,	White, La.
Frye,	Lindsay,	Smith.	

NOT VOTING—34.

Brice,	Chandler,	Dixon,	Hansbrough,
Camden,	Cockrell,	George,	Harris,
Cameron,	Colquitt,	Gordon,	Hawley,

Higgins,	Mitchell, Wis.	Power,	Vance,
Hill,	Morgan,	Quay,	Walthall,
Kyle,	Morrill,	Ransom,	Wilson,
Lodge,	Murphy,	Sherman,	Wolcott.
McMillan,	Pettigrew,	Squire,	
Martin,	Platt.	Stewart.	

So the Senate refused to adjourn.

The VICE-PRESIDENT. The Senator from Kansas will proceed.

Mr. PEFFER. Mr. President, it will be observed that the proposed amendment is a copy of sections 8, 9, 10, 11, 14, and 15 of the act of January 18, 1837, which changed the standard weight of coins, reducing the alloy. The act of June 28, 1834, had reduced the weight of gold in the gold coins 6 per cent, leaving the weight of silver coin what it was.

My object in presenting the amendment in this form is to restore the old law as it was given to us by the first generation after the coinage of 1792 had been established by the fathers of the Republic. We insisted all along during the last political campaign, during the campaign of 1890, and ever since the silver-coinage question has been before the people, that all we asked for was a restoration of the old law. I have copied those sections of the law verbatim, with the single exception that the provisions for the coinage of the 5-cent piece are omitted. With that exception the words are the same as they were in the act of 1837.

In the discussion of this proposed amendment I wish to call attention to three or four particular points and to emphasize all of them. The first one is that the Administration——

Mr. McPHERSON. If the Senator from Kansas will yield to me, I should like to make an inquiry.

Mr. PEFFER. Certainly.

Mr. McPHERSON. Is the Senator debating any proposition now before the Senate or one which he intends to offer.

Mr. VOORHEES. His amendment is before the Senate.

Mr. ALDRICH. It is the pending amendment.

Mr. PEFFER. If the Senator from New Jersey had been as alert as he usually is he would have understood that I am speaking to the pending amendment.

The first point to which I wish to call the attention of the Senate is that the Administration is proposing no discussion of the philosophy of money. It is not proposing anything in the way of a bill to which we can add either in the way of a compromise or in the way of amendment that will not wholly change the character of the bill. In other words, the Administration is giving to Congress nothing whatever to do but to repeal an existing act, so that it would seem to be at least to some extent out of order to discuss the theory of money, the philosophy of finance, or the foundation principles upon which monetary systems are builded. I shall, therefore, not go into that discussion at all; but I wish to emphasize the point that while we have been called together in extraordinary session to relieve the financial condition of the country, and at a time of the year when it is most uncomfortable, unhealthy, and inconvenient, we are given nothing upon which we can offer anything in the usual legislative order.

The Administration offers us no compromise. It does not come to us saying: "We are not altogether satisfied whether the ratio between gold and silver is just what it ought to be. We are not entirely satisfied whether we had not better submit this whole subject to some foreign tribunal. We are not quite satisfied whether we had not better abandon the American system and adopt the foreign system." Nothing of that kind is proposed, but simply the repeal of an act which is now existing and which act provides for about $50,000,000 fresh, new currency every year for the people.

Second. I wish to call attention to the fact that the Southern States, at least seven of them, were carried for the national Democratic ticket in the year 1892 by reason of promises which were made to the people of that magnificent agricultural region that they should have, in case the Democratic party succeeded to power, free and unlimited coinage of silver.

Third. That repeal without providing for free coinage will destroy the two old political parties; and

Fourth. That the value of the dollar unit, whether it be made of silver or of gold, is 371¼ grains of pure silver.

First, the farmers in the country with substantial unanimity have not only asked for free coinage, but wherever they have been organized they have demanded it. There probably is not one practical farmer in the country to-day—I do not mean the old farmers who became fat with the profits of agriculture when farming was profitable, and are now living in the cities while renters are tilling their farms, but I mean the farmers who are working in the soil, who are practically digging their living out of the earth—there is not one in a thousand of them who would not be glad to have again the silver coinage of the fathers. We all remember, everyone of us who was reared on a farm, that in every farmer's house under the old régime, there was always a little till in the secretary, now called a bureau, where there was a pile of half dollars and quarter dollars, and some Spanish dollars, and Mexican half dollars. It was the common currency of the farmer. It was the only money that they used. I do not remember ever to have seen a gold coin in my father's till, but invariably, when the till was opened, I saw a pile of silver money; and it was so everywhere in the East, in the West, and in the South; for, as the Senator from New Hampshire [Mr. GALLINGER] suggested to me the other day, money has always been a cash article with the farmer.

But more recently the farmers of the country largely have organized themselves. About twelve years ago, perhaps a little more than that in Texas, a movement was begun among the farmers and it extended all over the South until in 1887, at Shreveport, La., the Farmers' Union, the Agricultural Wheel (the Farmers' Union was an organization in Louisiana, the Agricultural Wheel was an organization in Arkansas), and the Alliance, which had originated in Texas, organized themselves into a national body, and at that convention there was one if not more than one representative from the State of Kansas. By the time 1889 had come around all of the farmers' organizations in the country substantially had become united in one great body, and they met in the city of St. Louis in December of that year. They indorsed the early declaration of principles of the Farmers' Alliance, which demanded the free and unlimited coinage of silver. At that convention the Knights of Labor were represented and a number of other labor organizations. They met by committees and finally agreed unanimously upon a declaration of principles, and among them was the free and unlimited coinage of silver.

I dare say that many Senators and a great many public men, especially those in the eastern portion of the country, have no idea, and have not had at any time, of the extent of that great body of farmers. In 1890 I am satisfied the membership was at least 4,000,000, not 4,000,000 voters, but there were at least two and one-half million voters in the body at that time. All of them proclaimed to the world that they not only desired, but demanded the free and unlimited coinage of silver. At that particular convention there were twenty-six States represented.

The Knights of Labor had in their declaration of principles the same demand. So far as I am aware—and my opportunities for information have been very good in that respect—there have been no organizations of either farmers or wage-workers which have not demanded what I am now asking for. And when the demand was made it was not for some new ratio; we did not talk about any new ratio; we understood the ratio then existing, that which had been established in 1837, the very act which I have incorporated in my amendment.

In 1890, when the supreme council of the Farmers' Alliance met, the doctrine was repeated; in 1891 at Indianapolis it was reaffirmed; and in 1892 the executive committee of that great body of farmers came to this body and asked us in solemn petition to grant the free and unlimited coinage of silver. I see the junior Senator from Illinois [Mr. PALMER] giving me the honor of his attention. He knows what was the feeling of the farmers of his State as represented in the Farmers' Mutual Benefit Association, a splendid organization of splendid men. That was their doctrine.

So strong had this feeling in favor of the free and unlimited coinage of silver become among the Alliance members, especially in the South and Northwest, that they were in the habit of calling their candidates before them and catechising them before they would pledge their suffrages to them. In Kansas it was common at the early stages for our people to require persons whose names were presented as candidates to hold up their hands before the convention, in order that it might be determined from actual ocular demonstration whether they were farmers or not, whether their hands were hardened from holding the plow handles.

In the South they were even more particular than that. They sent out to each of the different candidates a written request for their opinions. Not only that, but they provided them with a card, so that there might be no doubt about it. I have here a dispatch, which was given to the press from Charlotte, N. C., in 1890, calling attention to the strictness of the Farmers' Alliance with their candidates, and they mentioned a particular gentleman named Jones—I need not give the initials, because it is not necessary to identify the individual any further than the name does [laughter]—in which they requested him to sign certain demands.

The first demand was for the abolition of national banks and the substitution for their notes of legal-tender Treasury notes. The pledge under this demand, like all others, must be signed in the presence of a witness, says the card, a special line being left for the witness to sign, and it reads:

I approve the above demand, and, if elected to a seat in Congress, will endeavor to have it enacted into law.

So they go on with all the demands of the Alliance. They were so strict with the candidates in the Southern States that it attracted the attention of politicians, as it was intended to do, and it brought out a great many commendatory letters from gentlemen who were anxious to sit in one or the other branch of the Congress. I have here a copy of a dispatch from Atlanta, Ga., dated the 26th day of May, 1890. It is as follows:

Governor John B. Gordon, who is now a candidate to succeed Senator Joseph E. Brown in the Senate, has placed himself in line with the Farmers' Alliance and approved of their scheme. In a letter written to the secretary of the State Alliance to-day, after reviewing the constitution, he says:

"In view of these efforts to secure organization, during so many years of my past life, it is scarcely necessary for me to say that I hail the advent of the Farmers' Alliance as the possible final realization of a long-cherished hope; nor is it necessary, with my past record before you, to say that I indorse, without reservation and with unabated emphasis, the policy of the Alliance for the increase of the circulating medium of the country."

The General goes on speaking very kindly of the objects, the demands, and the principles of the Farmers' Alliance. The gentleman who was then General Gordon, is now a distinguished member of this body and favors the passage of the repeal bill.

Mr. GORDON. Mr. President, if it will not interrupt the Senator from Kansas, I will distinctly say that I indorse now all that I said then; but I do not indorse the Farmers' Alliance since it fell from grace.

Mr. PEFFER. The Senator from Georgia relieves me of some embarrassment, for it is not the Alliance which has fallen from grace; it is the Democratic party.

The action of Congress in 1891, in line with what had been done in the same direction by the same body in 1890, very justly as I believe, aroused the suspicion of the farmers that they were being played with; that their interests were being trifled with; that they were being pushed to the rear at a time when they ought not only to have had the attention of the law-making power, but its unflinching and unswerving support. This suspicion became quite general.

In May of 1891, a conference of farmers, wage-workers, and laborers in general, through delegates duly appointed, was called to meet in the city of Cincinnati. There were over fifteen hundred delegates, representing every farmers' organization and every labor organization in the country. After two or three days' discussion there was a platform of principles published to the world by that conference, and among the planks in the declaration of principles was one favoring the free and unlimited coinage of silver. Before the conference adjourned, arrangements were made for the organization of a new political party in case it should be deemed necessary after further conference. So rapidly did this proposed new political movement become diffused throughout the country that early in 1892 it was taking deep hold in the Southern States as well as in the Northwestern States.

I hold in my hand an editorial article, which I clipped from the Atlanta Constitution, dated March 31, 1892. I will read a paragraph of it. This, remember, was in March.

It is imperative that the Democratic party in this State, through its regular organization, proceed at once to the work of checking the progress of the third party movement in Georgia.

The Senate will understand that I am calling attention to the fact that the farmers in the South only supported the Democratic party in the last campaign because of the promises of their political leaders that they should have the sort of legislation that I am proposing here now.

The Constitution continues:

There is danger ahead, and unless the Democratic organization takes the matter in hand at once disaster will follow. The third party leaders are vigilant and enthusiastic. The organization of the movement is being systematically worked, and there is probably not a county in the State which has not been canvassed, and in which the third party has not established headquarters.

In some counties the regular Democratic executive committees have not enough members left to make a quorum, on account of the inroads of the new party.

That is the way it was in Kansas in 1890, only it was the Republican party instead of the Democratic. The trouble was well understood to be upon the money question, and that question turned, so far as the farmers were concerned, upon the coinage of silver. I gave expression to the thought when on this floor about that time that the problem before the people to be solved must be solved with a silver key. We were talking about the free coinage of silver. That was the money question at that time.

I have here another article from the Constitution, April 3, 1892:

On its face, the declaration of the Augusta Chronicle—

And this is answering some strictures upon the part of the Chronicle, published at Augusta, Ga.—

On its face, the declaration of the Augusta Chronicle that the farmers can not get a dollar without a just equivalent, is true. But it is not an argument against the free coinage of silver or against the financial relief which the farmers are demanding. The congestion of money in the centers of speculation has taken it out of circulation in these sections where it is most needed.

The whole truth of the matter is that the financiers, bankers, and speculators of the North and East have as much money as they want. The volume of currency is amply sufficient for their needs. They are always able to lay their hands on enough to meet the ordinary demands of speculation or the average necessities of business. They can not understand the demands of the people; they can not appreciate the revolution which the abnormal condition of finances is bringing about. The money of the country flies to the money centers of the North and East and stays there. In that quarter everything is serene. The smug banker rubs his hands together gleefully; the speculator counts his gains; the business man is happy with his profits. Why should anybody talk about increasing the volume of currency? We shall not present the reverse of this picture. Every reader of the Constitution, every farmer, every community in the South is familiar with it—the dearth of money and the stagnation of business.

As the campaign of education progressed the papers in the South as well as in the Northwest advocating the silver side of the money question became more and more intense in their discussion of the subject, and the disaffection was all over Georgia. I read another paragraph from the Constitution under date of April 15:

It is safe to say that two-thirds of the farmers of Georgia have indorsed the Ocala demands—

The "Ocala demands" means the demand by the Farmers' Alliance at the city of Ocala, in the State of Florida, the fall before—

It is safe to say that two-thirds of the farmers of Georgia have indorsed the Ocala demands—if not its letter, certainly its spirit.

Then below, after discussing the subject further, the editor says:

Yet, as our readers know, the question refuses to be suppressed. The victory of the Wall street contingent in the House will do more to embarrass the Democratic party than anything else, except the nomination of Mr. Cleveland.

I commend this language to the Senator from Georgia [Mr. GORDON]. I will read it again:

The victory of the Wall street contingent in the House will do more to embarrass the Democratic party than anything else, except the nomination of Mr. Cleveland. The feeling in favor of free coinage has been aggravated to such an extent that the farmers of the South are making it the leading issue, and this, in view of the effort to nominate Mr. Cleveland, which owes its origin and incentive to the Wall street bolt in New York, is putting a great strain on the party.

And now the party is beginning to feel it, Mr. President. The probable nomination of Mr. Cleveland as the party's candidate for the Presidency rendered the situation still more annoying. I have here another article (these all are from the Constitution) under date of May 3, 1892. The article begins in this way:

The danger of the Democratic party resides in that large element among the farmers which is biding its time and patiently waiting events.

That class of farmers who were not taking any active part in outdoor politics, who had their minds fixed upon the monetary question, upon silver coinage at the old ratio—that class of farmers were those who had to be attended to. Then the editor refers to a meeting held in South Carolina and refers to the fact that the whole South is becoming alive to this great question, and that unless the Democratic party takes hold of it with ungloved hands and complies with the wishes of the farmers there will be breakers in its course; and those breakers are now appearing. The article is as follows:

The danger of the Democratic party resides in that large element among the farmers which is biding its time and patiently waiting events. They are engaged in no movement of any sort; they have not gone into the third party, and they are not making any threats; they are absolutely quiescent. Yet they do not hesitate to say that if the Democratic convention caters to the gold-bug influence of the East and puts up an antisilver man on a financial plank that amounts to a straddle, they will feel themselves absolved from any further obligation to act with the Democratic party on national questions. This means, of course, that they will either join the third party, or act with the free-coinage party organizing in the far West. This means a serious Democratic division throughout the South—a division that will strip the party of a number of electoral votes.

The feeling on the part of the farmers who have not gone with the third party, but who are waiting to see what the Democratic party will do, may be judged from the frank expressions given in a meeting of the Farmer's Alliance in Fairfield County, S. C., two or three weeks ago. After the Alliance had transacted the business before it, the members resolved themselves into a farmers' meeting and discussed the political situation. The expressions of opinion were of the frankest and friendliest character. There were no politicians or would-be officeholders present to give a radical turn or interpretation to the purposes of the farmers, and the farmers carried on their debate and interchanged opinions without confusion and with a total absence of noisy demonstrations.

Finally the sense of the meeting was put in the shape of resolutions. It was resolved that in the case of the nomination for President or for State Congressmen of men who are opposed to the free coinage of silver, the farmers will not be expected to support the nominees. It was also resolved that it is neither necessary nor expedient to organize a third party until after the result of the Democratic national convention is known.

The question was discussed whether prospective bolters could honorably maintain their party affiliations. The meeting, after discussing the matter, decided that questions of national and local concern are essentially different and distinct; that the unity of the white people in State matters is essential to the preservation of white supremacy, on which depends the prosperity of

Carolina; but that there is no longer any good reason why people should not vote as they thought best for their interest and protection on all national questions.

Here the substantial and conservative farmers were speaking. They were speaking for a large body of voters, not only in Carolina, but in the whole South. The question is, will the national convention strike the party a staggering blow in the face by ignoring this attitude of the farmers? We have asked this question before and we shall ask it again. We shall continue to ask it until the convention assembles. It is a question that involves the unity of the party in the South, and a more important one will not be brought before the national body. The personality of candidates has nothing whatever to do with it; and the leaders at the North should be told now, so that they may not have the excuse of ignorance, that a compromise which Wall street can comfortably swallow will turn the stomachs of the Southern farmers.

If the junior Senator from South Carolina [Mr. IRBY] were present he would perhaps remember that at one of the meetings referred to in the article I have just read the Democratic Alliance men of South Carolina appointed their delegates to the Chicago national convention. They went upholding the free-coinage plank in their platform, but when they went home they were satisfied with the promises which had been made to them by their leaders in this makeshift, if I may so call it, that is now proposed to be attached to this bill, which means nothing unless it means that after the European nations have agreed upon what we shall do we will accept it, for in the platform no solution of the problem is suggested.

We believe in using both metals as standard money, "but every dollar must be of intrinsic value equal with every other dollar, and this must be determined by international agreement or by some sort of legislation that we will enact after we have ransacked all Europe, and I was going to say Asia, Africa, and the islands of the sea to have somebody dictate a money policy for us." Those good farmers went home relying upon the promises of their leaders, and now we find that their leaders are divided. Verily a house divided against itself can not stand.

I need but to refer to the splendid speech of the Senator from North Carolina [Mr. VANCE] a few days ago to show the truth of what I have said here, the remarks made by the junior Senator from Louisiana [Mr. CAFFERY] as to a probable difference between the people he represents and himself upon this point, and the eloquent language of the Senator from Georgia [Mr. GORDON] a few days ago. All these indications dropped from the lips of Senators from Southern States are proof, if I needed any, of the truth of what I am saying.

Repeal without providing for silver coinage means the discontinuance of silver coinage and the permanent establishment of the gold standard. This it plainly understood by all the people. Disguise it as we may, or attempt to conceal it as we may, the people of all classes understand very well that that is what the passage of this bill without amendment means. I have a copy of a recent issue of The Manufacturer, a paper published at Philadelphia, Pa. This is number 34 of the sixth volume, an established paper, not in the whirl of politics, not printed for the purpose of advancing any scheme or of inculcating any kind of partisan doctrine. I will read three short paragraphs from it:

One immediate consequence of the unconditional repeal of the silver-purchase clause, of course,—

It is a matter of course with the writer, just as it is with everybody else. I will repeat:

One immediate consequence of the unconditional repeal of the silver-purchase clause, of course, will be that no more Treasury certificates will be issued, and that the country will have just that much less increase of the volume of currency.

Proceeding:

Another result will probably be a fall of prices consequent upon the further appreciation of gold. It is hard to perceive how this can be avoided. There will be occasion for surprise if wheat does not fall to 50 cents.

Again:

The chances are, also, that this action will remove all possibility of silver remonetization in any shaped during Mr. Cleveland's Administration.

I will add to the editor's truthful language—during all subsequent Administrations, unless, and the danger hangs upon that word "unless," the people become aroused and with invincible power demand that their wishes shall be respected by the lawmakers.

Unless his views are much misunderstood he will veto any measure that may be offered to him in the silver interest.

And that means still further depreciation of values, as this writer says. The people point to the fact that wheat, and corn, and cotton, and other farm products and manufactured articles have fallen as silver has fallen since the protection of the law was taken away from it in 1873, and they expect that the fall will continue.

I present here a table showing the price of wheat in 1872 and the following years on down to 1893. These are the export prices, I believe, as they can be found by any Senator who will refer to any of the recent copies of the Statistical Abstract of the United States. Also the prices of cotton for the same years are given in another column; and the prices of silver bullion per ounce in another column:

Year.	Wheat	Cotton	Silver.	Year.	Wheat.	Cotton	Silver.
		Cents.				*Cents.*	
1872	1.47	19.3	1.32	1883	1.13	10.8	1.11
1873	1.31	18.8	1.29	1884	1.07	10.5	1.01
1874	1.43	15.4	1.27	1885	.86	10.6	1.06
1875	1.12	15.0	1.24	1886	.87	9.9	.99
1876	1.24	12.9	1.15	1887	.89	9.5	.97
1877	1.17	11.8	1.20	1888	.85	9.8	.93
1878	1.34	11.1	1.15	1889	.90	9.9	.93
1879	1.07	9.9	1.12	1890	.83	10.1	1.04
1880	1.25	11.5	1.14	1891	.85	10.0	.90
1881	1.11	11.4	1.13	1892	.80	8.7	.86
1882	1.19	11.4	1.13	1893	.72	7.3	.78

Besides that, and immediately following it, is produced a table of gold and silver produced in the world, and the commercial ratio of silver to gold for each calendar year since 1870, showing the gradual drop of silver in proportion to gold. This is a good companion piece to the table which immediately precedes it:

Production of gold and silver in the world, and the commercial ratio of silver to gold, for each calendar year since 1870.

Year.	Tons.		Ratio.	Year.	Tons.		Ratio.
	Gold.	Silver.			Gold.	Silver.	
1870			15.57	1882	169.1	2935	18.19
1871			15.57	1883	158.2	3058	18.64
1872			15.63	1884	168.7	2798	18.57
1873	159.5	2169	15.92	1885	179.8	3142	19.41
1874	150.5	1896	16.17	1886	175.8	3198	20.78
1875	161.7	2134	16.50	1887	175.5	3205	21.13
1876	172.0	2323	17.88	1888	182.8	3732	21.99
1877	189.1	2148	17.22	1889	204.7	4300	22.09
1878	197.3	2519	17.94	1890	199.7	4608	19.76
1879	180.7	2546	18.40	1891	209.2	4938	20.92
1880	176.6	2563	18.05	1892			23.73
1881	170.8	2705	18.16	1893			

A few days ago, when discussing the principal measure, I called the attention of the Senate to the fact that a number of foreign economists had selected a large number of articles in everyday use among the people. Something of the same kind appears, if I am not mistaken, in a report which was made to this body by a committee of which the Senator from Rhode Island [Mr. ALDRICH] was chairman. Finally Mr. Sauerbeck selected forty-five of the leading articles from the list and found a common divisor for their value, calling that the unit; and in his table he shows the gradual fall of the unit of those articles in conjunction with the fall of silver.

The farmers point to the fact that the general fall in prices has corresponded with and substantially in the same proportion that silver has fallen in its relation to gold. Further than that, the farmers call attention to the indebtedness of the people. They call attention to the fact that during the census years from 1880 to 1890 there were about $10,000,000,000 borrowed, chiefly from the Eastern States, for which their homes were mortgaged; that during the ten years about one-half of that amount had been paid, but that there still remained on the 1st day of January, 1890, so large an amount as to make an average indebtedness for different States that I will read to the Senate in a moment.

I wish to make it clear, first, that this average per capita is not the average for the individual debtors, but that it means a general average for the entire population of the States; that is to say, the total indebtedness of each of the different States amounts to a general average for the entire population, as the figures show. There have been just twenty States reported, as follows:

Alabama, $26; Arkansas, $13; Colorado, $206; Connecticut, $107; Illinois, $100.

Senators will understand that for a family of five persons this indebtedness in the State of Illinois will amount to $500, in the State of Connecticut it will amount to $535, in Colorado to $1,030, in Arkansas to $65, in Alabama to $130. By multiplying the figures by 5 as I go along, any one can determine for himself instantly just the amount of the average indebtedness to the family of five persons.

Indiana, $51; Iowa, $104; Kansas, $170; Maine, $49; Massachusetts, $144; Minnesota, $152; Missouri, $80; Nebraska, $126; New Hampshire, $50; Oregon, $73; Pennsylvania, $117; Rhode Island, $106; Tennessee, $23; Vermont, $84; Wisconsin, $72.

We must consider the fact that this indebtedness is entirely upon the farms and the lots in the cities. The general average is about two-thirds of the indebtedness upon the farms, while one-third is upon the lots in the cities.

Mr. GALLINGER. Will it disturb the Senator if I propound a question?

Mr. PEFFER. Not at all.

Mr. GALLINGER. In making that average of indebtedness I ask the Senator if the assets were taken into account at all in the individual cases or in relation to States? For instance, I notice that my own State is credited with an average per capita indebtedness of $50, but in my State we have $200 per capita in our savings banks alone. Of the entire population of New Hampshire there is a per capita of $200 in the savings banks. For every man, woman, and child there is that amount, aggregating $76,000,000. Yet we are charged in this calculation with being $50 per capita in debt. I wish to know if the balance was struck in any way, or if it was simply ascertained that a man owed something without reference to whether other people owed him, or whether he had railroad stock, or money in savings banks, or bank stock and other assets that would go to wipe out his indebtedness and leave him a balance.

Mr. PEFFER. The Senator has favored me by giving me a good introduction to what is to follow. Upon an examination——

Mr. CAREY. Will the Senator from Kansas allow me a moment?

The PRESIDING OFFICER (Mr. BUTLER in the chair). Does the Senator from Kansas yield to the Senator from Wyoming?

Mr. PEFFER. If he can so connect his question with the question of the Senator from New Hampshire that I shall not lose track of that, I will yield.

Mr. CAREY. The Senator has made a statement which I think a little unfair, but which was probably made inadvertently. I was looking a few minutes ago at the bulletin issued from the Census Office with reference to the State of Colorado, from which it appears that there is a mortgage indebtedness in the State of Colorado of about $89,000,000. Fifty-five per cent of that amount is in Arapahoe County, in which county is located the city of Denver. The great majority of those mortgages is on the city site where Denver is situated. If a critical examination were made of the census bulletins, it would be found that the mortgage indebtedness is on the cities and towns in the West which have been built very rapidly, and that Eastern money has been shipped out there to put up fine large buildings. We in the West had to borrow the money, as we had not money of our own.

Mr. PEFFER. I understand very well that this indebtedness is most of it for borrowed money. What the Senator says in relation to the State of Colorado may be true, and the points made by the Senator from New Hampshire [Mr. GALLINGER] may be true; yet I think before I have concluded the Senators will be satisfied that the point I am making is true, and I shall not lose sight of it.

Upon examination, you will find that all of this indebtedness is either upon farms and upon lots in the cities—the homes of the people. Some of the lots in cities like Denver, where valuable improvements had been erected, are included in the list of lots. I have no doubt that the lots upon which the Millionaires' Club have erected their splendid edifice in the city of New York are included in this list.

Mr. President, you will find that this indebtedness is upon the poor people of the States quite largely, and you will find that the money which is in the savings banks belongs to persons who are not included in this vast list of indebtedness here. You will find, furthermore, that while this indebtedness upon the farmers and wage-workers of the cities has been accumulating at the enormous rate to which I have called attention, fabulous fortunes have been amassed year after year by speculators, by wealthy manufacturers, and by railroad magnates, as we call them—the wealthy classes, the privileged classes. They have been amassing fortunes while the poor people have been losing largely.

Mr. GALLINGER rose.

Mr. PEFFER. If the Senator will wait until I get through with this point I will answer his next question.

I wish to be understood as saying that while the farmers and the working people have been growing poorer, a few people in the cities have been growing richer. Now I yield to the Senator from New Hampshire.

Mr. GALLINGER. I shall endeavor not to be offensive to the Senator from Kansas in interrupting his discussion with a question, but I desire simply to say to him—and I can speak only for my own State in matters of this kind—that of the $76,000,000 in savings banks in my own State, aggregating $200 per capita, 75 per cent of the amount is in sums less than $300, showing that it is the wage-earners, the farmers, the mechanics, and the poor men and women who are depositing this money in the savings banks.

Mr. PEFFER. Yes; but it is not that class of wage-earners whose homes are mortgaged. If it were, the debts would be paid. The small sums of $200, $300, and $400 which are deposited by wage-earners are deposited by that class of wage-workers who earn good high wages. They are usually skilled workmen and such persons as have no families, so that what little they receive is sufficient to keep them and to have something left.

Mr. GALLINGER. The point I would further make is, that if the Senator will make a careful examination of the mortgage indebtedness of my State he will find that to a very considerable extent it is upon large properties—properties held by corporations, properties held by rich men—who have been compelled, as the men have been compelled in Denver, to erect large buildings, and in that way they come in possession of a balance in addition to the mortgage indebtedness.

Mr. PEFFER. That may be true, but if the Senator will examine in the cities of his own State he will discover that the number of renters even in dear old New Hampshire has increased wonderfully in the past ten years, people living in the cities whose homes have gradually drifted away from them. I do not remember the number, and I will not risk asserting it, but he will find that a large number of the people in the cities of his own State are to-day renters, as compared with the number in 1880.

Mr. ALLISON rose.

Mr. GALLINGER. I will suggest to the Senator——

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from New Hampshire [Mr. GALLINGER] or the Senator from Iowa [Mr. ALLISON]?

Mr. PEFFER. I should prefer not to continue this discussion any further.

Mr. GALLINGER. Just one word.

Mr. PEFFER. Very well.

Mr. GALLINGER. I will suggest that what the Senator states is due to the fact that we have to-day ten times as many French Canadians in our cities, who come to work in our mills, as we had a few years ago, and they are not property-holders.

Mr. PEFFER. That is because you can get them for lower wages.

Mr. ALLISON. I wish to say one word respecting the table as applied to Iowa. It may have escaped the Senator's notice that in Iowa, of the mortgages as shown by the census bulletin, the aggregate is $150,000,000, and that upon town property, as stated by him, the mortgages amount to about $50,000,000, leaving $100,000,000 upon the farms of Iowa and property outside of the cities.

It so happens that in four counties in my State, and they are average counties, accurate and detailed accounts were taken as to the character of these mortgages and the purpose for which they were made. Two of the newer counties were taken and two of the older ones, and it appeared from actual investigation that on these mortgages 64 per cent in one county, 68 per cent in another, and a larger percentage in two others was for additional lands purchased by farmers who own their farms, and of the remainder 15 per cent was for improvements made upon those farms, leaving merely 10 per cent of the whole of this great sum for purposes not accounted for, not connected with the purchase of farms for homes. So these mortgages, as a rule in the State in which I live, show a prosperity of the farmers, and not that they are mortgaging their land because of their poverty.

Mr. PEFFER. Mr. President, now I think it would be better if the discussion should not be further interrupted.

Mr. ALLISON. I beg the Senator's pardon.

Mr. PEFFER. That is all right. If I should yield for interruptions I would possibly have to occupy a good deal more time upon this very interesting subject than the Senate would care to wait for.

Mr. CALL. I will ask the Senator from Kansas if he will yield to me?

Mr. PEFFER. For what purpose?

Mr. CALL. I inquire if the Senator prefers to go on with his remarks this evening or to yield to a motion to adjourn?

Mr. PEFFER. I understand that to-morrow as soon as the routine morning business is completed, the Senator from Nevada [Mr. STEWART] expects to address the Senate, and I do not wish to interfere with the Senator, as I know he does not wish to interfere with me. So perhaps it would be better that I should proceed now.

I was calling attention to the fact that the farmers point to these things. The farmers may be ill informed, they may not know what they are talking about. I know they were told during 1890, and they have been told a great many times since, that they did not know what they were talking about. That is what the Southern farmers were told and the farmers in Kansas, in Nebraska, in Iowa, and all through the West, wherever we undertook to talk about these things, were told by gentlemen to whom we had looked for leadership that we did not know what we were talking about, but we do. The farmers call attention

to the fact of the indebtedness resting upon the farms of the people. No matter how it came there, we need not discuss that now, and it is not introduced on my part for the purpose of criticizing the farmers or criticizing any of the particular States, but to call attention to the fact that the farmers know these things, and ask for some relief.

Every debt that is now due is payable in money upon the gold standard, and many of them were contracted at a time when silver and gold coin were the standards, and this is the reason our misfortunes have been multiplied and our debts have become burdensome. Dollars that we owe do not increase, while the property that we have out of which to purchase dollars is constantly depreciating in value.

In connection with the indebtedness of the farmers of the country I submit the following table, which shows the value of the taxable property of the people:

Preliminary statement showing the assessed valuation of real and personal property of the several States and Territories for 1880 and 1890.

[Census Bulletin No. 104, August 22, 1891.]

States and Territories.	Total assessed valuation.		Increase of assessed valuation.	Population.		Assessed valuation per capita.		Increase per cent of assessed valuation.	Increase per cent of population.
	1880.	1890.		1880.	1890.	1880.	1890.		
Total	$16,902,993,543	$24,249,589,804	$7,346,596,261	50,155,783	62,622,250	$337.01	a$387.62	43.46	24.86
Alabama	122,887,228	197,080,441	74,213,213	1,262,505	1,513,017	97.32	130.26	60.40	19.84
Arizona	9,270,214	21,434,767	12,164,553	40,440	59,620	229.23	359.52	131.22	47.43
Arkansas	86,409,364	b172,408,497	85,999,133	802,525	1,128,179	107.67	152.82	99.53	40.58
California	584,578,036	b1,071,102,327	486,524,291	864,694	1,208,130	676.05	886.58	83.23	39.72

a The assessed valuation of Oklahoma not being given, the population of that Territory is omitted in calculating the assessed valuation per capita for 1890 of the United States. *b* Annual report of 1889. *c* The State board of equalization declares that in 1880 the assessed value was 50 per cent and in 1890 only 25 per cent of the true value; hence the reduction. *d* Decrease. *e* Valuation for local purposes; amount for State purposes, $469,187,408. *f* Valuation for State purposes; amount for local purposes not reported. *g* Assessment of 1886; assessment made every five years. *h* Not including unorganized counties.

The farmers, calling attention to these things, believe that the President and Congress are treating them unfairly; and I think they are justified in that belief. They think that the President's message ignores the real cause of our troubles, and sets out only the banker's plea; and I agree with them. They fear that Congress is moved with an influence at variance with the common good and opposed to the general welfare.

The fear is well founded. What has been done in Congress thus far shows plainly that the friends of the Administration—strange as it may appear to an observing world, quite as numerous among Republicans as among Democrats—have not made and do not intend to make any investigations of the causes which brought about this disastrous state of affairs, and do not propose or intend to propose any change in our financial legislation, except only the repeal of the silver-purchasing clause of the Sherman law, which they know and we all know removes from silver the last recognition which it has as standard money. They do not come to us and say, "Let us reason together." They submit to us a single proposition, and it is in the commanding mood, or as we were taught at school, the imperative mood—repeal this law which gives to the people $50,000,000 fresh currency every year, and which has kept thousands of men at work. You set up wealth against men, gold against brains, affluence against want, speculation against labor, and demand a prompt compliance with the scheme to further increase your power over us.

As far as I am concerned and those whom I am proud to represent, we spurn your imperial decree. You offer no quarter, you need expect none. I give you warning now, we are in open rebellion against your usurpation, and bid godspeed to the coming revolution which will drive you from power and restore the Government of the United States to the people to whom it belongs.

Mr. President, it is free coinage at the present ratio which the people are asking. No other ratio was ever considered or discussed.

Again the farmers point to platform utterances and professions of orators and writers and say, "If you were false to us then, we will not believe you now;" and they submit this test: "Are you willing to couple repeal with free coinage?" That is what my amendment means. No Senator upon that side—and when I say that side, I mean the Administration side, including all the Senators here who favor unconditional repeal—has proposed anything of the kind.

I do not believe that Senators who favor this bill have any intention in the future to propose any measure at any time looking to free coinage at 16 to 1 or at any ratio. If they had

such intention, they would not stand halting in the face of a powerful public sentiment in favor of such a step. Having studied the course of Senators on this subject, I have been able to find only one reasonable explanation of their conduct, and that is that they have come to believe that the speculators and bankers are entitled to more respect than the people who perform the country's work and produce its wealth.

So believing, they are compelled to put the people off once more with promises, while they satisfy the money-changers by voting for their interests. You talk for the masses, but vote for the classes.

I ask any Senator, if you are sincere in this matter, why do you not show your faith by your works? Why has not the Senator from Indiana [Mr. VOORHEES], the distinguished chairman of the Finance Committee, or the Senator from Ohio [Mr. SHERMAN], who has so long been in the leadership of the Republican party, offered something of this kind if these Senators are bimetallists? If they want to accede to the demands of the people upon this subject, why do they not say so? Why do they not propose something looking, squinting that way, if I may use a vulgar expression? Why does not my venerable friend from Illinois [Mr. PALMER] or his colleague [Mr. CULLOM], who sits near him, both distinguished leaders in two great opposing parties and having the same view upon this question, suggest something?

The senior Senator from Illinois [Mr. CULLOM], in his speech to-day, stated that, so far as he was concerned, he would never consent to the free coinage of silver until some ratio had been established by international agreement or by legislation. I was anxious to make an inquiry of the Senator, but he did not wish to be interrupted. I was anxious to ask the Senator this question: How he would arrive at the parity between the two metals? Would he measure silver by gold, or would he measure gold by silver, or would he strike down the protection of the law from gold, putting both the metals upon the open market on an equality one with the other, and let the ratio come in the open field of competition?

I now submit that question to any Senator who believes as the Senator from Illinois does upon this question, and I will repeat it: How will you arrive at the proper parity between the two metals? Will you measure gold by silver, as the fathers did, or will you measure silver by gold, as their unworthy descendants are doing; or will you put them both on the open market, as you do wheat and cotton, and let them find their level just as you do the products of the farm?

Mr. PALMER. May I ask the Senator one question?

Mr. PEFFER. Yes, if it is not long.

Mr. PALMER. It is very short. I ask what is the Senator's suggestion on that point?

Mr. PEFFER. It is in the amendment I have offered—to restore the old law of 16 to 1. There has never been any difficulty in understanding where our people stand; there has been no difficulty in understanding where the farmers and the workers of the country, the toiling masses, are; we have been there all the time, and in our public declarations given to the world year by year we have stated it plainly.

Mr. PALMER. I will ask the Senator one more question, if he will permit me.

Mr. PEFFER. Very well.

Mr. PALMER. Will the proposition of the Senator produce the result of equality in value?

Mr. PEFFER. Yes, sir; it always did before.

Mr. PALMER. Will it now?

Mr. PEFFER. It will now. If the Senator does not agree with me, I submit this proposition to him: Let us try it a while, and see.

Mr. PALMER. I ask the Senator another question. Have we not tried it? Is it not on trial now, and has it not failed?

Mr. PEFFER. No, sir; it is not on trial now. In 1873 the silver dollar was stricken out of the list of our silver coins; in 1874, by the revision of the statutes, the silver dollars were absolutely demonetized; and when we attempted to restore the old law in 1876, 1877, and 1878 the men who believed then just as the Senator from Illinois now believes turned their backs upon the people, and said "You can not have it;" and when, in 1890, we made the same attempt, the same class of Senators and Representatives turned their backs upon the people and repeated that language "You can not have it;" and we have not had it.

The Bland act, enacted in 1878, came the nearest to free coinage. The President of the United States vetoed the bill. After it became a law every Secretary of the Treasury, from that time until the law was repealed, has done his utmost within the purview of the law to defeat the will of the people. Instead of giving us four millions worth of silver in dollars every month, they gave us but $2,000,060 worth, and instead of putting those dollars out into circulation they purposely kept them in the Treasury. There can be no question about that.

This is plain language, Mr. President; but the record proves it. It was kept in the Treasury, and kept there in order that it should not get out among the people. Finally, so strong was the demand for change, for small notes and bills or forsil ver dollars, that silver certificates were issued. The people did not go to the Treasury and deposit their silver dollars. That is a fiction of law. But the silver certificates were issued in place of the coin.

There has been a studied attempt, I assert here without any fear of contradiction, under the administration of both parties to keep silver out of circulation.

So, in answer to the Senator's question—and I speak with some feeling about it, because I believe that the people were greatly wronged by it—I say there has been no trial of free coinage, but a studied attempt to prevent a trial of it.

Mr. President, unconditional repeal will disrupt the old parties. The unconditional repeal of this law means what will be described in common parlance as the East against the West. That is not the way it will be in fact, however. During the times that followed 1860 up to 1865, when this country was at war among its own people, we were in the habit of saying the North against the South, the Northern army against the Southern army, and so on. In the contest which is coming there will be friends upon the one side in all parts of the country, and friends on the other side in all parts of the country, and the line between them will not be geographical, but it will be a line based upon the money question. That is the way the line will be.

One class will favor the gold standard, because we will drive you to it in the end. If you insist upon a gold standard, and at the same time claim to be bimetallists, we will drive you to gold monometallism, because there is no consistency in any other position when you assume that doctrine. On the other hand, you charge us with going toward silver monometallism. Be it so, Mr. President. I believe when you come down to the logic of this question, the monometallist, whether he be for silver or gold, has the advantage in the argument. You say you are bimetallists, but you will measure silver by gold, and that means the gold standard. You charge us with wanting to measure gold by silver. But we ask only that we shall return to the bimetallism of the fathers.

There will be friends of the gold standard in the future as there are now in all parts of the country, in every State, and in every county, some more, some less; but we can not work together in the same harness when we are pulling apart, and the time has come when we must take our stand for or against silver. We have gold, and we all favor retaining gold, provided, of course, we can get silver. If we can not get both, then we are in favor of striking down gold and putting them both as commodities upon the open market, and let the people who want to buy gold and silver buy them in the open market just as they buy cattle and horses and potatoes.

Mr. HOAR. Does the Senator mean that we shall have no coin?

Mr. PEFFER. No, sir; I do not mean that. I mean that the Government will purchase gold and silver alike for the purposes of coinage. It was suggested by a New York friend to me the other day in an article which he had printed in a newspaper that the Government should take possession of all the gold and silver mines in the country. I do not see why that should not be done and the Government coin all the gold and silver that the people need, and just what they need, not for foreign exchanges among individuals, not for private enterprise, not to supply individuals in their speculations, but to supply the people with a national currency, or to let it lie in the Treasury and issue paper upon it as the people may need currency.

My own individual judgment upon this matter (and I speak for no one but myself) is that it would be vastly better, as long as the people insist upon having a metallic basis for their money, to purchase gold and silver alike in the open market, coin as much of it as the people need, and issue the value of all the rest of it in paper money. After awhile we shall all come to the conclusion that we do not need any gold or silver for money purposes whatever. Our business necessities will drive us to it, just as in the line of invention in the mechanic arts the necessities of manufacturers have driven them to the invention of new machines. I was out in Nebraska a little while ago looking at the beet-sugar manufacture there and observing what the beet-growers were doing, and the proprietor showed me a machine that necessity had driven him to have invented. He offered $5,000 for a machine that would lift the beets out of the furrow and take the tops off of them, and the machine came. Every great invention has come by the necessities of mechanics and manufacturers.

Now, we have found, and never so plainly as in our recent business disturbances, that our present financial system is wholly inadequate. In time of great trouble, when the people need

money, they can get none. They can not even get out of the banks their own deposits, and when checks are sent by banks in the West, and South, and Northwest to their Eastern bankers, where money is on deposit to their credit, they can not even get their own money in cash, but are compelled to accept clearing-house certificates.

This is called a bankers' panic. Everything that has occurred within the last ninety days in relation to our monetary affairs shows more and more conclusively, Mr. President, that our banking system and our financial system is out of order. Why, I have heard learned Senators on this floor, gentlemen who have grown gray in the public service, whose voices have echoed and reëchoed in this Hall a thousand times, say that these panics are the ordinary, usual, logical, and natural sequences that follow in the line of business transactions. Why, those are alarming statements. They are as alarming as they are surprising, and we propose to continue a system which we know is defective.

So I say, Mr. President, our system being wrong, it is time we began studying whether we can not improve it in some way instead of censuring those who suggest improvements. We do not come in and ask that any wild and untried, visionary, anarchistic scheme be brought to the attention of the people, but ask that an old custom of the fathers, one that was tried and tried successfully eighty years, be restored to us.

Then if you will issue to the people as much more money in paper as they need to transact their business there will be no question about the scarcity of money, provided still further, that you reduce the rate of interest so that people can afford to pay it, and so that a money-changer can not make any more money than a blacksmith or a bricklayer or a farmer; then money will always be plenty and remain out among the people, instead of moving always to money centers.

Bearing on this subject, I present an editorial article from the Atchison (Kans.) Champion, written by a gentleman who was honored by the suffrages of the people of our State four years for the office of lieutenant-governor, a gentleman of great intelligence and very high character. He purchased a daily newspaper that had been founded by John A. Martin, one of the pioneers of Kansas. Governor Felt, after the last election, gave expression to his conclusions in this article, beginning with "Something is the matter. The people know that sure enough and appreciate it strongly." The next paragraph follows: "Reform or revolution! Which shall it be?"

Something is the matter. The people know that sure enough and appreciate it strongly. The great bulk of the owners of three-fourths of all the wealth on this continent live north of the Potomac and east of the Apalachian range. It is not the result of their superior thrift, knowledge, pluck, age, or geographical position. They are loaners of money and merchandise. The balance of the United States are borrowers of money and merchandise. Ninety per cent of all the interest paid by the borrowers of this country goes to New England, New York, and Pennsylvania. They control the money market in all the South and all the West. Four years ago the Republicans promised to attempt to remedy these conditions. Two years ago the Democrats promised free coinage of silver. Wall street raised the cry "that is for the benefit of the silver regions of the West." It was beaten.

The advocates of the gold standard own and control the country to-day. And that, too, in the face of the declaration of all parties for bimetallism. Democrats never desert their party on account of its broken promises. If they did there would be no Democratic party to-day. Republicans are independent and leave in herds when they distrust the policy or leaders of their party. The result shows that.

Reform or revolution! Which shall it be? There has never been a time in the history of the world when so many people were giving patient, thoughtful study to financial questions as at the present moment. There is something vitally wrong, and the people know it. The people know they are sick. They think they know what ails them. They are seeking the remedy. Affairs are rapidly assuming a condition when it will be the struggle between organized capital and organized citizens. Trusts and combines govern the country. They elect Congress, make and unmake laws, are intrenched in courts, and dictate party platforms. The struggle is bound to come. Resolutions can not prevent it. Party promises can not stay its course. There must be prompt, absolute reform in financial affairs or a revolution in parties. The people know that a policy which makes combines rich and individuals poor is radically wrong. Dollars combine to double their value. The people are combining to save their own. The issue is here. It must be met. To attempt to evade it is abject folly. To refuse to listen to its demands is to invite disaster. To make the fight in the interest of organized capital against organized citizens means revolution. To say that the groundswell is all caused by demagogues and shysters is to imitate the imbecility of George III, who regarded Washington as a rebel, Hancock as a demagogue, and Patrick Henry as a political adventurer. There are many grains of golden truth hidden in the train-loads of buncombe offered by the Populist movement. To disregard those truths is both unwise and unpatriotic, and swings wide open the gateway of chaos.

Both of the great political parties, the Republican party which I loved so well and the Democratic party which I fought so long and so hard and so persistently, are both going the way of all old parties that have come to the end of their usefulness. To-day the leaders could grant to the workers of the country their simple request to restore to them one of the privileges that the fathers gave them, but instead of this they turn their backs upon the people and their faces are toward Wall street. It is time that the partnership existing between the Government of the United States and the speculators shall be dissolved. The leaders of the Democratic party are pursuing precisely the same course that the leaders of the Republican party did, and, Senators, you are on breakers.

The metropolitan press, the New York World, the Herald, and others, have offered something which I wish to present to the view of the Senate.

Here is a map from the New York World. [Exhibiting.] It is a map of the States of the United States, showing which of them, in the House of Representatives, voted for the repeal bill and which of them voted against it, and then in tables which follow, attention is called to the wealth of the different States and the population, calling special attention to what the Herald a few days before had referred to as the pocket boroughs of the West, and one of the other papers referred to as the "mining camps out in the Northwest," holding up to the world the idea that it is wealth against men, dollars against muscle; that because men in Massachusetts happen to be worth more than the men in Kansas, and the people in Pennsylvania happen to be worth a little more than the people in California, and the people in New York happen to be worth a little more than those in South Carolina and Georgia, therefore they are entitled to more consideration at the hands of the National Legislature. I say to the friends of this measure that they ought to discourage upon every possible occasion such exhibitions as this. Because a man happens to be rich he is no better and entitled to no more respect on that account than the man who is poor. I know we are poor in the West, but we are proud and defiant.

Mr. HOAR. What are the numbers in the population of the States given on the map, on one side and on the other?

Mr. PEFFER. I will give the map to the Senator and let him look at it at his leisure.

Mr. HOAR. The Senator stated that the map gives the population, and I wanted to see whether——

The PRESIDING OFFICER (Mr. GORDON in the chair). Does the Senator from Kansas yield to the Senator from Massachusetts?

Mr. HOAR. Does the Senator from Kansas decline to yield?

Mr. PEFFER. I will yield to the Senator if he will not occupy much time.

Mr. HOAR. I merely wish to call the attention of the Senator to the fact that in this raid which he says is made against the people by certain wicked persons, 42,535,272 people are on the side opposed to the Senator against only 19,000,000 on the Senator's side, according to his table.

Mr. PEFFER. I would not say a word if these newspaper criticisms were based upon population. The Constitution provides that in the House of Representatives the members shall be apportioned according to population, but that is not what is presented to the country and thrown into our faces while we are trying to build up an empire in the West, while we are throwing our railway lines through the mountains and in some places are compelled to place bridges upon overhanging wires, where we are opening mines and developing an arid region, exploring and settling a continent, we are taunted in this hour of our need with our poverty. I would care nothing about the comparison if it were simply confined to numbers.

The Senator from Massachusetts, in an able and eloquent speech which he delivered in this Chamber some days ago, took occasion to defend our people against some of the charges that were made, so that I know how kindly his heart is disposed to us; and I am satisfied he will pardon me when I say to him that while I think he is not responsible for it at all, what I call the insolence of the Eastern press is something intolerable, and that the people of the West have no patience with it. We are of the same stock the Senator comes from.

I want to say to Senators that they need not fear that any great harm will come to the country by reason of the predicted disintegration of the two old parties. There is a bright, young, vigorous party now on the map of politics that is ready to strike hands with men of all other parties to make the fight for silver. I care not whether you call it Populist, whether you call it National, no matter what you call it; there is coming a union of hearts and of hands on both sides of this great question, and that in the very near future. I delivered an address in the city of Washington about two and a half years ago, before I became a member of this body by taking the oath, in which I predicted that in a few years the leaders of two old parties would be together under the management of Grover Cleveland, and they are there now.

I wish to call the attention of the Senate to the number of the people demanding silver coinage, and of the number who are opposed to it. Take the producers of this country and compare them with the absorbers. Take 20,000,000 workers, give them $300 a year apiece, and the amount of money they would use in a year would be $6,000,000,000, or ten times as much as the capital of all the national banks in the country. There are only about 8,000 bankers, while there are 20,000,000 workers. I will ask the

Senate to permit me to incorporate in my remarks a quotation from a speech that I delivered in this body a year or more ago upon this particular branch of the subject:

Men of large means, men whose business affairs are managed on a large scale, need but little money. Our foreign commerce amounts to nearly $20,000,000,000 annually, and a few millions only are needed to settle balances. All the rest is done with drafts and bills of exchange. Our internal commerce is vast in extent, amounting yearly to many thousand million dollars, yet but little money comparatively is actually handled in doing the work, and most of that is needed to pay the poor men and women whose hands perform the hardest part of the labor. The farmer once made most of the implements he used in raising his crops. The fiber in his clothing was grown on the farm, the yarn was spun there, it was woven and made into garments within a few rods of the spot where it grew. Wheat and corn and cotton and tobacco were hauled miles away to the great market towns, and there exchanged for sugar, coffee, tea, spices, and other supplies which could not be produced at home. Meat was cured, fruit preserved, and grain ground on the land where they grew; but the smokehouse and the neighborhood mill, like the wagon shop by the wayside, have disappeared. The modern farmer sells his wheat and buys his flour; sells his cattle and swine and buys his meat; he sells his fruit and buys it back in cans and jars; he sells his cotton and wool and buys them back in cloth and clothing.

All this requires money, and a great deal of it. Only fifty years ago a few dollars sufficed to carry on an ordinary farm a year; now it requires ten times as much. Wheat and cotton will not pay for wagons and shoes and coats now. Money and only money will answer.

And now, after having superseded the farmer as a mechanic and manufacturer on his own ground, having crowded him out of the business of making forks, leather, and cloth, and having pushed him from barter to cash, having wrested from him many of his ancient privileges and changed his habits of economy and self-help, having removed his defenses and exposed his interests to the organized rapacity of stronger men, his competitors have diminished the sources of his income and thus increased the number of his necessities. At a time when he needs $10 they give him but one. When the aggregate business of the country nets but 4 per cent yearly profit he is compelled to pay 8 per cent to 10 per cent, and far beyond in some instances, for the use of borrowed money. Shadows flit over his fields, his bushels and pounds do not go as far as they did once; he has more trouble to pay his taxes, and his interest dues seem larger and harder to meet than ever before.

Now, one other point, and that is, the legal status of what we call the value of a dollar. Under the act of 1792 the silver dollar was made to represent the unit of value. It was not made the unit of value, but the simple single word dollar was made the unit of value, and that dollar was to be made of silver, weighing 371¼ grains of pure silver, or, as was stated by a Senator a few moments ago, 416 grains of standard silver, changed in 1837 to 412½ grains.

If Senators will take the trouble to refer to reports of committees, first session Twenty-third Congress, 1833–'34, they will find in Report No. 278 of the House of Representatives a report of a select committee on coins, a committee which had examined carefully the coinage of the country from the beginning of our history down to our time.

Mr. COCKRELL. In what year was that?

Mr. PEFFER. In 1834.

Mr. COCKRELL. Will the Senator from Kansas yield for a motion to adjourn?

Mr. PEFFER. If it is understood that I may conclude my remarks in the morning, before the Senator from Nevada [Mr. STEWART] proceeds, I will yield.

Mr. TELLER. There will be no objection to that, I think. I have none.

Mr. PEFFER. With the understanding that I am to have the floor in the morning, I will yield.

Mr. CALL. I ask leave to offer an amendment to the pending bill. I send it to the desk, and ask that it be printed and lie on the table.

The PRESIDING OFFICER (Mr. GORDON in the chair). It will be so ordered. What is the pleasure of the Senate?

Mr. COCKRELL. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 38 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, September 5, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate September 4, 1893.

COLLECTORS OF INTERNAL REVENUE.

Moritz F. Blumenfeld, of Wisconsin, to be collector of internal revenue for the second district of Wisconsin, to succeed Earl M. Rogers, resigned.

W. K. Murphy, of Illinois, to be collector of internal revenue for the thirteenth district of Illinois, to succeed Daniel Hogan, resigned.

Furnifold M. Simmons, of North Carolina, to be collector of internal revenue for the fourth district of North Carolina, to succeed Elihu A. White, resigned.

I. C. Smith, of Michigan, to be collector of internal revenue for the fourth district of Michigan, to succeed John Steketee, resigned.

COLLECTOR OF CUSTOMS.

Lewis P. Stearnes, of Virginia, to be collector of customs for the district of Newport News, in the State of Virginia, to succeed Henry de B. Clay, resigned.

APPRAISER OF MERCHANDISE.

James E. Tucker, of California, to be appraiser of merchandise in the district of San Francisco, in the State of California, to succeed Robert A. Thompson, resigned.

POSTMASTERS.

William W. Screws, to be postmaster at Montgomery, in the county of Montgomery and State of Alabama, in the place of Charles W. Buckley, removed.

Milton A. Smith, to be postmaster at Anniston, in the county of Calhoun and State of Alabama, in the place of George B. Randolph, removed.

Chauncey M. Wright, to be postmaster at Milledgeville, in the county of Baldwin and State of Georgia, in the place of Carlos G. Wilson, whose commission expired March 27, 1893.

Albert S. Coil, to be postmaster at Beardstown, in the county of Cass and State of Illinois, in the place of Cad Allard, removed.

John Eddy, to be postmaster at Bloomington, in the county of McLean and State of Illinois, in the place of James S. Neville, whose commission expired March 26, 1893.

Isaac Fielding, to be postmaster at Champaign, in the county of Champaign and State of Illinois, in the place of John W. Spalding, removed.

John W. Potter, to be postmaster at Rock Island, in the county of Rock Island and State of Illinois, in the place of Howard Wells, removed.

William Cunningham, to be postmaster at Alexandria, in the county of Madison and State of Indiana, in the place of Joseph M. Tomlinson, resigned.

Allen H. Donham, to be postmaster at Terre Haute, in the county of Vigo and State of Indiana, in the place of David C. Greiner, removed.

Rufus H. East, to be postmaster at Bloomington, in the county of Monroe and State of Indiana, in the place of Joseph G. McPheeter, removed.

Francis M. Harbit, to be postmaster at Elwood, in the county of Madison and State of Indiana, in the place of James M. Overshimer, resigned.

Thomas A. Rush, to be postmaster at Columbus, in the county of Bartholomew and State of Indiana, in the place of Amos E. Hartman, resigned.

Henry Shireman, jr., to be postmaster at Martinsville, in the county of Morgan and State of Indiana, in the place of William H. Dryden, removed.

George W. Van Horne, to be postmaster at Muscatine, in the county of Muscatine and State of Iowa, in the place of John Mahin, removed.

Charles M. Blakesley, to be postmaster at Anita, in the county of Cass and State of Iowa, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1892; Sherman F. Myers, who was nominated by the President and confirmed by the Senate December 22, 1892, not having been commissioned.

Jonathan R. Conrey, to be postmater at Leon, in the county of Decatur and State of Iowa, in the place of Jerome L. Harvey, resigned.

Philip Eich, to be postmaster at Bonaparte, in the county of Van Buren and State of Iowa, in the place of James P. Davis, removed.

Robert E. Kearney, to be postmaster at Sheldon, in the county of O'Brien and State of Iowa, in the place of Frank T. Piper, whose commission expired March 21, 1893.

John P. Kieffer, to be postmaster at Waterloo, in the county of Black Hawk and State of Iowa, in the place of Halsey H. Saunders, deceased.

Louie E. Lange, to be postmaster at Laurens, in the county of Pocahontas and State of Iowa, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

Theodore B. Lemoin, to be postmaster at Manson, in the county of Calhoun and State of Iowa, in the place of George I. Long, whose commission expired April 1, 1893.

Louis A. Liffring, to be postmaster at Cherokee, in the county of Cherokee and State of Iowa, in the place of William M. Snell, resigned.

Henry R. Martin, to be postmaster of Oelwein, in the county of Fayette and State of Iowa, in the place of George W. Jamison, resigned.

Lewis A. Mitchell, to be postmaster at Vinton, in the county of Benton and State of Iowa, in the place of James C. Traer, resigned.

John L. Powers, to be postmaster at Carroll, in the county of Carroll and State of Iowa, in the place of John B. Hungerford, resigned.

Nelson C. Roberts, to be postmaster at Fort Madison, in the county of Lee and State of Iowa, in the place of James H. Duffus, resigned.

Joseph S. Root, to be postmaster at Charles City, in the county of Floyd and State of Iowa, in the place of Eugene B. Dyke, removed.

Justus J. Hetsch, to be postmaster at Newport, in the county of Campbell and State of Kentucky, in the place of Anne W. Jenks, removed.

Hamilton A. Belcher, to be postmaster at Farmington, in the county of Franklin and State of Maine, in the place of Josiah H. Thompson, resigned.

Henry F. Libby, to be postmaster at Pittsfield, in the county of Somerset and State of Maine, in the place of Henry F. Libby, whose commission expired January 29, 1891.

Harry B. Parker, to be postmaster at Bucksport, in the county of Hancock and State of Maine, in the place of Guy W. McAllister, whose commission expired March 19, 1893.

Frank L. Thayer, to be postmaster at Waterville, in the county of Kennebec and State of Maine, in the place of Willard M. Dunp, removed.

Jeremiah C. Byrns, to be postmaster at Ware, in the county of Hampshire and State of Massachusetts, in the place of Andrew J. Davis, resigned.

Jeremiah W. Coveney, to be postmaster at Boston, in the county of Suffolk and State of Massachusetts, in the place of Thomas N. Hart, resigned.

John W. Ellam, to be postmaster at Southbridge, in the county of Worcester and State of Massachusetts, in the place of George W. Corey, resigned.

John F. Freese, to be postmaster at East Walpole, in the county of Norfolk and State of Massachusetts, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

William G. Goldsmith, to be postmaster at Andover, in the county of Essex and State of Massachusetts, in the place of Abraham Marland, resigned.

Emory E. Harwood, to be postmaster at Spencer, in the county of Worcester and State of Massachusetts, in the place of Edward M. Bliss, whose commission expired March 30, 1893.

Andrew Shanahan, to be postmaster at Rockland, in the county of Plymouth and State of Massachusetts, in the place of Joshua S. Smith, removed.

Fred W. Smith, to be postmaster at Adams, in the county of Berkshire and State of Massachusetts, in the place of John E. Mole, whose commission expired March 26, 1893.

Edwin M. Wheelock, to be postmaster at Hopedale, in the county of Worcester and State of Massachusetts, in the place of George A. Draper, whose commission expired March 21, 1893.

John J. Enright, to be postmaster at Detroit, in the county of Wayne and State of Michigan, in the place of Ellwood T. Hance, resigned.

John F. Crocker, to be postmaster at Kearney, in the county of Buffalo and State of Nebraska, in the place of Rice H. Eaton, resigned.

John A. Cook, to be postmaster at David City, in the county of Butler and State of Nebraska, in the place of Samuel L. Brown, jr., resigned.

Rogers Scribner, to be postmaster at St. Paul, in the county of Howard and State of Nebraska, in the place of Edwin F. Chinn, resigned.

Charles W. Dayton, to be postmaster at New York, in the county of New York and State of New York, in the place of Cornelius Van Cott, resigned.

James L. Dunning, to be postmaster at Cape Vincent, in the county of Jefferson and State of New York, in the place of John Buckley, whose commission expired March 23, 1893.

Charles L. Elwood, to be postmaster at Middletown, in the county of Orange and State of New York, in the place of Ira Dorrance, whose commission expired March 13, 1893.

Henry O. Fairchild, to be postmaster at Hammondsport, in the county of Steuben and State of New York, in the place of Llewellyn H. Brown, removed.

Henry B. Graves, to be postmaster at Genova, in the county of Ontario and State of New York, in the place of Herman F. Fox, whose commission expired March 23, 1893.

James A. McKenna, to be postmaster at Long Island City, in the county of Queens and State of New York, in the place of William Richensteen, resigned.

Edward C. Reynolds, to be postmaster at Haverstraw, in the county of Rockland and State of New York, in the place of Richard W. Oldfield, whose commission expired March 30, 1893.

Andrew T. Sullivan, to be postmaster at Brooklyn, in the county of Kings and State of New York, in the place of George J. Collins, deceased.

Lewis W. Terwilliger, to be postmaster at Hancock, in the county of Delaware and State of New York, in the place of Suydam F. Wheeler, whose commission expired March 30, 1893.

PROMOTIONS IN THE ARMY.

Medical Department.

Maj. Henry R. Tilton, surgeon, to be deputy surgeon-general, with the rank of lieutenant-colonel, August 12, 1893, vice Janeway, retired from active service.

Cavalry arm.

First Lieut. Alfred M. Fuller, Second Cavalry, to be captain, August 14, 1893, vice Eaton, Second Cavalry, deceased.

Second Lieut. David L. Brainard, Second Cavalry, to be first lieutenant, August 14, 1893, vice Fuller, Second Cavalry, promoted.

Second Lieut. Walter M. Whitman, Second Infantry, to be second lieutenant, May 3, 1893, with rank from November 20, 1892, vice Andrew, First Cavalry, resigned.

Infantry arm.

Second Lieut. Julius A. Penn, Thirteenth Infantry, to be first lieutenant, July 29, 1893, vice Benham, Second Infantry, appointed regimental quartermaster.

APPOINTMENTS IN THE ARMY.

Medical Department.

To be assistant surgeons, with the rank of first lieutenant, to date from May 12, 1893:

Alexander N. Stark, of Virginia, vice Moseley, promoted.

Charles Lynch, of New York, vice Burton, retired from active service.

John S. Kulp, of Pennsylvania, vice Taylor, retired from active service.

Edward L. Munson, of Connecticut, vice Skinner, promoted.

Charles E. B. Flagg, of South Carolina, vice Hopkins, resigned.

James M. Kennedy, of South Carolina, vice De Witt, resigned.

Guy C. M. Godfrey, of Ohio, vice De Loffre, promoted.

William F. Lewis, of North Carolina, vice Suter, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate September 4, 1893.

REGISTERS OF THE LAND OFFICE.

Frank P. Alexander, of Greenville, Tex., to be register of the land office at Alva, in Oklahoma Territory.

Wilson M. Hammock, of Hartsville, Tenn., to be register of the land office at Woodward, in Oklahoma Territory.

James E. Malone, of Juneau, Wis., to be register of the land office at Perry, in Oklahoma Territory.

Robert W. Patterson, of Macon, Ga., to be register of the land office at Enid, in Oklahoma Territory.

Edward Phillips, of Natchitoches, La., to be register of the land office at Natchitoches, La.

RECEIVERS OF PUBLIC MONEYS.

Robert H. Allen, of Iuka, Miss., to be receiver of public moneys at Alva, in Oklahoma Territory.

Joseph H. King, of Anniston, Ala., to be receiver of public moneys at Perry, in Oklahoma Territory.

David H. Patton, of Remington, Ind., to be receiver of public moneys at Woodward, in Oklahoma Territory.

SENATE.

TUESDAY, *September 5, 1893.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Journal of yesterday's proceedings was read and approved.

VALUES OF EXPORTS AND IMPORTS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury inclosing a letter from the Chief of the Bureau of Statistics of that Department stating the reason why a detailed statement of the values of exports and imports carried under the several flags engaged in the foreign carrying trade during each of the last two fiscal years, called for by a resolution of the 31st ultimo, can not be furnished unless a special appropriation is made for the purpose; which, with the accompanying papers, was referred to the Committee on Finance, and ordered to be printed.

PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented three petitions of the Bankers' Association of Georgia, praying for the establishment of a subtreasury in that State; which were referred to the Committee on Finance.

Mr. QUAY presented a petition of the Window Glass Workers' Assembly, No. 300, Knights of Labor, of Pittsburg, Pa., and a petition of the Patrons of Husbandry, of western Pennsylvania

and eastern Ohio, praying for the free coinage of silver; which were ordered to lie on the table.

He also presented a memorial of the Central Labor Union, of McKean County, Pa., remonstrating against the repeal of the so-called Sherman silver law, which was ordered to lie on the table.

He also presented three petitions of business men of Pittsburg, Philadelphia, and Shawsbury, in the State of Pennsylvania, praying for the repeal of the silver-purchasing clause of the so-called Sherman law, which were ordered to lie on the table.

Mr. McMILLAN presented a petition of manufacturers, merchants, vesselmen, and other citizens of Detroit, Mich., praying for the repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

Mr. HOAR presented the petition of Timothy T. Sawyer, president of the Warren Institution for Savings, and other citizens of Charlestown, Mass., and the petition of the George H. Gilbert Manufacturing Company and numerous citizens of Ware, Mass., praying for the unconditional repeal of the so-called Sherman silver law; which were ordered to lie on the table.

Mr. FAULKNER presented a petition of the Board of Trade of Parkersburg, W. Va., praying for the repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

Mr. BUTLER presented the petition of Thomas D. Richardson and others, representing the people of Beaufort, S. C., praying for Federal aid and relief for the sufferers by the late cyclone; which was referred to the Committee on Appropriations.

Mr. WALTHALL presented a petition numerously signed by citizens of Port Gibson, Miss., praying for the repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

Mr. KYLE presented a petition of citizens of Aberdeen, S. Dak., praying for the repeal of the so-called Sherman silver law; which was ordered to lie on the table.

He also presented a memorial of citizens of Aberdeen, S. Dak., remonstrating against the repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

Mr. MITCHELL of Wisconsin presented the petition of Stephen Bull, Jackson I. Case, B. B. Northrup and others, merchants and manufacturers of Racine, Wis., praying for the repeal of the purchasing clause of the so-called Sherman silver law and favoring the appointment of an expert commission to devise an improved system of national currency; which was ordered to lie on the table.

Mr. HANSBROUGH. I present a petition of 14 residents of Northwood, N. Dak., praying for the repeal of the so-called Sherman silver act. This petition seems to bear the impress of having been sent out from a common center. It is nicely printed, and has evidently been sent to interior banks throughout the country. I find on it a note, which reads:

Get signed and send to your Senator or Representative without delay.

I move that the petition lie on the table.

The motion was agreed to.

Mr. BATE presented a petition of citizens of Lake, Dyer, and Obion Counties, in the State of Tennessee, praying that an appropriation be made for the purpose of building a levee from Hickman, Ky., to the highlands at or near Island No. 10, in the State of Tennessee; which was referred to the Committee on Commerce.

Mr. ALLISON presented a petition of the Business Men's Association of Davenport, Iowa, praying for the repeal of the Sherman silver law, and for the appointment of a representative commission to inquire into the whole subject of the currency, to report to the next regular session of Congress; which was ordered to lie on the table.

He also presented a resolution of Algona Grange, No. 1684, Patrons of Husbandry of Iowa, favoring the coinage of all gold and silver mined in the United States, remonstrating against the repeal of the law taxing State banks, and praying that all money shall be issued by the General Government; also favoring an increase in the currency equal to $50 per capita; which was ordered to lie on the table.

He also presented memorials of the Advance Farmers' Alliance, No. 568, of Shelby County, and of the Lynn Farmers' Alliance of Montgomery County, in the State of Iowa, remonstrating against the repeal of the so-called Sherman silver law, unless there be first enacted a law providing for the free and unlimited coinage of silver at the present ratio of 16 to 1; which were ordered to lie on the table.

He also presented a petition of members of the Mississippi Valley Hardware Association, and a petition of business men of Cedar Rapids, Iowa, praying for the repeal of the silver-purchasing clause of the so-called Sherman law; which were ordered to lie on the table.

Mr. PALMER presented a petition of business men of Joliet, Ill., praying for the unconditional repeal of the so-called Sherman silver law; which was ordered to lie on the table.

BILLS INTRODUCED.

Mr. LODGE introduced a bill (S. 837) for the relief of Albert Locke, alias Shipley; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Military Affairs.

Mr. GALLINGER introduced a bill (S. 838) for the relief of Col. Jesse H. Strickland, Eighth Tennessee Cavalry, United States Volunteers; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. QUAY (by request) introduced a bill (S. 839) granting an increase of pension to George J. Bond; which was read twice by its title, and referred to the Committee on Pensions.

He also (by request) introduced a bill (S. 840) granting an increase of pension to James E. Engle; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 841) to amend sections 44 and 30, title 52, of the Revised Statutes of the United States; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Naval Affairs.

Mr. BUTLER introduced a bill (S. 842) to provide for the purchase of lands adjoining the United States naval station, Port Royal, S. C.; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. McPHERSON introduced a bill (S. 843) for the relief of Bvt. Col. Thomas P. O'Reilly; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. PETTIGREW introduced a bill (S. 844) for the relief of W. L. Hall; which was read twice by its title, and referred to the Committee on Claims.

He also introduced a bill (S. 845) granting a pension to George Gamache; which was read twice by its title, and referred to the Committee on Pensions.

Mr. ALLISON introduced a bill (S. 846) for the construction of a public building at Clinton, Iowa; which was read twice by its title, and referred to the Committee on Public Buildings and Grounds.

He also introduced a bill (S. 847) to amend section 707 of the Revised Statutes; which was read twice by its title, and referred to the Committee on the Judiciary.

He also introduced a bill (S. 848) authorizing the Secretary of War to place the name of Hugh McClain on the roll of the First Regiment of Iowa Cavalry; which was read twice by its title, and referred to the Committee on Military Affairs.

He also introduced a bill (S. 849) for the relief of Jean Louis Legaré, of Dominion of Canada; which was read twice by its title, and referred to the Committee on Foreign Relations.

He also introduced a bill (S. 850) to refund to the State of Iowa the amounts paid by said State to the noncommissioned officers and enlisted men of the Second and Third Regiments Iowa Volunteer Infantry, for gray uniforms charged to them by the United States mustering and disbursing officers when they were mustered into the United States service in May and June, 1861, and afterwards ordered to be discarded and blue uniforms substituted therefor; which was read twice by its title, and referred to the Committee on Military Affairs.

He also introduced a bill (S. 851) to settle and adjust the claims of any State for expenses incurred by it in defense of the United States; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Claims.

Mr. McPHERSON (by request) introduced a bill (S. 852) to incorporate the National Light and Fuel Company; which was read twice by its title, and referred to the Committee on the District of Columbia.

Mr. PEFFER (by request) introduced a bill (S. 853) to advance learning, the arts and sciences, and to promote the general welfare by founding a college of scientific learning in the District of Columbia; which was read twice by its title, and referred to the Committee on the District of Columbia.

PURCHASE OF SILVER BULLION.

Mr. FAULKNER. Mr. President, I desire to give notice that I shall ask the indulgence of the Senate on Friday, immediately after the morning business, to submit some remarks upon the pending financial measure, which is the unfinished business.

DISTRICT GARBAGE.

Mr. VANCE. I submit a resolution and ask its reference to the Committee on the District of Columbia, as it relates to the abatement of a nuisance in this District.

The resolution was read, and referred to the Committee on the District of Columbia, as follows:

Be it resolved, etc., That the Commissioners of the District of Columbia are hereby directed to immediately report to the Senate why they have permit-

ted a factory for boiling and manufacturing into fertilizers all garbage and dead animals collected in the District of Columbia within the city limits at the foot of South Capitol street.

Also the distance of said factory from the Capitol, and if its location at said point is not in violation of the health ordinances of the District of Columbia, approved by joint resolution of Congress April 24, 1820;

Also, how far said factory is located from any sewer, and if the offal escaping therefrom is not drained into the open gutters of South Capitol street and onto the stagnant marshes in the rear of said factory, in violation of an ordinance of the old corporation of Washington, approved August 16, 1862.

Also, if the contractor is not required by the terms of his contract to remove outside of the limits of the District of Columbia all garbage and dead animals that he collects, or consume them to ashes; and, if so, why he is allowed to manufacture such decayed and offensive substances into fertilizers within the limits of the city of Washington.

Also, if he is paid an extra price for manufacturing said garbage and dead animals into fertilizers, instead of incinerating them; and, if so, how much.

Also, if said contractor is paid an extra price for collecting, daily, the garbage of the entire cities of Washington and Georgetown; and, if so, how much; and if the complaints from citizens and reports of inspectors do not show that said garbage is not collected daily.

HOUR OF MEETING.

Mr. VOORHEES. I submit a resolution for consideration, which I ask may go over, subject to be called up for action to-morrow morning at the close of the routine business.

The resolution was read, as follows:

Resolved, That on Thursday, the 7th day of September, and until further order of the Senate, the daily hour of meeting be 11 o'clock a. m.

The VICE-PRESIDENT. The resolution will go over under the rule.

JOINT COMMITTEE ON FINANCIAL QUESTIONS.

Mr. MORGAN. I submit a concurrent resolution and ask that it be printed and go over until to-morrow.

The concurrent resolution was read, as follows:

Concurrent resolution to raise a joint committee of the two Houses to consider questions of finance, etc.

Resolved by the Senate (the House of Representatives concurring), That a committee of the two Houses of Congress be raised, to consist of seven Senators, to be appointed by the President of the Senate, and seven Representatives, to be appointed by the Speaker of the House of Representatives, who, together shall constitute a joint select committee on finance, the chairman of which shall be chosen by the committee, by ballot, and he shall appoint a clerk to said committee.

2. Said joint committee shall hold its sessions in the Capitol, and in such other places as a majority thereof shall direct, and may employ a stenographer, and such messengers as shall be found necessary, and shall have power to direct the administration of oaths and to send for papers and persons. Eleven members of said joint committee shall constitute a quorum to do business.

3. Said joint committee shall examine into the financial and monetary condition of the Government and people of the United States, with a view to devising means for the betterment thereof, and, to this end, shall have full jurisdiction to examine and report upon any financial or monetary question that concerns the people or the Government of the United States.

4. Said committee shall make a special examination of the following subjects, and report upon each, separately, in their recommendations to Congress, and may submit one bill or several bills to the respective Houses to carry their recommendations into effect, that is to say:

(1) The full or partial remonetization of legal-tender silver coins and the ratio of legal value that shall be established between such coins and coins of gold.

(2) The revision of the laws relating to legal tender, so as to prevent unjust discrimination in the legal-tender quality of any descriptions of money coined or issued by the United States, or for the redemption of which the Government is pledged.

(3) The repeal of the taxes upon the issues of State banks that circulate as money, and what restrictions upon the conduct of such banks are necessary for the public security and welfare, and are within the competency of Congress to provide.

(4) The actual cause of the present embarrassed condition of the people and the national banks, in reference to the character or the supply of circulating medium, and the consequent paralysis of trade and industry. And what further legislation is required to prevent the national banks from abusing their powers under the law, either by their separate dealings, or in combination, concert, or conspiracy with other banks or persons to the detriment of the Government or the people of the United States.

(5) Said joint committee may appoint subcommittees, to consist of not less than four members thereof, three members to constitute a quorum, who shall be empowered to sit in any place in the United States and to take testimony on oath to be administered by the designated chairman of such subcommittee, to be reported to the general committee. Such subcommittees shall be appointed under the resolution or order of the general committee, in such manner as they shall agree.

(6) The expenses incurred in the execution of the requirements of this concurrent resolution shall be borne in equal sums by the respective Houses of Congress, to be paid out of the contingent funds appropriated, or to be appropriated by Congress.

Mr. HARRIS. The resolution has to go to the Committee to Audit and Control the Contingent Expenses of the Senate, I think. Does it not provide that the expenses shall be paid out of the contingent fund?

Mr. BUTLER. It does.

Mr. HARRIS. Then it has by law to go to that committee.

Mr. MANDERSON. It is to be printed and lie over.

Mr. HARRIS. It may be printed and lie over; but before the Senate can act upon it it must go before the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. MANDERSON. Certainly.

The VICE-PRESIDENT. The concurrent resolution will go over and be printed.

REDEMPTION IN SILVER, ETC.

The VICE-PRESIDENT. The Chair lays before the Senate a resolution submitted by the Senator from Nebraska [Mr. ALLEN], coming over from yesterday. It will be read.

The Secretary read the resolution submitted yesterday by Mr. ALLEN, as follows:

Resolved, That the Secretary of the Treasury be directed to furnish to the Senate, without unnecessary delay, full information on the following subjects:

1. Whether the Treasury Department has, at any time, redeemed any portion of the silver or coin certificates in silver coin, as provided by the act of July 14, 1890, commonly known as the Sherman act, and if so, when and what amount has been thus redeemed.

2. What amount, in coinage value, of silver bullion purchased by the Treasury Department under the act of July 14, 1890, and subject to coinage, in the discretion of the Secretary of the Treasury, remains uncoined, and why said silver bullion has not been coined and paid out, in accordance with the provisions of said act.

3. Whether any part, and, if so, what part, of the paper money redeemed in gold by the Treasury Department since March 4, 1893, was canceled after redemption or in any manner withheld from general circulation.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

Mr. ALLISON. I suggest to the Senator from Nebraska that he strike out the words "without unnecessary delay." I think that phrase is unusual in a resolution of inquiry.

Mr. ALLEN. I will do so. Let the resolution be so modified.

The VICE-PRESIDENT. The amendment suggested will be stated.

The SECRETARY. In line 2 of the resolution, after the word "Senate," strike out the words "without unnecessary delay."

Mr. ALDRICH. I suggest to the Senator from Nebraska that there are no silver certificates issued under the act of 1890. I suppose he means United States Treasury notes. I suggest that a change be made in the resolution in that respect also.

Mr. VOORHEES. They are all Treasury notes under that act.

Mr. ALDRICH. They are all Treasury notes issued under the act of 1890.

Mr. ALLEN. I will so modify the resolution.

The VICE-PRESIDENT. The proposed modification of the resolution will be stated.

The SECRETARY. In line 5, after the word "the," strike out "silver or coin certificates in silver coin" and insert "Treasury notes;" insert "for" after "provided," in line 6; and in line 8, after the word "act," insert "in silver coin;" so as to make the paragraph read:

First. Whether the Treasury Department has, at any time, redeemed any portion of the Treasury notes provided for by the act of July 14, 1890, commonly known as the Sherman act, in silver coin, and if so, when and what amount has been thus redeemed?

The VICE-PRESIDENT. The question is on agreeing to the resolution as modified.

The resolution as modified was agreed to.

ADDITIONAL GOLD CERTIFICATES.

Mr. COCKRELL. I ask that action be taken on the joint resolution (S. R. 24) for the issue of additional gold certificates, introduced by me August 31, 1893. I see that it was simply read twice and ordered to lie on the table. I ask that it be read at length.

The joint resolution was read, as follows:

Resolved, etc., That the Secretary of the Treasury is hereby directed, in pursuance of the provisions of section 254 of the Revised Statutes of the United States, to issue certificates, not at any time to exceed 20 per cent beyond the amount of gold coin and bullion in the Treasury, and to use and expend the same in payment of interest on the public debt and any other demands, obligations, or liabilities of the United States.

Mr. COCKRELL. I ask that the joint resolution be referred to the Committee on Finance, and I desire to call their especial attention to it in order that prompt action may be had. Under the existing law the Secretary of the Treasury may issue 20 per cent of gold certificates in payment of the interest on the public debt. The joint resolution simply proposes to extend that provision so as to make gold certificates available to be expended on any liability of the Government, and I think in the present condition of the Treasury it is an absolutely necessary thing to do.

The VICE-PRESIDENT. The joint resolution will be referred to the Committee on Finance.

PURCHASE OF SILVER BULLION.

Mr. PEFFER rose.

The VICE-PRESIDENT. The Chair lays before the Senate the unfinished business.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to repeal a part of an act, approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes," the pending question being on the amendment of Mr. PEFFER to the substitute reported by the Committee on Finance.

Mr. PEFFER. Mr. President, when the Senate adjourned yesterday I was calling attention to the peculiar phraseology of the law with regard to the value of the dollar. We commonly say that the silver dollar is the unit of value. The unit of value is the dollar simply, and its value as specified in the act of Congress of April 2, 1792, section 9, is the value of the Spanish milled dollar. The amount of silver contained in the Spanish milled dollar was ascertained by melting one thousand clean Spanish dollars of different dates, and dividing the product in pure silver by 1,000. It was found that the quotient was 371¼ grains, and that has been the value of the dollar from that day until this.

The word "value" must relate to either one or the other of two things. It must relate to the weight in silver or else it must relate to the value of products in general use which that much silver would purchase in the open market; and while the latter view is, I think, the correct one in monetary philosophy, yet our laws have constantly recognized the former—the weight. If you will examine the act of February 9, 1793, you will find that silver coins and gold coins of foreign nations then current in this country, were made legal tender in payment of debts at certain specified weights. You will find by consulting the act of 1834, and again the act of 1837, and again the act of 1857 and the act of 1873, that the same rule of weight has been maintained uniformly. I submit the sections of those acts:

Sections 9 and 11 of the act of April 2, 1792, are as follows:

SEC. 9. *And be it further enacted*, That there shall be from time to time struck and coined at the said mint, coins of gold, silver, and copper, of the following denominations, values, and descriptions, viz: Eagles—each to be of the value of ten dollars or units, and to contain two hundred and forty-seven grains and four-eighths of a grain of pure, or two hundred and seventy grains of standard gold. Half eagles—each to be of the value of five dollars, and to contain one hundred and twenty-three grains and six-eighths of a grain of pure, or one hundred and thirty-five grains of standard gold. Quarter eagles—each to be of the value of two dollars and a half-dollar, and to contain sixty-one grains and seven-eighths of a grain of pure, or sixty-seven grains and four-eighths of a grain of standard gold. Dollars or units—each to be of the value of a Spanish milled dollar as the same is now current, and to contain three hundred and seventy-one grains and four-sixteenths parts of a grain of pure, or four hundred and sixteen grains of standard silver. Half dollars—each to be of half the value of the dollar or unit, and to contain one hundred and eighty-five grains and ten sixteenths parts of a grain of pure, or two hundred and eight grains of standard silver. Quarter dollars—each to be of one-fourth the valu of the dollar or unit, and to contain ninety-two grains and thirteen-sixteenth pars of a grain of pure, or one hundred and four grains of standard silver. Dimes—each to be of the value of one-tenth of a dollar or unit, and to contain thirty-seven grains and two-sixteenth parts of a grain of pure, or forty-one grains and three-fifth parts of a grain of standard silver. Half-dimes—each to be of the value of one-twentieth of a dollar, and to contain eighteen grains and nine-sixteenth parts of a grain of pure, or twenty grains and four-fifth parts of a grain of standard silver. Cents—each to be of the value of the one-hundredth part of a dollar, and to contain eleven pennyweights of copper. Half-cents—each to be of the value of half a cent, and to contain five pennyweights and half a pennyweight of copper.

* * * * * * *

SEC. 11. *And be it further enacted*, That the proportional value of gold to silver in all coins which shall by law be current as money within the United States, shall be as fifteen to one, according to quantity in weight, of pure gold or pure silver; that is to say, every fifteen pounds weight of pure silver shall be of equal value in all payments with one pound weight of pure gold, and so in proportion as to any greater or less quantities of the respective metals.

Section 1, of this act of February 9, 1793, is as follows:

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That from and after the first day of July next, foreign gold and silver coins shall pass current as money within the United States, and be a legal tender for the payment of all debts and demands, at the several and respective rates following, and not otherwise, viz: The gold coins of Great Britain and Portugal, of their present standard, at the rate of one hundred cents for every twenty-seven grains of the actual weight thereof; the gold coins of France, Spain, and the dominions of Spain, of their present standard, at the rate of one hundred cents for every twenty-seven grains and two-fifths of a grain, of the actual weight thereof. Spanish milled dollars, at the rate of one hundred cents for each dollar, the actual weight whereof shall not be less than seventeen pennyweights and seven grains; and in proportion for the parts of a dollar. Crowns of France, at the rate of one hundred and ten cents for each crown, the actual weight whereof shall not be less than eighteen pennyweights and seventeen grains, and in proportion for the parts of a crown. But no foreign coin that may have been, or shall be issued subsequent to the first day of January, seventeen hundred and ninety-two, shall be a tender, as aforesaid, until samples thereof shall have been found, by assay, at the Mint of the United States, to be conformable to the respective standard required, and proclamation thereof shall have been made by the President of the United States.

Section 1 of the act of March 3, 1849, is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be, from time to time, struck and coined at the Mint of the United States and the branches thereof, conformably in all respects to law (except that on the reverse of the gold dollar the figure of the eagle shall be omitted), and conformably in all respects to the standard for gold coins now established by law, coins of gold of the following denomination and values, viz: double eagles, each to be of the value of twenty dollars or units; and gold dollars, each to be of the value of one dollar, or units.

Section 3 of the act of February 21, 1857, is as follows:

SEC. 3. *And be it further enacted*, That all former acts authorizing the currency of foreign gold or silver coins, and declaring the same a legal tender in payment for debts, are hereby repealed: but it shall be the duty of the Director of the Mint to cause assays to be made, from time to time, of such foreign coins as may be known to our commerce, to determine their average weight, fineness, and value, and to embrace in his annual report a statement of the result thereof.

Section 8 and following of the act of January 18, 1837, are as follows:

SEC. 8. *And be it further enacted*, That the standard for both gold and silver coins of the United States shall hereafter be such that of one thousand parts by weight nine hundred shall be of pure metal and one hundred of alloy, and the alloy of the silver coins shall be of copper, and the alloy of the gold coins shall be of copper and silver, provided that the silver do not exceed one-half of the whole alloy.

SEC. 9. *And be it further enacted*, That of the silver coins the dollar shall be of the weight of four hundred and twelve and one-half grains; the half dollar of the weight of two hundred and six and one-fourth grains; the quarter dollar of the weight of one hundred and three and one-eighth grains; the dime, or tenth part of a dollar, of the weight of forty-one and a quarter grains; and the half dime, or twentieth part of a dollar, of the weight of twenty grains and five-eighths of a grain. And that dollars, half dollars, and quarter dollars, dimes, and half dimes shall be legal tenders of payment, according to their nominal value, for any sums whatever.

SEC. 10. *And be it further enacted*, That of the gold coins the weight of the eagle shall be two hundred and fifty-eight grains; that of the half eagle one hundred and twenty-nine grains; and that of the quarter eagle sixty-four and one-half grains. And that for all sums whatever the eagle shall be a legal tender of payment for $10, the half eagle for $5, and the quarter eagle for two and a half dollars.

SEC. 11. *And be it further enacted*, That the silver coins heretofore issued at the mint of the United States, and the gold coins issued since the 31st day of July, 1834, shall continue to be legal tenders of payment for their nominal values on the same terms as if they were of the coinage provided for by this act.

* * * * * * *

SEC. 14. *And be it further enacted*, That gold and silver bullion brought to the mint for coinage shall be received and coined, by the proper officers, for the benefit of the depositor: *Provided*, That it shall be lawful to refuse, at the mint, any deposits of less value than $100 and any bullion so base as to be unsuitable for the operation of the mint: *And provided also*, That when gold and silver are combined, if either of these metals be in such small proportions that it can not be separated advantageously, no allowance shall be made to the depositor for the value of such metal.

SEC. 15. *And be it further enacted*, That when bullion is brought to the mint for coinage it shall be weighed by the Treasurer, in the presence of the depositor, when practicable, and a receipt given which shall state the description and weight of the bullion: *Provided*, That when the bullion is in such a state as to require melting before its value can be ascertained the weight after melting shall be considered as the true weight of the bullion deposited.

The point I wish to make, and it is the only one in the conclusion of this address, is that to-day, as in 1792 and in all the intervening years, the value of the dollar, notwithstanding it is made in gold now, is 371¼ grains of pure silver, with the alloy as specified in the law, and that in all our coinage history the laws have provided gold should be measured by silver.

The coinage report of 1834, before alluded to, states in so many words that the object of the committee was to make the value of gold coin conform to its value in silver, and in the act of that year Congress reduced the weight of gold in gold coins 6 per cent. In every act relating to the subject the silver measure has been preserved. Even the demonetization act of 1873 does not change the rule, though it has always been construed as if it did.

I repeat, so that Senators need not mistake my meaning, the value of the dollar which we use is not 25.8 grains of gold, but it is 371¼ grains of pure silver; that that was the amount found and enacted to be the value of the dollar in 1792, and that it has been kept up continuously until the present time.

I now read a few lines from section 14 of the act of February 12, 1873:

That the gold coins of the United States shall be a one-dollar piece, which, at the standard weight of 25.8 grains, shall be the unit of value.

A gold dollar of the standard weight of 25.8 grains of gold shall be the unit of value. This "unit of value" was described and provided for in the act of 1792, and it has been preserved from that time to this, if the law be strictly construed. It is 371¼ grains of pure silver that constitutes the value of the dollar, the lawful dollar. The 25.8 grains dollar provided for in section 14 of the act of February 12, 1873, simply provides that the gold coin, not the value of it, shall be substituted for the silver coin when we refer to the unit of value. The value remains the same, though the metal of the coin be changed. The dollar is the standard—not metal of any kind.

APPENDIX A.

Coinage of the United States mints from 1840 to 1890, inclusive.

Calendar years.	Total coinage.			
	Gold.	Silver.	Minor.	Total.
1840	$1, 675, 482. 50	$1, 726, 708. 00	$24, 627. 00	$3, 426, 812. 50
1841	1, 091, 857. 50	1, 132, 750. 00	15, 973. 67	2, 240, 581. 17
1842	1, 829, 407. 50	2, 332, 750. 00	23, 833. 50	4, 185, 991. 40
1843	8, 108. 707. 50	2, 834, 750. 00	24, 283. 30	11, 967, 830. 70

APPENDIX B.

Total gold and silver used as money of the world, in form of coin and bullion, and amount per capita.

Mr. Leech, Director of the United States Mint, has prepared for the Congressional Committee on Coinage a series of tables showing the estimated and officially reported amounts of gold, silver, and paper in circulation as money in different parts of the world. The following table comprises the portions of the statement in reference to gold and silver:

SPECIE.

Country.	Gold.	Silver.
United States	$702,018,869	$482,071,346
United Kingdom	550,000,000	100,000,000
France	900,000,000	709,000,000
Germany	500,000,000	145,000,000
Belgium	65,000,000	55,000,000
Italy	140,000,000	60,000,000
Switzerland	15,000,000	15,000,000
Greece	2,000,000	4,000,000
Spain	100,000,000	125,000,000
Portugal	40,000,000	10,000,000
Austria-Hungary	40,000,000	90,000,000
Netherlands	25,000,000	65,000,000
Scandinavian Union	32,000,000	10,000,000
Russia	190,000,000	60,000,000
Turkey	50,000,000	45,000,000
Australia	100,000,000	7,000,000
Egypt	100,000,000	15,000,000
Mexico	5,000,000	50,000,000
Central America		500,000
South America	45,000,000	25,000,000
Japan	90,000,000	50,000,000
India		900,000,000
China		700,000,000
The Straits		100,000,000
Canada	16,000,000	5,000,000
Cuba, Haiti, etc	20,000,000	2,000,000
Totals	3,727,018,869	3,820,571,346

POPULATION OF THE EARTH.

Europe	357,379,000
Asia	825,954,000
Africa	163,953,000
America	121,713,000
Australia	3,230,000
Oceanic Islands	7,420,000
Polar Regions	80,400
Total	1,479,729,400

The total gold of the world in coin and bullion used as money amounts to $2.51 per capita.

The total silver of the world in coin and bullion used as money amounts to $2.58 per capita.

The total gold and silver of the world in coin and bullion used as money amounts to $5.09 per capita.

If the whole world is reduced to a gold basis, $2.51 per capita will be our money of redemption, instead of $5.00 under a bimetallic system.

UNITED STATES COINAGE LAWS.

Mr. STEWART. Mr. President, the United States Mint was established by the act of April 2, 1792. The gold coins consisted of the ten, five, and two-and-a-half-dollar pieces. The silver coins consisted of dollars, half-dollars, quarter-dollars, dimes, and half-dimes.

The act declared—

That the proportional value of gold to silver in all coins which shall by law be current as money within the United States, shall be as 15 to 1, according to quantity in weight, of pure gold or pure silver; that is to say, every fifteen pounds' weight of pure silver shall be of equal value in all payments with one pound weight of pure gold, and so in proportion as to any greater or less quantities of the respective metals. (Laws relating to loans, currency, etc., 1886; page 213.)

The silver dollar was the unit of account, and consisted of 371¼ grains of pure silver, or 416 grains of standard silver. The dollar contained 3½ grains more of alloy than the present silver dollar, but exactly the same amount of pure silver. There was no gold dollar coined. The eagle, which was $10, contained 247½ grains of pure gold, which would make the dollar, if such a coin had been struck, contain 24¾ grains of pure gold.

Section 14 of the act declared—

That it shall be lawful for any person or persons to bring to the said mint gold and silver bullion, in order to their being coined; and that the bullion so brought shall be there assayed and coined as speedily as may be after the receipt thereof, and that free of expense to the person or persons by whom the same shall have been brought.

The act of June 28, 1834, reduced the quantity of gold in the gold coins and made the eagle or ten-dollar piece contain 232 grains of pure gold or 258 grains of standard gold, which would require only 23.20 grains of pure gold to make the dollar, or 25.8 grains of standard gold. This reduction changed the ratio from 15 to 1 to 16 to 1.

The act of January 18, 1837, reduced the alloy in the coins to one-tenth of the weight. The standard dollar by that act contained 371¼ grains of pure silver, or 412½ grains of standard silver, which is the same as the standard dollar now coined. The gold dollar, if such a coin had been authorized, would have contained 23.20 grains of pure gold, or 25.77 grains of standard gold. The fourteenth section of the act of 1837, declared—

That gold and silver brought to the mint for coinage, shall be received and coined, by the proper officers, for the benefit of the depositor.—*Ibid.*, page 225.

By the ninth section of the statute of 1837, the half-dollar contained 206¾ grains of standard silver, and the quarter-dollar, dime, etc., weight in proportion.

The act of February 21, 1853, reduced the weight of the subsidiary coin, making the weight of the half-dollar 192 grains of standard silver, and reducing the weight of the minor coins proportionally. By that act, the legal tender of the half-dollar, quarter-dollar, etc., was limited to $5, the dollar remaining a full legal tender.

The act of February 9, 1793, declared—

That from and after the 1st day of July next, foreign gold and silver coins shall pass current as money within the United States, and be a legal tender for the payment of all debts and demands, at the several and respective rates following, and not otherwise.—*Ibid.*, p. 217.

* * * * * * *

Spanish milled dollars, at the rate of 100 cents for each dollar, the actual weight whereof shall not be less than 17 pennyweights and 7 grains; and in proportion for the parts of a dollar. Crowns of France, at the rate of 110 cents for each crown, the actual weight whereof shall not be less than 18 pennyweights and 17 grains, and in proportion for the parts of the crown.—*Ibid.*, p. 217.

This law remained in force until the 21st of February, 1857, when it was provided that subsidiary Mexican and Spanish coin, when received at the mint, should be recoined; and all former acts making foreign coin a legal tender were repealed.

By the act of February 12, 1873, the silver dollar was omitted from the list of silver coins, and a gold dollar of 23.22 of pure gold, or 25.8 grains of standard gold, was substituted for the silver dollar as the unit of account.

The act of February 28, 1878, restored the standard dollar of 412½ grains of standard silver, as provided in the act of January 18, 1837, and provided for the purchase, at the market price, of not less than $2,000,000 nor more than $4,000,000 worth of silver bullion each month, to be coined into standard dollars.

The act of July 14, 1890, provided for the purchase of 4,500,000 ounces of silver bullion per month, at the market price, and the issuance of legal-tender Treasury notes in payment of such purchases. The act made these notes redeemable in gold or silver coin, at the discretion of the Secretary of the Treasury.

The third section of the act declared—

That the Secretary of the Treasury shall each month coin two million ounces of the silver bullion purchased under the provisions of this act into standard silver dollars until the 1st day of July, 1891, and after that time he shall coin of the silver bullion purchased under the provisions of this act as much as may be necessary to provide for the redemption of the Treasury notes herein provided for.—*United States Statutes at Large*, volume 26, page 289.)

COINAGE OF SILVER BEFORE 1873.

From the establishment of the mint, in 1792, to 1873 there was no year in which there was not more or less legal-tender silver coins struck at the mints. There were many years in which there were no dollars coined, but there was no year, month, or day, Sundays and holidays excepted, when the owner of silver bullion could not take it to the mint and have it coined into dollars or some other denomination of silver coins. The total amount of silver coinage previous to 1873 was $105,437,025.60. Only about $8,000,000 of this amount was legal-tender silver dollars, but all the balance was full legal-tender silver money, excepting the subsidiary coin coined after 1853.

Between 1860, the date of the opening of the Comstock, and 1873, the date of the demonetization of silver, there were 4,337,610 standard silver dollars coined; in the year 1871, 1,115,760; in 1872, 1,106,450; and between January 1 and February 12, 1873, the date of the passage of the mint act, there were 293,600 dollars coined.

These figures are taken from the report of the Director of the Mint for 1890, page 247. I call particular attention to the fact that there were coined during the years 1871 and 1872, 2,232,210 standard silver dollars, and that there were coined between the 1st day of January, 1873, and the 12th day of February, 1873, when the mint act took effect, 293,600 standard silver dollars. If the coinage had continued at the same rate during the entire year there would have been coined in 1873, 2,492,185. The statement which emanated from the Senator from Ohio that the silver dollar was obsolete at the time of the passage of the mint act, and which statement has been constantly repeated by the gold press and gold orators ever since, is absolutely untrue. After the adoption of the ratio of 16 to 1 in 1834, silver was undervalued in our coinage, and the bullion value of silver for export was 3 per cent more than its coinage value. Consequently the silver dollars and silver bullion produced in this country were exported with profit.

But in the beginning of the seventies we produced more silver than could profitably be exported, and our silver miners found it desirable to take silver to the mint for coinage. At that time vast and extensive silver mines had been discovered in this country, and the prospect of a large increase in our current coin from our silver mines and from the mines of Mexico and South America was encouraging. The right of the owner of silver bullion to take the same to the mint and have it coined for his own benefit was of the greatest value.

THE GOLD MONOMETALLISTS

of London saw very clearly that if our mints remained open for the coinage of silver our financial strength would be irresistible, and their cherished scheme of a single gold standard for their debts must fail.

Since silver was demonetized by the mint act the gold monometallists have continually and persistently asserted that the silver dollar was suppressed by previous legislation, and that no existing valuable right was taken away by the legislation of 1873. I call attention to the following dialogue, which occurred in the Senate of the United States on March 30, 1876, in which Senators Conkling, SHERMAN, Bogy, and McDonald participated. It will be found on pages 2062 and 2063 of the CONGRESSIONAL RECORD, volume 4, part 3, Forty-fourth Congress, first session:

Mr. CONKLING. Will the Senator allow me to ask him or some other Senator a question? Is it true that there is now by law no American dollar: and if so is it true that the effect of this bill is to make half-dollars and quarter-dollars the only silver coin which can be used as legal tender?

Mr. SHERMAN. I will answer the Senator from New York, that since the law of 1853 the use of the silver whole dollar has been discontinued and none has been issued. That has been so since 1853.

Mr. CONKLING. Is there power to issue it?

Mr. SHERMAN. There is no power and has been none.

Mr. BOGY. The power to issue existed from 1853 to 1873; but since 1873 I think there has been no power.

Mr. SHERMAN. There has been no silver dollar issued since 1853, and my impression is that the law of 1853 did not confer the power to issue it. The Senator thinks it did confer the power, but the law of 1873 cut off the power, in my judgment, if it existed. The dollar was practically dropped from our coinage system for the best possible reason, the same reason that the five-franc piece and the large coins of England have been dropped out of their currency, simply because it is inconvenient in size and form for ordinary coinage and ordinary business.

* * * * * * *

Mr. MCDONALD. Permit me to ask the Senator from Ohio whether we have any law on the subject of the silver coinage of the United States except section 3513 of the Revised Statutes?

Mr. SHERMAN. I read that section.

Mr. MCDONALD. Is not that the only law we have defining the present silver coins of the United States?

Mr. SHERMAN. Yes, sir. I read that.

Mr. MCDONALD. Does not that leave out the old standard dollar entirely?

Mr. SHERMAN. Undoubtedly, but I say there has been none coined since 1853. The question of restoring that dollar is a question that is not in this bill at all. (CONGRESSIONAL RECORD, volume 4, part 3, Forty-fourth Congress, first session, pages 2062 and 2063.)

* * * * * * *

The Senator from Ohio, in his speech of August 30, 1893 (CONGRESSIONAL RECORD of August 31, page 1053), after he had undertaken to give figures as to the coinage of silver, which he obtained from the reports of the Director of the Mint, said:

After the passage of the act of February 21, 1853, gold in great quantities, the product of the mines in California, was freely coined at the ratio of 16 to 1 and was in general circulation. If, then, the purchase of silver instead of the free coinage of silver is the demonetization of silver, it was demonetized practically in 1835, and certainly in 1853, when the purchase of silver and its use as money increased enormously.

Comment upon such statements is unnecessary. The record of the mint, which I have given, is the best evidence that they are untrue.

The reasons why there was no more silver coined previous to the discovery of the Comstock mines were that the United States produced little or no silver, and the silver imported came in the shape of coin, and was made a legal tender. The Comstock mines were discovered in 1859, and, although specie payments were suspended, the coinage of silver dollars in the two years preceding the demonetization of silver was many times greater than in any preceding year.

It is true that the change of ratio in 1834, from 15 to 1 to 16 to 1, undervalued silver and overvalued gold, as compared with the valuations of Europe and Asia. At the ratio of 16 to 1 an ounce of silver is worth $1.2929. At the ratio of 15½ to 1, which is the prevailing ratio in Europe, an ounce of silver is worth a little over $1.33 in gold. At the ratio of 15 to 1, which prevailed in this country from 1792 to 1834, and which now prevails in Asia, an ounce of silver is worth a little over $1.37. This was the reason why the silver in the silver dollar was 3 per cent premium over the gold in the gold dollar. Europe would give $1.33 an ounce, while the United States paid only $1.2929. This was no reason for demonetizing silver. It might have been a reason for changing the ratio to conform to the European ratio, by making a lighter silver dollar.

HISTORY OF THE DEMONETIZATION OF SILVER.

Previous to the Napoleonic wars silver was the principal money of Great Britain, sometimes the only coin. But after the battle of Waterloo, and when peace had been fully established throughout Europe, England, in 1816, passed a law demonetizing silver and adopting the single gold standard. During the fifties, and while there was an enormous output of gold from California and Australia, an effort was made by Chevalier, of France, and Maclaren, of England, and other writers upon political economy, to demonetize gold. Germany, Austria, and Holland adopted the single silver standard and closed their mints against gold. The effort to demonetize the yellow metal, because it was plenty and cheap, would have succeeded if England could have been satisfied that gold would continue to be the plentier metal. In 1854 England sent commissioners to California and Australia to investigate the probable continuance of the output of gold, and after thorough investigation it was ascertained that the great gold placers would soon be exhausted.

From the discovery of America up to 1850 all writers who have investigated the question agree that there were more than 31 ounces of silver produced for every ounce of gold.

England inferred, and correctly inferred, from the experience of three hundred and fifty years that in the long run silver would be more plentiful than gold, and she therefore adhered to her gold policy.

Our war closed in 1865. In that same year a union was formed between France, Italy, Greece, Belgium, and Switzerland, by which it was agreed to establish common coins, weights, and measures.

In 1867 the French Emperor extended an invitation to the United States and all the nations of Europe to hold

A CONFERENCE IN PARIS

for the purpose of extending the principles of the union throughout the commercial world. Mr. Samuel B. Ruggles was appointed commissioner for the United States.

The Senator from Ohio [Mr. SHERMAN], who was then chairman of the Committee on Finance of the Senate, visited London in the summer vacation of 1867. He afterwards visited Paris, where the conference was in session, and wrote to Mr. Ruggles the following letter:

HON. JOHN SHERMAN TO SAMUEL B. RUGGLES, ESQ., ADVOCATING THE GOLD STANDARD.

HOTEL JARDIN DES TUILERIES, *May 18, 1867.*

MY DEAR SIR: Your note of yesterday, inquiring whether Congress would probably, in future coinage, make our gold dollar conform in value to the gold 5-franc piece, has been received.

There has been so little discussion in Congress upon the subject that I can not base my opinion upon anything said or done there.

The subject has, however, excited the attention of several important commercial bodies in the United States, and the time is now so favorable that I feel quite sure that Congress will adopt any practical measure that will secure to the commercial world a uniform standard of value and exchange.

The only question will be how this can be accomplished.

The treaty of December 23, 1865, between France, Italy, Belgium, and Switzerland, and the probable acquiescence in that treaty by Prussia, has laid the foundation for such a standard.

If Great Britain will reduce the value of her sovereign 2 pence, and the United States will reduce the value of her dollar something over 3 cents, we then have a coinage in the franc, dollar, and sovereign easily computed, and which will readily pass in all countries; the dollar as 5 francs, and the sovereign as 25 francs.

This will put an end to the loss and intricacies of exchange and discount. Our gold dollar is certainly as good a unit of value as the franc, and so the English think of their pound sterling. These coins are now exchangeable only at considerable loss, and this exchange is a profit only to brokers and bankers. Surely each commercial nation should be willing to yield a little to secure a gold coin of equal value, weight, and diameter, from whatever mint it may have been issued.

As the gold 5-franc piece is now in use by over 60,000,000 of people of several different nationalities, and is of convenient form and size, it may well be adopted by other nations as the common standard of value; leaving to each nation to regulate the divisions of this unit in silver coins or tokens.

If this is done France will surely abandon the impossible effort of making two standards of value. Gold coins will answer all the purposes of European commerce. A common gold standard will regulate silver coinage, of which the United States will furnish the greater part, especially for the Chinese trade.

I have thought a good deal of how the object you propose may be most readily accomplished. It is clear that the United States can not become a party to the treaty referred to. They could not agree upon the silver standard, nor could we limit the amount of our coinage, as proposed by the treaty. The United States is so large in extent, is so sparsely populated, and the price of labor is so much higher than in Europe, that we require more currency per capita. We now produce the larger part of the gold and silver of the world, and can not limit our coinage, except by the wants of our people and the demands of commerce.

Congress alone can change the value of our coin. I see no object in negotiating with other powers on the subject. As coin is not now in general circulation with us, we can readily fix by law the size, weight, and measure of future issues. It is not worth while to negotiate about that which we can do without negotiation, and we do not wish to limit ourselves by treaty restrictions.

In England many persons of influence and different chambers of commerce are earnestly in favor of the proposed change in their coinage. The change is so slight with them that an enlightened self-interest will soon induce them to make it, especially if we make the greater change in our coinage. We will have some difficulty in adjusting existing contracts with the new dollar; but as contracts are now based upon the fluctuating value of paper money, even the reduced dollar in coin will have more purchasable value than our currency.

We can easily adjust the reduction with the public creditors in the payment or conversion of their securities, while private creditors might be authorized to recover upon the old standard.

All these are matters of detail, to which I hope the commission will direct their attention.

And now, my dear sir, allow me to say in conclusion that I heartily sympathize with you and others in your efforts to secure the adoption of the metrical system of weights and measures.

The tendency of the age is to break down all needless restrictions upon social and commercial intercourse. Nations are now as much akin to each other as provinces were of old.

Prejudices disappear by contact. People of different nations learn to respect each other as they find that their differences are the effect of social and local custom not founded upon good reasons.

I trust that the industrial commission will enable the world to compute the value of all productions by the same standard, to measure by the same yard or meter, and weigh by the same scales.

Such a result would be of greater value than the usual employments of diplomatists and statesmen.

I am, very truly, yours,

JOHN SHERMAN.

(Senate Executive Document No. 14, Fortieth Congress, second session, pages 107 to 110.)

Mr. Ruggles, soon after the receipt of the above letter, obtained an interview with the Emperor Louis Napoleon, and in the report of that interview, among other things, says:

It was then stated to the Emperor that an eminent American statesman, Mr. SHERMAN, Senator from Ohio, chairman of the Finance Committee of the Senate of the United States, and recently in Paris, had written an important and interesting letter, expressing his opinion that the gold dollar of the United States ought to be, and readily might be, reduced by Congress in weight and value to correspond with the gold 5-franc piece of France; that the letter is now before the international committee having the question of uniform coin under special examination, to which letter, as being one of the best interpretations of the views of the American people, the attention of the public authorities of France was respectfully invited. The Emperor then closed the audience by repeating the assurances of his gratification that the important international measure in question was likely to receive active support from the United States.

The letter of Mr. SHERMAN above referred to, dated the 18th of May, 1867, originally written in English, was presented in a French translation a few days afterwards to the international committee in full session, where it was received with unusual interest and ordered by the committee to be printed in both languages.—(*Senate Executive Document No. 14*, Fortieth Congress second session, page 9.)

This letter was presented by Mr. Ruggles to the international committee, as appears from the following extract from his letter to Mr. Seward of July 18, 1867:

On the 17th of May the undersigned presented to the international committee the letter of Senator Sherman in a French translation, which was received with lively interest and forthwith ordered, with the approbation of the imperial commission, to be published both in French and English. It is but due to the history of unification of money to state that the earnest and active agitation of this subject in a practical form, on the part of the United States, exerted its full share of influence in leading the Government of France to adopt the decisive measure of inviting in diplomatic form an authoritative "conference" of delegates, duly accredited from all the nations of the European and American world practically accessible, to meet at Paris on the 17th of June, not merely for an exchange of views or a discussion of general principles, but 'practically to seek for the basis of ulterior negotiation' between the nations."—*Senate Executive Document No. 14*, Fortieth Congress, second session, page 13.

SHERMAN'S POWERFUL INFLUENCE FOR MONOMETALLISM.

In his report of November 7, 1867, pages 99 and 100, Mr. Ruggles said:

The establishment of the single standard exclusively of gold is, in truth, the cardinal, if not the all-important feature of the plan proposed by the conference, relieving the whole subject, by a single stroke of the pen, from the perplexity, and, indeed, the impossibility of permanently unifying the multiplicity of silver coins scattered through the various nations of Europe. It is a matter of world-wide congratulation that on this vital point the delegates from the nineteen nations represented in the conference were unanimous, not excepting France itself, so strongly wedded by its national traditions to a double standard.

It will be seen by the report of the discussions (sixth "seance," pages 79 to 82) that the subject of the "common denominator," or unit of gold, elicited a considerable difference of opinion. A denominator or unit equivalent to and equiponderant with the existing gold 5-franc coin of France was actively supported by the United States and by Austria, Russia, Switzerland, Portugal, and other nations. The delegates from Great Britain and from Sweden urged, in preference, a denominator or unit of 10 francs.

The question was finally decided by a formal vote by ayes and noes, on a roll call of the nations, which resulted in a large majority in favor of the denominator or unit of 5 francs, thirteen (13) nations voting in its favor, and two (2), Great Britain and Sweden, in favor of the 10 francs. The delegates from Prussia, Baden, Bavaria, and Wurtemburg abstained from voting, mainly in view of existing stipulations in local monetary conventions, which temporarily embarrassed their action.

On all these questions the interests of monetary unification were materially advanced by the publication at Paris of the concise but admirable letter from the Hon. JOHN SHERMAN, Senator in Congress from the State of Ohio, a copy of which has been already communicated to the Department of State, but which for more convenient reference is now transmitted herewith in duplicate with its French translation.

His opinions are unmistakably expressed in the following extracts:

As the gold 5-franc piece is now in use by over sixty millions of people of several different nationalities, and is of convenient form and size, it may well be adopted by other nations as a common standard of value, leaving to each nation to regulate the divisions of this unit in silver coin or tokens.

If this is done France will surely abandon the impossible effort of making two standards of value. Gold coins will answer all the purposes of European commerce. A common gold standard will regulate silver coinage.

'In England many persons of influence and different chambers are earnestly in favor of the proposed change in the coinage. The change is so slight with them that an enlightened self-interest will soon induce them to make it, especially if we make the greater change in our coinage.—*Senate Executive Document No. 14*, Fortieth Congress, second session, pages 99, 100.'

The English Government was represented at the conference as an advocate of the single gold standard. Mr. Rivers Wilson, the delegate, read the following declaration:

Before recommencing a discussion of the lists of questions, the English delegates deem it their duty to the Government they represent, to the members of the conference, and particularly to the Government of the Emperor, by whose invitation they are present, and to prevent any misunderstanding, to indicate their delicate and exceptional situation. They are convinced of the necessity of this declaration from the serious and practical turn the discussion has borne to this time, and particularly from the high signification that must attach in public opinion to the presidency of his imperial highness, Prince Napoleon, and to the labors which must result from it.

The English Government was obliged to accept the cordial invitation from the Government of the Emperor to participate in this conference, because a refusal would have shown a want of courtesy and would have made it liable to accusations of prejudices upon this very important question.

Indeed, the English nation is in a position much more independent upon this question than most continental nations.

So long as public opinion has not decided in favor of a change of the present system, which offers no serious inconveniences, either in wholesale or retail trade, and until it shall be incontestably demonstrated that a new system offers advantages sufficiently commanding to justify the abandonment of that which is approved by experience and rooted in the habits of the people, the English Government could not believe it to be its duty to take the initiative in assimilating its coinage with those of the countries of the continent.

But the English Government will always be ready to aid any attempt to enlighten and guide public opinion in the appreciation of the question, and facilitate the discussion of the means by which such an assimilation, so advantageous in theory, may be effected.

Thus, while consenting to be represented in this conference, the English Government has found it necessary to place the most careful restrictions upon its delegates; their part is simply to listen to the different arguments, to study the situation as developed in the discussion, and to report to their Government. Thus far they have found no difficulty in voting in favor of all the propositions adopted by the conference, because their principles agree with the system now in force in England. But they cannot vote for any question tending to bind their Government, or express any opinion to induce the belief that Great Britain will adopt the convention of 1865.—*Senate Executive Document, No. 14*, Fortieth Congress, second session, page 55.

Mark the language:

The English delegates had found no difficulty in voting in favor of all the propositions adopted by the conference, because their principles agree with the system now in force in England. But they can not vote for any question tending to bind their Government or express any opinion to induce the belief that Great Britain will adopt the convention of 1865.

The convention of 1865 established the Latin Union, which was the bimetallic union of Europe. The earnest efforts of the English delegation, of Mr. Ruggles, the delegate from the United States, and of Mr. SHERMAN, chairman of the Committee on Finance of the Senate of the United States, procured a decision of the conference in favor of the single gold standard. England and the United States inaugurated the movement for a gold standard in the conference of 1867, and by the aid of Mr. SHERMAN'S letter secured the recommendation. The report of Mr. Ruggles, portions only of which have been quoted, abundantly establishes this most important fact.

Mr. HOAR. I should like to ask the Senator, while he is giving the history of that question, whether that report of Mr. Ruggles was not asked for by a vote of the Senate at the time, and whether it was not communicated to the Senate by the Treasury Department, and published as a Senate document?

Mr. STEWART. At the time?

Mr. HOAR. Yes.
Mr. STEWART. It was sometime afterwards, I believe.
Mr. HOAR. Within a few weeks or months?
Mr. STEWART. Did the Senator ever read it?
Mr. HOAR. Yes; I read it.
Mr. STEWART. At the time?
Mr. HOAR. I was not a Senator at the time, and I do not know whether I read it at the time or not.
Mr. STEWART. I suppose the Senator asked the question in order to have me read it.
Mr. HOAR. I wish to add, if the Senator will pardon me, as he was giving the history of that transaction, I thought he would himself desire that so important a part of the history of legislation as that report should be spread before the Senate.
Mr. STEWART. I do not care about a speech being injected in mine.
Mr. HOAR. I ask the Senator if that is not true?
Mr. STEWART. I am spreading before the Senate all the facts. If the Senator will not interrupt me, he can draw his inferences afterwards.
Mr. HOAR. What I stated is a fact.
Mr. STEWART. I am referring to the documents, and every document that I quote I refer to in my speech, giving the page, date, and everything connected with it.
Mr. HOAR. Will the Senator allow me?
Mr. STEWART. I do not wish to be interrupted, because it breaks the thread of my remarks.
Mr. HOAR. I desire to ask the Senator a question of fact purely, not to interrupt his remarks. I desire to ask whether the report to which he has referred was not asked for by the Senate by resolution, communicated to the Senate by the Treasury Department, and published by the Senate as a document? There is no doubt about that.
Mr. STEWART. Of course it was. If the Senator wants to know any particulars about it, he can see it. I refer to it. I can not get the report and read it now.
Mr. HOAR. I put my question, if the Senator will pardon me——
Mr. STEWART. I decline to be interrupted to put a whole lot of trash in my speech.
Mr. HOAR. Very well.
Mr. STEWART. It simply breaks up the narrative I was giving.
Mr. HOAR. I shall endeavor to make my point after the Senator gets through.
Mr. STEWART. After I get through the Senator can talk.

FIRST ATTEMPT BY MR. SHERMAN TO DEMONETIZE SILVER.

On the 6th day of January, 1868, Mr. Sherman introduced the following bill, which was referred to the Committee on Finance:

[Fortieth Congress, second session.]
S. 217.
IN THE SENATE OF THE UNITED STATES, *January 6, 1868.*

Mr. SHERMAN asked, and by unanimous consent, obtained leave to bring in the following bill; which was read twice, referred to the Committee on Finance, and ordered to be printed:

A bill in relation to the coinage of gold and silver.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, with a view to promote a uniform currency among the nations, the weight of the gold coin of $5 shall be 124$\frac{4}{10}$ troy grains, so that it shall agree with a French coin of 25 francs, and with the rate of thirty-one hundred francs to the kilogram; and the other sizes or denominations shall be in due proportion of weight, and the fineness shall be nine-tenths or 900 parts fine in 1,000.

SEC. 2. *And be it further enacted*, That, in order to conform the silver coinage to this rate and to the French valuation, the weight of the half dollar shall be 179 grains, equivalent to 116 decigrams; and the lesser coins be in due proportion, and the fineness shall be nine-tenths. But the coinage of silver pieces of one dollar, five cents, and three cents shall be discontinued.

SEC. 3. *And be it further enacted*, That the gold coins to be issued under this act shall be a legal tender in all payments to any amount; and the silver coins shall be a legal tender to an amount not exceeding $10 in any one payment.

SEC. 4. *And be it further enacted*, That in the assay of the gold coins to be issued under this act there shall be no greater deviation allowed from the standard of fineness than one-thousandth part above or below.

SEC. 5. *And be it further enacted*, That the devices on the coins shall consist of such emblems and inscriptions as are proper to the Republic of the United States, but plainly distinct from those now in use; each coin shall express its proper date and value; and the value of the gold coins shall be stated both in dollars and in francs; and whenever it is ascertained that Great Britain has conformed the pound sterling to the value of the piece of $5, then the value in British terms shall also be stated; and the devices as well as the diameters of the coins shall be fixed by the Director of the Mint, under the control of the Secretary of the Treasury.

SEC. 6. *And be it further enacted*, That foreign gold coins, conformed to the basis herein prescribed, shall be a legal tender in all payments whatsoever, so long as the standards of weight and fineness are duly maintained; and it shall be the duty of the commissioners of assay, meeting at the Mint in the month of February of each year, to try a sufficient number of such foreign coins of the preceding year, to be procured for that purpose by the Director of the Mint, and if any serious deficiency be found, the Secretary of the Treasury shall have power to suspend the right of legal-tender in the particular case.

SEC. 7. *And be it further enacted*, That when the gold and silver coins of the United States are brought to the mint or its branches for recoinage, such coins shall be received by weight, and those of them which have been issued as nine-tenths fine shall be so received, but all others by assay. And in payments at the mint for both gold and silver coins above specified, the value shall be rendered according to the weights prescribed in the first and second sections of this act; and there shall be no charge for coinage, seigniorage, or internal revenue; and on all other deposits of gold for coinage the charge shall be one-half of 1 per cent.

SEC. 8. *And be it further enacted*, That for the uses of the Treasury and the custom-houses, the Secretary of the Treasury shall, as soon as this act takes effect, publicly declare the rates at which the coins of the United States and of foreign countries now current shall be reckoned upon estimates furnished by the Director of the Mint.

SEC. 9. *And be it further enacted*, That this act shall take effect on the 1st day of January, 1869, but to expedite the recoinage it shall be lawful for the mint and its branches to receive gold and silver coins of the United States for that purpose on and after the 1st day of October next, and to give certificates therefor, payable in the order of receipt in the new coins, and to convert the metals thus received into ingots and planchets to be ready for stamping when this act takes effect. And in respect to other deposits of gold or purchases of silver the like certificates may be issued if demanded, on and after the 1st day of October next.

SEC. 10. *And be it further enacted*, That the weights to be used at the mint when this act goes into operation may be either troy weights or French gram weights, or both, as the Secretary of the Treasury shall direct.

On the 9th of June, 1868, Mr. SHERMAN reported the foregoing bill favorably, and advocated its passage by an elaborately written report, in which he referred to and relied on the reports of Mr. Ruggles of the proceedings of the monetary conference which had been held in Paris the previous year. He then said:

The second inquiry of your committee was whether the plan proposed by the Paris conference was the best mode to accomplish the end desired.

It proposes:

1. *A single standard exclusively of gold.*
2. Coins of equal weight and diameter.
3. Of equal quality of fineness—nine-tenths fine.
4. The weight of the present 5-franc gold piece to be the unit.
5. The coins of each nation to bear the names and emblems prepared by each, but to be legal tenders public and private in all.

The single standard of gold is an American idea, yielded reluctantly by France and other countries, where silver is the chief standard of value. The impossible attempt to maintain two standards of value has given rise to nearly all the debasement of coinage of the last two centuries. The relative market value of silver and gold varied like other commodities, and this led first to the demonetization of the more valuable metal, and second to the debasement or diminution of the quantity of that metal in a given coin.

He then gave further reasons in favor of the gold standard, and continued—

For the reasons that induced the adoption of this unit of value, reference is made by your committee to the report of Mr. Ruggles. They may be summed up as follows:

"1. The coin proposed is the smallest gold coin in use, and therefore the most convenient unit of value.

"2. It approximates more nearly to existing coinage of the great commercial nations than any other proposed. The dollar reduced 3$\frac{1}{2}$ cents at the mint becomes the unit of value, and its decimal divisions and multiples enable us to retain all our well-known coins, both of gold and silver.

"A very slight reduction of the English sovereign makes it conform to the multiple of the dollar and franc, so that 5 francs are a dollar, and 25 are a sovereign, or half-eagle. The same unit is easily adapted to existing coinage of other nations.

"3. The franc is already in use by 72,000,000 of the most industrious and thrifty people of Europe—France, Belgium, Italy, Switzerland, and Holland.

"4. The actual gold coinage in francs from 1793 to 1856 was 1,312,220,814, while the gold coinage in dollars during the same period was $845,536,591, and in sovereigns was $965,341,450, thus showing that in France alone the existing gold coinage on the proposed standard is greater than upon any other that could be adopted."

* * * * * * *

France, whose standard is adopted, makes a new coin similar to our half-eagle. She yields to *our demand for the sole standard of gold*, and during the whole conference evinced the most earnest wish to secure the cooperation of the United States in the great object of unification of coinage.—*Senate Committee Report No. 117*, Fortieth Congress, second session, pages 4, 5, and 6.

DEMONETIZATION DEFEATED IN 1868.

Senator E. D. Morgan, of New York, from the same committee, submitted a minority report from which I make the following extracts:

In June last, while the Universal Exposition was in progress, an international monetary conference was held in Paris under the presidency of the French minister of foreign affairs.

Delegates from the several European nations were present.

Mr. Samuel B. Ruggles represented the United States, and his report on the subject has been communicated to Congress through the Department of State. From this it appears that a plan of monetary unification was there agreed upon, the general features of which are:

1. A single standard, exclusively of gold.
2. Coins of equal weight and diameter.
3. Of equal quality, nine-tenths fine.
4. The weight of the present 5-franc gold piece to be the unit, with its multiples. The issue by France of a new coin of value and weight of 25 francs was recommended.
5. The coins of each nation to continue to bear the names and emblems preferred by each, but to be legal tenders, public and private, in all.

Senate bill 217 is designed to carry into effect this plan. Its passage would reduce the weight of our gold coin of $5, so as to agree with a French coin of 25 francs.

It determines that other sizes and denominations shall be in due proportion of weight and fineness, and that foreign gold coin, conformed to this basis, shall be a legal tender so long as the standard of weight and fineness are maintained. It requires that the value of gold coin shall be stated both in dollars and francs, and also in British terms, whenever Great Britain shall conform the pound sterling to the piece of $5.

It conforms our silver coinage to the French valuation, and discontinues the silver pieces of $1, and 5 and 3 cents, and limits silver as a legal tender to payments of $10. The 1st of January, 1869, is fixed as the period for the act to take effect.

The reduction which this measure would effect in the present legal standard value of the gold coin of the United States would be at the rate of three

and a half dollars in the hundred, and the reduction in the legal value of our silver coinage would be still more considerable.

A change in our national coinage so grave as that proposed by the bill should be made only after the most mature deliberation. The circulating medium is a matter that directly concerns the affairs of everyday life, affecting not only the varied, intricate, and multiform interests of the people at home, to the minutest detail, but the relations of the nation with all other countries as well. The United States has a peculiar interest in such a question. It is a principal producer of the precious metals, and its geographical position, most favorable in view of impending commercial changes, renders it wise that we should be in no haste to fetter ourselves by any new international regulation based on an order of things belonging essentially to the past.

* * * * * * *

The American continent, too, produces four-fifths of the silver of commerce. The mines of Nevada have already taken high rank, and Mexico alone supplies more than half the world's grand total. Our relations with the silver-producing people, geographically most favorable, are otherwise intimate.

Manifestly our business intercourse with them can be largely increased, a fact especially true of Mexico, which, for well-known political reasons, seeks the friendliest understanding. This must not be overlooked.

These two streams of the precious metals, poured into the current of commerce in full volume, will produce perturbations marked and important. Other countries will be affected, but the United States will feel the effect first and more directly than any other.

The Pacific Railway will open to us the trade of China, Japan, India, and other Oriental countries, of whose prepossessions we must not lose sight. For years silver, for reasons not fully understood, has been the object of unusual demand among these Asiatic nations, and now forms the almost universal medium of circulation, absorbing rapidly the silver of coinage. The erroneous proportion fixed between silver and gold by France, and which we are asked to copy, is denuding that country of the former metal. Our own monetary system, though less faulty, is not suitably adjusted in this respect. The silver dollar, for instance, a favorite coin of the native Indian and distant Asiatic, has well nigh disappeared from domestic circulation, to reappear among the Eastern peoples with whom we more than ever seek close intimacy.

As they prefer this piece we do well to increase rather than discontinue its coinage, for we must not deprive ourselves of the advantages which its agency will afford, and "it would be useless to send dollars to Asia inferior in weight and value to its well-known Spanish and American prototype."

Mr. Ruggles says that nearly all the silver coined in the United States prior to 1858 has disappeared. A remedy is not to be found in the adoption of a system that undervalues this metal, for that commodity, like any other, shuns the market where not taken at its full value to find the more favorable one.

It is a favorite metal, entering into all transactions of daily life, and deserves proper recognition in the monetary system.

It is said that "to promote the intercourse of nations with each other, uniformity in weights, coins, and measures of capacity is among the most efficacious agencies." Our weights, coins, and measures now correspond much more nearly to the English than to the French standard. Our commerce with Great Britain is nine times greater than with France, and if the former does not adopt the Paris system of coinage—and we have no assurance that she will—the United States would certainly commit a serious error in passing this bill. No argument is needed to enforce this. And what of the rising communities? A properly adjusted coinage would stimulate commerce with those great parts of the continent lying south and southwest of us, with the West Indies and the countless millions of trans-Pacific countries. We stand midway on the thoroughfare of traffic between these two widely-separated races. Our railways, canals, our natural highways, and merchant marine may be made to control their carrying trade.

But here, as everywhere else, a well-adjusted coinage becomes a wand of power in the hand of enterprise. Tokens are not wanting to mark the favor in which the United States are held by China. The unusual honor recently conferred by that government upon a citizen of this country was not alone because of his fitness as an ambassador at large, but was a mark as well of a friendly disposition towards this country. Future harmony of intercourse is assured, too, by their adoption as a text-book in diplomatic correspondence of a leading American authority on international law. Much might also be said about the growing partiality of Japan towards this country, but it is enough that the recent opening of certain ports indicates an enlightened change in the politics of these two old empires, of which commerce, especially our own, is availing itself.

* * * * * * * *

Our coinage is believed to be the simplest of any in circulation, and every way satisfactory for purposes of domestic commerce: it possesses special merits of everyday value, and should not, for light reasons, be exchanged where the advantages sought to be gained are mainly theoretical, engaging more properly the attention of the philosopher than the practical man. The instincts of our people lead them to believe that we are on the eve of important business changes, and we may therefore safely hold fast for the present to what experience has proven to be good, following only where clear indications may lead, and a future of great prosperity opens to our country.

The war gave us self-assertion of character, and removed many impediments to progress; it also proved our ability to originate means to ends. Its expensive lesson will be measurably lost if it fails to impress upon us the fact that we have a distinctive American policy to work out, one sufficiently free from the traditions of Europe to be suited to our peculiar situation and the genius of our enterprising countrymen.

The people of the United States have been quick to avail themselves of their natural advantages. The public lands, not only, and the mines of precious metals, but our political institutions, have likewise powerfully operated in our favor, and will continue to do so with increasing force.—*Senate Report, Com. No. 117*, 40th Congress, second session, page 13.

I observe we are doing business without a quorum. I do not ask that a quorum be present in my case, but I give notice that during the remainder of this session, when other Senators are speaking, who are giving facts and information so much needed by Senators who spend their time in the cloak rooms, we shall have 43 Senators in their seats.

Mr. PUGH. Mr. President, the absence of a quorum being suggested, and it being manifest that a quorum is not present, I move a call of the Senate.

The PRESIDING OFFICER (Mr. LODGE in the chair). The Secretary will call the roll.

The Secretary called the roll, and the following Senators responded to their names:

Aldrich,	Davis,	Lodge,	Ransom,
Allen,	Dixon,	McMillan,	Roach,
Allison,	Dolph,	McPherson,	Shoup,
Bate,	Dubois,	Manderson,	Smith,
Berry,	Faulkner,	Mitchell of Oreg.	Stewart,
Blackburn,	Frye,	Morgan,	Stockbridge,
Brice,	Gordon,	Palmer,	Teller,
Butler,	Gray,	Pasco,	Vance,
Caffery,	Hale,	Peffer,	Vest,
Call,	Harris,	Perkins,	Voorhees,
Camden,	Hawley,	Pettigrew,	Walthall,
Carey,	Hoar,	Platt,	Washburn,
Coke,	Jones of Ark.	Pugh,	White of La.
Cullom,	Lindsay,	Quay,	Wolcott.

The PRESIDING OFFICER. Fifty-six Senators have answered to their names. A quorum of the Senate being present, the Senator from Nevada will proceed.

Mr. STEWART. The bill was never called up for action. If it had been the reading of Mr. Morgan's report would have settled its fate, and it would not have received a single vote in the Senate. The author himself would certainly have repudiated it in view of the cogent reasons why it should not pass which Mr. Morgan presented to the country. Neither the bill nor the report attracted the slightest attention, and it is doubtful if any Senator who was not on the Finance Committee ever knew that such a bill had been introduced. The title was, "A bill in relation to the coinage of gold and silver," and gave no indication of the real character of the legislation proposed.

But the report of Mr. Morgan must have satisfied the promoters of the scheme to demonetize silver that it could not be accomplished by open and direct means, and that a discussion in the Senate would be fatal to the object of their desire. Mr. Morgan's report stood as an absolute bar against the demonetization of silver. He had full knowledge of the objects of the bill, which he defeated, but the Senate and the country were ignorant of the whole transaction. No discussion in either House of Congress had taken place with regard to the demonetization of silver, and the Senate as well as the country were ignorant of what occurred in the Finance Committee. Senators are too busy to examine the reports of committees upon bills which are never called up for action. It would not do to bring up the question again while Mr. Morgan was a member of the Finance Committee of that body. His term of office expired March 4, 1869, and Mr. Reuben E. Fenton took his place.

SECOND ATTEMPT AT DEMONETIZATION OF SILVER.

Gen. Grant became President of the United States on the 4th of March, 1869, and Mr. Boutwell was his Secretary of the Treasury; John J. Knox, Comptroller of the Currency, and Mr. Linderman, Director of the Mint. *A revision of the mint laws* was undertaken.

Mr. SHERMAN says:

What is the history of that bill? I have here the original bill. It was a bill framed in the Treasury Department. It did not come into Congress in the ordinary way, but it was framed in the Treasury Department by a distinguished body of experts, every one of whose names is now borne with honor wherever it is mentioned. Most of them are dead; but some of them are living. Mr. Pollock, long a Director of the Mint; Mr. Secretary Boutwell, who, as I shall show you, claims to be the author of the bill, and properly so, because he was at the head of the Department; Mr. John J. Knox, who held the office of Deputy Comptroller of the Currency; Mr. Linderman, who was Director of the Mint; Mr. Patterson, who was superintendent of the mint at Philadelphia, and a whole host of other experts, framed that bill after a most elaborate correspondence, which is contained here in the official documents communicated to Congress at the time. (CONGRESSIONAL RECORD, August 31, 1893, page 920.)

The bill contained seventy-one sections, and was sent to Mr. SHERMAN, chairman of the Committee on Finance, with the following letter from Mr. Boutwell:

TREASURY DEPARTMENT, *April 25, 1870.*

SIR: I have the honor to transmit herewith a bill revising the laws relative to the mint, assay offices, and coinage of the United States, and accompanying report. The bill has been prepared under the supervision of John Jay Knox, Deputy Comptroller of the Currency, and its passage is recommended in the form presented. It includes, in a condensed form, all the important legislation upon the coinage, not now obsolete, since the first mint was established, in 1792; and the report gives a concise statement of the various amendments proposed to existing laws, and the necessity for the change recommended. There has been no revision of the laws pertaining to the mint and coinage since 1837, and it is believed that the passage of the inclosed bill will conduce greatly to the efficiency and economy of this important branch of the Government service.

I am, very respectfully, your obedient servant,

GEORGE S. BOUTWELL,
Secretary of the Treasury.

Hon. JOHN SHERMAN,
Chairman Finance Committee, United States Senate.

It will be observed that Mr. Boutwell's letter transmitting the bill makes no mention of any change in the coinage laws, but he called it a bill revising the laws relative to the mint, assay offices, and coinage of the United States. This was the harmless title of the bill. He states that the bill was prepared under the supervision of John Jay Knox, Deputy Comptroller of

the Currency. Mr. Knox was soon after promoted from that office to the presidency of a leading national bank, one of the great financial institutions of New York. Such promotions of Treasury officials who have been faithful to the banking interests have been too frequent to escape observation.

Mr. Sherman states that Mr. Linderman and others assisted Mr. Knox in the preparation of the bill. Mr. Linderman was well qualified to render service in that behalf. His familiarity with the mint laws and his devotion to the cause of monometallism after his return from England made him a most efficient agent in securing gold monometallism after the example of Great Britain. Mr. Knox was also familiar with the English coinage laws, for he states in the documents which the Senator from Ohio had printed in his speech in the RECORD (page 922) that the appendix to his report recommending the bill which the Secretary sent to the chairman of the Finance Committee contained a copy of the English coinage act of 1870.

The title of the bill, "Revising the laws relative to the mint, assay offices, and coinage of the United States," was altogether misleading. No one would suspect from the title that it contained any device for the demonetization of silver. The Senator from Ohio in his speech of August 30, 1893, sets out in full

THE SECTIONS WHICH DECEIVED THE SENATE.

He says:

The bill contains seventy-one sections. Sections 15 and 18 of the bill are the only ones to which this implication has ever been made. I have here sections 15 and 18 as originally introduced by the Secretary of the Treasury and sent to the Committee on Finance. Here are the original sections:

"SEC. 15. *And be it further enacted*, That of the silver coin the weight of the half dollar, or piece of 50 cents, shall be 192 grains, and that of the quarter dollar and dime shall be, respectively, one-half and one-fifth of the weight of said half dollar. That the silver coin issued in conformity with the above section shall be a legal tender in any one payment of debts for all sums less than $1."

This is a literal copy, word for word, from the act of 1853, except that it drops the 5-cent piece, I believe it is.

Mr. MILLS. The act of 1873, the Senator means?

Mr. SHERMAN. No; I say the bill that was sent to us reënacts the law of 1853, and is an exact copy of it; but as the law of 1853 applied only to the fractional coins, in this draft, they added to the four or five sections fixing the gold and silver and other coins the following section:

SEC. 18. *And be it further enacted*, That no coins, either gold, silver, or minor coinage, shall hereafter be issued from the mint other than those of the denominations, standards, and weights herein set forth.

Two sections intervene between the fifteenth and eighteenth sections quoted by Mr. SHERMAN. A person reading the bill without any previous notice of the change in the currency would not have known that a change was contemplated. On the contrary, believing, as all did believe, that it was a mere codification of the mint laws, with only such changes as were necessary to harmonize and make them a consistent system, no one would suspect that anything had been omitted, much less the standard dollar, which had survived all changes since it was ordained by Hamilton and Jefferson.

The bill was introduced by Mr. SHERMAN on the 28th day of April, 1870, and referred to the Committee on Finance. On December 19, 1870, it was reported to the Senate with amendments. On the 9th day of January, 1871, the bill came up in the Senate, and was discussed in Committee of the Whole. No allusion whatever was made during that discussion to sections 15 and 18; in fact, there was nothing in those sections to discuss. They contained nothing objectionable. It was not what the bill contained, but

WHAT IT DID NOT CONTAIN,

that worked the wrong and demonetized silver.

The silver dollar was omitted from the list of coins, which omission was not observed and the attention of the Senate was not called to it.

After two or three unimportant amendments relating to salaries reported by the Committee on Finance had been disposed of, the following amendment reported by the committee came up for consideration in the Committee of the Whole:

For coinage, whether the gold and silver deposited be coined or cast into bars or ingots, in addition to the charge for refining or parting the metals, three-tenths of 1 per cent.—*Congressional Globe*, part 1, third session Forty-first Congress, 1870–'71, page 368.

This amendment was regarded as a direct attack upon the mining industry of the United States, and also upon domestic coinage. It was argued that such a provision of law would discourage the minting of gold and silver in the United States and encourage its exportation, because the mints of the leading nations of Europe made no charge for coinage after the metal had been refined and parted.

The discussion which followed on this amendment occupies eight pages in the Congressional Globe. (See *Ibid.*, pages 368 to 377, both inclusive.)

The amendment was finally agreed to—yeas 25, nays 22, absent 25.

Other sections, having no relation to sections 15 and 18, were then amended, and the Senate went into executive session.

On the following day, when the bill was reached in its order, the proceedings were commenced as follows:

MINT LAWS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. No. 859) revising the laws relative to the mints, assay offices, and coinage of the United States.

The bill was reported to the Senate as amended.

The VICE-PRESIDENT. Unless a separate vote be demanded, the question will be taken on concurring in the amendments made as in Committee of the Whole in gross.

Mr. COLE. I ask for a separate vote.

The VICE-PRESIDENT. Does the Senator from California ask for a separate vote on the amendment in regard to the coinage charge?

Mr. COLE. Yes, sir.

Mr. SUMNER. There is one suggestion I wish to make. It comes under section 19.

The VICE-PRESIDENT. That will still be in order after the amendments agreed to in Committee of the Whole shall have been acted upon.

Mr. SUMNER. Very well.

The VICE-PRESIDENT. The Secretary will report the amendment upon which a separate vote is demanded.

The Chief Clerk read the amendment, which was in section 25, after the words "as follows," in the third line, to insert "for coinage, whether the gold and silver deposited be coined or cast into bars or ingots, in addition to the charge for refining or parting the metals, three-tenths of 1 per cent."

The VICE-PRESIDENT. The other amendment in the same section, inserting the words in line 12 "other than for coinage," will be considered at the same time, as they are dependent upon each other. The remaining amendments made as in Committee of the Whole will be regarded as concurred in. The question now is on concurring in this amendment made as in Committee of the Whole. (*Ibid.*, page 394.)

The coinage charge was discussed at great length. (See pages 394 to 399, both inclusive.)

The entire discussion on the last day, as it had been on the first, was confined to the charge of three-tenths of 1 per cent on the coinage of gold and silver bullion. The yeas and nays on the adoption of this amendment in the Senate were taken, resulting in the negative—yeas 23, nays 26, absent 23. (*Ibid.*, page 399.)

Mr. SHERMAN then said:

I should like to have a vote by yeas and nays on the passage of the bill.

The yeas and nays were ordered; and being taken, resulted—yeas 36, nays 14; as follows:

Yeas—Messrs. Bayard, Boreman, Brownlow, Casserly, Cole, Conkling, Corbett, Davis, Gilbert, Hamlin, Harlan, Jewett, Johnston, Kellogg, McCreery, Morton, Nye, Patterson, Pomeroy, Pool, Ramsey, Rice, Saulsbury, Spencer, Stewart, Stockton, Sumner, Thurman, Tipton, Trumble, Vickers, Warner, Willey, Williams, Wilson, and Yates—36.

Nays—Messrs. Abbott, Ames, Anthony, Buckingham, Carpenter, Chandler, Fenton, Hamilton of Texas, Harris, Howell, Morrill of Vermont, Pratt, Scott and Sherman—14. (*Ibid.*, page 399).

It will be observed that Mr. SHERMAN voted in the negative and that I voted in the affirmative. I now desire to call particular attention to the amendment, which was substantially the only matter in controversy in the Senate, and about which all the debate took place. I will repeat it:

For coinage, whether the gold and silver deposited be coined or cast into bars or ingots, in addition to the charge for refining or parting the metals, three-tenths of 1 per cent.

Mr. ALDRICH. Mr. President——

Mr. STEWART. I do not wish to be interrupted now.

Mr. ALDRICH. I should like——

The PRESIDING OFFICER (Mr. CULLOM in the chair). The Senator from Nevada declines to be interrupted.

Mr. ALDRICH. I wish to put in a section of that bill at that point.

Mr. STEWART. Let the Senator put it in his own speech. The facts I am giving follow consecutively.

Mr. ALDRICH. I wish to put in a section of the bill, so as to show the exact facts.

Mr. STEWART. The Senator can not put it in my speech. Let him make his own speech. Of course, it is very aggravating to Senators to have the facts of the matter brought out, and I appreciate their position.

This amendment assumed that silver bullion could be deposited at the mint for coinage for the benefit of the depositor, and imposed a tax on the person so depositing for the privilege of coining. If the Senate had been advised, as Mr. SHERMAN says that he was, that no silver could, under that bill, be deposited at the mint for coinage, is it probable that it would have spent two days in hot debate over the question of taxing bullion which could not be deposited, and therefore never could be taxed? For what purpose did Mr. SHERMAN violently advocate the tax on silver bullion deposited for coinage in a bill which denied it the right of coinage, and denied to the owner of bullion the right to deposit it for that purpose?

Under the act of 1853 and under the provisions of the bill then under consideration, the subsidiary silver coin mentioned in section 15 could only be coined on the account of the Government. No private party could present it for that purpose. But the owners of bullion could, under existing laws, from the foundation of the Government, present the same to the mint and have it coined into standard dollars. Mr. SHERMAN says he knew that he had taken that right away, and that we all ought to have known the same. Why, then, was he combatting for a charge on the abolished coinage?

On the other hand, why should the Senate occupy two dasy of its time debating such a charge, if it also knew that the right of coinage of silver on private account was abolished? The

DISINGENUOUSNESS OF THE SENATOR FROM OHIO

was manifested at that time by advocating a charge on the coinage of silver for private parties, as well as of gold, when he knew that gold only could be coined on private account, if he succeeded with his measure.

I can draw no other inference from his course at that time than a purpose to conceal the fact that the silver dollar had been omitted. The fact that Mr. SHERMAN voted against the bill is most suggestive. Why should he vote to prevent a useful revision of the mint laws and the passage of so important a bill as the one then under consideration because the Senate would not consent to a charge for mintage which was not in the original bill introduced by him? He knew very well that his vote would not defeat the bill nor endanger it in the slightest degree; but by voting against it he made the Senate believe that he attached more importance to a charge of three-tenths of 1 per cent on the coinage of gold (and of silver bullion, the coinage of which on private account had been abolished) than to the systematizing of the various confused mint laws of the country, by a measure which had been the labor of experts so eminent as those he describes.

Mr. SHERMAN says he knew that silver was demonetized by the bill, and that everybody else ought to have known it. Is it not barely possible that, knowing that fact, he desired to avoid the odium of voting for it which would attach after its far-reaching consequences should have been realized? Is it not barely possible that that amendment was introduced at the early stage of the consideration of the bill to attract the attention of the Senate and divert attention from the other provisions of the bill to make it seem the most important provision? Is it not a little strange that after his visit to London and Paris and his celebrated letter to Mr. Ruggles, which I have quoted, that he took no further interest in the demonetization of silver?

Does not the fact that he introduced a bill for the demonetization of silver, and made a most elaborate report in its favor, which bill was consigned to oblivion after the minority report of Mr. MORGAN came in, add to the mystery of his conduct? Can it be supposed that the man who contributed so largely to swing nineteen nations into line for the gold standard, and who induced all the Finance Committee except one to favor the demonetization of silver, would forego this master desire of his heart, which he declares was "an American idea," because he could not impose a paltry charge of three-tenths of 1 per cent upon gold and silver coinage after the free coinage of silver had been abolished?

This disposes of the charge so often made by the gold monometallists and repeated by Mr. SHERMAN, that in 1871 I voted for the demonetization of silver and he voted against it.

In the report of Mr. Knox, printed in the remarks of the Senator from Ohio of August 30, 1893 (RECORD of August 31, page 923), the following further history of the bill is given:

On January 13, 1871, on motion of Hon. William D. Kelley, the Senate bill was ordered to be printed. On February 25, 1871, Mr. Kelley, the chairman of the Committee on Coinage, reported the bill back with an amendment, in the nature of a substitute, when it was again printed and recommitted.

The bill, therefore, was never heard of again at that session, and it never was debated in the House for a moment.

HISTORY OF THE DEMONETIZATION ACT OF 1873.

Mr. Kelley again, on March 9, 1871, introduced a bill in the Forty-second Congress, when it was ordered to be printed, and referred to the Committee on Coinage when appointed.

On January 9, 1872, the bill was reported by Mr. Kelley, chairman of the Coinage Committee, with the recommendation that it pass.

ITS GENEARL OBJECTS

were stated by Mr. Kelley. He informed the House that it had been prepared in the Treasury Department for the purpose of codifying and simplifying the mint laws. He informed the House that the most important change made by the bill was creating a Director of the Mint, with headquarters in the Treasury Department. He said:

It is of the highest importance, therefore, that the one single cardinal change that the bill proposes should be made.—*Congressional Globe*, part 1, Forty-second Congress, second session, 1871–'72, page 322.

Mr. Maynard stated what this

CARDINAL CHANGE

was:

It contemplates that the Mint shall be a bureau in the Treasury Department, and that the head of that Bureau shall be appointed by the President, by and with the advice and consent of the Senate, for a period of five years, unless sooner removed for reasons given to the Senate. * * *

This bill is symmetrical in all its parts; it is a mere revision of the mint laws, suggested by the Secretary of the Treasury, and concurred in by every man who sees the difficulty of managing mints and assay offices, scattered over this country as they are, without having a responsible head. Its sole function is to so codify the laws, and to appoint a responsible head under the Secretary of the Treasury. (*Ibid.*, 325).

Some discussion was had with regard to the salaries of officers, but the main contention was with regard to nickel coinage, and how the nickel should be obtained.

The House adjourned that day without action on the bill. (See *Ibid.*, pages 322 to 328, both inclusive.)

On the 10th of January the House resumed consideration of the bill. The debate was confined to the question of salaries. The bill was finally recommitted to the Committee on Coinage, Weights, and Measures. (See *Ibid.*, pages 336 to 340, both inclusive.)

No allusion whatever was made to the omission of the silver dollar. If it was omitted in the bill offered by Mr. Kelley, as alleged, the original can not be found.

I again quote from the report of Mr. Knox, printed in the speech of the Senator from Ohio:

On February 9, 1872, it was again reported from the Coinage Committee by the Hon. Samuel Hooper, printed and recommitted, and on February 13, 1872, reported back by Mr. Hooper with amendments, printed, and made the special order for March 12, 1872, until disposed of.

The bill came up for consideration on April 9, 1872.

Mr. Hooper made a

LENGTHY EXPLANATION OF THE PROVISIONS OF THE BILL,

occupying four pages of the RECORD, from pages 2304 to 2307, both inclusive.

The only allusion made by Mr. Hooper to the silver dollar is contained in the following extract from his remarks, published in the speech of the Senator from Ohio, on page 924, as follows:

Section 16 reënacts the provisions of existing laws defining the silver coins and their weights, respectively except in relation to the silver dollar, which is reduced in weight from 412½ to 384 grains: thus making it a subsidiary coin in harmony with the silver coins of less denomination, to secure its concurrent circulation with them. The silver dollar of 412½ grains, by reason of its bullion and intrinsic value being greater than its nominal value, long since ceased to be a coin of circulation, and is melted by manufacturers of silverware. It does not circulate now in commercial transactions with any country, and the convenience of those manufacturers in this respect can better be met by supplying small stamped bars of the same standard, avoiding the useless expense of coining the dollar for that purpose. The coinage of the half-dime is discontinued, for the reason that its place is supplied by the copper nickel 5-cent piece, of which a large issue has been made, and which, by the provisions of the act authorizing its issue, is redeemable in United States currency. (Congressional Globe, part 3, second session Forty-second Congress, page 2306.)

Mr. Hooper correctly states the weight and fineness of the dollar contained in the bill then pending and as it finally passed the House, but he does not state that it was a legal tender for only $5. It is true he classes it with the subsidiary coin, but a person listening to his remarks might well suppose that the weight of the dollar was simply reduced, because he states at considerable length that the silver dollar was at a premium over the gold dollar, and the natural inference would be that he intended to establish the parity between the two metals.

Mr. Stoughton did say, in the course of the debate, that—

The silver coins provided for are the dollar, 384 grains troy; the half-dollar, quarter-dollar, and dime, of the value and weight of one-half, one-quarter, and one-tenth of the dollar respectively, and they are made a legal tender for all sums not exceeding $5 at any one payment. The silver dollar as now issued is worth for bullion 3¼ cents more than the gold dollar, and 7½ cents more than two half-dollars. Having a greater intrinsic than nominal value, it is certain to be withdrawn from circulation whenever we return to specie payment, and to be used only for manufacture and exportation as bullion. (Congressional Globe, part 3, second session Forty-second Congress, 1871–'72, page 2308.)

But it was reserved for the Hon. Clarkson Potter, of New York, to develop

THE REAL CHARACTER OF THE BILL

and show that it adopted a gold standard.

The speech of Mr. Potter, from which the following extracts are taken, developed the radical character and far-reaching scope of the bill, and furnished material for a protracted discussion, which must have defeated the object of our English friends and American doctrinaires to demonetize silver:

Mr. POTTER. I confess, therefore, that the introduction of the bill at such a period excited my suspicion. I was and am at a loss to gather from anything I know of or can learn that there is any necessity for the adoption of this measure now. When the bill comes to be read section by section I shall make such suggestions in the way of amendments as I think are calculated to make it better if it should go into operation. But for the present I desire to avail myself of the few minutes allowed me to state generally my objections to the adoption of any such law now.

* * * * * * *

Then, in the next place, this bill provides for the making of changes in the legal-tender coin of the country, and for substituting as legal-tender coin of only one metal instead, as heretofore, of two. I think myself this would be a wise provision and that legal-tender coins, except subsidiary coin, should be of gold alone; but why should we legislate on that now when we are not using either of these metals as a circulating medium? The bill provides also for a change in respect of the weight and value of the silver dollar, which I think is a subject which, when we come to require legislation about it at all, will demand at our hands very serious consideration, and which, as we are not using such coins for circulation now, seems at this time to be an unnecessary subject about which to legislate.

But beyond that, the bill provides for an entirely new subsidiary coinage. It provides for the coinage of new 5-cent, 3-cent, 2-cent, and 1-cent pieces, and it provides that these new coins shall be of a certain alloy of copper and nickel. Now, we have at present in circulation several hundred million pieces of subsidiary base coin. They are familiar to every one of us, and have been in circulation for some years. There is the ordinary nickel 5-cent,

the ordinary nickel 3-cent piece, and the bronze 2-cent piece, and the nickel 1-cent piece, for which there has been substituted of late years the bronze 1-cent piece. Of these pieces of subsidiary coinage, I repeat, several hundred million pieces are in circulation, and it is proposed that in place of these pieces we shall have another set of minor subsidiary coins of nickel copper, according to the form prescribed in this bill. For what reason? It has been suggested for the purpose of uniformity. That reason, however, seems to me so insufficient that it has occurred to me that behind this provision of the law lies the real motive power of this bill; that is, that it will make necessary a great consumption of nickel copper for several hundred million pieces of this new subsidiary coinage.—*Congressional Globe*, part 3, second session Forty-second Congress, 1871-'72, page 2310.

He continued at considerable length, pointing out other objections to the bill. The speech of Mr. Potter excited a general debate, which made it very clear that the passage of the bill by ordinary methods was impossible. The House adjourned pending the consideration of the bill and terminated a very exciting controversy. The debate which did occur occupies ten pages—from page 2307 to 2317, inclusive.

The opposition to this bill was so determined and aggressive that its friends professedly abandoned it and brought in

A SO-CALLED SUBSTITUTE,

which, they asserted, obviated the objections made. On the 27th day of May the following extraordinary proceedings were had in the House of Representatives:

MINTS AND COINAGE.

Mr. HOOPER of Massachusetts. I desire to call up the bill (H. R. No. 1427) revising and amending the laws relative to mints, assay offices, and coinage of the United States. I do so for the purpose of offering an amendment to the bill in the nature of a substitute, one which has been very carefully prepared, and which I have submitted to the different gentlemen in this House who have taken a special interest in the bill. I find that it meets with universal approbation in the form in which I offer it. I move that the rules be suspended and that the substitute be put on its passage.

Mr. BROOKS. I ask the gentleman from Massachusetts (Mr. Hooper) to postpone his motion until his colleague on the committee, my colleague from New York [Mr. Potter] is in his seat. It is my impression that he does not concur in this substitute.

Mr. HOOPER of Massachusetts. It is so late in the session that I must decline waiting any longer.

Mr. BROOKS. I would again suggest to the gentleman that he should wait until my colleague comes in.

Mr. HOOPER of Massachusetts. I can not do so.

Mr. HOLMAN. I suppose it is intended to have the bill read before it is put upon its passage.

The SPEAKER. The substitute will be read.

Mr. HOOPER of Massachusetts. I hope not. It is a long bill, and those who are interested in it are perfectly familiar with its provisions.

Mr. KERR. The rules can not be suspended so as to dispense with the reading of the bill?

The SPEAKER. They can be.

Mr. KERR. I want the House to understand that it is attempted to put through this bill without being read.

The SPEAKER. Does the gentleman from Massachusetts [Mr. Hooper] move that the reading of the bill be dispensed with?

Mr. HOOPER of Massachusetts. I will so frame my motion to suspend the rules that it will dispense with the reading of the bill.

The SPEAKER. The gentleman from Massachusetts moves that the rules be suspended and that the bill pass, the reading thereof being dispensed with.

Mr. RANDALL. Can not we have a division of that motion?

The SPEAKER. A motion to suspend the rules can not be divided.

Mr. RANDALL. I should like to have the bill read, although I am willing that the rules shall be suspended as to the passage of the bill.

The question was put on suspending the rules and passing the bill without reading; and (two-thirds not voting in favor thereof) the rules were not suspended.

* * * * * * *

MINTS AND COINAGE.

Mr. HOOPER of Massachusetts. I now move that the rules be suspended and the substitute for the bill in relation to mints and coinage passed; and I ask that the substitute be read.

The Clerk began to read the substitute.

Mr. BROOKS. Is that the original bill?

The SPEAKER. The motion of the gentleman from Massachusetts [Mr. HOOPER] applies to the substitute, and that on which the House is called to act is being read.

Mr. BROOKS. As there is to be no debate, the only chance we have to know what we are doing is to have both the bill and the substitute read.

The SPEAKER. The motion of the gentleman from Massachusetts being to suspend the rules and pass the substitute, it gives no choice between the two bills. The House must either pass the substitute or none.

Mr. BROOKS. How can we choose between the original bill and the substitute unless we hear them both read?

The SPEAKER. The gentleman can vote "aye" or "no" on the question whether this substitute shall be passed.

Mr. BROOKS. I am very much in the habit of voting "no" when I do not know what is going on.

Mr. HOLMAN. Before the question is taken upon suspending the rules and passing the bill, I hope the gentleman from Massachusetts will explain the leading changes made by this bill in the existing law, especially in reference to the coinage. It would seem that all the small coinage of the country is intended to be recoined.

Mr. HOOPER of Massachusetts. This bill makes no changes in the existing law in that regard. It does not require the recoinage of the small coins. On the contrary, I understand that the Secretary of the Treasury proposes to issue an order to stop the coinage of all the minor coins, as there is now a great abundance of them in the country. The salaries are not increased. They remain as they were.

Mr. HOLMAN. Is not the salary of the subtreasurer at New York increased?

Mr. HOOPER of Massachusetts. No, sir; it is not increased.

Mr. GARFIELD of Ohio. Does the gentleman say that no salary is increased by this bill?

Mr. HOOPER of Massachusetts. No salary is increased by this bill.

Mr. FARNSWORTH. Are there any additional offices created?

Mr. SARGENT. The bill dispenses with some existing offices.

Mr. HOOPER of Massachusetts. It dispenses with certain officers now in the mints, and the saving on their salaries will more than pay for the expenses of the new bureau of the Treasury Department.

Mr. HOLMAN. What is the new bureau called?

Mr. HOOPER of Massachusetts. The new bureau is to be called the bureau of mines and coinage. There is now no general superintendence; each mint runs on its own hook. There is really now no law regulating the mints, and no responsibility.

Mr. HOLMAN. How many mints are provided for by the bill?

Mr. HOOPER of Massachusetts. No new mints.

Mr. HOLMAN. Did the Committee on Banking and Currency consider the subject of discontinuing any of the mints?

Mr. HOOPER of Massachusetts. They did consider it and did not deem it expedient. The Secretary of the Treasury has authority now, independent of this bill, to discontinue certain mints if he deems it expedient; one at Charlotte, for instance. This bill does not change his power at all in that respect.

Mr. MERRIAM. Has this bill been submitted to the Secretary of the Treasury; and if so, does it meet his approval?

Mr. HOOPER of Massachusetts. It has been submitted to him, and he not only approves it, but strongly urges its passage. He deems it exceedingly important, as there are irregularities in the Mint now, which can not be controlled by any existing law.

Mr. KERR. Does the nickel clause, so-called, and which led to some controversy a month or so ago, remain in the bill as it was at that time?

Mr. HOOPER of Massachusetts. It has been changed. Any nickel to be purchased is to be subject to bids after advertisement.

Mr. BROOKS. My colleague from the Westchester district [Mr. Potter] stated the other day that this bill provided for the recoinage of more or less of the small currency of the country and the creation of a new currency.

Mr. HOOPER of Massachusetts. That is not the case with the bill as it now stands.

Mr. MCCORMICK of Missouri. I ask that the nineteenth section be read again.

The section was read, as follows:

"SEC. 19. That upon the coins of the United States there shall be the following devices and legends: Upon one side there shall be an impression emblematic of liberty, with an inscription of the word 'Liberty,' and the year of the coinage; and upon the reverse shall be the figure or representation of an eagle, with the inscriptions 'United States of America' and 'E Pluribus Unum,' and a designation of the value of the coin; but on the gold dollar and three-dollar piece, the dime, five, three and one-cent piece the figure of the eagle shall be omitted, and the Director of the Mint, with the approval of the Secretary of the Treasury, may cause the motto 'In God We Trust' to be inscribed upon such coins as shall admit of such motto; and any one of the foregoing inscriptions may be on the rim of the gold and silver coins."

Mr. MCCORMICK of Missouri. What I wish to inquire of the gentleman from Massachusetts [Mr. Hooper] is whether, under the provisions of the nineteenth section, the Director of the Mint is not authorized to recoin all the nickel coin of the United States in order to make it conform to the section?

Mr. HOOPER of Massachusetts. He is not. On the contrary, under the existing laws, as I stated before, the amount of minor coinage is so large that the Secretary of the Treasury has prepared an order prohibiting any further coinage until further notice.

Mr. MCCORMICK of Missouri. I understand that the Director of the Mint says that it costs the Government almost as much to coin a 5-cent nickel piece as it does to coin a 10-dollar gold piece.

Mr. HOOPER of Massachusetts. There is nothing in this bill to compel a recoinage.

Mr. MCCORMICK of Missouri. Would the gentleman have any objection to strike out that section?

Mr. HOOPER of Massachusetts. Certainly I would.

Mr. GARFIELD of Ohio. Does this bill provide what shall be done with those officers of the Treasury that are now called assistant treasurers and who are *ex officio* officers of the mint? By this bill they are evidently separated from the Treasury, and belong wholly to this new bureau which is to be established. Now, will it not be necessary for us to establish new offices in their cases and give them a salary appropriate to the duties they will have to perform in the Treasury?

Mr. HOOPER of Massachusetts. The Superintendent of the Mint (and that officer now exists) takes the place of the subtreasurer, who acted *ex officio* as an officer of the mint, and provision is made in this bill that the subtreasurer who acted *ex officio* shall go back and confine himself to his duties as assistant treasurer and disconnect himself from the mint.

Mr. GARFIELD of Ohio. Go back to the Treasury?

Mr. HOOPER of Massachusetts. Yes.

Mr. GARFIELD of Ohio. The gentleman will then see that that entails upon us the necessity of providing a sufficient salary for those going back to the Treasury.

Mr. HOOPER of Massachusetts. I beg the gentleman's pardon; it leaves the superintendent of the mint with the same salary as before.

Mr. GARFIELD of Ohio. I mean that the officers who go back into the Treasury must have salaries provided for them.

Mr. HOOPER of Massachusetts. They were *ex officio* officers of the Mint; their salaries were not increased.

Mr. GARFIELD of Ohio. I beg the gentleman's pardon; they had one salary as *ex officio* officers of the Mint and another as officers of the Treasury.

Mr. SARGENT. That was not so, except in one instance.

Mr. MCNEELY. As a member of the Committee on Coinage, Weights, and Measures, having carefully examined every section and line of this bill, and generally well understanding the subject before us, I am satisfied the bill ought to pass.

Mr. SARGENT. I hope we will now have a vote.

The question being taken on the motion of Mr. Hooper of Massachusetts, to suspend the rules and pass the bill, it was agreed to; there being—ayes 110, noes 13.—*Congressional Globe*, part 5, second session Forty-second Congress, 1871-'72, pages 3882, 3883.

Some of the foregoing questions and answers are very significant. Following are examples:

Mr. BROOKS. I ask the gentleman from Massachusetts [Mr. Hooper] to postpone his motion until his colleague on the committee, my colleague from New York [Mr. Potter] is in his seat. It is my impression that he does not concur in this substitute.

Mr. HOOPER of Massachusetts. It is so late in the session that I must decline waiting any longer.

Mr. BROOKS. I would again suggest to the gentleman that he should wait until my colleague comes in.

Mr. HOOPER of Massachusetts. I can not do so.—*Ibid.*, page 3882.

The refusal of Mr. Hooper to wait until Mr. Potter was present was more evidence of caution than of fairness.

Mr. KERR. Does the nickel clause, so called, and which led to some controversy a month or so ago, remain in the bill as it was at that time?

Mr. HOOPER of Massachusetts. It has been changed. Any nickel to be purchased is to be subject to bids after advertisement.—*Ibid.*, page 3882.

This was not true. There had been no change in the bill in that respect.

Mr. BROOKS. My colleague from the Westchester district [Mr. Potter] stated the other day that this bill provided for the recoinage of more or less of the small currency of the country and the creation of a new currency.

Mr. HOOPER of Massachusetts. That is not the case with the bill as it now stands.—*Ibid.*, page 3883.

A comparison of the bill and substitute will show that the substitute and the original bill were the same as to coinage, new currency, and nickel. The difference as between the original bill and the substitute were trifling and immaterial, relating to matters of administration and phraseology, and were wholly outside of the subject of controversy over the original bill. No change was made with regard to a single matter objected to in the debate. I have carefully compared the original bill and the substitute, which are now on file in the document room of the Senate, open to the inspection of all, and I affirm that the substitute was the same as the original bill, so far as the matters in controversy were concerned in the debate in which Mr. Potter took so prominent a part.

Too much importance can not be attached to the fact that the substitute could not have been adopted if Mr. Hooper had not asserted that the controverted portions had been changed. The original bill, with the alterations made by the substitute, will show

HOW FAR FROM THE TRUTH MR. HOOPER'S REPRESENTATIONS WERE,

and how thoroughly the House was misled by such misrepresentations.

These documents from which I have quoted are on file in the document room of the Senate, and can easily be referred to.

I will now give

THE ENTIRE PROCEEDINGS IN THE SENATE

on this House bill, commencing with the bill itself, as reported with amendments from the Finance Committee, together with every word of debate during its consideration.

[Note in explanation of the bill (H. R. 2934) printed below.

1. The body of the bill, printed in brevier, is as it came from the House.

2. Amendments to insert, reported by Committee on Finance, are in *italics*.

3. Amendments to strike out, reported by Committee on Finance, are in [brackets].

4. Amendments made by the Senate striking out words are in brevier, with brackets, and the words inserted in lieu thereof in the handwriting of the Clerk, are in SMALL CAPITALS.

5. Amendments reported by Committee on Finance, on page 12, section 18, line 9, in *italics* and brackets, were disagreed to by the Senate.

6. Amendment to strike out, on page 14, section 24, lines 5, and 6, was moved in the Senate, and is in SMALL CAPITALS and brackets.

7. The word "agreed," in the handwriting of the Clerk, showing what amendments were agreed to, is indicated by LARGE CAPITALS.

8. The exact pages and lines of the original bill are indicated.]

42d CONGRESS, 3d SESSION. H. R. 2934.

IN THE SENATE OF THE UNITED STATES.

MAY 29, 1872.

Read twice and referred to the Committee on Finance.

DECEMBER 16, 1872.

Reported by Mr. SHERMAN with amendments, viz: Strike out the parts in [brackets] and insert the parts printed in *italics*.

JANUARY 7, 1873.

Mr. SHERMAN, from the Committee on Finance, reported additional amendments; which were ordered to be printed with the bill.

AN ACT

Revising and amending the laws relative to the mints, assay-offices, and coinage of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Mint of the United States is hereby established as a Bureau of the Treasury Department, embracing in its organization and under its control all mints for the manufacture of coin, and all assay-offices for the stamping of bars, which are now, or which may be hereafter, authorized by law. The chief officer of the said Bureau shall be denominated the Director of the Mint, and shall be under the general direction of the Secretary of the Treasury. He shall be appointed by the President, by and with the advice and consent of the Senate,

2

and shall hold his office for the term of five years, unless sooner removed by the President, upon reasons to be communicated by him to the Senate.

SEC. 2. That the Director of the Mint shall have the general supervision of all mints and assay-offices, and shall make an annual report to the Secretary of the Treasury of their operations, at the close of each fiscal year, and from time to time such additional reports, setting forth the operations and condition of such institutions, as the Secretary of the Treasury shall require, and shall lay before him the annual estimates for their support. And the Secretary of the Treasury shall appoint the number of clerks, classified according to law, necessary to discharge the duties of said Bureau.

SEC. 3. That the officers of each mint shall be a superintendent, an assayer, a melter and refiner, and a coiner, and, for the mint at Philadelphia, an engraver, all to be appointed by the President of the United States, by and with the advise and consent of the Senate.

SEC. 4. That the superintendent of each mint shall have the control thereof, the superintendence of the officers and persons employed therein, and the supervision of the business thereof, subject to the approval of the Director of the Mint, to whom he shall make reports at such times and according to such forms as the Director of the Mint may prescribe,

3

which shall exhibit in detail, and under appropriate heads, the deposits of bullion, the amount of gold, silver, and minor coinage, and the amount of unparted, standard, and refined bars issued, and such other statistics and information as may be required. The superintendent of each mint shall also receive and safely keep, until legally withdrawn, all moneys or bullion which shall be for the use or the expenses of the mint. He shall receive all bullion brought to the mint for assay or coinage; shall be the keeper of all bullion or coin in the mint, except while the same is legally in the hands of other officers; and shall deliver all coins struck at the mint to the persons to whom they shall be legally payable. From the report of the assayer and the weight of the bullion, he shall compute the value of each deposit, and also the amount of the charges or deductions, if any, of all which he shall give a detailed memorandum to the depositor; and he shall also give at the same time, under his hand, a certificate of the net amount of the deposit, to be paid in coins or bars of the same species of bullion as that deposited, the correctness of which certificate shall be verified by the assayer, who shall countersign the same; and in all cases of transfer of coin or bullion, he shall give and receive vouchers, stating the amount and character of such coin or bullion. He shall keep and render, quarterly, to the Director of the Mint, for the purpose of adjust-

4

ment, according to such forms as may be prescribed by the Secretary of the Treasury, regular and faithful accounts of his transactions with the other officers of the mint and the depositors; and shall also render to him a monthly statement of the ordinary expenses of the mint or assay-office under his charge. He shall also appoint all assistants, clerks, (one of whom shall be designated "chief clerk,") and workmen employed under his superintendence; but no person shall be appointed to employment in the offices of the assayer, melter and refiner, coiner, or engraver, except on the recommendation and nomination in writing of those officers, respectively; and he shall forthwith report to the Director of the Mint the names of all persons appointed by him, the duties to be performed, the rate of compensation, the appropriation from which compensation is to be made, and the grounds of the appointment; and if the Director of the Mint shall disapprove the same, the appointment shall be vacated.

SEC. 5. That the assayer shall assay all metals and bullion, whenever such assays are required in the operations AGREED OR SAMPLES OF BULLION of the mint; he shall also make assays of coins/whenever required by the superintendent.

SEC. 6. That the melter and refiner shall execute all the operations which are necessary in order to form ingots of standard silver or gold, and alloys for minor coinage, suitable

5

for the coiner, from the metals legally delivered to him for that purpose; and shall also execute all the operations which are necessary in order to form bars conformable in all

respects to the law, from the gold and silver bullion delivered to him for that purpose. He shall keep a careful record of all transactions with the superintendent, noting the weight and character of the bullion; and shall be responsible for all bullion delivered to him until the same is returned to the superintendent and the proper vouchers obtained.

SEC. 7. That the coiner shall execute all the operations which are necessary in order to form coins, comformable in all respects to the law, from the standard gold and silver ingots, and alloys for minor coinage, legally delivered to him for that purpose; and shall be responsible for all bullion delivered to him, until the same is returned to the superintendent and the proper vouchers obtained.

SEC. 8. That the engraver shall prepare from the

AGREED WORKING

original dies already authorized all the [wording] ^ dies required for use in the coinage of the several mints, and, when new coins or devices are authorized, shall, if required by the Director of the Mint, prepare the devices, models, molds, and matrices, or original dies, for the same; but the Director of the Mint shall nevertheless have power, with the approval of the Secretary of the Treasury, to engage temporarily for this purpose the service of one or more artists distinguished

6

in their respective departments of art, who shall be paid for such service from the contingent appropriation for the mint at Philadelphia.

AGREED ASSAY

SEC. 9. That whenever any officer of a mint or ^ office shall be temporarily absent, on account of sickness or any other cause, it shall be lawful for the superintendent, with the consent of said officer, to appoint some person attached to the mint to act in the place of such officer during his absence; but all such appointments shall be forthwith reported to the Director of the Mint for his approval; and in all cases whatsoever the principal shall be responsible for the acts of his representative. In case of the temporary absence of the superintendent, the chief clerk shall act in his place; and in case of the temporary absence of the Director of the Mint, the Secretary of the Treasury may designate some one to act in his place.

SEC. 10. That every officer, assistant, and clerk of the mint shall, before he enters upon the execution of his office, take an oath or affirmation before some judge of the United States, or judge of the superior court, or of some court of record of any State, faithfully and diligently to perform the duties thereof, in addition to other official oaths prescribed by law; which oaths, duly certified, shall be transmitted to the Secretary of the Treasury; and the superintendent of each

7

mint may require such oath or affirmation from any of the employees of the mint.

SEC. 11. That the superintendent, the assayer, the melter and refiner, and the coiner of each mint, before entering upon the execution of their respective offices, shall become bound to the United States, with one or more sureties, approved by the Secretary of the Treasury, in the sum of not less than ten nor more than fifty thousand dollars, with condition for the faithful and diligent performance of the duties of his office. Similar bonds may be required of the assistants and clerks, in such sums as the superintendent shall determine, with the approbation of the Director of the Mint; but the same shall not be construed to relieve the superintendent or other officers from liability to the United States for acts, omissions, or negligence of their subordinates or employees: *Provided*, That the Secretary of the Treasury may, at his discretion, increase the bonds of the superintendent.

SEC. 12. That there shall be allowed to the Director of the Mint an annual salary of four thousand five hundred dollars, and actual necessary traveling expenses in visiting the different mints and assay-offices, for which vouchers shall be rendered, to the superintendents of the mints at Philadelphia and San Francisco, each four thousand five hundred dollars; to the assayer, melters and refiners, and coiners of said mints, each three thousand dollars; to the engraver of the mint at

8

Philadelphia, three thousand dollars; to the superintendent of the mint at Carson City, three thousand dollars; and to the assayer, to the melter and refiner, and to the coiner of the mint at Carson City, each, two thousand five hundred dollars; to the assistants and clerks such annual salary shall be allowed as the Director of the Mint may determine, with the approbation of the Secretary of the Treasury; and to the workmen shall be allowed such wages, to be determined by the superintendent, as may be customary and reasonable according to their respective stations and occupations, and approved by the Director of the Mint; and the salaries provided for in this section, and the wages of the workmen permanently engaged, shall be payable in monthly installments.

SEC. 13. That the standard for both gold and silver coins of the United States shall be such that of one thousand parts by weight nine hundred shall be of pure metal and one hundred of alloy; and the alloy of the silver coins shall be of copper, and the alloy of the gold coins shall be of copper, or of copper and silver; but the silver shall in no case exceed one-tenth of the whole alloy.

SEC. 14. That the gold coins of the United States shall be a one-dollar piece, which, at the standard weight of twenty-five and eight-tenths grains, shall be the unit of value; a quarter-eagle, or two-and-a-half dollar piece; a three-dollar piece; a half-eagle, or five-dollar piece; an eagle, or ten-dol-

9

lar piece; and a double-eagle, or twenty-dollar piece. And the standard weight of the gold dollar shall be twenty-five and eight tenths grains; of the quarter-eagle, or two-and-a-half-dollar piece, sixty-four and a half grains; of the three-dollar piece seventy-seven and four-tenths grains; of the half-eagle, or five-dollar piece, one hundred and twenty-nine grains; of the eagle, or ten-dollar piece, two hundred and fifty-eight grains; of the double-eagle, or twenty-dollar piece, five hundred and sixteen grains; which coins shall be a legal tender in all payments at their nominal value when not below the standard weight and limit of tolerance provided in this act for the single piece, and, when reduced in weight, below said standard and tolerance, shall be a legal tender at

AGREED

valuation in proportion to their actual weight; [and any gold coin of the United States, if reduced in weight by abrasion not more than one-half of one per centum on the double-eagle and eagle, and one per centum on the other coins, below the standard weight prescribed by law, shall be received at their nominal value by the United States Treasury and its offices, under such regulations as the Secretary of the Treasury may prescribe for the protection of the Government against fraudulent abrasion or other practices; and any gold coins in the Treasury of the United States reduced in weight below this limit of abrasion shall be recoined.]

AGREED

[SEC. 15. That any gold coin now in circulation the

H. R. 2934——2

10

weight of which is below the limit of abrasion prescribed in this act may be received at the mints in Philadelphia and San Francisco at par in exchange for silver coins: *Provided*, That the circulation of such gold coin, as shown by the date of coinage, has been sufficient to produce such loss by natural abrasion; and the coins so received shall be recoined; but no gold coins which appear to have been artificially reduced shall come within the provisions of this section.]

AGREED

SEC. [16] 15. [That the silver coins of the United States shall be a dollar, a half-dollar or fifty-cent piece, a quarter-dollar or twenty-five cent piece, and a dime or ten-cent piece; and the weight of the dollar shall be three hundred and eighty-four grains; the half-dollar, quarter-dollar, and the dime shall be, respectively, one-half, one-quarter, and one-tenth of the weight of said dollar; which coins shall be a legal tender, at their nominal value, for any amount not exceeding five dollars in any one payment.] *That the silver coins of the United States shall be a trade dollar, a half-dollar or fifty-*

AGREED A DIME OR TEN-CENT PIECE

cent piece, a quarter-dollar, or twenty-five-cent piece ^ *; and the weight of the trade-dollar shall be four hundred and twenty grains troy; the weight of the half-dollar shall be twelve grams and one-half of a gram; the quarter dollar and the dime shall be, respectively, one-half and one fifth of the weight of said half-dollar; and said coins shall be a legal*

11

tender at their nominal value for any amount not exceeding five dollars in any one payment.

AGREED

SEC. [17] 16. [That the minor coins of the United States shall be a five-cent piece, a three-cent piece, and a one-cent piece; and the alloy for minor coinage shall be of copper and nickel, to be composed of three-fourths copper and one-fourth nickel; the weight of the piece of five cents shall be five grams, or seventy-seven and sixteen-hundredths grains troy; of the three-cent piece, three grams, or forty-six and thirty-hundredths grains; and of the one-cent piece, one and one-half grams, or twenty-three and fifteen-hundredths grains; which coin shall be legal tender, at their nominal value, for any amount not exceeding twenty-five cents in any one payment.]

AGREED

That the minor coins of the United States shall be a five-cent piece, a three-cent piece, and a one-cent piece, and the alloy

for the five and three cent pieces shall be of copper and nickel, to be composed of three-fourths copper and one-fourth nickel and the alloy of the one-cent piece shall be ninety-five per centum of copper and five per centum of tin and zinc, in such proportions as shall be determined by the Director of the Mint. The weight of the piece of five cents shall be seventy-seven and sixteen-hundredths grains, troy; of the three-cent piece, thirty grains; and of the one-cent piece, forty-eight grains; which coin shall be a legal tender, at their nominal

12

value, for any amount not exceeding twenty-five cents in any one payment.

SEC. [18] 17. That no coins, either of gold, silver, or minor coinage, shall hereafter be issued from the mint other than those of the denominations, standards, and weights herein set forth.

SEC. [19] 18. That upon the coins of the United States there shall be the following devices and legends: Upon one side there shall be an impression emblematic of liberty, with an inscription of the word "Liberty" and the year of the coinage, and upon the reverse shall be the figure or representation of an eagle, with the inscriptions "United States of America" and "E Pluribus Unum", and a designation of the value of the coin; but on the gold dollar and three-dollar

DISAGREED.

piece, [*the silver dollar, half-dollar, quarter-dollar,*] the dime, five, three, and one cent piece the figure of an eagle shall be

AGREED

omitted; *and on the reverse of the silver dollar, half-dollar, quarter-dollar, and the dime, respectively, there shall be inscribed the weight and the fineness of the coin;* and the Director of the Mint, with the approval of the Secretary of the Treasury, may cause the motto "In God we trust" to be inscribed upon such coins as shall admit of such motto; and any one of the foregoing inscriptions may be on the rim of the gold and silver coins.

SEC. [20] 19. That at the option of the owner, gold or

13

silver may be cast into bars of fine metal, or of standard fineness, or unparted, as he may prefer, with a stamp upon the same designating the weight and fineness, and with such devices impressed thereon as may be deemed expedient to prevent fraudulent imitation, and no such bars shall be issued of a less weight than five ounces.

SEC. [21] 20. That any owner of gold bullion may deposit the same at any mint, to be formed into coin or bars for his benefit; but it shall be lawful to refuse any deposit of less value than one hundred dollars, or any bullion so base as to be unsuitable for the operations of the mint; and when gold and silver are combined, if either metal be in such small proportion that it can not be separated advantageously, no allowance shall be made to the depositor for its value.

SEC. 22 [21]. That any owner of silver bullion may deposit the same at any mint, to be formed into bars for his benefit; no deposit for coinage into silver coin shall be received; but silver bullion contained in gold deposits, and separated therefrom, may be paid for in silver coin, at such valuation as may be, from time to time, established by the Director of the

AGREED

Mint: *Provided, That at the option of the owner, silver may be cast into coins of standard fineness, and of the weight of four hundred and twenty grains troy, designated in section fifteen of this act as the trade-dollar.*

SEC. [23] 22. That when bullion is deposited in any of the

14

mints, it shall be weighed by the superintendent, and, when practicable, in the presence of the depositor, to whom a receipt shall be given, which shall state the description and weight of the bullion; but when the bullion is in such a state as to require melting, or the removal of base metals, before its value can be ascertained, the weight, after such operation, shall be considered as the true weight of the bullion deposited. The fitness of the bullion to be received shall be determined by the assayer, and the mode of melting by the melter and refiner.

SEC. [24] 23. That from every parcel of bullion deposited for coinage or bars, the superintendent shall deliver to the assayer a sufficient portion for the purpose of being assayed, but all such bullion remaining from the operations of the assay shall be returned to the superintendent by the assayer.

SEC, [25] 24. That the assayer shall report to the superin-

AGREED

FINENESS

tendent the quality or [standard] ∧ of the bullion assayed by him, and such information as will enable him to compute the amount of the charges hereinafter provided for, to be made

AGREED

to the depositor, [FOR THE COST OF CONVERTING THE BULLION INTO BARS.]

SEC. [26] 25. That the charge for converting standard

AGREED Transfer to line 8, p. 15—insert after bullion:

gold bullion into coin, (*or for converting standard silver into trade dollars,*) shall be one-fifth of one per centum; and the charges for refining when the bullion is below standard,

15

for toughening when metals are contained in it which render it unfit for coinage, for copper used for alloy when the bullion is above standard, for separating the gold and silver when

AGREED

these metals exist together in the bullion, ∧ and for the preparation of bars, shall be fixed, from time to time, by the Director, with the concurrence of the Secretary of the Treasury, so as to equal but not exceed, in their judgment, the actual average cost to each mint and assay-office of the material, labor, wastage, and use of machinery employed in each of the cases aforementioned.

SEC. [27] 26. That the assayer shall verify all calculations made by the superintendent of the value of deposits, and, if satisfied by the correctness thereof, shall countersign the certificate required to be given by the superintendent to the depositor.

SEC. [28] 27. That in order to procure bullion for the silver coinage authorized by this act, the superintendents, with the approval of the Director of the Mint, as to price, terms, and quantity, shall purchase such bullion with the bullion fund. The gain arising from the coinage of such silver bullion into coin of a nominal value exceeding the cost thereof shall be credited to a special fund denominated the silver-profit fund. This fund shall be charged with the wastage incurred in the silver coinage, and with the expense of distributing said coins as hereinafter provided. The balance to the credit of

16

this fund shall be from time to time, and at least twice a year, paid into the Treasury of the United States.

AGREED

OTHER THAN THE TRADE DOLLAR

SEC. [29] 28. That the silver coins ∧ shall be paid out at the several mints, and at the assay-office in New York City, in exchange for gold coins at par, in sums not less than one hundred dollars; and it shall be lawful, also, to transmit parcels of the same, from time to time, to the assistant treasurers, depositaries, and other officers of the United States, under general regulations proposed by the Director of the Mint, and approved by the Secretary of the Treasury; but nothing herein contained shall prevent the payment of silver coins, at their nominal value, for silver parted from gold, as provided in this act, or for change less than one dollar in settlement for gold deposits: *Provided,* That for two years after the passage of this act, silver coins shall be paid at the mint in Philadelphia and the assay-office in New York City for silver bullion purchased for coinage, under such regulations as may be prescribed by the Director of the Mint, and approved by the Secretary of the Treasury.

SEC. [30] 29. That for the purchase of metal for the minor coinage authorized by this act, a sum not exceeding fifty thousand dollars in lawful money of the United States shall be transferred by the Secretary of the Treasury to the credit of the superintendent of the mint at Philadelphia, at which establishment only, until otherwise provided by law, such

17

coinage shall be carried on. The superintendent, with the approval of the Director of the Mint as to price, terms, and quantity, shall purchase the metal required for such coinage by public advertisement, and the lowest and best bid shall be accepted, the fineness of the metals to be determined on the mint assay. The gain arising from the coinage of such metals into coin of a nominal value, exceeding the cost thereof, shall be credited to the special fund denominated the minor-coinage profit fund; and this fund shall be charged with the wastage incurred in such coinage, and with the cost of distributing said coins as hereinafter provided. The balance remaining to the credit of this fund, and any balance of profits accrued from minor coinage under former acts, shall be, from time to time, and at least twice a year, covered into the Treasury of the United States.

SEC. [31] 30. That the minor coins authorized by this act may, at the discretion of the Director of the Mint, be delivered in any of the principal cities and towns of the United States, at the cost of the mint, for transportation, and shall be exchangeable at par at the mint in Philadelphia, at the discretion of the superintendent, for any other coins of copper, bronze, or copper-nickel heretofore authorized by law; and it shall be lawful for the Treasurer and the several assistant

treasurers and depositaries of the United States to redeem, in lawful money, under such rules as may be prescribed by the

18

Secretary of the Treasury, all copper, bronze, and copper-nickel coins authorized by law when presented in sums of not less than twenty dollars; and whenever, under this authority, these coins are presented for redemption in such quantity as to show the amount outstanding to be redundant, the Secretary of the Treasury is authorized and required to direct that such coinage shall cease until otherwise ordered by him.

SEC. [32] 31. That parcels of bullion shall be, from time to time, transferred by the superintendent to the melter and refiner; a careful record of these transfers, noting the weight and character of the bullion, shall be kept, and vouchers shall be taken for the delivery of the same, duly receipted by the melter and refiner, and the bullion thus placed in the hands of the melter and refiner shall be subjected to the several processes which may be necessary to form it into ingots of the legal standard, and of a quality suitable for coinage.

SEC. [33] 32. That the ingots so prepared shall be assayed; and if they prove to be within the limits allowed for deviation from the standard, the assayer shall certify the fact to the superintendent, who shall thereupon receipt for the same, and transfer them to the coiner.

SEC. [34] 33. That no ingots shall be used for coinage which differ from the legal standard more than the following proportions, namely: In gold ingots, one-thousandth; in silver

19

AGREED THREE-THOUSANDTHS

ingots, [two-thousandths;]\in minor-coinage alloys, twenty-five-thousandths, in the proportion of nickel.

SEC. [35] 34. That the melter and refiner shall prepare all bars required for the payment of deposits; but the fineness thereof shall be ascertained and stamped thereon by the assayer; and the melter and refiner shall deliver such bars to the superintendent, who shall receipt for the same.

SEC. [36] 35. That the superintendent shall, from time to time, deliver to the coiner ingots for the purpose of coinage; a careful record of these transfers, noting the weight and character of the bullion, shall be kept, and vouchers shall be taken for the delivery of the same, duly receipted by the coiner; and the ingots thus placed in the hands of the coiner shall be subjected to the several processes necessary to make from them coins in all respects conformable to law.

SEC. [37] 36. That in adjusting the weights of the gold coins, the following deviations shall not be exceeded in any single piece: In the double-eagle and the eagle, one-half of a grain; in the half-eagle, the three-dollar piece, the quarter-eagle, and the one-dollar piece, one-fourth of a grain. And in weighing a number of pieces together, when delivered by the coiner to the superintendent, and by the superintendent to the depositor, the deviation from the standard weight shall not exceed one-hundredth of an ounce in five thousand dollars in double-eagles, eagles, half-eagles, or quarter-eagles,

20

in one thousand three-dollar pieces, and in one thousand one-dollar pieces.

SEC. [38] 37. That in adjusting the weight of the silver coins the following deviations shall not be exceeded in any single piece: In the dollar, the half and quarter dollar, and in the dime, one and one-half grains; and in weighing large numbers of pieces together, when delivered by the coiner to the superintendent, and by the superintendent to the depositor, the deviations from the standard weight shall not exceed two-hundredths of an ounce in one thousand dollars, half-dollars, or quarter-dollars, and one-hundredth of an ounce in one thousand dimes.

SEC. [39] 38. That in adjusting the weight of the minor coins provided by this act, there shall be no greater deviation allowed than three grains for the five-cent piece and two grains for the three and one cent pieces.

SEC. [40] 39. That the coiner shall, from time to time, as coins are prepared, deliver them to the superintendent, who shall receipt for the same, and who shall keep a careful record of their kind, number, and actual weight; and in receiving coins it shall be the duty of the superintendent to ascertain, by the trial of a number of single pieces separately, whether the coins of that delivery are within the legal limits of the standard weight; and if his trials for this purpose shall not prove satisfactory, he shall cause all the coins

21

of such delivery to be weighed separately, and such as are not of legal weight shall be defaced and delivered to the melter and refiner as standard bullion, to be again formed into ingots and recoined; or the whole delivery may, if more convenient, be remelted.

SEC. [41] 40. That at every delivery of coins made by the coiner to a superintendent, it shall be the duty of such superintendent, in the presence of the assayer, to take indiscriminately a certain number of pieces of each variety for the annual trial of coins, the number for gold coins being not less than one piece for each one thousand pieces or any fractional part of one thousand pieces delivered; and for silver coins one piece for each two thousand pieces or any fractional part of two thousand pieces delivered. The pieces so taken shall be carefully sealed up in an envelope, properly labeled, stating the date of the delivery, the number and denomination of the pieces inclosed, and the amount of the delivery from which they were taken. These sealed parcels containing the reserved pieces shall be deposited in a pyx, designated for the purpose at each mint, which shall be kept under the joint care of the superintendent and assayer, and be so secured that neither can have access to its contents without the presence of the other, and the reserved pieces in their sealed envelopes from the coinage of each mint shall be transmitted quarterly to the mint at Philadelphia. A record shall also

22

be kept at the same time of the number and denomination of the pieces so taken for the annual trial of coins, and of the number and denomination of the pieces represented by them and so delivered, a copy of which record shall be transmitted quarterly to the Director of the Mint. Other pieces may, at any time, be taken for such tests as the Director of the Mint shall prescribe.

SEC. [42] 41. That the coiner shall, from time to time, deliver to the superintendent the clippings and other portions of bullion remaining after the process of coining; and the superintendent shall receipt for the same and keep a careful record of their weight and character.

SEC. [43] 42. That the superintendent shall debit the coiner with the amount in weight of standard metal of all the bullion placed in his hands, and credit him with the amount in weight of all the coins, clippings, and other bullion returned by him to the superintendent. Once at least in every year, and at such time as the Director of the Mint shall appoint, there shall be an accurate and full settlement of the accounts of the coiner, and the melter and refiner, at which time the said officers shall deliver up to the superintendent all the coins, clippings, and other bullion in their possession, respectively, accompanied by statements of all the bullion delivered to them since the last annual settlement, and all the bullion

23

returned by them during the same period, including the amount returned for the purpose of settlement.

SEC. [44] 43. That when all the coins, clippings, and other bullion have been delivered to the superintendent, it shall be his duty to examine the accounts and statements rendered by the coiner and the melter and refiner, and the difference between the amount charged and credited to each officer shall be allowed as necessary wastage, if the superintendent shall be satisfied that there has been a bona fide waste of the precious metals, and if the amount shall not exceed, in the case of the melter and refiner, one-thousandth of the whole amount of gold, and one and one-half thousandth of the whole amount of silver delivered to him since the last annual settlement, and in the case of the coiner, one-thousandth of the whole amount of silver, and one-half thousandth of the whole amount of gold that has been delivered to him by the superintendent; and all copper used in the alloy of gold and silver bullion shall be separately charged to the melter and refiner, and accounted for by him.

SEC. [45] 44. That it shall also be the duty of the superintendent to forward a correct statement of his balance-sheet, at the close of such settlement, to the Director of the Mint, who shall compare the total amount of gold and silver bullion and coin on hand with the total liabilities of the Mint. At the same time a statement of the ordinary expense account,

24

and the moneys therein, shall also be made by the superintendent.

SEC. [46] 45. That when the coins or bars which are equivalent to any deposit of bullion are ready for delivery, they shall be paid to the depositor, or his order, by the superintendent; and the payments shall be made, if demanded, in the order in which the bullion shall have been brought to the mint; but in cases where there is delay in manipulating a refractory deposit, or for any other unavoidable cause, the payment of subsequent deposits, the value of which is known, shall not be delayed thereby; and in the denominations of coin delivered, the superintendent shall comply with the wishes of the depositor, except when impracticable or inconvenient to do so.

SEC. [47] 46. That unparted bullion may be exchanged at

any of the mints for fine bars, on such terms and conditions as may be prescribed by the Director of the Mint, with the approval of the Secretary of the Treasury; and the fineness, weight, and value of the bullion received and given in exchange shall in all cases be determined by the mint assay. The charge to the depositor for refining or parting shall not exceed that allowed and deducted for the same operation in the exchange of unrefined for refined bullion.

SEC. [48] 47. That for the purpose of enabling the mints and the assay-office in New York to make returns to depositors

25

with as little delay as possible, it shall be the duty of the Secretary of the Treasury to keep in the said mints and assay-office, when the state of the Treasury will admit thereof, such an amount of public money, or bullion procured for the purpose, as he shall judge convenient and necessary, out of which those who bring bullion to the said mints and assay-office may be paid the value thereof, in coin or bars, as soon as practicable after the value has been ascertained; and on payment thereof being made, the bullion so deposited shall become the property of the United States; but the Secretary of the Treasury may at any time withdraw the fund, or any portion thereof.

SEC. [49] 48. That to secure a due conformity in the gold and silver coins to their respective standards of fineness and weight, the judge of the district court of the United States for the east-

AGREED

ern district of Pennsylvania, *the Comptroller of the Currency*, the assayer of the assay-office at New York, and such other persons as the President shall, from time to time, designate, shall meet as assay-commissioners, at the mint in Philadelphia, to examine and test, in the presence of the Director of the Mint, the fineness and weight of the coins reserved by the several mints for this purpose, on the second Wednesday in February, annually, and may continue their meetings by adjournment, if necessary; if a majority of the commissioners shall fail to attend at any time appointed for their meeting, the

26

Director of the Mint shall call a meeting of the commissioners at such other time as he may deem convenient; and if it shall appear by such examination and test that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial shall be considered and reported as satisfactory; but if any greater deviation from the legal standard or weight shall appear, this fact shall be certified to the President of the United States; and if, on a view of the circumstances of the case, he shall so decide, the officer or officers implicated in the error shall be thenceforward disqualified from holding their respective offices.

SEC. [50] 49. That for the purpose of securing a due conformity in weight of the coins of the United States to the provisions of this act, the brass troy-pound weight procured by the minister of the United States at London, in the year eighteen hundred and twenty-seven, for the use of the mint, and now in the custody of the mint at Philadelphia, shall be the standard troy pound of the Mint of the United States, conformably to which the coinage thereof shall be regulated.

SEC. [51] 50. That it shall be the duty of the Director of the Mint to procure for each mint and assay-office, to be kept safely thereat, a series of standard weights corresponding to the aforesaid troy pound, consisting of a one-pound weight and the requisite subdivisions and multiples thereof, from the

27

hundredth part of a grain to twenty-five pounds; and the troy weights ordinarily employed in the transactions of such mints and assay-offices shall be regulated according to the above standards at least once in every year, under the inspection of the superintendent and assayer; and the accuracy of those used at the mint at Philadelphia shall be tested annually, in the presence of the assay-commissioners, at the time of the annual examination and test of coins.

SEC. [52] 51. That the obverse working-dies at each mint shall, at the end of each calendar year, be defaced and destroyed by the coiner in the presence of the superintendent and assayer.

SEC. [53] 52. That dies of a national character may be executed by the engraver, and national and other medals struck by the coiner of the mint at Philadelphia, under such regulations as the superintendent, with the approval of the Director of the Mint, may prescribe: *Provided*, That such work shall not interfere with the regular coinage operations, and that no private medal dies shall be prepared at said mint, or the machinery or apparatus thereof be used for that purpose.

SEC. [54] 53. That the moneys arrising from all charges and deductions on and from gold and silver bullion and the manu-

AGREED MEDALS

facture of [metals]/\and from all other sources, except as herein-

28

before provided, shall, from time to time, be covered into the Treasury of the United States, and no part of such deductions or medal charges, or profit on silver or minor coinage, shall be expended in salaries or wages; but all expenditures of the mints and assay-offices, not herein otherwise provided for, shall be paid from appropriations made by law on estimates furnished by the Secretary of the Treasury.

SEC. [55] 54. That the officers of the United States assay-office at New York shall be a superintendent, an assayer, and a melter and refiner, who shall be appointed by the President, by and with the advice and consent of the Senate. The business of said assay-office shall be in all respects similar to that of the mints, except that bars only, and not coin, shall be manufactured therein; and no metals shall be purchased for minor coinage. All bullion intended by the depositor to be converted into coins of the United States, and silver bullion purchased for coinage, when assayed, parted, and refined, and its net value certified, shall be transferred to the mint at Philadelphia, under such directions as shall be made by the Secretary of the Treasury, at the expense of the contingent fund of the mint, and shall be there coined, and the proceeds returned to the assay-office. And the Secretary of the Treasury is hereby authorized to make the necessary arrangements for the adjustment of the accounts upon such transfers between the respective offices.

SEC. [56] 55. That the duties of the superintendent, assay-

29

er, and melter and refiner of said office shall correspond to those of superintendents, assayers, and melters and refiners of mints; and all parts of this act relating to mints and their officers, the duties and responsibilities of such officers, and others employed therein, the oath to be taken, and the bonds and sureties to be given by them, (as far as the same may be applicable,) shall extend to the assay office at New York, and to its officers, assistants, clerks, workmen, and others employed therein.

SEC. [57] 56. That there shall be allowed to the officers of the assay-office at New York City the following salaries per annum: To the superintendent, four thousand five hundred dollars; to the assayer, and to the melter and refiner, each, three thousand dollars; and the salaries of assistants and clerks, and wages to workmen, and their manner of appointment, shall be determined and regulated as herein directed in regard to mints.

SEC. [58] 57. That the business of the branch mint at Denver, while conducted as an assay-office, and of the assay-office at Boisé City, Idaho, and all other assay-offices hereafter to be established, shall be confined to the receipt of gold and silver bullion, for melting and assaying, to be returned to depositors of the same, in bars, with the weight and fineness stamped thereon; and the officers of assay-offices, when their services are necessary, shall consist of an assayer, who shall have

30

charge thereof, and a melter, to be appointed by the President, by and with the advice and consent of the Senate; and the assayer may employ as many clerks, workmen, and laborers, under the direction of the Director of the Mint, as may be provided for by law. The salaries of said officers shall not exceed the sum of two thousand five hundred dollars to the assayer and melter, one thousand eight hundred dollars each to the clerks, and the workmen and laborers shall receive such wages as are customary, according to their respective stations and occupations.

SEC. [59] 58. That each officer and clerk to be appointed at such assay-offices, before entering upon the execution of his office, shall take an oath or affirmation before some judge of the United States, or of the Supreme Court, as prescribed by

AGREED SECOND

the act of July [twentieth,]/\eighteen hundred and sixty-two, and each become bound to the United States of America, with one or more sureties, to the satisfaction of the Director of the Mint or of one of the judges of the supreme court of the State or Territory in which the same may be located, and of the Secretary of the Treasury, conditioned for the faithful performance of the duties of their offices; and the said assayers shall discharge the duties of disbursing agents for the payment of the expenses of their respective assay-offices.

SEC. [60] 59. That the general direction of the business of

31

assay-offices of the United States shall be under the control and regulation of the Director of the Mint, subject to the

approbation of the Secretary of the Treasury; and for that purpose it shall be the duty of the said Director to prescribe such regulations and to require such returns, periodically and occasionally, and to establish such charges for melting, parting, assaying, and stamping bullion as shall appear to him to be necessary for the purpose of carrying into effect the intention of this act.

SEC. [61] 60. That all the provisions of this act for the regulation of the mints of the United States, and for the government of the officers and persons employed therein, and for the punishment of all offenses connected with the mints or coinage of the United States, shall be, and they are hereby declared to be, in full force in relation to the assay-offices, as far as the same may be applicable thereto.

SEC. [62] 61. That if any person or persons shall falsely make, forge, or counterfeit, or cause or procure to be falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting, any coin or bars in resemblance or similitude of the gold or silver coins or bars, which have been, or hereafter may be coined or stamped at the mints and assay-offices of the United States, or in resemblance or similitude of any foreign gold or silver coin which by law is, or hereafter may be made, cur-

32

rent in the United States, or are in actual use and circulation as money within the United States, or shall pass, utter, publish, or sell, or attempt to pass, utter, publish, or sell, or bring into the United States from any foreign place, or have in his possession, any such false, forged, or counterfeited coin or bars, knowing the same to be false, forged, or counterfeited, every person so offending shall be deemed guilty of felony, and shall, on conviction thereof, be punished by fine not exceeding five thousand dollars, and by imprisonment and confinement at hard labor not exceeding ten years, according to the aggravation of the offense.

SEC. [63] 62. That if any person or persons shall falsely make, forge, or counterfeit, or cause or procure to be falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting, any coin in the resemblance or similitude of any of the minor coinage which has been, or hereafter may be, coined at the mints of the United States; or shall pass, utter, publish, or sell, or bring into the United States from any foreign place, or have in his possession any such false, forged, or counterfeited coin, with intent to defraud any body politic or corporation, or any person or persons whatsoever, every person so offending shall be deemed guilty of felony, and shall, on conviction thereof, be punished by fine not exceeding one thousand dollars and

33

by imprisonment and confinement at hard labor not exceeding three years.

SEC. [64] 63. That if any person shall fraudulently, by any art, way, or means whatsoever, deface, mutilate, impair, diminish, falsify, scale, or lighten the gold or silver coins which have been, or which shall hereafter be, coined at the mints of the United States, or any foreign gold or silver coins which are by law made current, or are in actual use and circulation as money within the United States, every person so offending shall be deemed guilty of a high misdemeanor, and shall be imprisoned not exceeding two years, and fined not exceeding two thousand dollars.

SEC. [65] 64. That if any of the gold or silver coins which shall be struck or coined at any of the mints of the United States shall be debased, or made worse as to the proportion of fine gold or fine silver therein contained; or shall be of less weight or value than the same ought to be, pursuant to the several acts relative thereto; or if any of the weights used at any of the mints or assay-offices of the United States shall be defaced, increased or diminished through the fault or connivance of any of the officers or persons who shall be employed at the said mints or assay-offices, with a fraudulent intent; and if any of the said officers or persons shall embezzle any of the metals which shall at any time be committed to their charge for the purpose of

H. R. 2934——5

34

being coined, or any of the coins which shall be struck or coined at the said mints, or any medals, coins, or other moneys of said mints or assay-offices at any time committed to their charge, or of which they may have assumed the charge, every such officer or person who shall commit any or either of the said offenses shall be deemed guilty of felony, and shall be imprisoned at hard labor for a term not less than one year nor more than ten years, and shall be fined in a sum not exceeding ten thousand dollars.

SEC. [66] 65. That this act shall take effct on the first
AGREED APRIL SEVENTY-THREE
day of [July,] ∧ eighteen hundred and [seventy-two,] ∧ when the offices of the treasurer of the mints in Philadelphia, San Francisco, and New Orleans shall be vacated, and the assistant treasurer at New York shall cease to perform the duties of treasurer of the assay-office. The other officers and employees of the mints and assay-offices now appointed shall continue to hold their respective offices, they having first given the necessary bonds until further appointments may be required, the director of the mint at Philadelphia being styled and acting as superintendent thereof. The duties of the treasurers shall devolve as herein provided upon the superintendents, and said treasurers shall act only as assistant treasurers of the United States: *Provided*, That the salaries heretofore paid to the treasurers of the mints at Philadelphia, San Francisco, and

35

New Orleans, acting as assistant treasurers, shall hereafter be paid to them as "assistant treasurers of the United States", and that the salary of the assistant treasurer at New York shall not be diminished by the vacation of his office as treasurer of the assay-office.

SEC. [67] 66. That the different mints and assay-offices authorized by this act shall be known as "the mint of the United States at Philadelphia", "the mint of the United States at San Francisco", "the mint of the United States at Carson," "the mint of the United States at Denver," "the United States assay-office at New York", and "the United
AGREED "THE U. S. ASSAY-OFFICE AT CHARLOTTE. N. CAROLINA"
States assay-office at Boisé City, Idaho;" ∧ and all unexpended appropriations heretofore authorized by law for the use of the mint of the United States at Philadelphia, the branch mint of the United States in California, the branch mint of the United States at Denver, the United States assay-office in New York, and the United-States assay-office at Boisé City, Idaho, are hereby authorized to be transferred for the account and use of the institutions established and located respectively at the places designated by this act.

SEC. [68] 67. That this act shall be known as the "Coinage
AGREED 1873
act of [eighteen hundred and seventy-two"] ∧; and all other acts and parts of acts pertaining to the mints, assay-offices, and coinage of the United States inconsistent with the provisions of this act are hereby repealed: *Provided*, That this

36

act shall not be construed to affect any act done, right accrued, or penalty incurred, under former acts, but every such right is hereby saved; and all suits and prosecutions for acts already done in violation of any former act or acts of Congress relating to the subjects embraced in this act may be begun or proceeded with in like manner as if this act had not been passed; and all penal clauses and provisions in existing laws relating to the subjects embraced in this act shall be deemed applicable thereto: *And provided further*, That so much of the first section of "An act making appropriations for sundry civil expenses of the Government for the year ending June thirty, eighteen hundred and seventy-one, and for other purposes," approved July fifteen, eighteen hundred and seventy, as provides that until after the completion and occupation of the branch-mint building in San Francisco it shall be lawful to exchange, at any mint or branch mint of the United States, unrefined or unparted bullion whenever, in the opinion of the Secretary of the Treasury, it can be done with advantage to the Government, is hereby repealed.

Passed the House of Representatives May 27, 1872.
Attest: EDWARD McPHERSON,
Clerk.

[Indorsement on back of bill.]

42D CONGRESS, 3D SESSION. H. R. 2934. 704

AN ACT

Revising and amending the laws relative to the mints, assay-offices, and coinage of the United States.

1872—MAY 29.—Read twice and referred to the Committee on Finance.
DECEMBER 16, 1872.—Reported with amendments.
1873—JANUARY 7.—Additional amendments reported, which were ordered to be printed with the bill.
JANUARY 17, C. W.—Amended, read the third time, and passed.
JAN. 17.
Amended.
PASSED.
No papers.

SENATE PROCEEDINGS IN DETAIL.

The following proceedings were had in the Senate on Friday, January 17, 1873, when the foregoing bill was under consideration:

MINT LAWS.

The PRESIDING OFFICER. The Calendar under the Anthony rule is now in order.

Mr. SHERMAN. I rise for the purpose of moving that the Senate proceed to the consideration of the mint bill. I will state that this bill will not probably consume any more time than the time consumed in reading it. It passed the Senate two years ago after full debate. It was taken up again in the House during the present Congress, and passed there. It is a matter of vital interest to the Government, and I am informed by officers of the Government it is important it should pass promptly. The amendments reported by the Committee on Finance present the points of difference between the two Houses, and they can go to a committee of conference without having a controversy here in the Senate about them.

Mr. ANTHONY. I hope the Calendar will be laid aside informally, not postponed.

Mr. SHERMAN. Let it be passed over informally until we finish the reading of the mint bill and dispose of it. The reading is about half through, I am informed by the Secretary.

Mr. CRAGIN. I shall not oppose this motion, but I wish to give notice that as soon as the mint bill is disposed of I shall move to call up the bill (H. R. No. 3010) for the construction of six steam vessels of war, and for other purposes, which was reported from the Committee on Naval Affairs. I hope that bill will be left as the unfinished business this evening.

The PRESIDING OFFICER. The Chair is informed that it is proposed that the Calendar be informally passed over.

Mr. SHERMAN. I am perfectly willing that that should be done.

The PRESIDING OFFICER. That will be regarded as the sense of the Senate, if there is no objection, and the bill referred to by the Senator from Ohio is now before the Senate.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. No. 2934) revising and amending the laws relative to the mints, assay offices, and coinage of the United States.

The Chief Clerk resumed and concluded the reading of the bill.

The PRESIDING OFFICER. The Committee on Finance report the bill, with amendments, which will now be read.

Mr. SHERMAN. I send to the clerk some amendments of a formal character from the Committee on Finance, adopted since the amendments first reported were printed. I will ask that they be acted upon with the others in their order.

The first amendment of the Committee on Finance was, on page 4, section 5, line 3, after the word "coins," to insert "or sample of bullion;" so that the clause will read:

"That the assayer shall assay all metals and bullion, whenever such assays are required in the operations of the mint; he shall also make assays of coin or samples of bullion whenever required by the superintendent."

The amendment was agreed to.

The next amendment was on page 5, section 8, line 2, to strike out the word "wording" before the word "dies," and insert the word "working."

The amendment was agreed to.

The next amendment was on page 6, section 9, line 1, before the word "office," at the end of the line, to insert the word "assay."

The amendment was agreed to.

The next amendment was on page 9, section 14, to strike out the following words:

"And any gold coin of the United States, if reduced in weight by abrasion not more than one-half of 1 per cent on the double eagle and eagle, and 1 per cent on the other coins, below the standard weight prescribed by law, shall be received at their nominal value by the United States Treasury and its offices, under such regulations as the Secretary of the Treasury may prescribe for the protection of the Government against fraudulent abrasion or other practices; and any gold coins in the Treasury of the United States reduced in weight below this limit of abrasion shall be recoined."

Mr. COLE. I hope that amendment will not be agreed to. I think it is a very wise provision in the bill as it came from the House, and it ought to be allowed to remain. It merely provides that coins, when a little abraded by natural use and wear, shall be received at the Treasury of the United States, and the concluding portion of the clause proposed to be stricken out provides:

"And any gold coins in the Treasury of the United States reduced in weight below this limit of abrasion shall be recoined."

It is certainly the duty of the Government to provide the coins of the country and at its own expense, and this section seems to be well guarded. The language is:

"Under such regulations as the Secretary of the Treasury may prescribe for the protection of the Government against fraudulent abrasion or other practices."

It strikes me that this clause ought not to be stricken out. I remember at the last session of Congress we passed a law which contemplated the restoration of these coins. I will read it. It was passed at the earnest application of the Secretary of the Treasury, and I believe at the unanimous suggestion of the Committee on Finance of this body it was incorporated in an appropriation bill. It is as follows:

"For loss and expenses involved in the recoinage of gold coins in the Treasury which are below standard weight, under such regulations as the Secretary of the Treasury may prescribe, $150,000."

The Government makes provision for the restoration of the coins when they have been reduced by natural wear, and I should think that this part of the section ought to be left in the bill. I see no reason why it should be stricken out.

Mr. SHERMAN. I can only say I have here a number of documents, not only from the Director of the Mint in Philadelphia, but from Professor Barnard and the Comptroller of the Currency, calling our attention to this very important feature of the bill, and the Committee on Finance, after a patient examination of the whole matter, decided that it was clearly inexpedient and wrong to put in this provision for the recoinage of all the present gold coins of the United States.

It is true, as the Senator says, we have provided for recoining the coin in the Treasury of the United States; but we go no further than that. No nation in the world has gone further than that. I do not wish to delay the Senate by reading these documents, but I suggest to the Senator whether he had not better let this proposition go to a committee of conference rather than undertake to discuss it here, because if we are compelled to discuss it here I shall be obliged to have these letters read, which entirely convinced the Committee on Finance that the United States dare not assume the loss of abrasion beyond the legal standard.

There is a legal standard within which the United States make the coin good, but when coin depreciates below the standard of abrasion, then neither the United States nor any other nation in the world undertakes to make the coins good except for their intrinsic value. The ways in which these coins might be abraded by fraud were shown to us, and it would be utterly impossible for any regulation of the Secretary to prevent great loss to the Government if we attempt to maintain these coins when they fall below the limit of abrasion and redeem them at the nominal instead of the real value. It is a delicate question, and it will only be necessary to read these papers in order to convince the Senator himself that it would not be wise for the United States to undertake to do what the House proposes.

Mr. COLE. I should like it better if the chairman of the Committee on Finance would give us some reasons why this amendment should be made. This clause protects the Government fully. The degree of abrasion is prescribed in this clause not to exceed one-half of 1 per cent on double-eagles and eagles, and not to exceed 1 per cent upon coins of lesser denomination. If it would involve the Government in some expense to restore these coins after they had been received in the ordinary business of the country, received at the custom-houses and in the Treasury, it is very proper that the Government should bear that expense. And let me again remind the Senator that we have entered upon that business, and at the last session made an appropriation of $150,000 to do this very thing.

Mr. SHERMAN. That was for the coin belonging to the United States.

Mr. COLE. Exactly. This clause provides that when the coin reaches the Treasury it may be so treated, and that this coin shall be received by the United States at the Treasury and other offices.

Mr. CASSERLY. I had risen to ask a question of the Senator from Ohio [Mr. SHERMAN] which my colleague has anticipated. Authority is valuable only in proportion to the reason which goes with it. The names mentioned are of course names of authority in coinage and minting. But when it is said that we ought to strike out a provision such as that which we are now considering because the men of authority say it would be dangerous to enact it, we ought to know what reason they have for so saying.

In the first place, everybody knows that it is almost a mechanical impossibility to manufacture a coin that is exactly of the standard. The coin will be a little above or below the standard in weight, but generally it is below it. So that when you fix the limit of the abrasion as here at one-half of 1 per cent on the double eagle and eagle and 1 per cent on the other coins, you make your limit exceedingly narrow. In addition to that, the Secretary of the Treasury is authorized to make such rules as he sees fit for the protection of the Government against fraud. Now, what danger can there be to the Treasury of the United States under such a provision? Why should any respectable government consent to permit its gold coins to remain in circulation after they have suffered by abrasion so as to fall much below the legal standard? The loss by abrasion has to fall somewhere in the end, and it certainly ought to fall upon the whole people rather than upon the innocent holder who has taken the coin of the Government at its face, on the faith of the Government, without being aware of the reduction from its standard value.

I insist that it is the duty of the Government to make its coins of the standard value in the first place, and in the next place to keep them up to the standard value. The citizen is obliged by law to receive them for their full standard value, and, as the loss must fall somewhere, it ought to fall on the Government and not upon the citizen. It is hard enough that the innocent holder of a coin which has been fraudulently abraded, or reduced as by what they call "sweating," or by any other fraudulent process, must lose by the fraud to which he was no party. It is ever so much worse when you make him bear the loss of the natural and inevitable wear of the metal. Every such loss should be the loss of the Government, for it is the duty of the Government to keep its coin at the standard value at its own expense.

I do not understand the last two lines of this amendment as the Senator from Ohio understands them. If I understand them aright, he would not press his objection so strongly as he does. The language is:

"And any gold coins in the Treasury of the United States reduced in weight below this limit of abrason shall be recoined."

Mr. SHERMAN. The reason that those words are proposed to be stricken out is that the coins in the Treasury have already been provided for. The law now provides for recoining abraded coin in the Treasury of the United States. There is no necessity, therefore, for putting it in here again. Indeed, when this clause was inserted in the House the law providing for that recoinage had not been passed. It was passed in an appropriation bill on my own motion, I think, at the last session of Congress. The Mint was authorized to recoin the abraded coins in the Treasury of the United States, some of which were taken at their reduced value.

Mr. CASSERLY. Of course, if the Senator says the clause is unnecessary because it is the law now, there is nothing more to be said.

Mr. SHERMAN. The Senator's colleague referred to the law a moment ago.

Mr. CASSERLY. I am content to take what the Senator from Ohio says on that point. But that only corroborates what I say, that the Government recognizes it as its duty to restore its coins to the standard value after they have fallen below a certain limit of abrasion. Now, all that is asked is that before they fall below the limit of abrasion and while passing current in the business transactions of the country they shall be received at their denominational value by the United States Treasury, under such regulations as the Secretary of the Treasury may prescribe. I fully recognize what the Senator from Ohio says, that the whole subject of specie coinage is one of great intricacy, so that what appears a very small matter in itself may have very widespread consequences. But this provision now under consideration is so plain, so reasonable, and so perfectly guarded that I had very strong hopes the Senator from Ohio would consent to allow it to remain.

Mr. SHERMAN. I think after a full explanation of this matter the Senators from California themselves would vote for this proposition. I do not desire to take up time, but will say a few words in explanation of the amendment proposed by the committee striking out this clause.

All nations retain the nominal value of abraded coin to a certain standard, but when it falls below that the loss falls on the individual who holds it. That has been the custom of all countries. The coin that is held by the Treasury of the United States is received at its nominal value if it is within the limits of abrasion fixed by the law, but if it falls below the limits the loss falls on the holder of the coin, and much of that which is now being recoined in the United States was taken at the abraded value; that is, the reduced value. It was not taken at the full nominal value, but at the reduced value. Consequently, when we issue it again, we issue it in the form of coin up to the standard. Therefore, the question as to whether we shall recoin our own coin and the question whether we shall recoin the coin in the hands of citizens are very different things. Upon this identical point I will read a letter of Mr. Comptroller Knox. I may say that this clause was put in in the House, I believe, without the consent of the committee, and upon some motion made in the House; at least I am so informed, although I have not looked at the Globe to ascertain the fact. Mr. Knox writes this to the committee:

"I inclose herewith copy of a portion of a letter recently received from him (Prof. Barnard), in which you will be interested. I desire to call your especial attention to his criticisms upon sections 14 and 15 in reference to abrasion. So far as I can learn, no nation in the world has laws which offer inducements to wrong-doers to lighten the coins which are in circulation. If I had charge of the bill now before the Senate I should certainly much prefer its defeat to its passage, unless section 14 from line 20, and section 15, could be stricken from the bill."

That is what he says. Then I have here the letter of Prof. Barnard, which is very interesting. I will read a paragraph from it:

"Section 14 of the bill provides that any gold coin, if reduced in weight not more than one-half of 1 per cent on the double-eagle and eagle, and 1 per cent on the other coins, below the standard weight and limit of tolerance, shall be received at their denominational value by the United States Treasury and its officers, under such regulations, etc. This one-half of 1 per cent, with the tolerance, makes on the double-eagle about six-tenths of 1 per cent; that is to say, 12 cents on every such double-eagle, and on the eagle seven-tenths of 1 per cent, or 7 cents on every such eagle. This is an enormous sacrifice for the Government to propose to make, and one which will insure the return to the Treasury of a vast number of gold coins much reduced in weight by means which can not be proved to be fraudulent. A coin, or a lot of coins, which has been to some extent reduced by honest abrasion will be a Godsend to a rogue, for this may be still 'sweated' down to the limit named in this section without sensibly altering its appearance. Coins may moreover be abraded by rubbing them with rouge powder, or with prepared chalk, by hand or by mechanical means, so as seriously to reduce them without leaving any traces of violence. I am at a loss to know on what grounds the proposition is defended to receive 'at their nominal value' all coins depreciated by abrasion below the limits of legal tolerance.

"It is true that this section authorizes the Secretary of the Treasury to 'prescribe regulations' under which such coins shall be received. If this authority extends so far as to permit him to refuse to receive them at all, at 'their denominational value,' it may prove a safeguard; otherwise the provision seems to me extremely dangerous."

Here is another and a later letter from Prof. Barnard to the Comptroller of the Currency, under date of December 24:

"MY DEAR SIR: Dr. Torrey has just told me a very important fact. There is a manufactory of watch cases in Brooklyn. The workmen put the last polish on the cases with fine paper and rouge powder. Some time since the proprietor applied at the assay office for advice, as to some method of burning these papers, so as to prevent gold from being carried away mechanically in the smoke. He said their loss from this cause was serious, but that in spite of this they recovered $5,000 worth of gold from these papers per annum.

"The establishment is a large one, it is true; but, on the other hand, the workmen do not work with the design to polish off as much gold as they conveniently can, but just as little as the object in view will allow.

"I mention this to show you how easy it would be for a designing man to live off the coin of the country, setting up with a capital of a few thousand dollars. It is needless to say that the coins so abased could not be detectable by their brightness, for nothing is easier than to tarnish them."

Within a certain degree, one-thousandth per cent, a small degree, the Government maintains the coins at their nominal value even if abraded, but when they are abraded below that the loss falls on the holder, and every man who receives a coin must look to it that it has not been abraded beyond the legal amount. If it is so abraded he can refuse to take it, or if he takes it at all he should take it for what it is intrinsically worth. The recoinage of the gold now in circulation, although not very large, would amount to $1,000,000 or $2,000,000. As a matter of course, as soon as our attention was called to this fact we struck out this clause. I do not wish to go any further into the details of the matter. I think the action of the Committee on Finance was clearly right, and it would be very wrong indeed to undertake in this ambiguous way to make good all the coin now outstanding.

Mr. CASSERLY. I do not wish to be tenacious about this matter, still less pertinacious. I am very glad that the Senator from Ohio has read the letters on which he relies. I think they speak for themselves. The burden of them is that gold coin may be abraded or reduced fraudulently with such skill as to make it almost impossible of detection at the Treasury. The last letter from Professor Barnard conjures up a phantom to terrify Senators withal. It is that if this provision should become a law a man might with a capital of a few thousand dollars, by fraudulent abrasion, make a good living out of the Treasury. I ask the Senator from Ohio, what does such an argument amount to? If a man can make a good living out of the Treasury by fraudulent abrasion of the coin, so skillfully made as to defy detection of the officers, how is it to be with the community?

Mr. SHERMAN. I will say to my friend from California that any citizen can at any time test it by weight.

Mr. CASSERLY. I was just coming to that. The Senator says any one can weigh each piece as he takes it. Just imagine a merchant in large business in the city of San Francisco going about with a pair of scales in his pocket to weigh gold coin hourly as he receives it! The Senator surely is not serious when he says so. We are legislating for the American people, a rapid if not a fast people in their enterprises; a people whose energies are impatient of pause, still less of delay. To suppose that such a people are to go about with scales at their button-holes to weigh coins is to suppose something which, wishing well to the Senator, I hope he may live long enough to see.

Mr. President, we can not carry on a great Government like this without running some risk. I am sure that nobody ought to put the whole risk of coinage upon the citizens. As I said, the citizen has no choice. He must take the lawful money of the country in the course of his lawful transactions, and at its denominational value. If there must be loss even by fraud, I am not sure that it ought not to be borne by the Government in the case of an innocent holder, but I do not wish to raise that question now.

The portion of the clause proposed to be stricken out for which I am contending is that which provides for the natural and lawful abrasion of the coins. I am surprised that these learned and scientific men make such objections as those which the Senator has read, although I think they pretty much answer themselves.

Before I take my seat I wish to observe to the Senator from Ohio that this appears to be a bill for the codification of all the laws on this subject. Consequently, the fact that there is another statute which covers the ground covered by lines twenty-eight, twenty-nine, and thirty of this clause would not be a good reason for striking them out. They should therefore be retained.

Mr. SHERMAN. I will say to the Senator from California that the amount heretofore appropriated will probably be sufficient to have that recoinage done before this bill will take effect; at all events there will be no trouble about that, and I do not care whether the clause is retained or stricken out. The thing is provided for already by an appropriation as a distinct matter.

Mr. CASSERLY. This is a codified law and repeals all other laws.

Mr. SHERMAN. If the Senator is willing to compromise on that I am perfectly willing to allow those lines to remain in the bill.

Mr. CASSERLY. I shall vote to retain the whole clause, but I shall not debate it any further.

Mr. SHERMAN. I have no objection at all to the gold coin in the Treasury, that which has fallen below the standard, being recoined; but that will be done under the present law, under an appropriation which I moved myself.

Mr. CASSERLY. To save any question about that, probably the Senator will consent to let those words remain.

Mr. SHERMAN. I have no objection to that.

Mr. COLE. I shall not detain the Senate from a vote on this question more than a minute or two.

By the Constitution of the United States it is the duty of the Government to furnish the circulating medium, the material which is the price of values in business transactions, the currency of the country. That they assume to do in one form or another. Gold is a legal tender for all debts, and it is presumed when the gold is presented with the stamp of the United States upon it, so indorsed by the Government of the United States, that it is of a certain value and weight. Now, what are the facts so far as the Pacific coast is concerned? There is a quantity of coin there that has been in circulation for more than a score of years, and of course it has become more or less abraded by natural wear. It has become so in its use in business, and the dates upon these coins will show that they have been in use a long time.

I hear it said about me, *sotto voce*, that we ought on that coast to have paper money, and in that way avoid this difficulty of having coins which are worn used in business transactions. What are the facts so far as this is concerned? Why, sir, in the first place, in California there never was any bank of issue, there never was a dollar of paper money issued by any bank in that State; but before the late rebellion gold and silver were the circulating mediums exclusively. When the nation adopted as a legal tender the United States notes, it was, as it will be well remembered, a long time before they were made to replace the bank notes that were in circulation throughout the various States. It occurred by slow degrees, and by the time you were ready to dispense with the State banking institutions the legal tenders had fallen in value below the value of gold. They were worth perhaps but 90, or 80, or 70 cents on the dollar, and before they had decreased in value there was no supply possible to be obtained in the community which I have the honor in part to represent. There was no possibility before that time to receive enough there to supply as circulating medium the place that was filled by gold and silver. California never resisted the acceptance of paper money, but from the force of circumstances it could not be adopted there.

In the States on the Atlantic side the United States notes very naturally came into use as money. They took the place of the bank notes at first circulated with them and at the same value, and from one description of paper money they very naturally fell into the use of another. These circumstances never existed on the Pacific coast, and we never have had any banks of issue or paper money there. The United States notes or greenbacks never were furnished in sufficient numbers or quantity to supply the wants of the country, and they never could circulate as the money of the country. It is owing to these facts, and not to any unfriendly disposition on the part of the State of California or her people, that the United States notes have never come into general use there. It is owing to the fact that gold and silver were all the currency there before the issuance of United States notes. It is a great misfortune to us, and we realise it, that we have not the use of United States notes there the same as here. That fact is realized by our business community very generally. But we have never seen the time when we could use them or adopt them in place of gold and silver as the measure of value for the reasons I have mentioned. And now, since there is in use there this abraded coin, it is very proper that it should be received when not much abraded, when not abraded below the amount specified in this bill by the United States for the various uses for which they accept that sort of currency, and I think this bill ought not to be amended as proposed by the Finance Committee of this body.

Mr. FRELINGHUYSEN. I understand that the law has been for a course of years that the Government would always receive at the nominal value coin that was not abraded more than one-half of 1 per cent. So I do not see the hardship which the Senator from California complains of. The people of that State and of that community that use coin could under the law at any time have had the abraded coin redeemed.

Mr. COLE. Let me correct the Senator. I do not understand, at all events, that the coin is receivable now when abraded, as specified in this section, to the amount of one-half of 1 per cent upon eagles and double eagles, and 1 per cent upon coins of lesser denomination. I do not understand that that is the case.

Mr. FRELINGHUYSEN. I understand that the law has been for a course of years that if the coin was not abraded more than the rate fixed by the law, such a law as existed, the Government received it at its nominal and not at its actual value. Therefore I do not see the difficulty.

Mr. SHERMAN. I will read the Senator a paragraph on that subject in this very bill. These coins are receivable now. The language is:

"Which coins shall be a legal tender in all payments at their nominal value when not below the standard weight and limit of tolerance."

Mr. COLE. What is that?

Mr. SHERMAN. It is one-thousandth per cent. And another section provides that when they do fall below the limit of tolerance they shall be received at their actual value.

Mr. FRELINGHUYSEN. And that is only a reënactment of a preëxisting statute.

Mr. SHERMAN. Certainly; it is the law now.

Mr. FRELINGHUYSEN. Therefore I do not see that there is any hardship on the community that the Senator represents, inasmuch as they have had the right at any time to have that coin received at its nominal value within the limit fixed by the existing law, and it is absolutely necessary that the Government should have such a law. If this Government is to receive at its nominal value coin that has been reduced, abraded, it is a premium on fraud at once. Men will go to work with this process of sweating, and make money by it, and come and get the nominal value for the coin. This provision seems to me to be a very essential feature in our laws. The Government will of course receive the coin at its actual value; but if we should now pass a law that the Government would receive at its nominal value abraded coin, this coin that is in circulation in California, for instance——

Mr. COLE. How much abraded?

Mr. FRELINGHUYSEN. I do not remember the limit.

Mr. COLE. One-tenth of 1 per cent.

Mr. FRELINGHUYSEN. The rate now is one-half of 1 per cent.

Mr. COLE. No, sir; one-tenth of 1 per cent.

Mr. FRELINGHUYSEN. Very well. It is altogether immaterial what the rate is. The point of difference is that which is insisted on as covering the coin in California and that which is provided by this bill, and that is the point to which I am directing my remarks. They could have gone and had that coin made anew, but they did not do so. Now they want the rate increased, so as to cover the abrasion which has taken place there, and that very provision any person who was disposed to commit a fraud upon the Treasury could avail himself of.

The PRESIDING OFFICER. The question is on the amendment proposed by the Committee on Finance, striking out the words which have been read.

The question being put, it was declared that the ayes appeared to have it.

Mr. CASSERLY. I should like to have a decision on that.

Mr. SHERMAN. We have not got a quorum.

The PRESIDING OFFICER. Does the Senator call for a division?

Mr. CASSERLY. Yes, sir, or the yeas and nays in order that we may have the sense of the Senate on the question. By the sound the noes had it, I think.

Mr. SHERMAN. I think no one voted but the Senators from California. I suppose if the question is put again and the Senators respond "aye" or "no," there will be no difficulty in deciding it.

The PRESIDING OFFICER. The Chair will put the question again on striking out the words which have been read.

The amendment was agreed to.

Mr. CASSERLY. I understood the Senator from Ohio was willing to permit the last two lines to remain.

Mr. SHERMAN. I have no objection to that clause, because it is in accordance with existing law.

"And any gold coins in the Treasury of the United States reduced in weight below this limit of abrasion shall be recoined."

That is the law now, and I have no objection to retaining those words if it is desired.

Mr. CASSERLY. That means, abraded below this limit of one-half of 1 per cent.

Mr. SHERMAN. Oh, no; we struck out all about that.

Mr. CASSERLY. The meaning of the language is to be taken according to the place in which it is put.

Mr. SHERMAN. It is fixed above. If we strike out all between lines 19 and 27, then this clause will relate to the language before line 19, which reads:

"Which coins shall be a legal tender in all payments at their nominal value when not below the standard weight and limit of tolerance provided by this act for the single piece, and when reduced in weight below said standard and tolerance, shall be a legal tender at valuation in proportion to their actual weight."

Mr. CASSERLY. I understood the Senator to be willing to keep those words in the last clause of the section just in the meaning they had in that place; but of course if he has a different view of it I shall not contest it with him, because it is evident very few Senators are paying attention to this subject.

The PRESIDING OFFICER. The next amendment will be read.

The next amendment was to strike out the fifteenth section of the bill in the following words:

"SEC. 15. That any gold coin now in circulation the weight of which is below the limit of abrasion prescribed in this act may be received at the mints in Philadelphia and San Francisco at par in exchange for silver coins: *Provided*, That the circulation of such gold coin, as shown by the date of coinage, has been sufficient to produce such loss by natural abrasion; and the coins so received shall be recoined; but no gold coins which appear to have been artificially reduced shall come within the provisions of this section."

Mr. CASSERLY. It seems to me that section is a section which should be retained, not only for the general reasons applicable to the other section which I stated, but for the further reason that there is a protection provided by the express language of this section which it seems to me is absolutely sufficient. The language is:

"That any gold coin now in circulation, the weight of which is below the limit of abrasion prescribed in this act, may be received at the mints in Philadelphia and San Francisco at par in exchange for silver coins: *Provided*, That the circulation of such gold coin, as shown by the date of coinage, has been sufficient to produce such loss by natural abrasion; and the coins so received shall be recoined; but no gold coins which appear to have been artificially reduced shall come within the provisions of this section."

Of course that section, if it is to remain in the sense in which I desire it to remain, should be modified so as to refer to the limit of abrasion just stricken out, that is, not more than one-half of 1 per cent on the double-eagle and eagle, and 1 per cent on other coins. I presumed, after the amendment the Senate has just adopted, the Senator from Ohio would be willing to retain the fifteenth section.

Mr. SHERMAN. No; the fifteenth section is the one I have been debating all the time.

Mr. CASSERLY. Then I must have the wrong bill before me.

Mr. SHERMAN. It is the same bill that the Senator has before him; but the two amendments go together. If one falls the other falls. Is it right, is it just that the people of the United States should maintain the gold in circulation in California against the abrasion of honest people, as well as the abrasion of rogues, when it refuses to maintain its own paper currency against the abrasion of accident? When our paper currency is reduced in value by being mutilated to the amount of one-sixteenth, the holder of the bill loses to the extent of that mutilation, and the Treasury redeems the paper at so much less, in proportion to the loss of the bill. A mutilated bill presented to the Treasury is not redeemed at its nominal value. It is reduced in proportion to the amount presented. In order to avoid fraud, it is indispensably necessary to have such a provision. Indeed, the Senators from California and their constituents are much more interested in the passage of this bill than the people of Ohio; and I hope, therefore, if they want the sense of the Senate on this question they will take it by yeas and nays, and let us go on with the bill. I believe this is the only controverted point in the bill. I think the people of the Pacific coast, who persist in circulating gold coin rather than paper money, should not seek to get the people of the United States at large to make good their abraded coin, not only against honest abrasion, but against dishonest abrasion; and, as Professor Barnard has told us, it is utterly impossible to distinguish between honest and dishonest abrasion.

Mr. COLE. Before the Senator takes his seat I should like to ask him who pays for printing the United States notes? Do not the people of the United States at large pay for it, the people of California as well as the people everywhere else? And as to this other point about the notes being torn, what we are providing for is equivalent to furnishing notes that have been effaced without being torn. It is provided here that if the coin is not abraded beyond a certain extent it shall be recoined at the expense of the United States. That is the effect of the proposition; but if it is reduced beyond that, as if a bill were torn one-sixteenth or one-fourth, then there shall be no relief for the party holding it.

The PRESIDING OFFICER. The question is on striking out the fifteenth section.

Mr. CASSERLY. I do not propose to debate this bill at any length; but it is quite impossible for me to do my duty, as I understand it, to the people of California, or indeed of the United States who use gold coin, without suggesting the objections to it that occur to me. I understand the natural desire of the Senator from Ohio to get the bill passed with expedition. At the same time, each one of us here has to do his duty according to his lights.

I see no kind of analogy in the comparison which the Senator makes between gold coin that is abraded and a legal-tender note which is reduced in size to the extent of one-sixteenth. In the case of the note the reduction is visible, it is easily ascertained. In the case of the coin it not only is not easily ascertainable, but the whole argument of the Senator is it is so difficult to be ascertained as to make it dangerous to receive them at the Treasury.

The Senator aims to make some point in what he says of the people of California, namely, that they insisted on retaining a specie currency. Why, Mr. President, the people there had no choice about it. There never was a period of time between the going out of gold coin in the country at large and the coming in of paper as the sole currency when we could have made any such change in California. Our whole system of values was based upon gold coin. We could not have changed it if we had tried without such a disturbance as would have been a calamity to the State, from which, perhaps, she would not have recovered for years. We never have discredited the paper of the country.

On the contrary, we have always given from three-fourths of 1 per cent to 1½ per cent more for it than was paid for it in the State of the Senator from Ohio. The greenbacks of the Government, in reference to which so much is thrown out here against California, are now and always have been in better credit to-day in the city of San Francisco than in any city this side of the Rocky Mountains. You can get fewer of them for the same amount in gold in San Francisco than you can in Philadelphia, New York, Cincinnati, or Chicago. Yet we are constantly met when we seek to do anything to relieve the people of California in reference to the condition of the coinage there by the reproach that we insisted on keeping in California the gold coin of the country. Why, Mr. President, was it wrong for a State, when she had the right to choose between two kinds of lawful money, to choose that kind which formed her currency, and more than that, which formed her entire standard and basis of value?

Our situation in California in regard to our gold currency is one of very considerable difficulty and may become one of danger at any time. By the practice of the Federal officers there, all the new coin is systematically sent out of the country and the old coin is retained. The miner who takes his bullion to the mint in San Francisco to have it coined is, in nine cases out of ten, paid for it in the old coin of the country, abraded and reduced in value as it is. The result is that the old worn coin, instead of being taken up by the officers of the Government, as in the custom-house, and sent on here to the Treasury, is returned into the circulation of the State, to be more and more abraded and reduced, and the new $20 coins are sent forward to the Treasury at this side. It is not hard to see what must one day be the result of this state of things.

It seems to me, sir, that when we provide as we do in this section for the redemption of gold coins when the abrasion is no more than might honestly have taken place in the time during which, as the figures on their face show, they must have been in circulation, and when the section is further guarded for the protection of the Government against any sort of fraudulent or wrongful abrasion, there ought to be no unwillingness to retain the section as it came from the House.

I have proceeded all through upon the theory that these fraudulent abrasions were very difficult of detection, because that is the argument of the Senator from Ohio. My recollection of a number of criminal cases in England on the subject of sweating coin and similar offenses in the nature of fraudulent abrasions is that the crime is not so very difficult of detection, and that the condition of the coin will exhibit it to any person who inspects it closely.

The PRESIDING OFFICER. The question is on the amendment striking out the fifteenth section.

The amendment was agreed to.

The next amendment was to strike out section [17] 16, in the following words:

"SEC. [17] 16. That the minor coins of the United States shall be a five-cent piece, a three-cent piece, and a one-cent piece; and the alloy for minor coinage shall be copper and nickel, to be composed of three-fourths copper and one-fourth nickel; the weight of the piece of five cents shall be five grams, or seventy-seven and sixteen-hundredths grains troy; of the three-cent piece, three grams, or forty-six and thirty-hundredths grains; and of the one-cent piece, one and one-half grams, or twenty-three and fifteen-hundredths grains; which coins shall be legal tender, at their nominal value, for any amount not exceeding twenty-five cents in any one payment."

And to insert in lieu thereof the following:

"That the minor coins of the United States shall be a five-cent piece, a three-cent piece, and a one-cent piece; and the alloy for the five and three cent pieces shall be of copper and nickel, to be composed of three-fourths copper and one-fourth nickel; and the alloy of the one-cent piece shall be 95 per cent of copper and 5 per cent of tin and zinc, in such proportions as shall be determined by the Director of the Mint. The weight of the piece of five cents shall be seventy-seven and sixteen-hundredths grains troy; of the three-cent piece, thirty grains; and of the one-cent piece forty-eight grains; which coins shall be a legal tender, at their nominal value, for any amount not exceeding twenty-five cents in any one payment."

Mr. SHERMAN. There is an omission in the matter proposed to be inserted by the committee. I move to insert in line eleven, after the words "twenty-five-cent piece," the words "and a dime, or ten-cent piece."

The amendment to the amendment was agreed to.

The amendment as amended was adopted.

The next amendment was in section [18] 19, line 9, to insert, after the words "three-dollar piece," the words "the silver dollar, half dollar, quarter dollar," and also to insert in line 11, after the word "omitted," the words "and on the reverse of the silver dollar, half dollar, quarter dollar, and the dime, respectively, there shall be inscribed the weight and the fineness of the coin;" so that the section will read:

"SEC. [19] 18. That upon the coins of the United States there shall be the following devices and legends: Upon one side there shall be an impression emblematic of liberty, with an inscription of the word 'Liberty' and the year of the coinage, and upon the reverse shall be the figure or representation of an eagle, with the inscriptions 'United States of America' and 'E Pluribus Unum,' and a designation of the value of the coin; but on the gold dollar and three-dollar piece, the silver dollar, half dollar, quarter dollar, the dime, five, three, and one cent piece the figure of the eagle shall be omitted, and on the reverse side of the silver dollar, half dollar, quarter dollar, and the dime, respectively, there shall be inscribed the weight and fineness of the coin; and the Director of the Mint, with the approval of the Secretary of the Treasury, may cause the motto 'In God we trust' to be inscribed upon such coins as shall admit of such motto; and any one of the foregoing inscriptions may be on the rim of the gold and silver coins."

Mr. CASSERLY. It may be a matter of sentiment, but sentiment sometimes goes a great way, especially in those cases where it is difficult to reduce the action of men to a mathematical standard. I regret that the eagle is to disappear from the dollar, half dollar, and quarter dollar of our coinage. It will hardly be possible to think of a half dollar or quarter dollar as being such a coin without the eagle upon it.

Mr. SHERMAN. The Senator will see that the reason is because it is necessary to describe the weight and fineness of the coin. This amendment has been proposed by the officers of the mint. They have adopted a plan of describing on each coin its weight and fineness.

Mr. CASSERLY. What is the use of that, when we know that the weight of the coin is constantly being reduced?

Mr. SHERMAN. The reason given to us is because it has been adopted as a mode of international coinage. This method has been adopted in the corresponding coins of France and all the countries of Europe, pretty much, of describing upon the face of the coin its intrinsic weight and fineness.

Mr. CASSERLY. I must say I never saw a coin marked in that way.

Mr. SHERMAN. That is the reason the officers of the mint give for this change.

Mr. CASSERLY. I ask the Senator whether he is very strenuous in his ad-

vocacy of this amendment? I should like to save the American eagle on the half dollar and quarter dollar.

Mr. SHERMAN. The eagle is preserved on all gold coins in a size large enough to be caged. [Laughter.]

Mr. CASSERLY. But the half dollar and quarter dollar are the money of the people, and they are the leading coins of our entire silver coinage. I do not think it is of so much importance to put the fineness or the weight upon a half dollar or a quarter dollar as it might be upon a gold coin. I have never seen any foreign coin, and of course no American coin, marked in that way. To have the weight of the coin upon gold coin may be a useful thing because of the great preciousness of the metal; but what is the importance of having the weight inscribed upon the half dollar or quarter dollar? Does anybody ever weigh half dollars or quarter dollars in business?

Mr. SHERMAN. If the Senator will allow me, he will see that the preceding section provides for coin which is exactly interchangeable with the English shilling and the 5-franc piece of France; that is, a 5-franc piece of France will be the exact equivalent of a dollar of the United States in our silver coinage; and in order to show this wherever our coin shall float—and we are providing that it shall float all over the world—we propose to stamp upon it instead of our eagle, which foreigners may not understand, and which they may not distinguish from a buzzard or some other bird, the intrinsic fineness and weight of the coin. In this practical utilitarian age the officers of the mint seemed to think it would be better to do that than to put the eagle on our silver coin. I must confess I do not think it is very important; but I think the Senator ought to be willing to defer in these matters to the practical knowledge of the officers who have charge of this branch of the Government service. I will say that Mr. Linderman, whom the Senator must know, has suggested this as being a convenient mode of promoting international coinage.

Mr. CASSERLY. We can not have an international coinage on the basis of our silver coin unless our silver coin is up to the standard of all the nations with which we expect to have relations. Now, I ask the Senator whether this bill proposes a silver coinage of that character?

Mr. SHERMAN. This bill proposes a silver coinage exactly the same as the French and what are called the associated nations of Europe, who have adopted the international standard of silver coinage; that is, the dollar provided for by this bill is the precise equivalent of the 5-franc piece. It contains the same number of grams of silver; and we have adopted the international gram instead of the grain for the standard of our silver coinage. The "trade dollar" has been adopted mainly for the benefit of the people of California, and others engaged in trade with China. That is the only coin measured by the grain instead of by the gram. The intrinsic value of each is to be stamped upon the coin.

Mr. CASSERLY. Do I understand the Senator to say, then, that the intrinsic value of the dollar, half-dollar, and quarter-dollar is raised by this bill?

Mr. SHERMAN. There is a difference of about one-half of 1 per cent.

Mr. CASSERLY. I suppose it must be raised to the basis of international exchange.

Mr. SHERMAN. I think t is slightly raised, so as to conform with foreign coins. The Chamber of Commerce of New York first recommended this change, and it has been adopted, I believe, by all the learned societies who have given attention to coinage, and has been recommended to us, I believe, as the general desire. That is embodied in these three or four sections of amendment, to make our silver coinage correspond in exact form and dimensions, and shape and stamp, with the coinage of the associated nations of Europe, who have adopted an international silver coinage. I do not like myself to break in upon this plan or to change it in the slightest degree, but prefer to leave it to the proper officers of the Mint. Indeed, I would be perfectly willing to leave the whole thing to the officers of the Mint rather than to fix it by law. That was not deemed convenient, and therefore we had to drop the American eagle from these minor silver coins.

Mr. CASSERLY. I am not prepared to go as far as that. I would not leave it to anybody to remove from the eyes and the thoughts of the people those symbols of nationality which have stood this country in such good stead in many a hard-fought field by land and sea; and which may have to do the same service in the same way for many generations to come. While we laugh a good deal about the American eagle and the uses to which he is put by orators, political and otherwise, on the Fourth of July and other days, we must all feel that the associations that cluster around the American eagle are associations that make him a symbol of power, and I am not at all satisfied, because we desire to put the weight and fineness upon our half-dollar and our quarter-dollar, that therefore it is necessary to abolish the American eagle. The eagle, it is said, suffers little birds to sing, and the eagle will not object to having his value in the countries of the world put under his wing on the coin. I say retain the eagle and put whatever marks you like upon the face of your coin to indicate its weight and fineness. I do not think it will be of any value in regard to the simple coins of the denomination of half-dollar and quarter-dollar; but if the Senator is strongly of opinion that they ought to be there, let them be there.

The PRESIDING OFFICER. The question is on the amendment of the committee.

Mr. CASSERLY. I propose to strike out the words in italics in line 9 of section [19] 18, "the silver dollar, half-dollar, quarter-dollar."

The PRESIDING OFFICER. The Senator from California can accomplish his object by voting against the amendment of the committee inserting those words.

Mr. NYE. I should like to hear the amendment of the committee read.

The Chief Clerk read the amendment, which was in section [19] 18, line 9, to insert after the words "three-dollar piece," the words "the silver dollar, half-dollar, quarter-dollar;" and in line 11, after the word "omitted," to insert "and on the reverse of the silver dollar, half-dollar, quarter-dollar, and the dime, respectively, there shall be inscribed the weight and the fineness of the coin," so that that portion of the section will read:

"But on the gold dollar and three-dollar piece, the silver dollar, half dollar, quarter dollar, the dime, five, three, and one cent piece the figure of the eagle shall be omitted; and on the reverse of the silver dollar, half dollar, quarter dollar, and the dime, respectively, there shall be inscribed the weight and the fineness of the coin."

Mr. CASSERLY. I think the question is not understood by the Senate generally. As I understand, to vote for the amendment of the committee is to abolish the American eagle on the silver dollar, half dollar, and quarter dollar, and to vote against it is to keep him there. The subsequent amendment, in line 11, to which there is no objection, will allow the mark of weight and fineness to be put upon the coin.

The PRESIDING OFFICER. Does the Senator from California desire a separate vote on the two branches of the amendment?

Mr. SHERMAN. I suppose the Senator has no objection to the last one.

Mr. CASSERLY. None at all to the last one. The only point is that I wish to retain the American eagle on the silver dollar, half dollar, and quarter dollar.

The PRESIDING OFFICER. The question will then be taken on the amendment in line 9, which is to insert the words "the silver dollar, half dollar, quarter dollar."

The amendment was rejected; there being on a division—ayes 24, noes 26.

Mr. SHERMAN. As the Senate are so patriotic that they will not abolish the eagle, I hope they will be perfectly willing now to hurry along with the bill.

The PRESIDING OFFICER. The other part of the amendment will be considered as agreed to, if there be no objection.

The next amendment was on page 13, section 22 [21], to add at the end of the section the following proviso:

"*Provided*, That at the option of the owner silver may be cast into coins of standard fineness, and of the weight of four hundred and twenty grains troy, designated in section 15 of this act as the trade dollar."

The amendment was agreed to.

The next amendment was in section [25] 24, line 2, to strike out the word "standard" and insert "fineness;" so as to read:

"That the assayer shall report to the superintendent the quality of the fineness of the bullion assayed by him, etc."

The amendment was agreed to.

The next amendment was in section [25] 24, lines 5 and 6, to strike out the words "for the cost of converting the bullion into bars;" so as to read:

"*Provided*, That the assayer shall report to the superintendent the quality or fineness of the bullion assayed by him, and such information as will enable him to compute the amount of the charges hereinafter provided for, to be made to the depositor."

The amendment was agreed to.

Mr. SHERMAN. The next amendment is on page 14, in section [26] 25, line 2, to insert the words "or for converting standard silver into trade dollars." They should be transposed to line 7 of the same section.

The PRESIDING OFFICER. It is suggested by the clerk that the words ought to be inserted in line 8, after the word "bullion."

Mr. SHERMAN. At any convenient place, either after the word "bullion" in line 8, or after the word "standard" in line 7.

The CHIEF CLERK. The amendment of the committee is section [26] 25, line 8, after the word "bullion" to insert the words "or for converting standard silver into trade dollars;" so that the section will read:

"That the charge for converting standard gold bullion into coin shall be one-fifth of 1 per cent; and the charges for refining when the bullion is below standard, for toughening when metals are contained in it which render it unfit for coinage, for copper used for alloy when the bullion is above standard, for separating the gold and silver when these metals exist together in the bullion, or for converting standard silver into trade dollars, and for the preparation of bars, shall be fixed, from time to time, by the Director, with the concurrence of the Secretary of the Treasury, so as to equal but not exceed, in their judgment, the actual average cost to each mint and assay office of the material, labor, wastage, and use of machinery employed in each of the cases aforementioned."

Mr. SHERMAN. The Senate will see that the charge for converting standard silver into trade dollars, instead of being fixed at one-fifth of 1 per cent, is fixed at the actual cost. It is provided that the price for this work done at the mint shall be fixed by the Director of the Mint, but not in any case to exceed the actual cost of the operation.

Mr. CASSERLY. I did not suppose that the amendment to section [26] 25 had been disposed of.

The PRESIDING OFFICER. That is the question now pending.

Mr. CASSERLY. I supposed that the charge there of one-fifth of 1 per cent for silver coinage was a clerical error.

Mr. SHERMAN. The words "or for converting standard silver into trade dollars" were intended to come in after the word "standard" in line 7. The Committe on Finance observing that it was printed at the wrong place corrected it, and I gave the Secretary the correct place where it should be inserted. It is only to be the actual cost of the operation, whatever that may be.

The amendment was agreed to.

The next amendment was, on page 16, section [29] 30, line 1, after the word "coins" to insert "other than the trade dollar;" so that the clause will read:

"That silver coins other than the trade dollar shall be paid out of the several mints and at the assay office in New York City, in exchange for gold coins at par," etc.

The amendment was agreed to.

Mr. CASSERLY. I wish to ask what has become of the amendment to section 26. I did not know that it had been passed upon.

The PRESIDING OFFICER. It has been adopted.

Mr. CASSERLY. I presume it will still be in order to offer an amendment to that section after the amendments of the committee have been disposed of.

The PRESIDING OFFICER. It will be.

The next amendment was, on page 19, section [34] 35 line 4, to strike out "two-thousandths" and insert "three-thousandths;" so that the clause will read:

"That no ingots shall be used for coinage which differ from the legal standard more than the following proportions, namely, in gold ingots, one-thousandth; in silver ingots, three-thousandths; in minor-coinage alloys, twenty-five-thousandths, in the proportion of nickel."

The amendment was agreed to.

The next amendment was, on page 25, section [49] 48, line 4, after the word "Pennsylvania," to insert "the Comptroller of the Currency;" so that the clause will read:

"That to secure a due conformity in the gold and silver coins to their respective standards of fineness and weight, the judge of the district court of the United States for the eastern district of Pennsylvania, the Comptroller of the Currency, the assayer of the assay office at New York," etc.

The amendment was agreed to.

The next amendment was, on page 27, section [54] 53, line 3, to strike out "metals" and insert "medals."

The amendment was agreed to.

The next amendment was, on page 30, section [59] 58, line 5, to strike out "twentieth" and insert "second;" so as to read: "as prescribed by the act of July 2, 1862."

The amendment was agreed to.

The next amendment was, on page 34, section [66] 65, line 2, to strike out "July" and insert "April," and strike out "1872" and insert "1873;" so that the clause will read: "that this act shall take effect on the 1st day of April, 1873," etc.

The amendment was agreed to.

The next amendment was, on page 35, section [68] 67, line 2, to strike out "1872" and insert "1873;" so that the clause will read: "that this act shall be known as the coinage act of 1873," etc.

The amendment was agreed to.

The PRESIDING OFFICER. This concludes the amendments proposed by the Committee on Finance. The bill is open to further amendments.

Mr. COLE. I offer the following amendment, to come in on page 13, at the end of section [21] 20:

"And the Secretary of the Treasury may issue through the Director of the Mint certificates for gold bullion deposited at any of the mints or assay office at New York, which certificates shall state the value of the bullion less the coinage and other mint charges, and be payable to bearer on presentation at the mint or assay office at which the bullion was deposited, either in bullion

or coin, at the option of the superintendent of the mint or assay office, or in such proportion of bullion or coin as the superintendent may prefer: *Provided*, That if any holder of a certificate demands to be paid in coin a certificate may be issued stating the time when such coin will be ready for delivery."

Mr. NYE. That is a thing that is already provided for by existing law. Each one of our mints has a bullion fund provided from which the depositor gets his pay in coin for the value of the bullion as soon as it is ascertained. There is no delay now or waiting for coinage at the Mint.

Mr. SHERMAN. The Senator from California showed me this amendment. As it had never been considered by the committee, I hesitated to give my consent to it, but I could not see any objection to depositing bullion with the Treasury or the mints or assay offices and allow certificates to be issued, and therefore I had no objection to allowing the amendment to be made. If there seems to be any objection to it we can abandon it in a committee of conference, although if there is any doubt about it I think it had better not go on the bill.

The amendment was agreed to.

Mr. POOL. In section [67] 66, line 7, after the word "Idaho," I move to insert the words "and the United States assay office at Charlotte, N. C." The chairman of the Committee on Finance I believe agrees to accept this amendment.

Mr. SHERMAN. That depends upon the fact whether there is a legal assay office in North Carolina. If the Senator says there is, I shall not object; but I have the impression it has been abolished.

Mr. POOL. No, sir; it has not been abolished.

Mr. SHERMAN. If there is still a legal assay office there it ought to be named in this bill.

Mr. POOL. There is no question about its being such.

The amendment was agreed to.

Mr. NYE. With the consent of the Senate I should like to have the vote reconsidered by which the amendment of the Senator from California [Mr. Cole] regarding certificates for gold bullion was adopted.

Mr. COLE. The bill has not yet been reported to the Senate. The Senator can have it reserved.

Mr. NYE. Then I shall reserve it in the Senate. I do not think the Senator himself will insist upon it.

The bill was reported to the Senate as amended.

The PRESIDING OFFICER. The question is on concurring in the amendments made as in Committee of the Whole.

Mr. SHERMAN. The Senator from Nevada wished to reserve the amendment offered by the Senator from California [Mr. Cole].

Mr. NYE. I ask to have that amendment reserved.

The PRESIDING OFFICER. If there be no objection, the Chair will put the question on concurring in all the amendments together except the one indicated by the Senator from Nevada.

The remaining amendments were concurred in.

The PRESIDING OFFICER. The question now is on concurring in the amendment proposed by the Senator from California, which will be read.

The Chief Clerk read the amendment, which was to add to section [21] 20, the following:

"And the Secretary of the Treasury may issue through the Director of the Mint certificates for gold bullion deposited at any of the mints or assay office at New York, which certificates shall state the value of the bullion, less the coinage and other mint charges, and be payable to bearer on presentation at the mint or assay office at which the bullion was deposited, either in bullion or coin, at the option of the superintendent of the mint or assay office, or in such proportions of bullion or coin as the superintendent may prefer: *Provided*, That if any holder of a certificate demands to be paid in coin a certificate may be issued stating the time when such coin will be ready for delivery."

Mr. NYE. I do not understand that this amendment is insisted upon. The Senate will perceive at once that it is putting another currency into circulation, and one by which the superintendents of mints would be very likely to be injured and defrauded. I hope, therefore, it will not be adopted. They get their coin whenever they present their bullion now.

Mr. STEWART. There is a bullion fund provided for the purpose.

Mr. NYE. There is a bullion fund for that very purpose.

The amendment was nonconcurred in.

Mr. CASSERLY. I wish to move an amendment to section [26] 25. As it now stands it reads:

"That the charge of converting standard gold bullion into coin shall be one-fifth of 1 per cent."

I move to amend it so that it will read, "that there shall be no charge for converting standard gold bullion into coin."

The question raised by this amendment is not a new one in the Senate, nor indeed is it new in Congress. As I understand it has happened at least once that the Senate adopted the principle of my amendment, and that the House also adopted it; but neither of them adopted it upon the same bill. So that the amendment has the sense of each House of Congress in its favor. The principle of it is obvious.

I wish to say but this word in reference to it, that the only ground upon which the coinage charge has ever been supported was that the person depositing bullion for coinage ought to pay the Government for turning his bullion into the current coin of the country. I think it only requires a statement of that proposition to enable any of us to see its fallacy.

The person who furnishes the Government with the means to coin money for the necessary uses of its own citizens never should be taxed to pay for that which really is a great advantage to the Government. Why, sir, governments would be forced, if they could not get bullion without charge, to pay for it in order to manufacture their coins. It is contrary to the first principles of government, it seems to me, especially as applicable to this subject, that coinage charge should be continued. It is one which is evil in its results. It keeps up a discrimination which is always against us; and the reason to-day why the American man of business loses, at the rate of two cents and a fraction of a cent upon every pound sterling of exchange, all of which goes to the benefit either of the banker on this side or the payer of the exchange on the other, rests precisely in the maintenance of this extraordinary charge. But for this charge there would be no such discrimination in the rate of exchange against us.

A great many other grounds might be given, but I hope the Senator from Ohio will be willing to concede this amendment at this time, and that what the two Houses have both indorsed may now be embodied in this bill.

Mr. SHERMAN. I must confess my regret that the Senator from California should raise this disputed question at this stage of the bill, just as it was about on its passage. The Senate of the United States deliberately, after full discussion, after hearing the Senator at length and other Senators who maintain his view of this question, decided to retain the charge for coinage at one-fifth of 1 per cent. It is now one-half of 1 per cent. The Senate, by a very decided vote, after a full debate, settled that question. The bill went to the House of Representatives, and there was another effort made by the members from the Pacific coast to repeal the coinage charge, and there, after full debate, it was settled by an overwhelming majority to retain the charge of one-fifth of 1 per cent. The Senator says both Houses have at some time or other passed a bill abolishing the coinage charge. I am quite sure a proposition of that kind has never passed either House after debate and with full consideration.

If this question about the coinage charge is to be opened and pressed, it will compel those of us who are in favor of retaining the coinage charge to enter into an elaborate debate. I did so when it was here before. The Senator now in the chair [Mr. MORRILL of Vermont] and many other Senators participated in that discussion. The question has been settled, and this bill has now gone to its last stage. This bill once passed the Senate a few years ago, and was fully discussed, and the charge of one-fifth of 1 per cent was retained. I trust, therefore, that the Senator will not now seek to reverse the decision taken first by the Senate, and afterward agreed to by the House. This point is beyond our consideration practically. We ought not to undertake, at this period of the session, to review that decision.

The people of California are very largely interested in the revision of the mint laws. Indeed I have received more letters from that State about this coinage bill, desiring it to pass, than from any other portion of the country. I can see the great importance of it to them, and I believe it to be one of great importance to the whole people of the United States. Therefore I do not wish to enter into a discussion in regard to this coinage charge that may probably weary the Senate and delay the passage of the bill. I promised that the bill would not take more than an hour, and when I made that promise I supposed these amendments which have been acted upon would be acted upon *sub silentio*, and that other questions which had been settled would not be revived.

I therefore will not undertake to answer the argument of the Senator from California except to say that the question is *res adjudicata* so far as this bill is concerned. If, however, it is to be opened, as the Senator has a right to open it, it will lead to a long debate. I therefore prefer not to say anything on the question except that the coinage charge has not been and ought not to be repealed entirely. We have reduced it now to the lowest rate of any nation in the world except only Great Britain.

Mr. CASSERLY. If I have made a mistake as to the fact of the adoption in each House of the principle of this amendment, of course I desire to withdraw what I said.

Mr. SHERMAN. I do not deny that, if the Senator says it is so; but I do not remember it ever passing the Senate.

Mr. CASSERLY. I was so informed, and I have the impression that among the gentlemen so informing me was the Senator from Ohio.

Mr. SHERMAN. I have no recollection of it.

Mr. CASSERLY. I understand fully the objection to protracting debate at this late hour of the day, and I was very reluctant to say a word, even so much as was necessary to propose this amendment. I felt it to be my duty, however, to do so. I desire now to say that the continuance of this coinage charge repels from San Francisco, and, of course, from this country, almost the entire gold-bullion product of Australia. We refine so much more cheaply in San Francisco than they do in London, that but for this coinage charge the whole gold bullion of Australia would come to San Francisco to be refined.

Mr. SHERMAN. Oh, no.

Mr. CASSERLY. Perhaps the Senator does not understand me. I say the cost of refining in London is so much more than it is in San Francisco, that but for this coinage charge the gold-bullion product of Australia would come to us. Why? Because what they want in England all the while is silver for their Asiatic exchanges with India and China. We have more silver than we want. Nevada appears to be getting ready to deluge the world with silver. I see that her silver product last year was probably over $20,000,000.

Now, sir, there could not be a better basis for exchange, nor a more profitable operation for the American people, than to take the gold bullion of Australia and coin it in San Francisco and diffuse that much more specie through all the arteries of business, getting ready for the resumption of specie payments, of which the Senator spoke so well and so truly the other day, and to give them in return for their bullion this silver which we do not want and which before a great while may be at an absolute discount on our hands. I wish to say that much. I feel very earnest about this matter, because I think I understand the financial and commercial bearing of the great blunder we make in continuing this obsolete coinage tax. Having said so much, I leave the question to the Senate.

The PRESIDING OFFICER. The question is on the amendment of the Senator from California.

The amendment was rejected.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.—*Congressional Globe*, parts 1 and 2, third session Forty-second Congress, 1872-'73, pages 668 to 674.

The amendments were engrossed and reported to the House of Representatives, as follows:

IN THE SENATE OF THE UNITED STATES, *January 17, 1873.*

Resolved, That the bill from the House of Representatives (H. R. 2934) entitled "An act revising and amending the laws relative to the mints, assay offices, and coinage of the United States" do pass with the following amendments:

1. Page 4, line 21, after "coins," insert *or samples of bullion.*
2. Page 5, line 20, strike out [wording] and insert *working.*
3. Page 6, line 4, after "or," insert *assay.*
4. Page 9, strike out all after "weight" in line 14, down to and including line 27.
5. Page 11, strike out section 15.
6. Page 11, strike out section 16 and insert the following:

SEC. 15. *That the silver coins of the United States shall be a trade dollar, a half dollar or fifty-cent piece, a quarter dollar or twenty-five-cent piece, a dime or ten-cent piece; and the weight of the trade dollar shall be four hundred and twenty grains troy; the weight of the half dollar shall be twelve grains and one-half of a grain; the quarter dollar and the dime shall be, respectively, one-half and one-fifth of the weight of said half dollar; and said coins shall be a legal tender at their nominal value for any amount not exceeding five dollars in any one payment.*

7. Page 11, strike out section 17 and insert the following:

SEC. 16. That the minor coins of the United States shall be a five-cent piece, a three-cent piece, and a one-cent piece, and the alloy for the five and three cent pieces shall be of copper and nickel, to be composed of three-fourths copper and one-fourth nickel, and the alloy of the one-cent piece shall be ninety-five per centum of copper and five per centum of tin and zinc, in such proportions as shall be determined by the Director of the Mint. The weight of the piece of five cents shall be seventy-seven and sixteen-hundredths grains troy; of the three-cent piece, thirty grains; and of the one-cent piece, forty-eight grains; which coins shall be a legal tender at their nominal value for any amount not exceeding twenty-five cents in any one payment.

8. Page 12, in line 11, after "omitted," insert: *and on the reverse of the silver dollar, half dollar, quarter dollar, and the dime, respectively, there shall be inscribed the weight and the fineness of the coin.*

9. Page 13, at the end of line 8, insert the following:

Provided, That at the option of the owner silver may be cast into coins of standard fineness, and of the weight of four hundred and twenty grains troy, designated in section fifteen of this act as the trade dollar.

10. Page 13, line 24, strike [standard] and insert: *Aneneas.*
11. Page 13, strike out all after "depositor," in line 26, down to and including line 27.
12. Page 14, line 6, after "bullion" insert: *or for converting standard silver into trade dollars.*
13. Page 14, line 27, after "coins" insert: *other than the trade dollar.*
14. Page 17, line 20, strike out [two-thousandths] and insert: *three-thousandths.*
15. Page 24, line 4, after "Pennsylvania," insert: *the Comptroller of the Currency,*
16. Page 30, line 12, strike out [twentieth] and insert: *second.*
17. Page 34, line 23, strike out [July] and insert: *April.*
18. Page 34, line 24, strike out [seventy-two] and insert: *seventy-three.*
19. Page 36, at the end of line 2, insert: *the "United States assay office at Charlotte, North Carolina."*
20. Page 36, line 14, strike out [1872] and insert: *1873.*

Attest:

GEO. C. GORHAM, *Secretary.*

IN THE HOUSE OF REPRESENTATIVES, *January 25, 1873.*

Resolved, That the House nonconcur in the amendments of the Senate to the bill (H. R. 2934) revising and amending the laws relative to the mints, assay offices, and coinage of the United States, and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Samuel Hooper, Mr. Stoughton, and Mr. McNeely be the managers of the conference on the part of the House.

Attest: EDWARD McPHERSON, *Clerk.*

IN THE SENATE OF THE UNITED STATES, *January 27, 1873.*

Resolved, That the Senate insist upon its amendments to the bill (H. R. 2934) revising and amending the laws relative to the mints, assay offices, and coinage of the United States, disagreed to by the House of Representatives, and agree to the conference asked by the House on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. SHERMAN, Mr. Scott, and Mr. Bayard be the conferees on the part of the Senate.

Attest: GEO C. GORHAM, *Secretary.*

CONFERENCE REPORT.

IN SENATE.

Thursday, February 6, 1873.

MINT LAWS.

Mr. SHERMAN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the bill (H. R. No. 2934) revising and amending the laws relative to the mints and assay offices and coinage of the United States, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 5, 7, 10, 11, 13, 14, 15, 16, 17, 18, and 20; and agree to the same.

That the Senate recede from its fourth amendment, and agree to the words proposed to be stricken out, with the following amendments: after the word "by," in line 16, insert "natural;" in lines 17 and 18 strike out the words "on the double-eagle and eagle, and 1 per cent on the other coins;" and in line 19, after "law," insert the words "after a circulation of twenty years, as shown by its date of coinage, and at a ratable proportion for any period less than twenty years;" and the House agree to the same.

That the House recede from its disagreement to the sixth amendment of the Senate and agree to the same with the following amendments: In line 5 strike out the word "grains" at the end of the line, and insert in lieu thereof "grams (grammes;") and in line 6 strike out "grain" and insert "gram (gramme;") and the Senate agree to the same.

That the House recede from its disagreement to the eighth amendment of the Senate, and agree to the same with the following amendments: After "silver" insert "trade;" strike out the words "half-dollar, quarter-dollar, and the dime, respectively, there shall be inscribed," and the word "the" before "fineness;" and after "coin," at the end of the amendment, insert the words "shall be inscribed;" and the Senate agree to the same.

That the House recede from its disagreement to the ninth amendment of the Senate, and agree to the same with an amendment, as follows: Strike out the words proposed to be inserted, together with the remainder of the section, and in lieu thereof insert the following: "That any owner of silver bullion may deposit the same at any mint to be formed into bars or into dollars of the weight of 420 grains troy, designated in this act as trade-dollars, and no deposit of silver for other coinage shall be received; but silver bullion contained in gold deposits, and separated therefrom, may be paid for in silver coin at such valuation as may be from time to time established by the Director of the Mint;" and the Senate agree to the same.

That the House recede from its disagreement to the twelfth amendment of the Senate, and agree to the same with amendments as follows: Strike out the words proposed to be inserted and insert after "for," in line 3, section 26, the words "converting standard silver into trade-dollars, for melting and;" and in line 3, strike out "the;" and the Senate agree to the same.

That the House recede from its disagreement to the nineteenth amendment of the Senate, and agree to the same with an amendment as follows: Insert after "New York," in line 8, page 36 of the bill, the words "the United States assay-office at Charlotte, North Carolina;" and the Senate agree to the same,

JOHN SHERMAN,
JOHN SCOTT,
T. F. BAYARD,
Managers on the part of the Senate.

S. HOOPER,
WM. M. STOUGHTON,
Managers on the part of the House.

The report was concurred in.—*Congressional Globe*, part 2, third session Forty-second Congress, 1872-'73, page 1150.

THE AMENDMENT WHICH DEMONETIZED SILVER

and which finally found its way into the statute was the substitute brought in by the Finance Committee for section 16 of the House bill, which I now repeat:

The silver coins of the United States shall be a trade dollar, a half dollar, or 50-cent piece, a quarter dollar, or 25-cent piece, a dime, or 10-cent piece; and the weight of the trade dollar shall be 420 grains troy, the weight of the half-dollar shall be 12 grams and one-half of a gram, the quarter dollar and the dime shall be, respectively, one-half and one-fifth of the weight of said half dollar; and said coins shall be a legal tender at their nominal value for any amount not exceeding $5 in any one payment.

The debates and proceedings show that the amendments of the committee, according to the rules of the Senate, were first considered in their consecutive order, with the exception of section 16, which we will hereafter consider. The parts in brackets were to be stricken out, and the parts in italics inserted. The proceedings followed the usual order to and including section 15. That section was included in brackets; after debate it was stricken out by a vote of the Senate. Section 16 was also included in brackets, and the part in italics, which is the substitute I have already cited, was recommended by the committee to be inserted in its place. But the proceedings recorded in the Globe show that this substitute was

NEVER READ OR ACTED ON IN THE SENATE.

When the debate on section 15 was concluded the following proceedings occurred, as appears in the transcript I have already given. They will be found in the first volume, page 672, of the Congressional Globe, third session Forty-second Congress, part 1, 1872-'73:

The PRESIDING OFFICER. The question is on the amendment striking out the fifteenth section.

The amendment was agreed to.

The next amendment was to strike out section [seventeen] sixteen, in the following words:

It will be observed that the word "seventeen" is in brackets and the word "sixteen" follows. The fifteenth section having been stricken out, the sixteenth became the fifteenth and the seventeenth became the sixteenth. When amendments are made striking out a section, the remaining sections are given their new numbers and the original numbers are placed in brackets.

The seventeenth section was then read and amended, and after that the consideration of the amendments of the committee was continued in regular order.

No one who will read the debate and observe the criticisms of Senators on every amendment acted upon, can possibly doubt that if the substitute for section 16, which demonetized silver, had been read, it would have challenged debate and defeated the demonetization of silver.

When section 19 of the original bill, and 18 of the new number, was reached, the amendment of the committee, among other things, provided that "on the gold dollar, the three-dollar piece, the silver dollar, the half dollar, etc., the figure of the eagle shall be omitted, and on the reverse side of the silver dollar, half dollar, quarter dollar, etc., respectively, there shall be inscribed the weight and fineness of the coin."

Mr. Casserly, of California, called attention to the omission of the eagle; whereupon Mr. SHERMAN gave the following explanation of that omission:

Mr. SHERMAN. If the Senator will allow me, he will see that the preceding section provides for coin which is exactly interchangeable with the English shilling and the 5-franc piece of France; that is, a 5-franc piece of France will be the exact equivalent of a dollar of the United States in our silver coinage; and in order to show this wherever our silver coin shall float—and we are providing that it shall float all over the world—we propose to stamp upon it, instead of our eagle, which foreigners may not understand, and which they may not distinguish from a buzzard or some other bird, the intrinsic fineness and weight of the coin.—*Congressional Globe*, part 1, third session Forty-second Congress, 1872-'73, page 672.

There was a dollar in section 16 of the House bill, the exact equivalent of the 5-franc piece of France. It contained 384 grains of standard silver. This is

THE DOLLAR WHICH MR. SHERMAN DESCRIBES

when discussing section 19 as being still in existence in a preceding section. If he then told the truth, section 16 had not been amended. The trade dollar, which was at some other time or place incorporated into the act, contained 420 grains of standard silver. This statement of Mr. SHERMAN corroborates the record, which shows that no action was taken on the substitute for section 16.

The other amendments proposed by the committee were acted upon, and the bill passed without a division. No word was spoken or allusion made in the Senate at any time, when any bill was pending, to the important fact that a change was to be made in the silver coinage of the United States, except the statement of Mr. SHERMAN that the proposed dollar was the exact equivalent of the 5-franc piece. This statement that the bill contained a 384-grain dollar equivalent to the French 5-franc piece was made by him, notwithstanding the fact that his committee had reported a 420-grain trade dollar; and the Senate, at the time he was speaking, had passed beyond the consideration of the section in which the trade dollar proposed by him was to have been inserted. How could the 384-grain dollar be in the bill while he was discussing section 19, if the 420-grain dollar had been substituted for it in section 16?

I am aware of the fact that, as it came from the House, it lim-

ited the legal-tender quality of the new dollar to sums of $5, but that limitation was passed over in the Senate without observation.

Mr. SHERMAN enters into an elaborate argument in great detail to show the number of times the mintage bill was printed with the standard silver dollar omitted, and also to show that it was originally prepared in that form by experts in the Treasury Department; but

HE HAS NEVER GIVEN ANY EXPLANATION OF HIS OWN CONDUCT

as chairman of the Finance Committee in not calling the attention of the Senate to this important change. He knew the importance of the change, and that it demonetized silver and adopted the gold standard. His efforts, as before remarked, to secure the recommendation of the monetary conference of Paris in favor of the gold standard, and his elaborate report on the bill, which was defeated in the Forty-first Congress, show how important it was in his mind.

If he had supposed that it would result in a great benefit to the American people would he not have called attention to it with pride and emphasis? It had been the labor of years, as I have shown, and its accomplishment should have been a great event in his life. The contest for the last twenty years to reverse that legislation, and Mr. SHERMAN'S persistent opposition to all efforts to restore the silver dollar, show what importance he must then have attached to his work. And yet he gave the Senate no intimation of this important change.

When we witness the columns of editorials and correspondence with regard to the pending controversy we can imagine what interest would have been excited in the country if it had been proclaimed by him that Congress was about to demonetize silver.

NO WORD EXCAPED HIS LIPS

and the metropolitan journals of that day had no knowledge of what occurred. No mention of the demonetization of silver at that time can be found in their columns. The parliamentary history of the world may be searched in vain to find a parallel for the accomplishment of a great financial revolution by a leading financial statesman without an announcement by him of what he was doing or what he had done.

The conference report which is set forth in the foregoing transcript affords very meager information of the changes which were made in the joint committee of the two Houses. Nearly all the amendments are referred to by numbers, and those which are not simply mention words and phrases, which were inserted or omitted without giving the context. A comparison of the report with the engrossed bill shows that the amendment or substitute for section 16 was numbered 6. That harmless number imparted no information of the important change demonetizing silver, to which it related. The report was made and adopted in each House without a word of explanation which would indicate its scope and effect. No mention was made in either House on the presentation of that report as to the character of any of the amendments agreed to. It was understood that it was simply a bill to revise and codify the mint laws, and under such circumstances it was natural that there was no anxiety to inquire as to its details.

The fact that silver was demonetized by the bill did not become generally known until the Latin Union suspended the coinage of silver. Silver then fell in price, and an inquiry as to the cause became general. When

IT WAS ASCERTAINED THAT SILVER HAD BEEN DEMONETIZED

by the mint act, there was a general demand throughout the country for its remonetization. This demand came about two years after the passage of the bill. In the latter part of 1875, the mints of the Latin Union having been finally closed, intense interest was excited in the United States in 1876. Nearly all the leading journals of the country demanded the restoration of the silver dollar to the place it occupied as a legal-tender coin previous to 1873.

A Presidential election was to be held in the fall of 1876, and politicians were shaping their course with a view to the coming contest. The strong popular expression against the demonetization of silver and in favor of its restoration made it important for aspiring men in each of the great political parties to espouse the popular side of the question.

Mr. SHERMAN took an early opportunity to newly define his position. On the 6th of March, 1876, he made an elaborate argument against a resolution of the Chamber of Commerce of the city of New York in favor of repealing the resumption act of 1875. In the course of his remarks on that resolution he said:

Our coinage act came into operation on the 1st of April, 1873, and constituted the gold one-dollar piece the sole unit of value, while it restricted the legal tender of the new silver trade dollar and the half-dollar and subdivisions to an amount not exceeding $5 in one payment. Thus the double standard previously existing was finally abolished, and the United States as usual was influenced by Great Britain in making gold coin the only standard. This suits England, but does not suit us. I think with our large silver-producing capacity we should return to the double standard, at least in part, and this will constitute one of the means by which we will be enabled to resume specie payments.

This remarkable utterance of the original hero and the present advocate of gold monometallism appears on page 1481 of the Congressional Globe, Forty-fourth Congress, first session, volume 4, part 2.

The statement of the Senator from Ohio that

THE UNITED STATES WAS INFLUENCED BY GREAT BRITAIN

in making gold the only standard is in accordance with the opinion of all who have investigated the question; but it may be suggested that it is slightly in conflict with the Senator's report on the bill of 1868, entitled "A bill in relation to the coinage of gold and silver," wherein he said:

The single standard of gold is an American idea, yielded reluctantly by France and other countries, where silver is the chief standard of value.

This report will be found in Senate report of committee, No. 117, Fortieth Congress, second session, page 4.

The Senator from Ohio, who secured the demonetization of silver, had the means of knowing by what influence the standard silver dollar was stricken down in the United States, and when he states that it was by British influence, full faith and credit must be given to that statement. His visit to London and Paris in 1867, and the powerful aid he rendered in coöperation with the English delegation at the monetary conference at Paris to secure the consent of continental Europe to recommend the gold standard, gave him ample opportunity to know from what source came the influence which secured the demonetization of silver in the United States and robbed the people of this country of the benefits of an ample supply of metallic money from the great discoveries of silver mines which had then been made in the mountains of the West.

Why

THE SENATOR FROM OHIO YIELDED TO THAT INFLUENCE

an explanation is wanted. The remarks I have quoted show how important he regards the large silver-producing capacity of this country in the resumption of specie payments. He knows how much more important it now is to maintain specie payment. Why has he from that time to this so persistently resisted every effort to restore silver to the place it occupied previous to the passage of the act of 1873, which, he informs us, was obtained by British influence? If he was influenced by Great Britain in the passage of the act of 1873, why does he continue under that influence, and insist that the act of 1890 shall be repealed, and that the act of 1873, secured by British influence, shall be reaffirmed and made the permanent policy of the United States? If silver was demonetized in 1853, why was it necessary to invoke British influence to demonetize it in 1873?

The Senator from Ohio informed us in his speech the other day that after the repeal of the Sherman act we must issue bonds and increase the national debt to buy gold to maintain specie payments. What influence is forcing the passage of the bill now under consideration, which denies the people the right to mine and coin money, and compels them to buy British gold? Our annual interest account to-day on the money we owe Europe is more than $150,000,000. Is all hope of financial independence for this country to be abandoned?

"GOLD" AND "COIN" USED AS SYNONYMS.

In the course of his remarks the Senator from Ohio uses the following language:

The law was passed in February, 1873, and I do know that within a year from that time the Senator from Nevada knew that silver was demonetized, because he said so; and he said it February 11, 1874, as will appear in the document which I have here before me, and to which I give him a reference, so there can be no mistake about it. On page 1392, volume 2, part 2, of the CONGRESSIONAL RECORD, first session Forty-third Congress, he said:

"I want the standard gold, and no paper money not redeemable in gold; no paper money the value of which is not ascertained; no paper money that will organize a gold board to speculate in it."

Again, only a week or two after this, on the 20th of February, to be found in the CONGRESSIONAL RECORD, volume 2, part 2, page 1677, when speaking in favor of the resolution instructing the Committee on Finance to report a bill providing for the convertibility of Treasury notes into gold coin or 5 per cent bonds, he said:

"By this process we shall come to a specie basis, and when the laboring man receives a dollar it will have the purchasing power of a dollar, and he will not be called upon to do what is impossible for him or the producing classes to do—figure upon the exchanges, figure upon the fluctuations, figure upon the gambling in New York; but he will know what his money is worth. Gold is the universal standard of the world. Everybody knows what a dollar in gold is worth."—*Congressional Record*, August 31, 1893, pages 925, 926.

It was of no consequence whether or not I knew in February, 1874, that silver was demonetized in February, 1873. It was too late to prevent what had been done in the previous year. My position at that time, as well as my knowledge, were entirely immaterial and irrelevant to this discussion. I did not know that silver was demonetized for more than a year after February, 1874, since which time my bitterest enemies will hardly blame me for not doing all in my power in and out of Congress to remonetize silver.

But the statement of the Senator from Ohio that I knew on the 11th day of February, 1874, that silver was demonetized, or that I said so, has no foundation in fact. The quotation from the speech which he held in his hand when he made the statement does not prove it, and the speech itself disproves any such inference. I was opposing an additional issue of bank circulation and arguing in favor of specie payment. The use of the term "gold" for specie was inaccurate, but it was a common practice at that time. Gold was simply a synonym for coin, and it was in that sense alone in which I used it, as the speech shows. His second quotation is taken from a speech advocating the return to the specie basis. At that time there was no difference in the bullion value between gold and silver coin. The mints of the Latin Union were still open, and the silver in the silver dollar was worth as much as the gold in the gold dollar.

The following January the specie-resumption act, providing for the redemption of Treasury notes in coin, was passed.

No mention was made in the discussion of the bill providing for resumption of specie payment of the demonetization of silver. On the contrary, the assumption was that the

REDEMPTION WAS TO BE IN GOLD AND SILVER.

On this subject Mr. SHERMAN said:

I may say the whole credit and money of the United States is placed by this bill under the direction of the proper executive officers not only to prepare for, but to maintain resumption, and no man can doubt that if this bill stands the law of the land from this time to the 1st day of January, 1879, specie payments will be resumed, and that our United States notes will be converted at the will of the holder into gold and silver coin.—*Congressional Record*, volume 3, part 1, Forty-third Congress, second session, page 195.

Mr. Bogy, of Missouri, said:

Gold and silver are the only true measures of value not only here, but throughout the world.—*Ibid.*, page 200.

Mr. Hamilton of Maryland offered a substitute for the bill, as follows:

That from and after the 4th day of July, A. D. 1876, nothing but gold and silver shall be a legal tender for the payment of debts contracted thereafter.—*Ibid.*, page 204

DEMONETIZATION UNKNOWN AT THE TIME.

The Senator from Ohio says:

Sir, I would rather stand this day before you defending a law which has been denounced and vilified, as this has been, boldly avowing that I did read the law, and that I knew its contents, than to plead the baby act, and say I did not know what was pending here before us for two or three years as an act of legislation.—*Congressional Record*, August 31, 1893, page 925.

Such a charge under ordinary circumstances might be regarded as a reproach. If I stood alone I would not feel complimented by the charge. But I was in illustrious company, and I will now introduce some of those associates to whom the charge of "pleading the baby act" equally applies.

Senator Thurman, on the 15th of February, 1878, in debate said:

I can not say what took place in the House, but know when the bill was pending in the Senate we thought it was simply a bill to reform the mint, regulate coinage, and fix up one thing and another, and there is not a single man in the Senate, I think, unless a member of the committee from which the bill came, who had the slightest idea that it was even a squint toward demonetization.—*Congressional Record*, volume 7, part 2, Forty-fifth Congress, second session, page 1064.

Senator Conkling, in the Senate, on March 30, 1876, during the remarks of Senator Bogy on the bill (S. 263) to amend the laws relating to legal tender of silver coin, in surprise, inquired:

Will the Senator allow me to ask him or some other Senator a question? Is it true that there is now by law no American dollar? And, if so, is it true that the effect of this bill is to make half dollars and quarter dollars the only silver coin which can be used as a legal tender?—*Congressional Record*, volume 4, part 3, Forty-fourth Congress, first session, page 2062.

Senator ALLISON, on February 15, 1878, when the bill (H. R. 1093) to authorize the free coinage of the standard silver dollar and to restore its legal-tender character was under consideration, observed:

But when the secret history of this bill of 1873 comes to be told, it will disclose the fact that the House of Representatives intended to coin both gold and silver, and intended to place both metals upon the French relation instead of on our own, which was the true scientific position with reference to this subject in 1873, but that the bill afterwards was doctored, if I may use that term, and I use it in no offensive sense of course——

Mr. Sargent interrupted him and asked him what he meant by the word "doctored."

Mr. ALLISON said:

I said I used the word in no offensive sense. It was changed after discussion, and the dollar of 420 grains was substituted for it.—*Congressional Record*, volume 7, part 2, Forty-fifth Congress, second session, page 1058.

On February 15, 1878, during the consideration of the bill above referred to, the following colloquy between Senator Blaine and Senator VOORHEES took place:

Mr. VOORHEES. I want to ask my friend from Maine, whom I am glad to designate in that way, whether I may call him as one more witness to the fact that it was not generally known whether silver was demonetized. Did he know, as Speaker of the House, presiding at that time, that the silver dollar was demonetized in the bill to which he alludes?

Mr. BLAINE. I did not know anything that was in the bill at all. As I have before said, little was known or cared on the subject. [Laughter.] And now I should like to exchange questions with the Senator from Indiana, who was then on the floor and whose business it was, far more than mine, to know, because by the designation of the House I was to put questions; the Senator from Indiana, then on the floor of the House, with his power as a debater, was to unfold them to the House. Did he know?

Mr. VOORHEES. I very frankly say that I did not.

(*Ibid.*, page 1063.)

Senator Beck, in a speech made in the Senate January 10, 1878, said:

It [the bill demonetizing silver] never was understood by either House of Congress. I say that with full knowledge of the facts. No newspaper reporter—and they are the most vigilant men I ever saw in obtaining information—discovered that it had been done.—*Congressional Record*, volume 7, part 1, Forty-fifth Congress, second session, page 260.

Senator Hereford, in the Senate, on February 13, 1878, in discussing the demonetization of silver, said:

So that I say that beyond the possibility of a doubt (and there is no disputing it) that bill which demonetized silver, as it passed, never was read, never was discussed, and that the chairman of the committee who reported it, who offered the substitute, said to Mr. HOLMAN, when inquired of, that it did not affect the coinage in anyway whatever.—*Ibid.*, page 989.

Senator Howe, in a speech delivered in the Senate on February 5, 1878, said:

Mr. President, I do not regard the demonetization of silver as an attempt to wrench from the people more than they agree to pay. That is not the crime of which I accuse the act of 1873. I charge it with guilt compared with which the robbery of two hundred millions is venial.—*Congressional Record*, volume 7, part 1, Forty-fifth Congress, second session, page 764.

Gen. Garfield, in a speech made at Springfield, Ohio, during the fall of 1877, said:

Perhaps I ought to be ashamed to say so, but it is the truth to say that, I at that time being chairman of the Committee on Appropriations, and having my hands overfull during all that time with work, I never read the bill. I took it upon the faith of a prominent Democrat and a prominent Republican, and I do not know that I voted at all. There was no call of the yeas and nays, and nobody opposed that bill that I know of. It was put through as dozens of bills are, as my friend and I know, in Congress, on the faith of the report of the chairman of the committee; therefore I tell you, because it is the truth, that I have no knowledge about it.—*Congressional Record*, volume 7, part 1, Forty-fifth Congress, second session, page 989.

Mr. Bright, of Tennessee, said of the law:

It passed by fraud in the House, never having been printed in advance, being a substitute for the printed bill; never having been read at the Clerk's desk, the reading having been dispensed with by an impression that the bill made no material alteration in the coinage laws; it was passed without discussion, debate being cut off by operation of the previous question. It was passed, to my certain information, under such circumstances that the fraud escaped the attention of some of the most watchful as well as the ablest statesmen in Congress at that time. * * * Aye, sir, it was a fraud that smells to heaven. It was a fraud that will stink in the nose of posterity, and for which some persons must give account in the day of retribution.—*Congressional Record*, volume 7, part 1, second session Forty-fifth Congress, page 584.

Mr. HOLMAN, in a speech delivered in the House of Representatives July 13, 1876, said:

I have before me the record of the proceedings of this House on the passage of that measure, a record which no man can read without being convinced that the measure and the method of its passage through this House was a "colossal swindle." I assert that the measure never had the sanction of this House, and it does not possess the moral force of law.—*Congressional Record*, volume 4, part 6, Forty-fourth Congress, first session, appendix, page 193.

Again, on August 5, 1876, he said:

The original bill was simply a bill to organize a bureau of mines and coinage. The bill which finally passed the House and which ultimately became a law was certainly not read in this House.

* * * * * * *

It was never considered before the House as it was passed. Up to the time the bill came before this House for final passage the measure had simply been one to establish a bureau of mines; I believe I use the term correctly now. It came from the Committee on Coinage, Weights, and Measures. The substitute which finally became a law was never read, and is subject to the charge made against it by the gentleman from Missouri [Mr. BLAND], that it was passed by the House without a knowledge of its provisions, especially upon that of coinage.

I myself asked the question of Mr. Hooper, who stood near where I am now standing, whether it changed the law in regard to coinage. And the answer of Mr. Hooper certainly left the impression upon the whole House that the subject of the coinage was not affected by that bill.—*Congressional Record*, volume 4, part 6, Forty-fourth Congress, first session, page 5237.

Mr. CANNON, of Illinois, in a speech made in the House on July 13, 1876, said:

This legislation was had in the Forty-second Congress, February 12, 1873, by a bill to regulate the mints of the United States, and practically abolished silver as money by failing to provide for the coinage of the silver dollar. It was not discussed, as shown by the RECORD, and neither members of Congress nor the people understood the scope of the legislation.—*Ibid.*, appendix, page 197.

Mr. Burchard, of Illinois, in a speech made in the House of Representatives on July 13, 1876, said:

The coinage act of 1873, unaccompanied by any written report upon the subject from any committee, and unknown to the members of Congress, who without opposition allowed it to pass under the belief, if not assurance, that it made no alteration in the value of the current coins, changed the unit of value from silver to gold.—*Ibid.*, page 4560.

Mr. Kelley, of Pennsylvania, who had charge of the bill, in a speech made in the House of Representatives on March 9, 1878, said:

In connection with the charge that I advocated the bill which demonetized the standard silver dollar, I say that, though the chairman of the Committee on Coinage, I was ignorant of the fact that it would demonetize the silver dollar or of its dropping the silver dollar from our system of coins, as were those distinguished Senators Messrs. Blaine and VOORHEES, who were then

members of the House, and each of whom a few days since interrogated the other: "Did you know it was dropped when the bill passed?" "No," said Mr. Blaine; "did you?" "No," said Mr. VOORHEES. I do not think that there were three members in the House that knew it. I doubt whether Mr. Hooper, who, in my absence from the Committee on Coinage and attendance on the Committee on Ways and Means, managed the bill, knew it. I say this in justice to him.—*Congressional Record*, volume 7, part 2, Forty-fifth Congress, second session, page 1605.

Again on May 10, 1879, Mr. Kelley said:

All I can say is that the Committee on Coinage, Weights, and Measures, who reported the original bill, were faithful and able, and scanned its provisions closely; that as their organ I reported it; that it contained provision for both the standard silver dollar and the trade dollar. Never having heard until a long time after its enactment into law of the substitution in the Senate of the section which dropped the standard dollar, I profess to know nothing of its history; but I am prepared to say that in all the legislation of this country there is no mystery equal to the demonetization of the standard silver dollar of the United States. I have never found a man who could tell just how it came about or why.—*Congressional Record*, volume 9, part 1, Forty-sixth Congress, first session, page 1231.

President Grant was also ignorant of the demonetization of silver. Eight months after the passage of the bill he wrote a letter to Mr. Cowdrey, from which the following extract is taken:

The panic has brought greenbacks about to a par with silver. I wonder that silver is not already coming into the market to supply the deficiency in the circulating medium. When it does come, and I predict that it will soon, we will have made a rapid stride towards specie payments. Currency will never go below silver after that. The circulation of silver will have other beneficial effects. Experience has proved that it takes about forty millions of fractional currency to make small change necessary for the transaction of the business of the country. Silver will gradually take the place of this currency, and, further, will become the standard of values which will be hoarded in a small way. I estimate that this will consume from two to three hundred millions, in time, of this species of our circulating medium.

It will leave the paper currency free to perform the legitimate functions of trade and will tend to bring us back where we must come at last, to a specie basis. I confess to a desire to see a limited hoarding of money. It insures a firm foundation in time of need. But I want to see the hoarding of something that has a standard of value the world over. Silver has this, and if we once get back to that our strides toward a higher appreciation of our currency will be rapid. Our mines are now producing almost unlimited amounts of silver, and it is becoming a question, "What shall we do with it?" I suggest here a solution that will answer for some years, and suggest to you bankers whether you may not imitate it: To put it in circulation now; keep it there until it is fixed, and then we will find other markets.—*McPherson's Handbook of Politics for 1874*, pages 134 and 135.

RECAPITULATION.

I will now recapitulate. In 1867 the mints of the United States and every mint on the Continent of Europe were open to the free and unlimited coinage of silver. The mints of Germany, Austria, and Holland were closed against gold. The mints of England were open to the free coinage of gold, but closed against silver.

A conference was in session at Paris which had been called by the Emperor to consider the unification of coins, weights, and measures. Samuel B. Ruggles represented the United States, and Rivers Wilson represented Great Britain. These two delegates, representing a hundred millons of English-speaking people, with the powerful aid of the Senator from Ohio, chairman of the Committee of Finance of the Senate, obtained the reluctant consent of the nations of the Continent of Europe to join England and the United States in recommending the single gold standard.

The Senator from Ohio undertook to carry out that recommendation by the legislation of Congress. He returned to the Senate, and in the following session introduced a bill making gold the standard of value and reducing silver to token money. He induced the majority of the Finance Committee to sanction his elaborate report recommending the passage of the bill, and in claiming that the single gold standard was an American idea yielded reluctantly by France and the associated nations of the continent.

Senator E. D. Morgan, of New York, a member of the Finance Committee, submitted a minority report, which exposed the scheme and settled the fate of the bill. It was never called up for action, and the country was ignorant of the fact that such a bill had been introduced or such reports made.

After the expiration of the term of office of the Senator from New York a clique in the Treasury Department, headed by John Jay Knox, prepared an elaborate bill of seventy-one sections—professedly to revise and codify the mint laws—which omitted the standard dollar from the list of coins. The bill was introduced by the Senator from Ohio, referred to the Committee on Finance, and by him reported to the Senate, with amendments. All the amendments were inconsequential except one, and that one imposed a tax of three-tenths of 1 per cent upon the coinage of gold and silver bullion in addition to the charges for parting and refining. Such a charge was opposed, because it would discourage coinage in the United States and encourage exportation of gold and silver.

Two days' debate were had over this amendment. There was no other controverted matter debated in the Senate. The amendment was finally rejected, and the bill passed by an overwhelming majority, Mr. SHERMAN voting in the negative. He knew very well before his name was reached in the calling of the roll that the bill would pass by an overwhelming majority. But by voting against the bill he would say by his vote that he attached more importance to a tax of three-tenths of 1 per cent upon gold and silver bullion deposited for coinage—when he knew, but the Senate did not, that no silver could be deposited for that purpose—than he did to the very important bill which he had introduced for the codification of the mint laws.

A bill which had been prepared by a commission of eminent men whom he described in his speech the other day, earnestly recommended by the Secretary of the Treasury, and introduced by him without the charge of three-tenths of 1 per cent for minting gold and silver coin, was declared by the vote of the Senator from Ohio to be of less consequence than the tax he proposed on deposits of gold and of silver, which could not be deposited under the provisions of the bill. His vote was either in good faith, showing that the tax proposed was of paramount importance in his opinion to the codification of the mint laws, to the recommendation of the gold standard by the Paris conference, and to the adoption of the gold standard in this country, so earnestly and elaborately urged in his report from the Finance Committee in 1868, or that he desired by that amendment and that vote to conceal the omission of the silver dollar from the list of coins which had escaped the attention of the Senate.

The history of the bill in the other House was equally suggestive, and after the fact was developed by Hon. Clarkson Potter, member of Congress from New York, that it contained a provision demonetizing silver, Mr. Hooper of Massachusetts, who had charge of the bill, affected to abandon it. Some days afterwards, and in the absence of Mr. Potter, Mr. Hooper presented a substitute for the bill, which he falsely claimed did not contain any of the objectionable features which had caused debate on the original bill. The House passed the substitute under the erroneous belief, produced by the statements of Mr. Hooper, that the substitute contained none of the objectionable features contained in the original bill.

The substitute as it came from the House, contained, in the sixteenth section, a dollar of 384 grains, the equivalent of the 5-franc piece with legal tender limited to $5.

The Senator from Ohio, as chairman of the Committee on Finance, reported the bill to the Senate with various amendments, among which was a substitute for section 16, which contained a trade dollar of 420 grains, and limited the legal tender of all silver coins to $5.

Notwithstanding all the other amendments reported by the committee are recorded in the Globe, according to the practice of the Senate, no mention is made of the substitute for the sixteenth section.

After the sixteenth section had been passed over and the nineteenth section was reached and under consideration, Mr. Casserly, of California, made inquiry why the eagle was omitted from the silver dollar and other coins, whereupon the Senator from Ohio said:

Mr. SHERMAN. If the Senator will allow me, he will see that the preceding section provides for coin which is exactly interchangeable with the English shilling and 5-franc piece of France; that is, a 5-franc piece of France will be the exact equivalent of a dollar of the United States in our silver coinage; and in order to show this, wherever our silver coin shall float—and we are providing that it shall float all over the world—we propose to stamp upon it instead of our eagle, which foreigners may not understand and which they may not distinguish from a buzzard or some other bird, the intrinsic fineness and weight of the coin. In this practical, utilitarian age the officers of the mint seem to think it would be better to do that than to put the eagle on our silver coins.

The remaining amendments of the committee were disposed of, and the bill passed without a division.

The conference report designated the substitute for section 16—which, as before remarked, does not appear in the Senate proceedings recorded in the Globe—as No. 6, and thus made it a part of the statute.

I have shown that the leading members of the two Houses who were present during the consideration of the bill were ignorant of the fact that the silver dollar was omitted in the codification of the mint laws. The Senate and the country must judge whether a fair opportunity was afforded the members of the two Houses to know of the omission of the silver dollar from the list of coins.

It was repeatedly stated by the Senator from Ohio, who had charge of the bill in the Senate, and Mr. Hooper of Massachusetts, who had charge of the bill in the House, that it had been carefully prepared in the Treasury Department by competent experts, which statements naturally inspired confidence that it was a conservative and honest compilation of existing laws, without any radical or revolutionary change. No reference was made in the debate in the Senate either to the gold standard or to the omission of the silver dollar from the list of coins, as will appear from a perusal of that debate, every word of which will be printed in these remarks.

The fact that so many prominent and leading members of the two Houses, and the President of the United States, who signed the bill, were ignorant of the omission of the silver dollar, is significant. The fact that the Senator from Ohio, who did so much to secure the recommendation of the gold standard by the Paris conference, introduced in 1868 a bill with a harmless title adopting the gold standard, claiming that the gold standard was "an American idea," had charge of the mint bill from beginning to end and failed to notify the Senate that it demonetized silver, is most astonishing.

But,

IN CONCLUSION,

let me say that the important question above and beyond all that is, was the legislation demanded or approved by the American people? It certainly was not. They knew nothing of it. It was not discussed in any political campaign. It was not published or commented upon in any of the great dailies. It remained a profound secret, so far as the masses of the people were concerned, for more than two years, and did not become generally known until the mints of the Latin Union were closed against silver and the price of silver declined in the markets of the world, since which time the people have demanded the restoration of silver to the place as a money metal which it occupied previous to the passage of the mint act.

No political party has ever at any time in national or State convention declared in favor of the single gold standard. On the contrary, every convention, State or national, has either ignored the question or declared in favor of bimetallism, and at every Congress since the discovery was made that silver was demonetized, a majority of the members of each House professed at the time of their election to be in favor of bimetallism.

In the last campaign the platform of all political parties declared in favor of bimetallism, and all parties were pledged, in case of success, to legislate to that end. The great dailies of the Republican and Democratic parties claimed that no party was opposed to bimetallism, and that it was not a party question, and that the tariff was the main issue to be decided by the people.

It is true that the Republican platform favored a national election law, which gave the Democratic party an opportunity to frighten the South by the ghost of negro domination and secure a solid South without regard to other considerations.

I did not believe that the organs of the two great parties were sincere in making the tariff the only issue with the ghost of negro domination as an adjunct.

I returned to my State, and informed the people whom I in part represent that the pending contest between the Democratic and Republican parties was a sham battle over the tariff and the force bill to secure power to be used for another and very different purpose. I told them that it made no difference which party succeeded, the result would be the same. Both Mr. Cleveland and Mr. Harrison were gold monometallists, and if either succeeded, the power and patronage of the Administration would be used to destroy silver and establish the single gold standard. I also told my people that I would support neither Mr. Cleveland nor Mr. Harrison, and that I repudiated the false pretenses of the managers of both of the great political parties.

But the great mass of the people in the United States would not believe that the parties to which they belonged intended to deceive them, and reluctantly voted the party ticket, hoping for the best.

The deception was not universal. More than a million votes were cast for Mr. Weaver, who was running on a free-coinage platform without hope of success. Another million remained away from the polls and refrained from voting. The people of my State, irrespective of party, voted for members of the Legislature and other officers pledged to the free and unlimited coinage of silver, and elected every member of the Legislature and the Member of Congress by more than a two-thirds vote.

When the Legislature met my position was indorsed by the unanimous vote of each house. I am here to represent the people of my State and the vast majority of the people of all the States who by their votes for the last twenty years have signified their desire for the restoration of silver to its place as a money metal.

I was severely censured, especially by Republicans, for the position I took as to the aims and purposes of the leaders of the two great political parties to deceive the people by proclaiming their intention to do one thing to obtain power with the design of doing the opposite after they gained control of the Government.

I saw no difference in the position of the two candidates, and could trust neither. The Administration of President Cleveland is doing to-day just what I predicted in the canvass. Immediately after the polls were closed, the bondholders and the national banks claimed that the victory was theirs, and that the verdict of the people demanded a repeal of the only law which recognized silver as a money metal.

This law which, notwithstanding the numerous violations by the executive department of its most beneficial provisions, has added one hundred and fifty millions of the new legal-tender money to the currency of the country, can not have caused the scarcity of money which produced the panic. It has not been shown, and no effort has been made to show, that the Sherman act has up to this time inflicted any injuries upon the country. On the contrary, it is admitted that thus far it has been beneficial, and the Senator from Ohio informs us that it prevented a panic in 1890.

The country is familiar with the predictions of the gold monometallists. They have denounced every law and every bill looking to the restoration of silver as pregnant with calamity. From 1878, when the Bland act was passed, to the present hour they have declared that silver legislation would ruin the country, but they have been unable to point out any instance where legislation favorable to silver has been injurious. The evils they predicted from the use of silver as money are always in the future; never in the past.

The bankers' panic was inaugurated to force Congress to demonetize silver and prevent predicted evils; not to remedy evils already produced by the Sherman act. The coöperation of Mr. Gladstone and Mr. Cleveland was to degrade silver, the former by suspending coinage in India and the latter by refusing to obey a mandatory law requiring the Secretary of the Treasury to purchase four and a half million ounces of silver per month. They accomplished their object by closing the silver mines and increasing the panic. The President in his message, finding it impossible to point out any injury the increase of $150,000,000 of new money had done, was compelled to rest his demand for the repeal of the Sherman act upon the apprehension of future evils. He said:

> It may be true that the embarrassments from which the business of the country is suffering arise as much from the evils apprehended as from those actually existing.

He failed to inform Congress that the apprehended evils which produced the panic existed only in the imagination of the bondholders; the bankers, and their newspaper organs, who had created the present distress in the country for their own selfish and sordid purposes; the bondholders to make money scarce and to increase the obligations of their debtors; the banks to destroy silver, to create the necessity to sell bonds and buy gold for more national-bank circulation, and the newspapers to do the bidding of the banks and the bondholders for their patronage and other considerations.

Every day the false pretenses of the hue-and-cry against the Sherman act become more apparent. No member of either House of Congress since the debate began has been able to show how the $150,000,000 of new legal-tender money issued under the Sherman law has made money scarce or in anyway injured the business of the country. No one has shown or attempted to show that the continued issuance of legal-tender notes, until the voice of the people can be again heard on the main question of bimetallism or the gold standard, will produce any possible injury. On the contrary, the experience of the past abundantly demonstrates the beneficial effects of more new money.

The machinations of the banks and the bondholders have created dire distress in the country. The immediate duty of the hour is to relieve that distress. There is an honest remedy and a dishonest remedy. The honest remedy is to restore silver. If that can not be done, utilize the silver in the Treasury Department belonging to the Government by issuing silver certificates thereon, and issue enough greenbacks to relieve the distress. The dishonest remedy is to pass the bill under consideration and ratify and sanctify the infamous act of 1873 and fasten a perpetual gold standard upon the country; donate $20,000,000 of the people's money, as is proposed in another bill, to the banks without any consideration from them; sell bonds, increase the national debt, and levy more taxes for the purpose of allowing the national banks to usurp the power of the Government in furnishing the people money.

I am in favor of honest legislation. I am in favor of utilizing the $50,000,000 of idle silver in the Treasury by the issuance of silver certificates thereon. I am in favor of putting out whatever greenbacks may be necessary—$100,000,000, $200,000,000, or any amount that may be necessary to relieve the distress which has been inflicted upon the country by the false pretenses of the money power.

In view of the conspiracy inaugurated by concentrated capital to reduce the masses of the people of this country to poverty and want, it is the duty of every Senator who loves his country to resist by every possible parliamentary means the perpetration of this great wrong. I do not wonder that bondholders, bankers, and their organs demand an immediate vote. They want no dis-

cussion. They fear the result of an exposé of their conspiracy. It is significant at this time that the great journals of New York say, "Vote first, and debate afterwards." Surrender and give up your arms; then fight if you can.

We notify them now that the fort occupied by the defenders of the people will never be surrendered. The armies of avarice, fraud, and deception must take it if they can.

To-day the united metropolitan press applaud bimetallists who will vote for monometallism. The service of deserters is always gratefully received during the hour of battle; but when the war is over there is but one opinion of their conduct by both friends and foes. Seventy millions of people constitute the tribunal which must ultimately pass upon the proceedings of this extra session. They will not view with approbation the men or parties whom they trusted with power, on the promise to restore the money of the Constitution, who use that power to rob them of that money and transfer their property to an organization of gold monopolists.

The pretext for the passage of this bill is not only flimsy, but it is absurd. We are told that the object of the bill is to restore confidence. Confidence in what, and in whom? Confidence in the Government? Nobody has questioned the solvency of the Government or the quality of any money bearing the stamp of the Government. Confidence in the people themselves? Nothing has happened to shake the confidence of the American people in their own ability to live and prosper, except the robbery which has been practiced in the past and is threatened in the future. Confidence in the bondholders and banks? They have sufficient confidence already in their power to acquire the wealth of others. They have been in the habit so long of reaping where they did not sow that their confidence in their own ability is sufficiently strong. The fact that they regard the Sherman act as an obstacle to their schemes of plunder is no reason why it should be repealed.

On the contrary, it is the strongest possible reason why it should be retained until all the Sherman acts, from 1873 to 1890, both inclusive, can go, and go together. The country wants no more Sherman acts. But before we repeal the act which was extorted from him, let us blot from the statute book the act which he placed there without the knowledge or consent of the American people in 1873. When that is done prosperity will be restored, and not till then. There can be no progress or prosperity while the iron grasp of contraction binds the limbs of enterprise. Contraction can not be permanently prevented without the remonetization of silver. The metallic basis of gold is too narrow for the present generation, and will continue to grow narrower and narrower as the supply grows less and less.

The creditor class may as well know first as last that the people of this country will not consent to continual falling prices, hard times, and stagnation. If the bondholders can change the contract and make it payable in gold and take away the option of the debtor to pay in either gold or silver, the people will ultimately see to it that the debtor has money of no more or less value than the money of the contract. The people do not ask to change the contract; the bondholders do. They have already doubled the value of gold, and by so doing they have doubled the obligations of the debtor. This was revolutionary. It is dangerous for capital to engage in revolution, and I appeal to the Senate to-day to listen to the voice of the people as expressed in twenty years of elections, and turn a deaf ear to a subsidized press and bankers' petitions extorted from their trembling debtors.

Mr. President, there are many other branches of this subject which it is necessary to discuss, and to discuss in good faith. I do not know whether I can get through to-night with what I wish to say; I do not suppose I can; but I wish to refer to a few additional facts. When the false pretense is made that this bill is the road to bimetallism, we should examine that question carefully.

What is the situation of the world in this respect? In the first place, England is the

CREDITOR NATION OF THE WORLD.

The outside world owe her $10,000,000,000 upon what she has received, and she is receiving $500,000,000 annually in interest. When I speak of England I mean the bonded aristocracy, for the poor people of England are suffering the same as are our poor people; but the England that governs is concentrated capital with claims against the balance of the world of $10,000,000,000. I do not know how much of that this country owes, but I am inclined to think that we owe very nearly half of it. I said in my remarks that we had to pay England $150,000,000 annually. I think we are paying more than that. I think we are paying $200,000,000 to England. See what a position she has! The outside world has to pay her $500,000,000 a year; which is an enormous contribution to England, besides the supremacy she has in the carrying trade and other commercial advantages.

The continent of Europe is

POOR AND PROSTRATE.

It is said that they are supporting 22,000,000 soldiers at an expense of more than $800,000,000 a year. Most of those countries are bankrupt, and owe England, particularly Austria and Italy.

It was England and the United States which destroyed silver. The United States joined England to destroy silver, and for what purpose? For the obvious purpose to enhance the value of money. Now, it said that we must go on a gold basis with England; that there is no other mode; that there is nothing else for us to do.

THE PRESIDENT SAYS

we must have the same kind of money that England has. What does that mean? We have to pay her $200,000,000 a year now, and she has demands enough against us at present to break us down, if we attempt to compete with her for gold.

If we undertake to buy gold, where is the gold? It is all locked up; $536,000,000 in Russia, for instance; $150,000,000 probably in Austria, most of which she got from us; she can not pay it out; eight or nine hundred millions are in France, and she dare not pay any of it out. She protects herself by paying out silver.

The same condition exists in Germany. She can not pay out gold. England has the advantage of collecting gold from all the world. That does a good deal toward keeping up her gold supply, but she adopts an expedient to keep her gold at home. Whenever an attempt is made to draw out her gold, she raises her rate of interest. England has never allowed any country to draw out her

INTERNATIONAL MONEY.

From the earliest history of England, whenever that attempt has been made, she has suspended specie payments or raised the rate of interest, and in that way protected her people.

During the Napoleonic wars she would not allow any international money to circulate in the country; no nation could draw her gold out and bankrupt her. If she allowed such an enemy as the gold board in New York to exist in London she never could have sent a soldier to the Continent. Since that war she has suspended specie payments three or four times, and she has time after time raised the rate of interest, so that the money could not be drawn out of the country. She had to do that, notwithstanding she was a great creditor nation. We, the only country in the world which pretends to have an international money, allow gold to go where it pleases.

Now, what position are we in? It is said that we must

SELL BONDS TO BUY GOLD.

Suppose we do it. In that event greenbacks will be presented and take the gold out. I know the banks want that, because they want the bonds to bank on. That is what makes them so intensely anxious for this plan. If we sell bonds and buy gold, you can not keep it; it will be taken away from you, and the same trick will be played on you which has been played this year.

When they want to carry out the Austrian scheme, and when they want gold in Europe for any purpose, they come here and sell our bonds, create a panic, and then the gold goes. The gold went last spring in that way; securities were sold, dumped on the market, and

A PANIC CREATED.

That was one of the processes by which it was created in connection with the New York banks, who are agents for the English bondholders. They are simply investors and collectors on foreign account. They started this trouble. They sold the securities, got the gold, and took it away, and when the panic came the securities went down 40 or 50 cents on the dollar, and the gold is coming back to buy them up. The gold which is coming now is to devour the carcasses of those who were killed and destroyed by taking it away.

It is said we must fight with England for this gold and that we can bring England to time. When we buy gold she can call it back by calling on us for three or four thousand millions. We can not compete with England in that way. We are a great country, but

WE ARE A DEBTOR NATION,

with vast unimproved resources, and if we begin to draw that gold out they will draw it back when they want it. They will take the foundation right out of our financial system. Do you not see what game was played in New York regularly some years ago when we were buying bonds every year for two three years? There would be a little combination in New York that would buy up the bonds during the winter and summer months, invest in them, get the interest, and when the stringency came to move the crops in the fall they would call on the Treasury to buy bonds, and $30,000,000 or $40,000,000 would be thrown in the hands of those men. The stringency had cre-

ated a panic; stocks would be down 20 or 30 per cent and they would have the gold to buy them, and then they would make their regular harvest; and while we were buying bonds the harvest was as regular as the returning seasons.

Do you not suppose that our English friends who can draw this gold out when they please will have that harvest all the time? They will have it this year. They will make hundreds and hundreds of millions

OUT OF THIS CALAMITY.

Do you not believe that they will repeat it? You have no foundation but what they can take out from under you. You will always have a panic when they command. With that great creditor nation we can not live in the world on an equality. If we give her the control of our circulating medium, if she can say at any time when a panic shall come, the people of this country are at her command. You in your experience know something of English rule. I do not mean the great body of the people of England. I speak of the concentrated capital that controls more than $20,000,000,000 of bonds, to which the whole world is paying tribute to-day. I speak of that capital which has no sympathy with the laboring interests of humanity. I speak of that capital that is crushing the masses of Europe to the earth. I speak of that capital that

GRINDS THE FACE OF THE POOR.

I speak of that capital that accumulates at the expense of the sweat and blood of the laboring masses. I speak of that capital that has turned back the wheels of progress and placed the laboring masses of Europe in a worse condition than they were fifty years ago. I speak of that capital that has produced this panic, stopped our mines and our mills, and filled the country with sorrow and grief. I speak of that heartless organization that looks upon America, not as a country, but as a land to be plundered. They look upon our people with scorn and contempt, and they

RIDICULE OUR IGNORANCE

in their reports.

The contempt which bondholding Europe has for America is well expressed by Daniel Watney, one of the leading advocates of the gold standard of Great Britain before the royal commission, when he said:

I can not suppose that everybody is wise. Just think of the folly of the United States when they were a debtor nation in adopting a gold coinage. They know nothing about currency matters; they did not know that it was going to increase their debt enormously.—*Second report, Royal Commission*, page 210.

Ah, the Senator from Ohio tells us that silver was demonetized by English influence. Oh, if some of our friends could be free for one session from English influence and legislate for America things would be different. What would have been the condition of this country if this crime had not been committed? At the time silver was

CLANDESTINELY DEMONETIZED

the miners of the West were taking their bullion to the mints. Previous to that time it had been more profitable to export it because of the mistake in the ratio, but the accumulations were too great for export. We had silver mines and in addition the gold mines to make us the strongest financial nation of the world. We were on the western hemisphere, where gold and silver have always been obtained in the greatest quantity. We had Mexico as a near neighbor, willing to buy of us, willing to trade with us, and to-day, notwithstanding the obstacles thrown in the way by the gold monometallists, she is, or she was until her silver mines were closed a short time ago, a great consumer of our products; and we had an ample supply. We had employment for our people. We might have had in this country to-day, if it had not been for the crime of 1873, as much gold and silver coin as the Roman Empire had in its palmiest days—nearly $2,000,000,000; and we would then have been free from debt. We would have owed nothing by this time. If we had been allowed

TO COIN OUR OWN MONEY

we would have been the leading nation. But by destroying our own resources, by denying our people the right they had under the Constitution, we are to-day reduced to the verge of bankruptcy. We can do nothing without the consent of the money powers of England. We can not legislate in these Halls without such consent. Their organs tell us that we must not discuss the question. They are teeming every morning with commands to the Senate to abdicate its power.

Right in this connection I will show you how they talked on another occasion when there was no money in question and when they were free from their masters. We will see what they said when they were not under the money power, when they were

FREE FROM THE ENGLISH INFLUENCE

of which the Senator from Ohio speaks. He says the act of 1873 was procured through English influence. I am going to read what some of these papers said when they were free from English influence. I first read from the New York World of January 5, 1891:

Will the brave-talking Western Senators execute the "ghost dance" to the crack of the party whip in the hands of those superannuated medicine men, HOAR and Edmunds, at the caucus to-day.

This is the way they talk when there is no money in it:

The desperate attempt of the old Republican leaders to drive the force bill through the Senate under the crack of the caucus whip is the boldest defiance of the popular will seen since the days of secession. * * * Under the lead of this besotted partisanship a Republican caucus will to-day seek to dragoon unwilling and protesting Senators.

[New York World, January 6, 1891.]

The Administration organ regards free speech in the Senate as "a pretended courtesy," and says "the Senate can not afford to waste time" in it. Fancy what Seward and Greeley would have said to such a claim. * * *

[New York World, January 8, 1891.]

The country has turned its face toward the future, and these younger men who realize that there are concerns of the present and future to be considered, decline longer to be led by men whose eyes are in the back of their heads.

* * * * * * *

The assumption that men are traitors because they ally themselves with one political party rather than another, is no longer to be accepted anywhere outside an asylum for aged and decrepit politicians of a past generation.

[New York World, January 8, 1891.]

Do you deny the agreement? says HOAR to GORMAN. Were you not to lie still and have your throat cut?

[New York World, January 19, 1891.]

The Democratic Senators would indeed be false to their duty if they neglected any resource, even the most extreme possible under parliamentary forms, to defeat this rascally and revolutionary conspiracy.

[New York World, January 20, 1891.]

No Democratic Senator would so far forget his constitutional duty as to refrain from resorting to every device to defeat the passage of the force bill.

[New York World, January 21, 1891.]

The present duty of Democrats in Congress is to kill the force bill. No sacrifice is too great, and no means should be left unused.

[New York World, January 23, 1891.]

If the minority of the Senate had no rights, there would be no one in Congress to speak in behalf of the people. * * * It is to silence the minority, to turn the people out of court, that cloture is suggested, and if the Democrats should not resort to every device to prevent the outrage they would be betraying a sacred trust.

Mr. MORGAN. Will the Senator from Nevada yield to me for a moment?

Mr. STEWART. Certainly.

Mr. MORGAN. The Senator has been on his feet discussing this question for a great while and evidently he is fatigued. He has not drawn as yet to the conclusion of his remarks, and doubtless has some valuable suggestions to make upon this question. With the Senator's permission, I will move that the Senate proceed to executive business.

Mr. STEWART. I yield for that purpose.

Mr. MORGAN. I make that motion.

The VICE-PRESIDENT. The Senator from Alabama moves that the Senate proceed to the consideration of executive business.

Mr. ALDRICH and Mr. HAWLEY called for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HARRIS (when his name was called). I am paired with the Senator from Vermont [Mr. MORRILL]. I should vote "yea" if the Senator from Vermont were here.

Mr. LODGE (when his name was called). I am paired with the Senator from Kansas [Mr. MARTIN]. If he were present I should vote "nay."

Mr. STOCKBRIDGE (when his name was called). I am paired with the junior Senator from Maryland [Mr. GIBSON]; but I am advised that he would vote "nay" if present. I will therefore vote. I vote "nay."

The roll call was concluded.

Mr. BUTLER. I am paired with the Senator from Pennsylvania [Mr. CAMERON]. I am not sure how he would vote on this question, and I withhold my vote. If he were present I should vote "yea."

Mr. DOLPH (after having voted in the affirmative). I am paired with the senior Senator from Mississippi [Mr. GEORGE], but I do not see him in the Chamber, and I will withdraw my vote.

Mr. HARRIS. The Senator from Oregon can let his vote stand if he chooses. I am paired with the Senator from Vermont [Mr. MORRILL] and I will record my vote.

Mr. DOLPH. Very well.

Mr. HARRIS. I vote "yea."

Mr. BUTLER. I am informed by Senators who appear to know that the Senator from Pennsylvania [Mr. CAMERON] would vote "yea" if present. I therefore vote "yea."

Mr. BLACKBURN (after having voted in the affirmative). I

ask if the senior Senator from Nebraska [Mr. MANDERSON] has voted?

The VICE-PRESIDENT. He has not voted, the Chair understands.

Mr. BLACKBURN. I am paired with that Senator on all questions, and I withdraw my vote.

The VICE-PRESIDENT. It will be so noted.

The result was announced—yeas 35, nays 28, not voting 22; as follows:

YEAS—35.

Allen,	Dolph,	Mitchell, Oregon	Shoup,
Bate,	Dubois,	Morgan,	Stewart,
Berry,	Faulkner,	Pasco,	Teller,
Butler,	Harris,	Peffer,	Turpie,
Call,	Hunton,	Perkins,	Vance,
Cockrell,	Irby,	Pettigrew,	Vest,
Coke,	Jones, Ark.	Power,	Walthall,
Daniel,	Jones, Nev.	Pugh,	Wolcott.
Davis,	Kyle,	Roach,	

NAYS—28.

Aldrich,	Frye,	Lindsay,	Quay,
Allison,	Gallinger,	McMillan,	Smith,
Brice,	Gorman,	McPherson,	Squire,
Caffery,	Gray,	Mills,	Stockbridge,
Carey,	Hale,	Palmer,	Vilas,
Cullom,	Hawley,	Platt,	Voorhees,
Dixon,	Hoar,	Proctor,	White, La.

NOT VOTING—22.

Blackburn,	Gibson,	Manderson,	Sherman,
Camden,	Gordon,	Martin,	Washburn,
Cameron,	Hansbrough,	Mitchell, Wis.	White, Cal.
Chandler,	Higgins,	Morrill,	Wilson.
Colquitt,	Hill,	Murphy,	
George,	Lodge,	Ransom,	

So the motion was agreed to; and the Senate proceeded to the consideration of executive business. After twenty minutes spent in executive session the doors were reopened, and (at 4 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, September 6, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate September 5, 1893.

POSTMASTERS.

Hudson Ausley, to be postmaster at Salamanca, in the county of Cattaraugus and State of New York, in the place of Edward B. Vreeland, whose commission expired March 27, 1893.

Don C. Bishop, to be postmaster at Pulaski, in the county of Oswego and State of New York, in the place of Lawson R. Muzzy, whose commission expired March 13, 1893.

Daniel Budd, to be postmaster at Rye, in the county of Westchester and State of New York, in the place of James M. Field, whose commission expired March 21, 1893.

Robert E. Connolly, to be postmaster at Phelps, in the county of Ontario and State of New York, in place of Frederick R. Hoag, whose commission expired March 23, 1893.

George F. Ketchum, to be postmaster at Warwick, in the county of Orange and State of New York, in the place of George H. Quackenbush, removed.

Milton H. Northrup, to be postmaster at Syracuse, in the county of Onondaga and State of New York, in the place of Carroll E. Smith, removed.

Jonas Shays, to be postmaster at Owego, in the county of Tioga and State of New York, in the place of William Smyth, removed.

Edmund M. Wilbur, to be postmaster at Saugerties, in the county of Ulster and State of New York, in the place of William V. Burhans, removed.

Archibald H. Boyden, to be postmaster at Salisbury, in the county of Rowan and State of North Carolina, in the place of James H. Ramsey, resigned.

Edwin T. Hutchinson, to be postmaster at Lakota, in the county of Nelson and State of North Dakota, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

Thomas R. Robertson, to be postmaster at Charlotte, in the county of Mecklenburg and State of North Carolina, in the place of Archibald Brady, removed.

John C. Bollmeyer, to be postmaster at Wauseon, in the county of Fulton and State of Ohio, in the place of James S. Brailey, whose commission expired March 21, 1893.

William L. Cox, to be postmaster at Prospect, in the county of Marion and State of Ohio, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

Frank A. Hockett, to be postmaster at Wellston, in the county of Jackson and State of Ohio, in the place of George W. Darling, removed.

Frank C. Schiffer, to be postmaster at Shelby, in the county of Richland and State of Ohio, in the place of John R. Wolfe, resigned.

PROMOTIONS IN THE ARMY.

CORPS OF ENGINEERS.

To be additional second lieutenants.

1. Cadet George P. Howell.
2. Cadet Charles W. Kutz.
3. Cadet Meriwether L. Walker.
4. Cadet Robert P. Johnston.
5. Cadet Robert R. Raymond.

ARTILLERY ARM.

To be second lieutenants.

6. Cadet William M. Cruikshank, vice Burr, First Artillery, appointed first lieutenant in the Ordnance Department.
7. Cadet Gordon G. Heiner, vice Davis, Second Artillery, promoted.

To be additional second lieutenants.

9. Cadet George H. McManus.
10. Cadet Edward J. Timberlake, jr.
12. Cadet David M. King.
14. Cadet Samuel C. Hazzard.
15. Cadet S. J. Bayard Schindel.
18. Cadet Otho W. B. Farr.
19. Cadet Robertson Honey.

CAVALRY ARM.

To be second lieutenants.

8. Cadet John H. Rice, vice Stewart, Third Cavalry, promoted.
13. Cadet Lincoln C. Andrews, vice Carter, Third Cavalry, promoted.
16. Cadet William R. Smedberg, jr., vice Hardeman, Fourth Cavalry, promoted.
21. Cadet John M. Morgan, vice Walcutt, Eighth Cavalry, promoted.
23. Cadet Andrew E. Williams, vice Barnum, Third Cavalry, promoted.
25. Cadet Walter C. Babcock, vice Byron, Eighth Cavalry, promoted.
26. Cadet William Yates, vice Traub, First Cavalry, promoted.
27. Cadet Herbert B. Crosby, vice Brooks, Eighth Cavalry, promoted.
29. Cadet Benjamin B. Hyer, vice Pershing, Sixth Cavalry, promoted.
30. Cadet Mathew C. Smith, vice Bean, Second Cavalry, promoted.
31. Cadet Edward B. Cassatt, vice Trout, Ninth Cavalry, promoted.

To be additional second lieutenants.

33. Cadet Kenzie W. Walker.
35. Cadet Harry H. Pattison.
36. Cadet Edward E. Hartwick.
37. Cadet Charles G. Sawtelle, jr.

INFANTRY ARM.

To be second lieutenants.

17. Cadet Howard Laubach, vice Davis, Twenty-third Infantry, promoted.
20. Cadet Elmer W. Clark, vice Dodge, Fourteenth Infantry, dismissed.
22. Cadet Louis B. Lawton, vice Duncan, Ninth Infantry, promoted.
24. Cadet Amos H. Martin, vice Summerall, First Infantry, transferred to the Fifth Artillery.
28. Cadet Buell B. Bassette, vice Kimball, Fifth Infantry, promoted.
32. Cadet Thomas L. Smith, vice Druien, Seventeenth Infantry, promoted.
34. Cadet Arthur M. Edwards, vice Kalk, Third Infantry, promoted.
38. Cadet Howard R. Perry, vice Frier, Seventeenth Infantry, promoted.
39. Cadet George E. Houle, vice McRae, Third Infantry, promoted.
40. Cadet Lincoln F. Kilbourne, vice Winn, First Infantry, promoted.
41. Cadet Verling K. Hart, vice Vance, Sixteenth Infantry, deceased.
42. Cadet Robert E. L. Spence, vice Brown, Sixteenth Infantry, resigned.
43. Cadet William C. Rogers, vice Baker, Seventh Infantry, promoted.

43. Cadet Frank B. McKenna, vice Williams, Fifteenth Infantry, promoted.
45. Cadet George H. Jamerson, vice Lasseigne, Seventh Infantry, promoted.
46. Cadet Edward E. Carey, vice Ballou, Sixteenth Infantry, promoted.
47. Cadet Edward Taylor, vice Poore, Twelfth Infantry, promoted.
48. Cadet Hamilton A. Smith, vice Smith, Third Infantry, promoted.
49. Cadet Hunter B. Nelson, vice Barton, Twenty-fourth Infantry, transferred to the Tenth Cavalry.
50. Cadet Albert Laws, vice Keene, Twenty-fourth Infantry, promoted.
51. Cadet Mathew E. Saville, vice Swaine, Twenty-second Infantry, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate September 5, 1893.

RECEIVER OF PUBLIC MONEYS.

John J. S. Hassler, of Forest City, S. Dak., to be receiver of public moneys at Enid, in Oklahoma Territory.

SENATE.

WEDNESDAY, *September 6, 1893.*

Prayer by the Chaplain, Rev. W. H. MILBURN, D. D.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

Mr. PEFFER. I present a petition, in the form of resolutions of the executive committee of the Industrial Council of the two adjoining Kansas cities, praying that Congress shall have power to instruct the Secretary of the Treasury to issue Treasury notes for circulation among the people as money, and loan the money to the different States upon application and approved security at a rate of interest not exceeding 1 per cent per annum to be by the several States distributed among their own people, and that such notes shall be legal tender in the payment of debts. I move that the petition be referred to the Committee on Finance for consideration in the future.

The motion was agreed to.

Mr. BRICE presented petitions of the Corrugating Company, of Cincinnati; of the Rolling Mill Company, of Piqua; of Nathan Drucker, Levi C. Goodale and Michael Ryan, committee of the Chamber of Commerce of Cincinnati; of the Perkins Campbell Company, of Cincinnati; of Stix, Krouse & Co., of Cincinnati; of Samuel Ach & Co., of Cincinnati; of J. B. Hearne, president of the Third National Bank, of Cincinnati; of the Linseed Oil Company, of Cincinnati; of The Plant and Marks Shoe Manufacturing Company, of Cincinnati; of Frank C. Grote & Bros., of Cincinnati; of N. Druker & Co., of Cincinnati; of Merrie, Verhage & Co., of Cincinnati; of the Chas. Moser Company, of Cincinnati; of Corbin, Mendel & Co., distillers, of Cincinnati; of Claude Ashbrook, cashier of the City Hall Bank, of Cincinnati; of James E. Mooney, president of the American Oak Leather Company, of Cincinnati; of S. M. Felton, of Cincinnati; of the Chamber of Commerce of Cleveland; of Leo A. Brigel, president of the Jackson Brewing Company, of Cincinnati, and of the Bucket Pump Company, of Cincinnati, in the State of Ohio, praying for the unconditional repeal of the silver-purchasing clause of the so-called Sherman law; which were ordered to lie on the table.

He also presented a petition of the Democratic executive committee of Seneca County, Ohio, praying for the repeal of the civil-service rules requiring competitive examination of applicants for appointment in the railway-mail service; which was referred to the Committee to Examine the Several Branches of the Civil Service.

Mr. SHERMAN presented a petition of merchants, business men, and others, of Miamisburg, Ohio, praying for the repeal of the silver-purchasing clause of the act of July 14, 1890; which was ordered to lie on the table.

Mr. ALLISON presented two petitions of business men and farmers of Belmond and Shenandoah, in the State of Iowa, earnestly praying for the repeal of the silver-purchasing clause of the so-called Sherman law; which were ordered to lie on the table.

Mr. QUAY presented a petition of Indiana Assembly, No. 2043, Knights of Labor, of Indiana, Pa., praying for the free coinage of silver and for the abolishment of all banks, national, State, and private, and remonstrating against any further issue of bonds and foreign domination in American finance; which was ordered to lie on the table.

He also presented a petition of Local Assembly, No. 6401, Knights of Labor of Pennsylvania, praying for the free coinage of silver; which was ordered to lie on the table.

He also presented a petition of the Chamber of Commerce of Pittsburg, Pa., praying for the repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

He also presented a memorial of Erie Lodge, No. 101, International Association of Machinists, remonstrating against the unconditional repeal of the silver-purchasing clause of the so-called Sherman law; which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. BERRY, from the Committee on Claims, to whom was referred the bill (S. 333) for the relief of Margaret Kennedy, reported it without amendment, and submitted a report thereon.

Mr. POWER, from the Committee on Public Lands, to whom was referred the bill (S. 335) to provide for the disposal of the abandoned Fort Maginnis military reservation in Montana, under the homestead and mining laws, for educational and other purposes, reported it without amendment, and submitted a report thereon.

Mr. MITCHELL of Oregon, from the Committee on Post-Offices and Post-Roads, to whom was referred the bill (S. 109) for the relief of the legal representatives of Chauncey M. Lockwood, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 110) for the relief of L. A. Davis, reported it without amendment, and submitted a report thereon.

COMPENSATION OF APPOINTED SENATORS.

Mr. VANCE. From the Committee on Privileges and Elections, I submit reports in reference to the compensation of the three appointed Senators who were refused seats in the Senate. The amount to be allowed to each appointee is specified in the report. I suppose I may ask for the immediate consideration of the reports.

Mr. COCKRELL. Let the reports be read, and then we will determine whether we will consider them.

The VICE-PRESIDENT. The first report will be read.

The Secretary read as follows:

The Committee on Privileges and Elections, to whom was referred resolution providing compensation for John B. Allen for his time and expense in prosecuting his claim to a seat in the United States Senate from Washington, report that he be allowed $2,500.

Mr. COCKRELL. Let the resolution be read.

The Secretary read the resolution submitted by Mr. SQUIRE and referred to the Committee on Privileges and Elections August 30, 1893, as follows:

Resolved, That there be allowed out of the contingent fund of the Senate to John B. Allen the sum of $5,000, in full compensation for all his time and expense in prosecuting his claim to a seat in the Senate as a Senator from the State of Washington.

The VICE-PRESIDENT. The Chair will state to the Senator from North Carolina that the resolution and report should go to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. COCKRELL. I was going to make that suggestion. Let all the reports take the same course.

The VICE-PRESIDENT. That will be the order.

Mr. VANCE. I ask that the other reports be also read.

The Secretary read as follows:

The Committee on Privileges and Elections, to whom was referred a resolution providing compensation for Lee Mantle for his time and expense in prosecuting his claim to a seat in the United States Senate from Montana, report that he be allowed $2,500.

The VICE-PRESIDENT. The report will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. VANCE. Let the third report be read.

The Secretary read the following resolution, reported from the Committee on Privileges and Elections:

Resolved, That there be allowed out of the contingent fund of the Senate to A. C. Beckwith the sum of $2,000, in full compensation for all his time and expense in prosecuting his claim to a seat as a Senator from the State of Wyoming.

The VICE-PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

BILLS INTRODUCED.

Mr. HOAR introduced a bill (S. 856) for the relief of John M. Goodhue; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. CULLOM introduced a bill (S. 855) to repeal all laws providing for the creation or maintenance of the sinking fund; which was read twice by its title, and referred to the Committee on Finance.

Mr. PLATT introduced a bill (S. 856) for the relief of Louis

H. Bristol, administrator; which was read twice by its title, and referred to the Committee on Claims.

He also introduced a bill (S. 857) to correct the military record of James McConnell; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

Mr. POWER introduced a bill (S. 858) to aid the State of Montana to support a school of mines; which was read twice by its title, and referred to the Committee on Public Lands.

Mr. VOORHEES introduced a bill (S. 859) for the relief of Capt. John B. Dowd, on account of injuries received by him by the collapse of the old Ford's theater, on the 9th day of June, 1893; which was read twice by its title, and referred to the Committee on Claims.

Mr. COKE introduced a bill (S. 860) to quiet the title to certain lands in the State of Mississippi, and for the relief of the heirs and representatives of Eli Ayres; which was read twice by its title, and referred to the Committee on Indian Affairs.

Mr. PEFFER introduced a bill (S. 861) for the relief of Charles M. Gourley; which was read twice by its title, and referred to the Committee on Military Affairs.

He also introduced a bill (S. 862) for the relief of Solomon S. Crosswhite; which was read twice by its title, and referred to the Committee on Military Affairs.

He also introduced a bill (S. 863) to amend the military record of certain enlisted men of the war of the rebellion, named therein, and for other purposes; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. PERKINS introduced a bill (S. 864) to authorize the payment to Rear-Admiral John H. Russell of the highest pay of his grade; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. MITCHELL of Wisconsin introduced a bill (S. 865) to confer the rank and pay of a first lieutenant of infantry upon the director of gymnastics and instructor in swordsmanship at the United States Military Academy; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. DUBOIS introduced a bill (S. 866) for the relief of the citizens of the States of Oregon, Idaho, and Washington who served with the United States troops in the war against the Nez Percés and Bannock and Shoshone Indians, and for the relief of the heirs of those killed in such service, and for other purposes; which was read twice by its title, and referred to the Committee on Military Affairs.

WITHDRAWAL OF PAPERS.

On motion of Mr. HOAR, it was

Ordered, That John M. Goodhue be permitted to withdraw from the files of the Senate all papers relating to his case.

VIEWS OF MR. SEYD ON COINAGE.

Mr. HOAR. I move that the letter of Ernest Seyd, which was printed as a document the other day, be reprinted for the use of the Senate. I understand there is great application for it, and that the copies are all gone.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Massachusetts.

Mr. COCKRELL. What is the motion?

The VICE-PRESIDENT. The Senator from Massachusetts will kindly repeat his motion.

Mr. HOAR. The motion is that the letter of Ernest Seyd, which was printed as a document, be reprinted for the use of the Senate. The copies are all gone and there is great application for it from all parts of the country.

Mr. CULLOM. There will be no objection to that.

The VICE-PRESIDENT. Is there objection to the motion of the Senator from Massachusetts? The Chair hears none, and it is so ordered.

INTERNATIONAL BIMETALLISM.

Mr. ALLEN. I should like to have the privilege of placing in the RECORD a short but very carefully prepared document on the subject of the impossibility of international bimetallism. It is a document well worthy the study of every member of the Senate.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Nebraska? The Chair hears none.

Mr. PLATT. What is the request?

Mr. GRAY. I rose to object. I have no objection to its being printed as a document, but I do object, with all respect to the Senator from Nebraska, to the abuse of the privilege of the CONGRESSIONAL RECORD. I think the CONGRESSIONAL RECORD ought to be, as its name imports, a faithful record of the proceedings and debates of this body, and that it should not be used for any other purpose. I have no objection, and, in fact, I should be glad to see the Senator's paper printed as a document.

Mr. PLATT. What is the request?

Mr. ALLEN. I have no objection to its being printed as a document, if it will be available to all Senators in that form.

The VICE-PRESIDENT. The Chair will state to the Senator from Nebraska that it is impossible to hear him.

Mr. ALLEN. Perhaps there will be no objection to having it published as a public document and as a part of the document which contains the letter of Ernest Seyd.

Mr. HOAR. May I ask the honorable Senator to raise his voice? It is impossible to hear him on this side of the Chamber.

The VICE-PRESIDENT. The Senate will be in order.

Mr. ALLEN. I say, perhaps there will be no objection on the part of the Senate to permit this document to be published with the letter of Ernest Seyd as a part of the same public document, and if there is no objection I make that request.

Mr. HOAR. Let it be published separately, if the Senate think it is worth while. The Ernest Seyd document has been once printed and all the copies are gone, and I suppose it will be much more convenient at the Printing Office to use the type already set up. They would have to make a new title-page, etc.

Mr. ALLEN. Let it be printed, then, as a separate document.

The VICE-PRESIDENT. Without objection, it will be so ordered.

Mr. PLATT. I do not think any Senator on this side knows what is the request or what the document is. Without knowing what it is I shall object. Perhaps when I know what it is I shall have no objection.

The VICE-PRESIDENT. The Chair requests that conversation be suspended.

Mr. TELLER. The fault is not with the Senator from Nebraska, but with Senators on the floor who are continually talking in a tone that prevents anybody from hearing what the Senator says.

Mr. ALLEN. The document consists of about six pages of very carefully prepared statistical matter upon the subject of the impossibility of international bimetallism. It is prepared by a gentleman well qualified to prepare such a document, and I am satisfied it would be of great benefit to the members of the Senate.

Mr. PLATT. That is all right.

The VICE-PRESIDENT. Without objection the document will be printed as requested.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. T. O. TOWLES, its Chief Clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 4) to provide for certain urgent deficiencies in the appropriations for the service of the Government for the fiscal year ending June 30, 1894, and for other purposes.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 4) to provide for certain urgent deficiencies in the appropriations for the service of the Government for the fiscal year ending June 30, 1894, and for other purposes, and it was thereupon signed by the Vice-President.

HOUR OF MEETING.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution of the Senator from Indiana [Mr. VOORHEES] coming over from yesterday, which will be read.

The Secretary read the resolution submitted yesterday by Mr. VOORHEES, as follows:

Resolved, That on Thursday, the 7th day of September, and until further order of the Senate, the daily hour of meeting be 11 o'clock a. m.

Mr. VOORHEES. With the permission of the Senate, I desire to make a brief statement. After full and careful consultation with the friends on this side of the Chamber of the bill repealing the purchasing clause of the Sherman act, in whose judgment I have been accustomed to confide and whose wishes I can not disregard, I ask that the resolution go over for the present, believing that if we occupy the time of the Senate carefully and conscientiously we can make as much speed perhaps as by its adoption—until at least a later day.

The VICE-PRESIDENT. The resolution will go over.

JOINT COMMITTEE ON FINANCIAL QUESTIONS.

The Vice-President laid before the Senate the concurrent resolution submitted yesterday by Mr. MORGAN; which was read, as follows:

Concurrent resolution to raise a joint committee of the two Houses to consider questions of finance, etc.

Resolved by the Senate (the House of Representatives concurring), That a committee of the two Houses of Congress be raised, to consist of seven Senators to be appointed by the President of the Senate, and seven Representatives, to be appointed by the Speaker of the House of Representatives, who together shall constitute a joint select committee on finance, the chairman of which shall be chosen by the committee, by ballot, and he shall appoint a clerk to said committee.

2. Said joint committee shall hold its sessions in the Capitol, and in such

other places as a majority thereof shall direct, and may employ a stenographer, and such messengers as shall be found necessary, and shall have power to direct the administration of oaths and to send for papers and persons. Eleven members of said joint committee shall constitute a quorum to do business.

3. Said joint committee shall examine nto the financial and monetary condition of the Government and people of the United States, with a view to devising means for the betterment thereof, and, to this end, shall have full jurisdiction to examine and report upon any financial or monetary question that concerns the people or the Government of the United States.

4. Said committee shall make a special examination of the following subjects, and report upon each, separately, in their recommendations to Congress, and may submit one bill or several bills to the respective Houses to carry their recommendations into effect, that is to say:

(1) The full or partial remonetization of legal-tender silver coins and the ratio of legal value that shall be established between such coins and coins of gold.

(2) The revision of the laws relating to legal tender, so as to prevent unjust discrimination in the legal-tender quality of any descriptions of money coined or issued by the United States, or for the redemption of which the Government is pledged.

(3) The repeal of the taxes upon the issues of State banks that circulate as money, and what restrictions upon the conduct of such banks are necessary for the public security and welfare, and are within the competency of Congress to provide.

(4) The actual cause of the present embarrassed condition of the people and the national banks, in reference to the character or the supply of circulating medium, and the consequent paralysis of trade and industry. And what further legislation is required to prevent the national banks from abusing their powers under the law, either by their separate dealings, or in combination, concert, or conspiracy with other banks or persons to the detriment of the Government or the people of the United States.

(5) Said joint committee may appoint subcommittees, to consist of not less than four members thereof, three members to constitute a quorum, who shall be empowered to sit in any place in the United States and to take testimony on oath to be administered by the designated chairman of such subcommittee, to be reported to the general committee. Such subcommittees shall be appointed under the resolution or order of the general committee, in such manner as they shall agree.

(6) The expenses incurred in the execution of the requirements of this concurrent resolution shall be borne in equal sums by the respective Houses of Congress, to be paid out of the contingent funds appropriated, or to be appropriated by Congress.

The VICE-PRESIDENT. The question is on agreeing to the resolution which has just been read.

Mr. MORGAN. Mr. President——

Mr. VOORHEES. What is the action desired by the Senator from Alabama?

Mr. MORGAN. I desire a vote on the resolution.

Mr. VOORHEES. A resolution of so much importance, it strikes me, ought not to be voted upon without reference to a committee and its examination. It involves a question of the greatest importance. I think it will have to be referred to the Committee on Contingent Expenses, any way——

Mr. MORGAN. No.

Mr. VOORHEES. And at the proper time I shall move the reference of the resolution to the Committee on Finance.

Mr. MORGAN. That will be a very proper motion, Mr. President, and whenever it is made we shall discuss it.

Before I submit the resolution to the Senate for reference, however, I desire to modify it by striking out the sixth clause of it.

Mr. VOORHEES. I give notice that the resolution can not be taken up now unless it displaces the regular order. The Senator from Texas [Mr. MILLS] has given notice of a speech to-day, the Senator from Nevada [Mr. STEWART] has the floor to conclude an unfinished speech, and I shall ask the Senate, in all fairness and candor, to continue the consideration of the pending business of the Senate, which is House bill No. 1.

Mr. MORGAN. Mr. President, I have been absent for some time from the Senate, unfortunately——

Mr. HARRIS. If the Senator from Alabama will allow me, I will suggest to him that he has a right to modify his resolution, and that he need not move to amend it.

Mr. MORGAN. I have already done that. I have modified it in the particular I have indicated.

The VICE-PRESIDENT. That has been done.

Mr. MORGAN. Then I wish to strike out "eleven," where it occurs in line 15, and insert "nine," so as to have a quorum consist of nine members instead of eleven.

The VICE-PRESIDENT. That modification will be made.

Mr. VOORHEES. I ask, and if necessary I move, that the Senate proceed to the consideration of the regular order of business.

Mr. MORGAN. The Senator from Indiana ought to know that he can not take me off the floor by a motion of that kind. What I desire to do is to inquire of the Chair whether the rules of the Senate have been so far altered in my absence as that there is no longer a morning hour? If there is a morning hour, I have the right to occupy my position here now on the floor in the advocacy of a measure which comes up in the morning hour.

The VICE-PRESIDENT. The Chair will state to the Senator from Alabama that there has been no change in the rules.

Mr. MORGAN. Very good. Then I am in order, and the Senator can wait for his bill until 2 o'clock. That is the rule of the Senate at least.

Mr. VOORHEES. I desire simply to say that, while that is true, the Senator from Alabama, with exceeding delicacy, takes two Senators off the floor who have given notice of their desire to address the Senate. One of them, the Senator from Nevada [Mr. STEWART], is on the floor with an unfinished speech, and the other with a notice given of an intention to speak. That is all I wish to say.

Mr. MORGAN. I shall be entirely delicate and respectful to every Senator in this body, Mr. President, when he is in order, but I am in order now, and no Senator has the right to the floor to supersede me speaking to a resolution which the President of the Senate has laid before the Senate. This body has jurisdiction of the resolution, because it is in the morning hour and the President of the Senate has laid it before the Senate. Therefore I am not guilty of any indelicacy towards any Senator in trying to assert what are my rights under the rules of the Senate.

The Senator from Indiana has given notice of a motion to refer this matter to the Committee on Finance. If the joint select committee which I propose, Mr. President, were not expressly intended to supersede the functions of the Committee on Finance in both Houses that would be a very proper motion, but I do not expect that the Senate will refer to the Committee on Finance a measure which has for its purpose to supplement the powers of the Committee on Finance, because the action of that committee up to this time has not been in conformity with, and it does not entirely or properly cover, the condition or the necessities of this country. That is not a friendly committee to any general plan of financial relief or reformation.

In my own conception of the situation, there being no human being responsible for this resolution but myself, I have thought that there was an attempt made here to cure a great breadth of financial trouble and evil and difficulty in the United States by the administration of a certain nostrum to cure a particular part of a complaint which the people of the United States recognize as being a very serious one and having many different aspects.

An extensive combination of diseases needs a broader treatment than the measure reported by the Committees on Finance of the two Houses.

I have not observed a greater difference between any Senators since I have been in this body than exists apparently between those Senators who are in the advocacy here of the repeal of the silver-purchasing clause of what is called the Sherman act of 1890. In regard to what shall take place after that repeal has been accomplished they have no common purpose, no agreement, no accord. There seems to be a great wildness of conjecture, a great want of concert of action amongst the gentlemen, all of whom agree together to repeal that portion of that law, as to what shall take place after it has been repealed; and the object of this resolution is to place it in the hands of the two committees of the two Houses to determine what is to be done in the event the Senate shall concur or shall fail to concur with the House in its proposition to repeal the purchasing clause of the Sherman act.

Will any man undertake to say that there will be no necessity for further legislation after that law has passed, or after it has been defeated? Has any one hinted that that repeal is to be a cure of the financial difficulties of the people of the United States? Is it proposed to do anything more than to give a mere respite to action until the country can right itself up, or until the legislation of Congress, which is necessary to bring the country right, can be matured?

No one has suggested, I believe, as yet that this particular remedy is going to relieve the country of all the great evils that we are experiencing now and have been experiencing for the last few months, indeed for the last year.

Therefore, it is necessary not only to meet public expectation, but it is a necessary duty devolving upon legislators of the United States in Congress assembled that they shall take a broad, general, and complete view of all the difficulties which have been suggested in respect of the financial and monetary situation of the United States; that they shall in their wisdom fully and completely investigate the whole subject, and when they have understood it that they will bring forward either one bill or several bills for the purpose of rectifying all the troubles under which we are living, or else dying.

The differences that exist, Mr. President, are very marked in respect to the remedies which have been suggested. Some of those men who claim to be *par excellence* Democrats, who have enjoyed that honorable name for many years, and have fought many valiant battles under the flag of the great Democracy, think that one remedy, perhaps an all-sufficient remedy, to be applied to the situation after the repeal of the purchasing clause of the Sherman act has been carried through, is that which is so emphatically and clearly stated in the Democratic platform at Chicago, the repeal of the tax upon the issues of the State

banks. There are other Democrats of just as good standing, and Republicans also of good standing in their own party, who believe that the next measure that ought to be adopted after the repeal of this purchasing clause will be the remonetization of silver. When I speak of the remonetization of silver, I mean to have it placed where it was in 1873.

There are both Democrats and Republicans one this floor and in the other House who believe not only that that is a necessaay policy to be observed to secure financial smoothness and equability of financial operations, but that it is a constitutional right of the people to have the free coinage of silver—not of the people *en masse*, but of every individual man in the United States to have this, and upon the united basis of gold and silver coins to reëstablish the system of banks chartered by the States.

When you commence to deal with matters which appertain to the constitutional rights of individual men in the United States you begin to trench upon a somewhat delicate ground, and it is necessary to be cautious and careful. At a more convenient time I hope to discuss this question.

So there are men who believe that the action of Congress in the demonetization of silver and the destruction of its constitutional and legal parity with gold has violated the Constitution of the United States, and that this country has no chance of recovery, no possible hope for a remedy, until that violation has been withdrawn and the evil which it has inflicted has been healed. There are men of that sort here, and they are neither few nor are they weak.

There are men here who believe that the common working, laboring classes of the people of the United States, of Great Britain, of France, of Germany, of Italy, of Austria, of Russia, and of every civilized power in this world, are obliged to have a silver currency in order to live; that they can not conduct their daily operations, their small industries, and feed their families without the aid of a silver currency. In most of the countries of the world, and in the United States also—shame that it should be said—this silver currency is called a subsidiary currency. More than that, it is dwarfed in its metallic value. Two silver half dollars, or four quarters, or ten dimes do not contain as much silver bullion as a dollar of the fathers by 8½ grains, I believe it is. That sort of money is supposed by a good many political economists and very sounding and resounding Democrats, who boast themselves of being just and liberal to the people of the United States, to say the least of it, to be good enough for them.

Our silver currency amounting to 412½ grains to the dollar, nine parts fine, is under the law, except when it is superseded by a contract, a full legal tender for all debts, public and private. Your subsidiary coin, which the people must use every day in their transactions, or go hungry and naked, is a legal tender for $10, and only for $10. There are $100,000 of subsidiary coin used in the United States in the daily transactions of the people to $5,000 of full round silver dollars and gold coin, but that is considered good enough for the common people of the United States. Shovel off upon them four quarters for a dollar, two halves for a dollar, ten dimes for a dollar, which contain 8½ grains less of silver than the dollar itself, and say, "With this you can pay a debt of $10, but no more; while with gold you can pay a debt of any amount, and with any gold that has been coined. If it is below the standard of legal circulation, you can take it and weigh it out in the scales and make your creditor take it."

That is the legal-tender quality of gold. The silver dollar of 412½ grains you may pay your debt with, no matter what it amounts to, unless the contract is the other way. All the subsidiary coin that you furnish to the people with less bullion in it than there is in the silver dollar, where the functions of money are equivalent to the face of the coin, you shovel upon the people and say "That is good enough for you." And, in the jealousy of the holders of gold, even that is denied to the poorer classes in proper supply.

Democrats have been accustomed, since I was a boy, to declaiming against class legislation. You legislate for the wealthy classes of this country by putting in your acts legal-tender money, with a full quota of silver in it or gold in it, as the case may be, and when you come to legislate for "the common masses of the common people" you say, "Take your depleted half dollars and your quarters and your dimes that you have to buy your daily bread with and get for your wages. That is good enough for you." I do not like that class feature in the legislation of the Congress of the United States. I am very much in favor of a proposition that has been made here, and argued and debated, of making all the minor subsidiary coins of the United States carry fully as much silver metal as the dollar of 412½ grains.

That is one of the things that we ought to be looking after. There is a point where we can rectify the rights of the people. There is the point where we can take care of the masses against the classes. There is a clean-cut proposition making it necessary for the action of some committee, and it ought not to be the Committees on Finance of the two Houses, for one House has passed over this great subject and sent to us, having apparently exhausted their powers of wisdom and contrivance, a bill that contains a single proposition, without looking through the whole field of legislative duty and providing for what the country so urgently needs and demands and what justice requires. That is a point that can be taken into consideration by this joint select committee of the two Houses, as it has not been by the standing committee of either House.

Another point may be taken into consideration by them, and ought to be and must be considered and settled before the financial system of the United States can even claim moderate respectability. That is, the legal-tender laws of the country.

Mr. PEFFER. By way of suggestion to the Senator from Alabama, I have the act of February 28, 1853, in my hand, in which it is provided that the weight of the half dollar, or piece of 50 cents, shall be 192 grains. If we double that we have 384 grains, which subtracted from the weight of the dollar, 412½ grains, leaves a difference of 28½ grains.

Mr. MORGAN. That is not pure silver?

Mr. PEFFER. No.

Mr. MORGAN. It is standard silver.

Mr. PEFFER. Standard silver.

Mr. MORGAN. I had reference to pure silver.

Mr. PEFFER. It is nine-tenths of that.

Mr. MORGAN. Nine-tenths. Now, we have quite a medley, quite a patch-work, quite a crazy-quilt performance, here in our statute books on the subject of legal-tender money. Under the Revised Statutes, section 3587—

> The gold coins of the United States shall be a legal tender in all payments at their nominal value, when not below the standard weight and limit of tolerance provided by law for the single piece, and, when reduced in weight below such standard and tolerance, shall be a legal tender at a valuation in proportion to their actual weight.

That is what the legal-tender laws of the United States do for gold and gold coin. It is an advantage that is unseemly and unjust.

Under section 3587 of the Revised Statutes the minor coins of the United States are legal tender for 25 cents.

Under sections 3473, 3475, and 5182 of the Revised Statutes:

> After any such association shall have caused its promise to pay such notes on demand to be signed by the president or vice-president and cashier thereof, in such manner as to make them obligatory promissory notes, payable on demand, at its place of business, such association is hereby authorized to issue and circulate the same as money; and the same shall be received at par in all parts of the United States in payment of taxes, excises, public lands, and all other dues to the United States, except for duties on imports; and also for all salaries and other debts and demands owing by the United States to individuals, corporations, and associations within the United States, except interest on the public debt, and in redemption of the national currency.

Now, there is a limited, peculiar, legal-tender quality given to the national-bank notes differing from all other legal-tender qualities given to all other species and descriptions of money.

> Silver dollars of the weight of 412½ grains troy, of standard silver * * * which coins together with all silver dollars heretofore coined by the United States, of like weight and fineness, shall be a legal tender, at their nominal value, for all debts and dues, public and private, except where otherwise expressly stipulated in the contract.—(Revised Statutes, sections 3099, 3473, 3474, 3513, 3586; Statutes, volume 20, page 25.)

Silver dollars are subjected there expressly to the stipulation that may be made in the contract between the parties, whereby they may establish for themselves a legal-tender rate and a legal-tender law as they think, but no judge would ever think of executing it.

> That the present silver coins of the United States of smaller denominations than $1 shall hereafter be a legal tender in all sums not exceeding $10 in full payment of all dues, public and private.—(Statutes, volume 21, page 8.)

The act of March 3, 1863, provides that—

> Treasury notes issued under the authority of the acts of March 3, 1863, chapter 73, and June 30, 1864, chapter 172, shall be legal tender to the same extent as United States notes for their face value, excluding interest: *Provided*, That Treasury notes issued under the act last named shall not be a legal tender in payment or redemption of any notes issued by any bank, banking association, or banker calculated and intended to circulate as money. (Revised Statutes, section 3590; Statutes, volume 12, page 710; Statutes, volume 13, page 218.)

There is another entirely peculiar phase of legal-tender law applicable to a particular part of our currency.

Then we come to Treasury notes:

> SEC. 2. That the Treasury notes issued in accordance with the provisions of this act shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom, then held in the Treasury, purchased by such notes; and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national-banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes herein provided for the Secretary of the Treasury shall, under such regulations as he may prescribe, redeem such notes in gold or silver coin, at his discretion. (Statutes, volume 26, page 289.)

That is the act of the 14th of July, 1890. Then comes the old foundation act, the legal-tender law, in regard to United States notes:

United States notes shall be lawful money and a legal tender in payment of all debts, public and private, within the United States, except for duties on imports and interest on the public debt. (Revised Statutes, section 3588; Statutes, volume 12, page 711.)

Here are nine different legal-tender laws applicable to the different kinds of money issued by the United States.

Now, I submit, Mr. President, that there never was such a medley of legislation upon one vital topic as that which now infests the statute books of the United States. If there was a ground of distrust of the value of the currency of the United States, of its actual money value, that ground would be firmer and stronger under the feet of the objector in respect to the legal-tender laws than any other part of the whole fabric of our patchwork of finance and monetary system. It is a crude, ill-digested, contradictory, elaborate, almost impossible-to-be-understood system of legal-tender laws, applying to all the various aspects of money that from time to time we have had occasion to put forth to meet the exigencies of our political and financial situation.

Ought that not to be remedied? Ought not any money issued by the United States or any money redeemable by the United States or any money coined by the United States (unless, perhaps, it is the minor coins made of nickel and copper) to be an equal legal tender for the payment of debts? If you have a legal-tender value attached to money at all, why is it that every dollar in the United States issued or coined by its authority is not of equal legal-tender value? Who, in framing a monetary system, would ever think of making this gross batch of inconsistencies and absurdities a part of that system? Until we get rid of that, discriminations are necessarily to be made, and will always be made, between the different classes of money issued by the authority of the Government of the United States.

That is a very important subject for the consideration of the Congress of the United States, one that we can not pretermit. We can not forbear to act upon it without disappointing just expectations and without impeaching the wisdom, if not the integrity of our action upon this financial question.

Our national-bank system stands between the people of the United States and the Government as the almoner, I will call it, the distributor of the promises of the Government of the United States that stand for money. While it has been guarded with all the care and supervision that has been possible by the wise men who have dealt with it heretofore, it is still an utterly insufficient system for the protection of the people against just such calamities and troubles as we are emerging from to-day.

Now, is that the fault of the system itself? Have we a system that may be abused by the adroitness of financiers here and in Europe to such an extent as that the national banks may violate all of their duties to the people and to the Government with absolute impunity, and yet, as the honorable Senator from Texas [Mr. COKE] told you the other day, and the honorable Senator from Missouri [Mr. COCKRELL] told you also, require the people of the United States to pay interest upon every dollar of national-bank notes that goes into circulation? They furnish the credit; they furnish the representatives to enact the laws; the laws are enacted; and the laws impose upon the money the people handle every day, taxation and interest. The people have to bear all these burdens; the banks bear none of them; and while the people are in this condition, the banks at will and pleasure perform or violate their duties, according to their best interests, and not according to the obligations either of oaths or public duty. Is that the fault of the system, or is it the fault of the administration of the system? That there is a fault no man denies, no man can deny.

I will not this morning, Mr. President, undertake to go over what has been so well portrayed here by the Senator from Colorado [Mr. TELLER], from facts that he has brought in evidence before the Senate, and by the Senator from Missouri [Mr. COCKRELL] upon an equally strong statement of facts, to show the criminal responsibility of the national banks of the United States in their dealings with the people of this country in these latter days, and especially during the last five or six months. There is no necessity on this occasion for me to do that. I hope to speak of this at a later date. There is not a man who can read the promise on the face of a bank note in the United States who does not understand it. We may think that this subject is so clouded up that the common people of this country can not understand it, but they all understand it perfectly, and they have at last learned, at the expense of a terrible experience, that they are to be made the sufferers of every financial calamity that can be brought upon this land.

They are beginning to understand that their representatives in the Senate of the United States and in the other House, either because of their being tied up with political affiliations that they dare not break through, or because of their indisposition to take the responsibilities of their high and awful position, stand by and refuse to grant them relief. They even stand by and refuse to consider the subject of relieving them. The House committee has had this subject before it, and the Senate Committee on Finance also; and with all of this startling development of cruel disappointment to the people of the United States, bringing almost actual starvation into the houses of thousands and hundreds of thousands of good people, they have been standing by and witnessing the refusal of the banks to pay their depositors when they had the money in their vaults and did not deny it; refusing all discounts upon paper and securities, it made no difference how good they were; locking up all the avenues of trade and industry, so that no man could do more than feed his family, and a great many could not do that.

These Representatives have stood by and seen the whole of it, and they have been as dumb as statues upon the subject of the interests and rights of the people, and of their responsibilities to them. They come forward with one single proposition where there are many to be considered, and demand of us that we shall consider that, and only that; and after we have received from them this modicum of what they claim to be a temporary relief, and not a complete and thorough and satisfactory relief to the people, then we are compelled beseechingly to ask them if they will not, in their goodness and benevolence to the people, after a while take up these other subjects for consideration and lend a helping hand.

I can not do my duty unless I demand more of the Senate of the United States than that, and I do demand it. I demand it, sir, as a Democrat. More than that, I demand it as an American Senator. If any party tie stood in the way of my making this demand and enforcing it I would strike it from me with delight and go as an honest and a free man to the fearless representation of an honest and free people. I could not be bound by such slight obligations to party ties while refusing to do my duty to a suffering constituency.

What are we to do about the rehabilitation of the State banks? There is not a wealthy man in the Senate who is in favor of it—not one. There is not a wealthy man in the United States I have ever heard of, who is in favor of it. If it depended upon their votes we would never get it, it would be an impossibility, notwithstanding that great pledge of the Democratic platform. Is that to be recalled? Is it to be swallowed whole? Is it to be ignored? Have we no responsibility of a party kind connected with the consideration of that question? Yet, Mr. President, if I were to offer such an amendment to the bill from the House pending here it would be voted down by the friends of the repeal of the Sherman act.

It would be voted down without hesitation. It would be voted down by them with the same unanimity of feeling that they would vote down the free coinage of silver, and so the rectification of the legal-tender laws would be voted down by them. If I should have the temerity to bring into the Senate a proposition that every dollar coined and issued by the United States Government should be an equal legal tender for the payment of debts, it would be voted down. So would any proposition to restrain the banks from destroying the industries of the people be discarded.

What we must do, if we do any thing at all for the sake of the people, is to do all that is in our power to consider the whole length and breadth of these great questions and determine them at one time and by one committee, and also in one session of Congress.

If this committee is properly constituted it would consist of representative men from every political party in this country. It would consist of seven members of the House and seven members of the Senate. Amongst that membership of seven there would be ample room for all the parties who are represented on this floor, the Populists, the free-coinage Democrats, the anti-silver Democrats, the free-coinage Republicans, and the anti-silver Republicans. They could all have a full and fair representation upon that committee in both Houses, and when they have met together for the purpose of considering the measures that are necessary for the welfare of the people of the United States we would find no mere party assemblage there.

We would find an assemblage of every interest represented on the floors of the two Houses. A just representation of the people of the United States, and every man would have his voice, could bring forward his facts and his views and make his report, and when the reports came into the two Houses the House and the Senate would have nothing to do but to adopt that report which will best coincide with its views of the requirements of the general situation and the welfare of the whole country.

Now, if we want to get at this question in a nonpartisan spirit—and almost every gentleman who has discussed this question in either House, I observe, has attempted to have the country be-

lieve that he approached it in an entirely free and nonpartisan spirit—if we want to get at this question in a nonpartisan spirit, let us have a committee upon which all of these respective interests are directly and distinctly represented. After such an examination of this great and comprehensive subject, it will be the duty of all parties to acquiesce in the wishes of the majority and to aid in carrying their plan of finance into full execution.

Then the people of the United States will have confidence in your patriotism and your impartiality. Then they will say you are conferring in a friendly spirit with all the people and all their representatives, and you are trying to bring them into harmony of action upon this great question of finance. You are trying in good faith to relieve the people.

Is there any reason why that should not be done? It ought not to disappoint the expectation or wound the pride of the Committee on Finance in the Senate or in the House that this should be done, for the reason, if there were no better reason, that you can not get concert of action between the two Houses otherwise than by the action of a joint committee. These two Committees of Finance, although they are Democratic in majority both in the House and in the Senate, are not in concert of action in every particular.

There has been but one point upon which they could meet. There has been but one point that they were willing to discuss or could afford to discuss. They have either ignored or else they have refused to consider every other proposition except the single one of coalescing with the honorable Senator from Ohio [Mr. SHERMAN] in destroying the act which he was so proud of here, and for several sessions after it had been enacted. That is as far as they can get.

Well, that does not go far enough to suit me as a Democrat. I never recognized the honorable Senator from Ohio as my file-leader as a Democrat. There were some other Democrats in the United States whom I preferred to affiliate with in former times. I will name one of them—Allen G. Thurman. Allen G. Thurman was always a free-coinage Democrat. I believe he has not lived until he has been forgotten as a Democrat. His teachings and his honorable labors in behalf of Democracy, as well as free coinage, will survive in the memory of men the history of 90 per cent of the members on this floor to-day, or who have been here in the last thirty or forty years. When you speak about great and good and consistent men who are Democrats I may proudly refer you to Allen G. Thurman, the Old Roman; not the modern Roman, who is represented in the person of the Chairman of the Committee on Finance.

I took up the Washington Post this morning, which I always read with satisfaction, because it is a bright paper, and it usually holds the front row, I may say, upon the news that is current through the United States. I find the following special to the Post:

NEW YORK, *September 5.*

The last trace of acute stringency in the money market disappeared to-day, there being no premium on cash. The banks are now paying out cash freely. The steamships Umbria, La Champagne, and Saale brought about $1,500,000 in gold.

The whole amount of the profits of the dealers in currency while the premium lasted aggregates $1,000,000, the statement of the representative of one firm being that their profits were $600,000. The profits of the remaining brokers are easy of estimate. The firm making the largest established a lead from the beginning, though forced by two banks to withdraw their accounts. The third bank accepted their account only on condition that currency should never be demanded of them. This and other discouragements offered by the banks intimidated many from engaging in the business, else the aggregate of profit might have been larger and the banks themselves forced to buy currency. The railway and express corporations helped the banks out by refusing to sell their cash receipts, and the premium on currency thus ended to-day and sooner than would otherwise have been the case.

The premium will not return in half a century. Banks say that the conditions producing the scarcity were unusual, and will never occur again in ordinary circumstances.

The most valuable of the influences against a premium is the growth of the sentiment against the sale of currency in hard times. The banks have been supported during the struggle to keep the premium down by the leading mercantile and stock houses.

Those who have had to buy the money have been principally large employers of labor, and the immediate effect of the dropping of the premium will be that more factories will start up, and concerns that have failed will not have to postpone resumption of business longer than is absolutely necessary.

Bankers at the uptown resorts said this evening that they had for the first time in five weeks been paying merchants and business men currency on demand and in whatever denominations were desired. Their customers were delighted, and the bankers assured them that henceforth they may expect to get currency of whatever denomination they asked for on their checks.

What has produced that marvelous relaxation, that sudden brightening up of the zenith and the horizon around the monetary world? What has so inspired these gentlemen as that they at last give their consent that the people of the United States shall have the use of their own money; that the depositors shall actually have their drafts honored when they are sent to the banks, and that "gilt-edge paper" may be discounted in the banks? What has produced this marvelous toning up of the confidence of the banking institutions in the United States? Is it the passage through the other House of the bill to repeal the Sherman act? It has not passed the Senate yet. We are invited to pass it. We are urged to pass it. We are commanded to pass it. We are threatened if we do not pass it. Our Democracy is questioned if we hesitate to pass it; but there seems to be quite a disposition on the part of the Senate to look into the subject before they pass it; they want to examine into it. These gentlemen who have become so confident in the monetary situation in the United States are not counting with absolute confidence upon the action of the Senate. No, sir; it is a different thing.

Four or five months ago this movement was commenced. It was commenced in Great Britain. It was commenced by a determination in Great Britain that the monetary system of the United States should be brought down to the English basis. Money had been loaned here upon bonds and securities of various kinds, put up as collateral, and if they could make money scarce in the British markets and hard to obtain, of course the collaterals would go down in value and would have to be sold. They made the cinch upon the monetary world in Great Britain and Germany, but chiefly in Great Britain. They got these securities on the down grade. The bears were triumphant. The speculators in lower prices had the rule of the money market, and the control of the bond market, and the margin market, and everything connected with the pledge of stocks as security for loans; and down and down went the securities that had been pledged in Great Britain for the loan of money.

These securities, it is said, were sent home for sale, and they were sold, and they were bought, and as soon as these men got hold of enough of them to make themselves rich, as soon as they had secured the market in their own hands and could buy them almost at their own prices, then they relaxed the money market and said to the people, "We have confidence now; we will relax the money market and prices will go up; ease and comfort will come into the monetary situation: bonds will rise, and we will reap a tremendous harvest out of this situation."

That is how it happened; and the wise gentlemen who fancy that they understand all about finances and financial operations can not deny these statements. Neither can they state any other ground for the terrible conflict and depression that we have passed through than that I have just stated.

The money of the United States, Mr. President, is not used for the purpose of developing agriculture, or mining, or the interests of forestry, or even of shipping and navigation, and scarcely for railroads. The great bulk of the money of the United States that is employed in Wall street is handled by the gamblers in stocks. They get the first call on the money market. They go there with their bonds, their securities piled up, and pledge them as collateral for the purpose of getting money to buy more with, and to speculate upon them, for that is the whole routine of their life and their business—speculation, and nothing else. When a merchant in good standing, I care not how good he may be, or a manufacturer with large industries under his control of the greatest possible advantage to the country and all the way from 1,000 to 10,000 employés and operatives to be taken care of, goes to one of these banking institutions and asks for a loan upon any kind of mortgage or pledge that he can possibly put up, they will not let him have it.

Now, there is a reason for that, and a good banking reason. The man who handles stocks can always throw them upon the market, and his money is borrowed upon call. It is a call debt. When the market shows that the stock which is put up as security is depreciating, and is likely to go below the proper margin for the payment of the amount loaned, the banker has not anything to do but to take it and put it upon the market and sell it and realize. A merchant goes to one of these banks that has had perhaps a million dollars loaned upon call, fortified by stocks as a collateral security, and asks for a loan. "What length of time do you want?" "Why, I want thirty days (or sixty days or ninety days) time. I am obliged to have some credit. I can furnish you ample security, of good indorsers, but I am obliged to have some credit." The answer is: "We can not take your paper at all, for the reason that we can make more money upon our call loans. We can handle our money two or three times over in a month, perhaps; at all events, it is always ready when we demand it, and if it is not paid we can go into the stock market and sell securities and realize." So that the great mass of the money of the country is employed continually in supplying funds for stock gamblers.

This thing reaches across the ocean, and there must be points where there are accumulations of capital sufficient to supply this great demand for money. Where are they? Go and unlock the vaults of the Rothschilds treasury, and you will find one of them; unlock the Seligman vaults, and you will find another; unlock the vaults of four or five of the great banking houses of Europe, and you will find them all. They are all there.

The fountain sources of the supply of money are there. They control the money, not of individuals merely, but of governments;

they control the whole financial system of Europe, and our banks go there to borrow money to lend to the stock gamblers, and not to lend to the people. So when there comes a tightness in the money market of Europe we find that the first effect is to place these bonds and securities upon the market at the loss of the stock gamblers, and we find that the next effect is that no commercial or industrial man can get a shilling on any paper that he can offer; no credit that he had been a lifetime building up is worth a cent to him; nothing is worth anything to him, because the power of the banks is controlled almost exclusively by the gamblers. That is why the people can not get in contact with their own institutions and their own money. That congestion is passing away, it seems. They have bought their stocks at great depreciation, and now they begin to want to realize, and money is let loose and prices rise. Prices rose 10 per cent in a week on stocks sold in the markets in New York.

Mr. HOAR. I should like to ask the Senator from Alabama, with his leave, if his statement of facts as to the course of the business of the national banks as to their preference in loans is made as the result of his observation of the national banks of his own State? Is that their course of business, so far as he is informed?

Mr. MORGAN. My observation, Mr. President, of course has been confined to the national banks of my own State pretty much, but the national banks of Washington also do the same thing, and I have some acquaintance with what they do. I know that a merchant can not go here in Washington city and get his bill discounted, no matter how good he makes it on the security of indorsements, and get the money for the purpose of carrying on his business. He can not make a loan in a national bank in Washington, but a man who can go and put up certain stocks for security can do so.

Mr. HOAR. If the Senator will permit me, I do not think it would be proper to rise to controvert his statement of fact about what comes within his personal observation, but I think I can say, as a man who has had some large experience in business affairs in my own State and large observation as a professional man, that that statement is not true of the banks of Massachusetts or New England. The class of speculators described by the Senator are the terror of the national banks. They never like their paper, and they get rid of it and reject it when they can. The business of the banks is almost exclusively confined to discounting the business paper of manufacturers and merchants at moderate rates, and these banks have been paying dividends of late years of about 5 or 6 per cent only. The panics, which the banks are charged with getting up, light upon the banks with more severity than on any other kind of capital invested in business.

Mr. MORGAN. Does the Senator from Massachusetts know how many savings banks in his State have demanded thirty days' notice from depositors?

Mr. HOAR. I do not, but I suppose they all do when they are expecting a run.

Mr. MORGAN. Every one. They demand time; they will not pay, and they can not pay. Their resources are locked up.

Mr. HOAR. That is entirely another question, which I will not interrupt the Senator to go into at this time, but I shall discuss it at the proper time.

Mr. MORGAN. It is not by any means another question. It is a part of the same troubles. The savings banks in Massachusetts and in all of New England have been remarkable for their punctuality in their dealings, and for their meeting all the demands brought upon them by the poor people who put their money in their charge; and now, even those honest New Englanders, who have handled the money of the people with so much care, so much circumspection heretofore, are forced by conditions which they can not possibly obviate or correct to demand thirty days' time when a poor fellow who has a deposit of $5 in the savings bank goes there to get his money to buy bread for his family.

Mr. HOAR. If my honorable friend will pardon me I think I know something of that also. What reputation I can give as a voucher for the statement I give, that the poor fellow whom the Senator describes will always get, does now get, and has through this panic got his money.

The thirty days' notice is a mere protection against a run, a panic, an excitement, an utterly unfounded delusion, but during all this time, as a rule in our savings banks, persons wanting their money to pay their taxes, to support their families, or to meet obligations which they had contracted depending on the savings bank deposit to meet them, have got their money.

The Senator is aware that the banks can only take to the amount of $1,500 from any one person in Massachusetts.

Mr. GRAY. With the permission of the Senator from Alabama, may I ask the Senator from Massachusetts a question?

Mr. MORGAN. I am in hopes that the Senator from Delaware and the Senator from Massachusetts will both come in and debate this resolution, for the reason that I want it carefully examined before it is acted upon.

Mr. HOAR. The Senator should remember that my last statement was made in reply to his question.

Mr. MORGAN. I want this resolution adopted because the Senator from Massachusetts and myself, without either of us desiring to make an incorrect impression in the slightest degree, find ourselves at cross points, at loggerheads, on a very important state of facts; and I want the proposed committee to examine into the facts and give us the truth, and let us see who is right and who is wrong.

Mr. GRAY. May I make a single observation in line of what the Senator is saying?

Mr. MORGAN. Yes.

Mr. GRAY. If I understand it—I do not know how it may be in Massachusetts—all of the savings banks of which I have any knowledge have it as a rule, it is one of their by-laws, that when a deposit is made it is made subject to the understanding or contract that thirty days, or some specified number of days, notice shall be given before the deposit is withdrawn.

Mr. MORGAN. Of course, Mr. President, that is the way it is done.

Mr. GRAY. It is part of the contract with the depositor.

Mr. MORGAN. Otherwise they would be put into bankruptcy, or perhaps their officers would be put into the penitentiary for not having complied with their obligations to pay the money, and so they have a reservation of thirty days; but when do they ever use that right?

Mr. GRAY. Only in times like these.

Mr. MORGAN. Yes, in times like these. It is because these times exist that the necessity has been forced upon the banks to claim thirty days before paying the deposits of these poor breadwinners.

Mr. HOAR. Ninety days.

Mr. MORGAN. I want to investigate. I want the country informed, and I want the country relieved in respect to these matters, not that I have any particular pet measure which I am advocating here or anywhere else, but I want the Congress of the United States to look into the whole subject and do everything that can be done for the purpose of rectifying these evils.

I thought, Mr. President, that I would read some extracts from the letter of the president of a national bank in Alabama to me upon the subject of the depression which exists in that State amongst the laboring people. It is not necessary that I should read the letter at large, and I find also that one sheet of it is missing. I thought I had it here.

This gentleman goes on to state that in those splendid iron industries in Alabama, which have been so prosperous and have done so much good to the people there and to the United States and to the world, the payment of wages of laborers is made daily or weekly in meat and bread. They do not ask any money; they do not expect to get it; they are working for a bare subsistence—enough to support them and their families. Men who could ordinarily get their $2.50 to $5 a day are working in the mines and in the iron establishments in Alabama upon a contract that they will receive from the companies enough meat and bread to feed their families. They can not get any money, and could not get any.

The people of the State of Alabama, through their newspapers, are sending up supplications and prayers to, heaven, and also to the national banks for some relaxation of the stringency of money matters. Once in a while a paper will come out in triumph and glee and say, "We are to have money to buy cotton;" and that carries a cheerful thought to the hearts of these poor laboring people of my State—money to buy cotton, as if the world did not need that staple as much almost as it does food; cotton, which has always commanded gold as well as currency whenever it might be landed at a railroad depot or on a steamboat, or on any place where it is accessible to navigation, from the time of its foundation as one of the leading industries of the United States; cotton, which has been crowned as a king in some of the days of this present generation, is a poor pitiful beggar wanting to know whether there is to be money to buy cotton.

Who has the control of the money so that the people who raise cotton for the clothing of the human family can not find a market for it, can not find money to sell it for? Who has got the money locked up? Who has got the control of it? Do you not know who has it? Has anybody ever suggested a doubt or a question that the money was locked up in the hands of banks and of bankers, that they have got the control of all the monetary system and the entire finances of the people of the United States? More than that, they bring their pressure to bear in this instance, as they have frequently before, just at the time when the wheat, cotton, and corn crops are maturing. Corn and wheat and cotton are at prices now which are discreditable to the Congress of the United States, which are a disgrace and a shame to these bodies, because we have not stood by our people and enabled them to have a sound currency for the purpose of carrying their crops to the markets of the world.

Wheat down even below 50 cents a bushel, cotton 5 to 5¼ cents a pound, corn at less than 30 cents a bushel, and all because the banks and bankers have got the money locked up in their vaults and treasuries and will not let the people have it, while they are taxing them to pay interest on it, and we stand idly by here and dream of party success and party allegiance and party fidelity, and see our people starve and go naked, and never raise a hand or a voice to undertake to care for them. I am not of such, thank Almighty God. [Manifestations of applause.]

I could go on, Mr. President, and show from the papers I have before me—but I shall not now refer to them—other very important facts to prove the necessity of our taking hold of this subject in a strong and earnest way.

Now, I have no pet policy or purpose about it. I am willing to go with and abide by my people after they have had a full hearing and after a free conference upon any system of measures which will make our people secure henceforth against these outrages and wrongs from which we are just now escaping. I care not whether it may be called a Republican, a Democratic, or a Populist measure—it makes no difference. If it will give the relief to the people, in accordance with the Constitution of the United States, which they have a right to demand at our hands, I will unite with whoever it is that brings that measure forward if it commends itself to my judgment. I am not going to be illiberal or stringent about it, either. I am not going to inquire whether somebody outside of this Chamber wants it done or does not want it done. I am not going to ask persons who have no legislative power whatsoever to form joint commissions to investigate this question. I feel upon this question the responsibilities of a representative of my State and people; I feel the necessity of action. I desire broad, catholic, orthodox action in respect of this question, consistently with the Constitution of the United States, and that is all I desire.

If you want to take the tax off the State-bank system, and that is the judgment of Congress as being one of the useful remedies or one of the best remedies which can be adopted, do so. If you want to remonetize silver as a means of restoring confidence and as a means of giving to the people a basis of credit and power of redemption, do that. I should be delighted if you were to do it. If you want to strike both gold and silver to death, if necessary, do it, if it is for the welfare of the people; but let us, Mr. President, hold the reins over our own institutions and our own establishments; let America furnish to Americans the proper currency to circulate in their business, let us not be dependent upon Great Britain or Germany or France for anything in respect of our currency. We have the material here to build up a system of finance better than any that exists in this world.

We already predicate a system of finance which requires us to redeem $800,000,000 of circulating paper on less than $100,000,000 in gold, and we sustain it without difficulty. What supplies the great vacuum between $100,000,000 of gold in the Treasury and $800,000,000 of paper in circulation in the hands of the people, for the redemption of every dollar of which the United States is responsible? What supplies it? The credit of the people. Their taxpaying power, their labor, their toil, their economy, their suffering, their patriotism supplies all that great breadth of disparity between $100,000,000 of gold in the Treasury and $800,000,000 of paper to be redeemed.

I say, let us help those people to bear these burdens; let us give them, as far as it is possible to do so, all the relief that we can. While we are here in Congress, while this question is up, while it is absorbing the public attention, while it is engaging the utmost efforts of everybody connected with government, while it is making demands upon our time, upon our talents, upon our energies, our industry, and our honesty and courage, of the most supreme character, let us not refuse to take the whole subject into consideration, and so deal with it and dispose of it that this country and our noble toilers shall have a monetary system suited to our greatness.

Mr. President, I could broaden this view of the question, if I had time to do so and felt that I was warranted in doing so, upon one idea or line of thought, which I shall merely suggest. The States of the western hemisphere from Mexico and Central America down, including all of South America, have a monetary system which is somewhat akin to ours—pretty close kin—based chiefly upon silver. They have also free republics and constitutional governments, which are copied after ours; they have sympathies in common with us; they are becoming more and more great producing peoples; their contributions to the commerce of the world are becoming exceedingly important. Those contributions ought to be interchanged in New York, and not in London.

There is enough of financial wealth and power in the western hemisphere to make of New York a city greater, within a comparatively short period of time, than London is in its financial and commercial power. If we will, in the effort to adjust our financial system, accommodate it to the interests and conditions of the people in South America, we can draw them right to our homes, with all their trade and credit. They are suffering as we are, perhaps in a worse degree, from the same causes; they have not got the credit that we have, and if a great joint committee of the two Houses would also take that subject into consideration and act upon it there would be brought into the Treasury of the United States and into the reach of the people an amount of wealth and power that we little dream of. That is one of the matters which this great committee ought to consider. It has not been considered heretofore, or, if so, in such a perfunctory manner that nothing has come of it. The subject has been slurred over.

Within what length of time, Mr. President, could this committee prepare itself to act upon all the leading propositions which I have suggested, or others, if you please, and report either separate bills or one bill to cover the whole question? I can take the honorable Senator from Missouri [Mr. COCKRELL], whose seat is now occupied by my colleague [Mr. PUGH], and put him at the head of a committee of that kind, and in twenty days he would have all the facts before this body which would be necessary for the purpose of having the subject perfectly understood and acted upon with wisdom, caution, and security. There would be no trouble about that.

By the time that in decency and in order the debate in this body would end upon the proposition which is now before it by the passage of the bill of the House as amended by the Committee on Finance of the Senate, the Senator from Missouri in charge of a committee of 14 members of both Houses—I designate him merely because his qualities and characteristics, his energy and his power entitle him to be designated—the Senator from Missouri could take such a committee as that, and, under his leadership, be prepared, within thirty days, to submit a plan which would cover the whole field of financial and monetary legislation in which we ought to engage.

I am entirely unambitious in this matter, and if the Senate of the United States should raise this committee, I give notice now that I would not accept a position on it, my notice being predicated upon the fact that I can look around me and see half a dozen Senators, both Democrats and Republicans, who are better fitted for such work than I am.

I want, Mr. President, that our people shall come together; I want that the finances of the people of the United States shall not be knocked about, like a weaver's shuttle, between politicians while they are suffering and starving; I want that they shall have relief, and that the politicians shall not stand in their way. I am as much a politician as any of them; but when I get upon a question of this sort, I am willing to surrender my politics for the welfare and interests of the people. So I announce that if the Senate should pass the resolution in the form I have it, or in any form whatsoever, I will not be a member of that committee. I want to stand upon ground where I can recommend this measure to the consideration at least of the Senate of the United States entirely aside from all party and personal considerations.

Now, is there any reason why we should not do this? Can any man, from pride of opinion or otherwise, rise in his place and object to having a great joint committee act on this subject? Have we not on many occasions when our country was imperiled, when the people were suffering, raised great joint committees to consider questions like this, before whom everybody could be heard and in whose body almost every feature of opinion in the Senate and House of Representatives was distinctly represented? That is all I ask you to do. It makes no difference whether the bill which is now before the Senate shall pass or shall not pass, the duties of this committee would be just as vital in the one event as in the other. The committee would be ready with its investigation, ready with its report, to take up this subject after the pending bill had passed or failed to pass, and enter upon the consideration of the broader view of the duty of the Congress of the United States toward the people. Then hope would revive in the hearts of the people, and we should inspire them with confidence, so much needed, in the justice of their own Government.

Mr. VOORHEES. Mr. President, I ask now that the Senate proceed to the consideration of House bill No. 1, on which the Senator from Nevada [Mr. STEWART] desires to occupy the floor. It is not necessary, I suppose, to make a motion to that effect.

Mr. MORGAN. I should like to have a vote on the resolution. The hour of 2 o'clock has not arrived.

Mr. VOORHEES. Let the resolution of the Senator from Alabama go over. I believe it goes properly to the Calendar.

Mr. HARRIS. The resolution of the Senator from Alabama is now before the Senate. It may be postponed by a majority, but it can not be disposed of in the manner the Senator from Indiana suggests.

Mr. VOORHEES. I supposed it would not be necessary to

make a motion to take up the regular order at this time, though I know a motion is necessary if there is objection to doing so. As there seems to be objection, I move the Senate proceed to the consideration of House bill No. 1.

The VICE-PRESIDENT. The Senator from Indiana moves that the Senate proceed to the consideration of a bill the title of which will be stated.

The SECRETARY. A bill (H. R. 1) to repeal a part of an act approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes."

The VICE-PRESIDENT. The question is on the motion of the Senator from Indiana. [Putting the question.] The "noes" seem to have it.

Mr. VOORHEES. I ask for the yeas and nays.

Mr. JONES of Arkansas. I rise to a question of order.

The VICE-PRESIDENT. The Senator from Arkansas will state his question of order.

Mr. JONES of Arkansas. Rule VII, in prescribing the order of morning business, after the first paragraph, specifies—

> The Presiding Officer shall then call for, in the following order:
> "The presentation of petitions and memorials;
> "Reports of standing and select committees;
> "The introduction of bills and joint resolutions;
> "Concurrent and other resolutions;"
> all of which shall be received and disposed of in such order unless unanimous consent shall be otherwise given.

This being a resolution regularly before the Senate, it seems to me that it must be disposed of in some way by the Senate, unless unanimous consent is given to the contrary; and a motion to proceed to the consideration of other business is not a proper disposition of this resolution.

Mr. McPHERSON. If the Senator will look at Rule VIII he will find that—

> At the conclusion of the morning business for each day, unless upon motion the Senate shall at any time otherwise order, the Senate will proceed to the consideration of the Calendar of bills and resolutions.

The motion of the Senator from Indiana is therefore in order.

The VICE-PRESIDENT. The Chair thinks the motion of the Senator from Indiana is in order; and upon that motion the yeas and nays are demanded. Is there a second to the demand?

The yeas and nays were ordered.

Mr. ALLISON. I should like to make a suggestion to the Senator from Alabama and the Senator from Indiana. In seven minutes from now the regular order, which the Senator from Indiana desires to reach, will be reached in the course of the business of the Senate.

Mr. VOORHEES. What we shall do in the next seven minutes is what is troubling me.

Mr. ALLISON. The Senator from Alabama desires to have a vote upon his resolution this morning. I submit to him that the importance of his resolution and the suggestions which have been made by himself will probably elicit other suggestions in the same direction or perhaps in other directions. So I think it would hardly be practicable to get a vote this morning. I suggest that we go on as though the hour of 2 o'clock had arrived without taking the yeas and nays, which will occupy nearly the whole intervening period of time.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Iowa?

Mr. MORGAN. I wish to say a word about that. Inasmuch as the morning hour had not yet expired I had a right to have a vote on my resolution, unless some Senator wished to debate it. Of course, if anyone wishes to debate it, I am entirely willing that it should go over; but it is not proper that the resolution should be destroyed merely by a resort to the regular order of the Senate within the morning hour.

Mr. VOORHEES. I desire to say to the Senator from Alabama that my action was not prompted by the slightest disposition to destroy his resolution or to do anything derogatory to it or to put it in any wrong attitude; but there were ten minutes left of the morning hour when I rose, and I did not know what else to do with those ten minutes before the measure of which I have charge would be laid before the Senate as the regular order of business, and so I asked the Senate for permission to proceed with what would be the regular order in ten minutes. Objection was made, and nothing was left to me but to make the motion which I did, with perfect respect to the Senator from Alabama and his resolution.

Mr. HARRIS. I suggest to the Senator from Indiana that we might consume the remaining minutes of the morning hour in taking the vote upon the resolution of the Senator from Alabama.

Mr. VOORHEES. I would suggest, from what I have heard other Senators say, not to speak of my own views, that this is a matter of such importance that it deserves further consideration than one single speech. It seems so to me; though, if the Senate wants to consider a measure of this sort without anything further, of course I am not going to interpose.

Mr. HARRIS. Of course, if any Senator takes the floor to debate the resolution, no one would go further than I to preserve his rights to do so; but as nobody does so, why not dispose of the resolution now?

Mr. VOORHEES. I insist upon my motion to proceed with the regular order of business.

The VICE-PRESIDENT. This debate has been proceeding by unanimous consent. The Secretary will call the roll on the motion of the Senator from Indiana.

The Secretary proceeded to call the roll.

Mr. DOLPH (when his name was called). I am paired with the senior Senator from Mississippi [Mr. GEORGE], whom I do not see in his seat, and therefore withhold my vote.

Mr. HARRIS (when his name was called). I am paired with the Senator from Vermont [Mr. MORRILL]. The Senator from Oregon [Mr. DOLPH] has announced a pair with the senior Senator from Mississippi [Mr. GEORGE]. If it suits the convenience of the Senator from Oregon, we may transfer our respective pairs.

Mr. DOLPH. That is entirely agreeable to me.

Mr. HARRIS. Then I vote "nay."

Mr. DOLPH. I vote "yea."

The roll call was concluded.

Mr. LODGE. I am paired on this question with the Senator from Kansas [Mr. MARTIN]. If he were present I should vote "yea."

Mr. PUGH. I am requested to state that the Senator from Georgia [Mr. COLQUITT] is paired with the Senator from Iowa [Mr. WILSON]. If the Senator from Georgia were present he would vote "nay."

Mr. VANCE (after having voted in the negative). I am paired with the Senator from New York [Mr. HILL] on this question, and withdraw my vote.

Mr. ROACH (after having voted in the negative). I am paired with the junior Senator from New York [Mr. MURPHY] on this question, and therefore withdraw my vote.

Mr. CALL (after having voted in the negative). I inquire if the Senator from Vermont [Mr. PROCTOR] is recorded as voting?

The VICE-PRESIDENT. The Chair is advised that the Senator from Vermont is not recorded.

Mr. CALL. Then I withdraw my vote, as I am paired with that Senator.

The result was announced—yeas 37, nays 21; as follows:

YEAS—37.

Allison,	Gallinger,	McPherson,	Smith,
Blackburn,	Gibson,	Manderson,	Stockbridge,
Brice,	Gorman,	Mitchell, Oregon	Vest,
Caffery,	Hale,	Palmer,	Vilas,
Cullom,	Hawley,	Pasco,	Voorhees,
Davis,	Higgins,	Pettigrew,	Washburn,
Dixon,	Hoar,	Platt,	White, La.
Dolph,	Hunton,	Quay,	
Faulkner,	Lindsay,	Ransom,	
Frye,	McMillan,	Sherman,	

NAYS—21.

Allen,	Harris,	Perkins,	Teller,
Bate,	Irby,	Power,	Walthall,
Berry,	Jones, Ark.	Pugh,	Wolcott.
Coke,	Jones, Nev.	Shoup,	
Dubois,	Morgan,	Squire,	
Hansbrough,	Peffer,	Stewart,	

NOT VOTING—27.

Aldrich,	Cockrell,	Kyle,	Proctor,
Butler,	Colquitt,	Lodge,	Roach,
Call,	Daniel,	Martin,	Turpie,
Camden,	George,	Mills,	Vance,
Cameron,	Gordon,	Mitchell, Wis.	White, Cal.
Carey,	Gray,	Morrill,	Wilson.
Chandler,	Hill,	Murphy,	

So the motion was agreed to.

Mr. HARRIS. Does not the Senate proceed to the consideration of the unfinished business by reason of the fact that it is the unfinished business and the hour of 2 o'clock has arrived?

Mr. VOORHEES. That will do very well, but the vote which has been taken helps somewhat; and that I wish to emphasize.

The VICE-PRESIDENT. The title of the bill which has been taken up by vote of the Senate will be stated.

The SECRETARY. A bill (H. R. 1) to repeal a part of an act, approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes."

Mr. TELLER. I rise to a question of order. I simply wish to know, as a parliamentary question, whether the bill is before the Senate by virtue of its being a special order or by virtue of the vote which has been taken?

The VICE-PRESIDENT. The Chair will state to the Senator from Colorado that, in the opinion of the Chair, House bill No. 1 is before the Senate both by virtue of the vote just taken and the fact that the hour of 2 o'clock has arrived.

Mr. TELLER. I should feel inclined to antagonize the Chair in that opinion.

Mr. DOLPH. Does the Senator from Colorado object to proceeding with the bill?

Mr. TELLER. Not at all. It strikes me that the motion made in hot haste to take up the bill did not succeed in getting it up until 2 o'clock and went for nothing, because at most we could only have taken it up under that motion until the time for the regular order. Had there been any other bill than this pending as the unfinished business it would have displaced the bill that we had taken up by motion. Consequently, if the bill is before the Senate now, it is not by virtue of that vote, or aided by that vote, but merely because it is the regular order.

Mr. VOORHEES. I wish to say to the Senator from Colorado that there was no hot haste about it, and he is mistaken in so characterizing it. There was a space of about ten minutes, and I knew of no other use to put it to except to execute the rules of the Senate, and I did so with no disposition of hot haste. What else might have come in that interval I did not know, and I was not at liberty to take any risk. The Senator can have the bill up now by virtue of the hour of 2 o'clock arriving, or by virtue of the vote we have taken, just as he chooses. It is up, however, and I hope the Senate will proceed with it.

Mr. TELLER. Mr. President, the resolution of the Senator from Alabama was before the Senate, upon which any of us who chose to do so had a right to be heard, and undoubtedly somebody would have been heard for the remaining five or eight minutes; but the Senator from Indiana, who has had no difficulty whatever in getting his bill before the Senate—because there has been no antagonism to his taking up that bill, and he has had it taken up from time to time with the assent of the opponents of the bill—makes a rush, if I may use the term, as if there were some great purpose in getting it up immediately. I am myself quite willing that the bill shall be taken up at 2 o'clock, but I do not think he is entitled to have it taken up before that time unless something is to be gained by it. I do not think it makes a particle of difference whether the bill has been taken up on the Senator's motion or whether it has been taken up in the other way. We are prepared to debate it.

Mr. VOORHEES. The Senate will bear witness that I said I made the motion when I did without any intention to destroy or do anything derogatory to the resolution of the Senator from Alabama. I first asked unanimous consent, and did not get it: and then I made the motion, because I was compelled to do so. In that connection the Senator from Tennessee [Mr. HARRIS] announced with some emphasis that if there was anybody ready to take the floor and debate the resolution as a matter of course he had a right to do so. I acquiesced in that. If anybody had risen at that time and taken the floor to debate the matter for ten minutes, nothing would have afforded me greater pleasure than to have allowed it, because I did not wish to occupy this little remnant of time by calling the yeas and nays.

Mr. HARRIS. The Senator from Indiana will allow me to say there, that no matter what came up, he certainly knew that at 2 o'clock his bill would be laid before the Senate as the unfinished business, and would have the right of way, no matter what the condition of things was at the moment 2 o'clock arrived.

Mr. VOORHEES. The Senator from Tennessee will pardon me for saying that he must not presume too much upon my parliamentary knowledge. He must not measure it by his own.

Mr. HARRIS. Then the Senator will allow me to say that I know the rule is exactly as I stated, and I supposed the Senator knew.

Mr. VOORHEES. Of course the Senator from Tennessee knew.

ENROLLED BILLS SIGNED.

A message from the House of Representatives, by Mr. T. O. TOWLES, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled joint resolutions:

A joint resolution (H. Res. 6) to make the 18th day of September, 1893, a holiday within the District of Columbia; and

A joint resolution (H. Res. 7) to permit the use of certain ensigns, flags, and signal numbers to decorate the Capitol and its approaches, September 18, 1893.

PURCHASE OF SILVER BULLION.

The VICE-PRESIDENT. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, the title of which will be stated.

The SECRETARY. A bill (H. R. 1) to repeal a part of an act, approved July 14, 1890, entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes."

The VICE-PRESIDENT. The bill is before the Senate, as in Committee of the Whole, and the Senator from Nevada [Mr. STEWART] is entitled to the floor.

Mr. MITCHELL of Oregon. The Senator from Nevada yields to me in order that I may give notice that on Tuesday next, immediately after the conclusion of the morning business, I shall ask the indulgence of the Senate to submit some remarks on the pending bill.

Mr. STEWART. Mr. President, when the Senate went into executive session yesterday I was referring to some comments in the New York newspapers as to

THE RIGHT OF THE SENATE TO LEGISLATE

and the right of Senators to speak—a right which these journals now deny. What they then called a duty they now call filibustering. In view of the fact that the money power has control of the press, has cut off all intercourse between the people and Congress, has surrounded Congress with its lobbies, with its newspapers, and with every force that can be brought to bear to produce coercion, and is keeping the people entirely ignorant about it in their efforts to stampede Congress and obtain legislation which the great mass of the people are opposed to, I shall be pardoned for dwelling a little further upon this question.

In order to show the exact position which they occupied when there was no money at stake, when they were speaking their sentiments as patriotic citizens, I shall be pardoned for calling attention to that, and then comparing that with what they say when they are obeying the mandates of the money power and seeking to wrench from the people a right which has existed under the Constitution from the foundation of the Government. I think it is wise and expedient to take a little retrospect and see how these organs stood which are

STAMPEDING CONGRESS

and creating such a panic here that some Senators are losing their nerve and going back on their records, and seem to think that the people have changed because the newspapers in New York have changed.

I now read from the New York Times of January 22, 1891:

[New York Times, January 22, 1891.]

* * * The Democrats were ready and anxious to attend to any of the legitimate measures before the Senate, but they steadily refused to make a quorum to enable the Republicans to adopt a gag law. * * * The tactics of the minority in defense of the right of debate were pursued with all necessary decorum.

[New York Times, January 23, 1891.]

Still another day of the session now so near its end was wasted by the Senate yesterday over the absurd and yet outrageous scheme for suppressing debate. * * *

[New York Times, January 27, 1891.]

The six Republican Senators who voted yesterday with the Democrats to abandon the effort to abridge discussion * * * were wiser in their generation than the thirty-three Republicans who rallied around Mr. HOAR.

[New York World, January 22, 1891.]

* * * It is the imperative duty of the Democrats in this Congress to see to it that this thing shall not be accomplished within the thirty-six days (end of Congress).

They have the means of defeating it in their hands now, if they are resolute and courageous in their use. They may have to sacrifice much for its defeat, but no sacrifice is too great which will baffle. * * * Every device for delay must be used in the Senate. Every day of delay renders the final triumph of wrong more difficult and less likely.

It should be the resolute determination of the Democrats * * * that nothing else shall be done unless and until the force bill shall be finally abandoned. In ordinary circumstances such dilatory tactics would be justly blamed. But these are not ordinary circumstances, and no legal act of any conceivable kind done to prevent the working of so great a revolution will be other than praiseworthy.

[New York World, January 25, 1891.]

Senator STEWART of Nevada packed a world of sound sense and truth into a sentence or two yesterday, when he told his fellow Republican Senators that a gag law would be an invasion of every precedent. * * *

[New York Times, January 25, 1891.]

When a majority can, at its discretion, shut off all amendments to a bill, its despotism is nearly as complete, and nearly as injurious to the rights of the public, as if it could prevent the minority from voting at all. To be able to say that a member of the Senate must vote a simple yea or nay upon a measure with the preparation of which he has had nothing to do, is a peculiarly offensive form of tyranny. It is, so far as it goes, revolutionary, since it strikes directly at that freedom of representative action which is the safeguard of the public rights. A body like the Senate, which was especially created in order that all action by Congress should be soberly and intelligently reviewed, needs every reasonable opportunity to develop the views of all members who may have them. * * * To shut off amendments arbitrarily, to compel members to accept or reject absolutely naked, unqualified propositions, is to confer on the majority a power that it will take more than the average fidelity to public duty to protect from abuse. * * * Nothing so subversive of inherent principles of legislation under a representative government has ever before been attempted in the United States. We are far within the truth when we say that never in the proudest and most insolent period of the domination of the slave power in Congress was anything so plainly inconsistent with the first principles of our Government done or attempted.

* * * * * * *

The men who are planning and leading the assault on some of the most valuable safeguards of free institutions are also those who in times past have fought with the utmost courage and fidelity against the abuses of Executive influence.

[New York Herald, January 19, 1891.]

* * * The Democrats in Congress are resisting this measure by every device known to honorable parliamentary tactics. * * * They have the right of the question.

[New York Herald, January 22, 1891.]

Mr. GORMAN and his plucky followers are making a brave and determined fight against the force bill in the Senate.

Perhaps it is vain to hope that this most iniquitous measure will be defeated, but the day of its passage should be delayed as long as possible by every honorable means known to parliamentary tactics.

* * * If they fail, after having done their utmost, they will still have the consciousness that they did what they could to avert the inevitable disaster.

[New York Herald, January 23, 1891.]

HAVE THE MINORITY ANY RIGHTS WHICH THE MAJORITY ARE BOUND TO RESPECT?

What are the rights of the minority in the Senate now so ably led by GORMAN, of Maryland? That is the question of the hour. Are the majority justified in closing debate simply because, being a majority, they have the power to do so?

Let us look at the matter squarely and fairly. * * *

First. A well-handled minority is one of the most important elements in a deliberative body. Its business is to discover the blunders made by the majority, and expose them by statement, argument, and ridicule.

Second. When the majority are unopposed * * * there is nothing on earth more tyrannous or mor harmful to the country. * * * A majority bent on passing laws * * * without regard to the welfare of the people as a whole, constitute a national peril which should be very zealously watched.

Third. The minority are just as apt to be right, just as likely to be patriotic, and to represent the sober second thought of the community as the majority.

Fourth. If a minority honestly believe that the majority are wrong, and their action will be injurious to the general welfare, they are bound to block the way to a final vote by every honorable means known to parliamentary tactics.

* * * If their opposition is not trivial or factious, but is based on the rules which govern the Senate, they are quite right to cause delay by every means within reach.

If they are more skillful in use of tactics than the majority, so much the worse for the majority—the best player wins the game, that's all. * * * The minority are too strong for them, and so they resort to cloture—that is to say, they will cut off debate, gag the opposition, refuse to recognize them when they take the floor, and push the question to a vote by the brute force of superior numbers. * * *

That is the New York Herald.

[New York Herald, January 26, 1891.]

NOW AND THEN.

Senator HOAR wrote an article for the Youth's Companion of November 15, 1890, in which he said:

"In this Assembly (the Senate) speech is absolutely unfettered. Every measure can be discussed fully without restraint and amended without limit. This is of immense importance not only to the perfection of legislation, but also to the dignity of the Senate, and, in my opinion, to civil liberty itself." * * *

Nothing is more clear than that * * * sound common sense controlled Mr. HOAR then.

[New York Herald, January 27, 1891.]

THE ACCURSED FORCE BILL AND THE INFAMOUS GAG RULE.

* * * We extend to GORMAN of Maryland, to the brave army of Democrats, and to the few Republicans who defied the revenges of the Administration our hearty congratulations. They have made a glorious fight.

* * * The naked truth is that the minority have been engaged in obstructing the Republican attempt to inaugurate a new period of disorder. * * * The minority are the conservative element of the Senate. They demand that the customs, traditions, and usages which have governed them for the last hundred years shall not be tampered with; that debate shall be conducted after the manner which has made the Senate a dignified, a deliberative, and useful body. * * *

[New York Herald, January 29, 1891.]

We should like to see the Senators who wanted to shut off debate try the experiment on their wives and daughters. Circus? That is too tame a word to describe the situation.

[New York Herald, February 5, 1891.]

Mr. Depew knows that during the discussion of the force bill the only "revolutionary measure" was introduced by a New England Senator, Mr. ALDRICH, in the shape of a cloture resolution, better known as the "gag rule." That was, indeed, revolutionary with a vengeance. Nothing of the kind was ever heard of before in the Senate Chamber. It was a radical and dangerous reversal of the methods of that body which struck the country with surprise and dismay. * * *

The Republicans wanted to change the rules by which the Senate has been governed for a century, but the Democrats blocked their way and demanded that the rights of free speech should not be invaded.

I have a large number of other coercive demands of the present hour in my hand. I will first read what appears in the World this morning:

END THE FILIBUSTERING.

All real debate in the Senate is over. Every Senator who had anything earnest to say on either side of the question has said it. The matter has been talked out. It is time to fix upon a day for a vote on the repeal bill.

The proceedings now in progress are, in their essence, filibustering. They are an abuse of that courtesy of the Senate which alone permits them. They are meant to secure indefinite delay, and for no other purpose whatever. The speeches that are made now are intended to kill time and postpone action. The majority has fully made up its mind to obey the popular command. The minority has fully recorded its protest and set forth its reasons.

It is time now for action. It is time to name a day for the vote. The country waits with growing impatience. The notice by Senator VOORHEES that he will call up to-day his resolution for earlier sessions is a move in the right direction. The next move should be to fix an early day for a vote, and to press the repeal bill to its passage.

Before I read any more I wish to remark that comparing the force bill in importance with this measure is belittling the issue before us. I was as much opposed to the force bill as anyone. I believed then and I believe now that the force bill would have changed and centralized our Government. I believed then and I believe now that it would have given the Federal authority control over every local election and cut off the "tap root," so to speak, of civil liberty. I believed then and I believe now that it would have ultimately made a monarchy of this Government. It is a terrible change from liberty and freedom to monarchy. But that is

NOTHING COMPARED TO THIS MEASURE.

Monarchies have lived and prospered. People have been happy under monarchies. The change in the form of government is nothing compared with consigning those now living and those to come after us to perpetual misery and starvation.

I have spent days and nights investigating the history of countries and the effect of a supply of money, and I have found that whenever the supply of money was cut off, barbarism and slavery followed. If you will give me the history of the production of the precious metals which any country could obtain I will write the rise and fall of that country. You can go back to antiquity, when the pyramids were built, and you will find that contemporaneous with that the mines of Nubia in Africa and mines in Western Asia were opened. When Solomon built his temple the mines in Western Asia and elsewhere were productive in the precious metals. When the Phœnicians were at the zenith of their power history records that they gathered gold and silver from Asia and all the countries surrounding the Mediterranean. When the mines gave out every nation of ancient times crumbled and fell. The Greeks, when Athens was the university of the world and when her philosophers and statesmen were more brilliant than in any other age, whose civilization we can only faintly imitate in some respects, had

MOST VALUABLE MINES.

Xenophon tells us that they got their gold and silver from the mountains of Thrace. The explorer in his travels finds the excavations and the ruins of their ancient works. When these ancient nations commenced to decay and when the gold and silver had fallen into the hands of a few, when it was monopolized as gold is being monopolized to-day, their power waned and the Roman invaders overran them. The Romans took the accumulations of gold and silver then existing to Rome. It had not been used there as money up to that time, but its use as money was soon ascertained. First it was held by the rich, and finally it commenced to be exchanged as money and its power was realized; and so greatly did it add to the power of Rome that in her future conquests she made slaves of the armies she captured and forced them to mine in Spain and Italy. The excavations and the ruins in Spain and Italy are most marvelous. There is nothing in modern times that shows such an extent of excavations as are found in Spain. Mountains were removed there by slave labor, and the two thousand years which have since elapsed have not been able to heal over the wounds that the slaves of the Roman Empire inflicted upon the mountains of Spain. By this process the Roman Empire acquired, according to Jacob and Gibbon, $1,800,000,000 of gold and silver, and as she acquired that wealth she advanced in power and in magnificence until her eagles floated all over Europe, western Asia, and Africa. She was then

THE RULER OF THE WORLD.

It was the gold and silver she had with which she paid her conquering legions that made her the mistress of the world.

The mines gave out. She decayed. Contraction, hard times, the stagnation of which we feel a touch to-day, gradually but continually for one thousand four hundred years reduced the proud Romans from a conquering race to feudal slaves to be sold as villeins with the land, and not one ray of hope was vouchsafed to humanity. It was all dark and gloomy until Columbus with his little band performed that daring and heroic voyage, the four hundredth anniversary of which we are to-day celebrating. The compass that guided his little bark across the ocean pointed the way to the creation of a new civilization, and when the gold and silver of Mexico and of South America floated into the Old World a new civilization was born which is now the civilization of the nineteenth century. It is that civilization which started in the sixteenth century; writers tell us there was a wonderful development of human energy, human thought, an uprising that they could not account for. The wonderful development in the sixteenth century was marvelous. We have heard so much of that. They pictured what they saw, but they did not know why it was. It was because the dormant energies of the downtrodden people and the slaves of Europe was

TOUCHED BY THE MAGIC WAND

of gold and silver. The stream of gold first touched Spain, an insignificant power, and immediately she rose and conquered nearly all Europe, and, as if by magic, seemed destined to rival the grandeur of the Roman Empire in its palmiest days. Her armies—while she monopolized the money from the New World—were everywhere irresistible. By and by the money got distributed and all Europe progressed. The new civilization was inaugurated; and to that new civilization, and to that money

from Mexico and South America, we owe the free institutions of the United States to-day.

Reflect a moment. In the islands of Great Britain when that discovery was made the

COMMON PEOPLE WERE SERFS.

The land was held by the few, by only 30,000. The poor were living without thought, without energy, without power of resistance. In the first hundred years after that discovery, the gold and silver of the world was more than quadrupled, prices advanced, and the landholders of Great Britain were swelled to a hundred thousand. They then had money. They could buy land. They could improve it. Out of that and by that means the common people of Great Britain, the yeomanry of Great Britain, were able to come into existence. To that yeomanry we owe the progress of the English-speaking race, all that is good in the British and American Constitutions. Until that time there never was a struggle for liberty because the masses were too poor; but when they had money from the New World they went on developing and acquiring wealth and they formed the yeomanry of Great Britain; and it was that yeomanry that settled this country and laid the foundation of our institutions.

From them we sprang. It was the yeomanry of Great Britain, who were brought into resistance by the discoveries of the New World, that peopled this country; and we brought with us the spirit of liberty and independence which our fathers on the other side possessed. We established these institutions; and the yeomanry of Great Britain continued powerful, continued to be able to grapple with despotism, to contend for their rights until the Napoleonic wars. At the end of that war the number of real-estate owners had risen to over 160,000—some put it at 200,000—but in ten years after Great Britain adopted the gold standard they were reduced back to 30,000, and they have been kept

UNDER THE HEEL OF DESPOTISM

and crushed by this mighty power; as all the world is being crushed by gold contraction. The yeomanry of Great Britain can send out no more colonies to establish liberty. They are too poor. If Australia and Canada had not got a start before they were crushed they never would have become successful colonies.

Then trace this thing further. This stream of gold and silver came continuously without any diminution. Of course, the percentage of increase of the volume was not as great as in the latter part as it was at first, because the volume had been so much increased. It quadrupled in the first instance, and then it could only increase at a small percentage from that time on; but from the first discovery until the commencement of this century, there was a gradual increase. Then came the Spanish-American war and cut off four-fifths of the supply. The world's production of gold and silver from that time until 1850 was not sufficient to supply the arts. None was furnished for new money. Then came

A PERIOD OF STRUGGLE,

of hard times, of battling against what seemed to be impending fate.

Those who were old enough can remember what the condition of the country was previous to 1850. This country was in a better condition than any other because we had new lands, but the laboring masses of Europe were set back at least a hundred years by the failure of the money metal. In this country, with all our new lands, the wages of labor were merely nominal. A farm hand thought he was doing well if he could get $8 a month and his board. Times were hard. Every device was resorted to to remedy the evil. Banks of every description were tried. All the wild-cat inventions that genius could devise were tried and all failed. They were tried in Europe and were equally failures there. Civilization seemed to be again on

THE DOWNWARD COURSE.

There was nothing in any part of the world but gloom. Hard times was the rule, and there was scarcely an exception among all the civilized nations of the world.

It seemed almost providential that the great discoveries of California and Australia were made, at this time of gloom and despair. The condition of civilization was changed. The vitalizing effect of the copious output of gold from the new mines started enterprises everywhere. Industries of every kind were advanced. There was activity everywhere, activity of mind and activity of pocket. There were more inventions in the twenty-five years following 1850 than at any other period of the world's history. Literature prospered; science advanced; everything that tended to the happiness of man all over the world was quickened. More wealth was created during the twenty-five years while that bounteous supply of gold and silver was coming from California and Australia than in any hundred years previous. Nothing can be compared to it.

Then the bondholders, as I showed yesterday, by the device of avarice and cunning, by indirection and fraud, the people not knowing what was being done, struck off half of the world's supply of money metal.

THEY STRUCK DOWN SILVER.

One-half the supply was struck off. Then we started down again towards hard times; and since that time there has been a desperate struggle against the inevitable fate of a contracting basis of circulation. See at what time it was. See how we were situated at that time. See how we were situated and mark how cruel it was. We had just passed through a terrible war. Our people were loaded with debt, debts contracted in inflated money; but we had enormous resources and we were full of hope for the future. During the war there had been silver mines developed in the Western States and Territories that gave ample assurance of plenty of gold and silver coin. At those vast developments your statesmen and good men rejoiced. I remember well the first time I came to Washington. It was the first time I was ever here. I visited President Lincoln. He took me by both hands and said: "My young friend, I am glad to see you. I am particularly glad to see you because you come from the Far West."

"YOUR PIONEERS HAVE SOLVED THE QUESTION.

"You have made it possible for us to sustain our financial system during the war. You have developed mines that will enable the people to pay the enormous debt from the proceeds of of their own country." Said he: "I congratulate your people. We were all very thankful and we were all very much gratified at the discovery of Comstock and these other mines. It has removed a dark cloud from the horizon and gives us hope for the future." But the war closed and a conspiracy in London and Paris and here tore from the people this grand heritage, and robbed them of the right to mine and coin their own money. For what purpose was this done? Could anybody tell? Has anybody ever said why it was done? Silver had been as good as gold during all time. It was used as money long before gold was. It was the money of the people. Twelve hundred millions of people used silver. Gold was only used in a few commercial centers. Silver was the money of the Constitution. Why was it struck down?

Now, to appreciate this we must examine the situation as it then existed. England, located on an island, had been free from wars and invasions for centuries. She had large accumulations. The money power had confiscated all the property of the enterprising people of England by converting $4,000,000,000 of paper money in 1816 by one rude act into $4,000,000,000 of gold-bearing obligations. The paper money

WAS WORTH 30 CENTS ON THE DOLLAR

and gold money was worth 100 cents. That was the rude act of which men boast. The Rothschilds and others were able to get accurate information of the battle of Waterloo and conceal it from the public long enough to accumulate the vast mass of this indebtedness. I say that has been regarded as smart. It laid the foundation of the money power of Europe, the bonded power which to-day, according to Mr. Gladstone, holds against the balance of the world a demand of $10,000,000,000, bringing an annual interest from the toiling masses of other nations of $500,000,000.

MR. GLADSTONE,

in a speech in Parliament on the reassembling of the Brussels Monetary Conference, said:

I suppose there is not a year which passes over our heads which does not largely add to the mass of British investments abroad. I am almost afraid to estimate the total amount of the property which the United Kingdom holds beyond the limits of the United Kingdom, but of this I am well convinced, that it is not to be counted by tens or hundreds of millions. One thousand millions ($5,000,000,000) probably would be an extremely low and inadequate estimate. Two thousand millions ($10,000,000,000), or something even more than that, is very likely to be nearer the mark. ["Hear!" "Hear!"] I think under these circumstances it is rather a serious matter to ask this country to consider whether we are going to perform this supreme act of self-sacrifice. I have a profound admiration for cosmopolitan principles. I can go a great length in moderation [laughter], in recommending their recognition and establishment, but if there are these two thousand millions ($10,000,000,000) or fifteen hundred millions ($7,500,000,000) of money which we have got abroad, it is a very serious matter as between this country and other countries.

We have nothing to pay them; we are not debtors at all; we should get no comfort, no consolation out of the substitution of an inferior material, of a cheaper money, which we could obtain for less and part with for more. We should get no consolation, but the consolation throughout the world would be great. [Loud laughter.] This splendid spirit of philanthropy, which we can not too highly praise—because I have no doubt all this is foreseen—would result in our making a present of fifty or a hundred millions ($500,000,000) to the world. It would be thankfully accepted, but I think the gratitude for your benevolence would be mixed with very grave misgivings as to your wisdom. I have shown why we should pause and consider for ourselves, once, twice, and thrice before departing from the solid ground on which you have within the last half century erected a commercial fabric unknown in the whole history of the world—before departing from the solid ground you should well consult and well consider and take no step except such as you can well justify to your own understanding, to your fellow countrymen, and to those who come after us. [Cheers.]—*The Times*, London, March 1, 1893.

I shall speak of the other England by and by. I now speak of the money power of England. I now speak of that grasping

power, that unscrupulous organization which cares not for humanity; that power which wants to have the whole world in its grasp; that power which says that the less money there is the more the purchasing power of our accumulations will be, the more it will take of labor and of sacrifice to pay the $500,000,000 of annual interest. That power was too apparent. Why did our delegate to Paris betray America and ask continental Europe to bow down to that power? Why should we send a delegate to join England in

SACRIFICING OUR MINES

and our people on the altar of the greed of that monster power, organized to rob, organized to feed upon the labor of others? But we did. I gave the history of that yesterday. It is a history that every American ought to know, and it ought to go out from this Capitol; but we must discuss it within closed walls, surrounded by the influence of that power.

The young men who write in the galleries have no heart in this work, for they must send out reports that represent us as filibustering and as seeking to delay, which are not true. There ought to be delay before the infamous act of 1873 is recognized and the right to mine and coin our money is forever taken away. If this bill passes and we are driven to the single gold standard, there is no prospect but poverty and starvation for the people. There is no gold here. Two-thirds of the gold of the world is held for war purposes. There are $500,000,000 in the Russian war chest, $350,000,000 or $400,000,000 in the German war chest, $900,000,000 in the French war chest, which she protects by paying out silver if anybody demands it, and about $400,000,000 in the British Empire, which she is paying a premium on exchange to get and raising the rate of interest to keep. If we attempt to get that we shall have less and less money; and if we put out bonds we shall have more and more failures and bankruptcies and more hard times like the present.

WE OWE ENGLAND

I think $3,000,000,000 or more. It is estimated all the way from $2,500,000,000 to $5,000,000,000. Suppose we sell bonds and buy gold. She draws out what she wants. Whenever she desires she can make a panic in this country by drawing at the foundation of your circulation. She can make a panic to order every year, sell her stocks at a premium and buy them in at a ruinous sacrifice. There is 40 per cent difference between the price of the stocks which she sold a year ago and the price at which she is buying them to-day. That is the game she plays with us; and do you say that can be compared with the force bill which I contended against and now believe meant monarchy? Monarchy is not as bad as slavery. No country has been robbed of its money that did not relapse into slavery and barbarism. This is a scheme put forth boldly for the avowed purpose of

ROBBING THIS COUNTRY

of its money, confiscating its mines, reducing the price of propty and wages, and increasing the obligations of contracts.

Now, this being the object and purpose of the legislation proposed, it is pertinent to show what the same papers which gave such good advice to the Senate two years ago are saying to-day.

Mr. TELLER. Mr. President, I suggest that there is not a quorum present.

The PRESIDING OFFICER (Mr. PASCO in the chair). The Senator from Colorado suggesting the absence of a quorum, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Dubois,	Manderson,	Smith,
Allison,	Frye,	Mills,	Squire,
Bate,	Gordon,	Mitchell, Oregon	Stewart,
Berry,	Gray,	Pasco,	Stockbridge,
Blackburn,	Hawley,	Peffer,	Teller,
Brice,	Higgins,	Perkins,	Turpie,
Butler,	Hoar,	Pettigrew,	Vest,
Caffery,	Hunton,	Platt,	Vilas,
Call,	Irby,	Power,	Voorhees,
Carey,	Jones, Ark.	Proctor,	Walthall,
Cockrell,	Jones, Nev.	Pugh,	Washburn,
Coke,	Lindsay,	Quay,	White, Cal.
Cullom,	Lodge,	Roach,	White, La.
Dixon,	McMillan,	Sherman,	Wolcott.
Dolph,	McPherson,	Shoup,	

The PRESIDING OFFICER. Fifty-nine Senators have answered to their names. A quorum is present. The Senator from Nevada will proceed.

Mr. TELLER. I ask the Senator from Nevada if he will yield to me just a moment?

Mr. STEWART. Certainly.

Mr. TELLER. Mr. President, I asked that the roll should be called to see whether a quorum was present. I did not do this for the purpose of delaying the business of the Senate. I did it because I think this question is big enough to justify us in insisting that there shall be a quorum present while we are transacting the business of the Senate.

Mr. President, it is no ordinary question that has brought us here at this special session. I have expressed my opinion as to the gravity and the importance of the subject. I need not go into that now. I believe that those who are opposed to the repeal of the act called the Sherman law have a right to come here and to discuss it in the way the traditions of the Senate justify them in doing. Up to this hour there has been no indication that they intend to do it otherwise than in that way. We who are opposed to repeal have been lampooned through the press and have been threatened with the vengeance of the power that seems to control in this country just now if we should venture to take the time of the country to discuss this most important question, in accordance, I repeat, with the methods which have been pursued for a hundred years in this body. We are attacked as willfully obstructing the public service, and we are charged in the public press with being enemies of the public good.

Mr. President, for one I intend to discuss this question in a proper spirit and a proper temper if I can, and I insist that those who believe this question is so important that it must be voted on without any discussion or any opportunity for those who differ with them to be heard shall stay in the Senate when it is being discussed. There was no member of the Committee on Finance in favor of the repeal in the Senate for the last hour, if I am not mistaken. I sat here night before last an hour and thirty minutes with a good portion of the time only 20 Senators in the Chamber, a part of the time only 18. I was here and could have called for a quorum. I knew that if I did I would be charged with interrupting and hindering the business of the Senate. We submitted when we knew that there were not within the Capitol more than one-third of the Senate at that time, although the Senate two hours before had declined to adjourn.

Yesterday, when one of the oldest members of the Senate had been on his feet for four hours, a thing occurred that in my acquaintance with the Senate, for now nearly seventeen years, had never occurred before. When that Senator said, as Senators have said on this floor hundreds of times, "I prefer not to go on any longer on this subject to-day; I am weary;" there was very nearly a majority of the Senate who said he should go on, contrary to the custom and usage of the Senate. In the presence of the Senate I venture to say that he had discussed the question in a tone and temper that was senatorial in every respect, and there was no reason why the courtesies and decencies of the Senate should not have been extended to him, and why it shall not be extended to the rest of us when we, in the discharge of a duty that we believe to be incumbent upon us on our oaths, shall have discussed it until our physical endurance is so taxed as to require us to take a rest.

Mr. President, I intend, while the debate goes on, to see that there is a quorum present, and especially will I do that, although it may inconvenience Senators, if those who do not believe in a repeal are to be inconvenienced and denied the ordinary and usual courtesy of this hitherto courteous body.

The PRESIDING OFFICER. The Senator from Nevada will proceed.

Mr. STEWART. Mr. President, I have already read some of the views of the metropolitan press on another occasion, when although a great question was pending every one who is familiar with the pending question and will take time and study it will know that this is vastly more important.

September 4, 1893, when this bill had been before the Senate but a day or two, when we had been waiting for the other House, and much more time had been occupied by the friends of the bill than by its opponents, the New York Herald said:

HIGH TIME FOR A VOTE.

The Senate of the United States wasting precious time in dreary harranguing when the country is suffering for financial relief is a deplorable spectacle which should be brought to a speedy end.

Senator Voorhees has said that after reasonable debate he would press for a vote. What does Senator Voorhees consider reasonable debate?

The majority of the Senators have made up their minds that the Sherman law must be repealed in obedience to the popular will and for the good of the country. In view of that fact further debate is unnecessary and delay iniquitous.

For such abuse the majority of the Senate is responsible to the country. It has the power to stop the useless talking and order a vote. It owes it to itself as well as the people to exercise that power.

No one supposes that any further speaking on either side will have the slightest effect on the result. To keep it up is a public evil and a public nuisance.

It is time to call a vote. The Senate is simply increasing popular disgust and indignation by its inaction. This week should not be allowed to close without seeing the repeal of the law which has wrought such widespread havoc.

I would not call attention to these demands of the money power if I did not see a disposition in the Senate to obey them, a disposition

TO DENY THE RIGHT OF DEBATE.

and when I find the mandates of the money kings issued through the papers affecting the Senate then they are legitimate matters

of discussion. If the newspapers are the masters of the Senate let us discuss the conduct of the masters. I quote the following from the New York Times of September 4, 1893:

THE SENATE AND REPEAL—MAJORITY OF AT LEAST TWENTY FAVORING THE PENDING BILL.

WASHINGTON, *September 3.*

Much interest will be taken in the vote to be urged to-morrow by Mr. VOORHEES in the Senate on his motion to begin the daily sessions at 11 o'clock from Tuesday.

The supporters of repeal are in a strong majority at this time, and if the repeal bill could be brought to a vote the Administration would be sustained by almost as strong a vote, relatively, as that in the House. As the vote for early sessions is a step toward a vote on repeal, it may be that the strength of the repeal column will be shown early to-morrow.

Mr. VOORHEES is fully aware of the desire all over the country that there should be prompt action, and he is laboring to that end with much energy. He feels that he is well supported, and he has not lost any of his enthusiasm since the State of Indiana presented a solid front for repeal when the bill was passed by the House.

He knows that there are many silver men in his State, and that they know that he was always a silver man. Several of the House members are just as strong for silver as he, yet none of them has been censured by his constituents for supporting the Administration in its efforts to have the silver-purchase clause of the Sherman bill obliterated unconditionally.

Should the vote on the repeal be taken to-morrow, it is believed that there would be, with a full Senate, about 20 to 21 majority for it. A canvass made by a member sets the vote down as follows:

For repeal—Aldrich (Rep., R. I.), Allison (Rep., Iowa), Blackburn (Dem., Ky.), Brice (Dem., Ohio), Caffery (Dem., La.), Camden (Dem., W. Va.), Cameron (Rep., Pa.), Carey (Rep., Wyo.), Chandler (Rep., N. H.), Cullom (Rep., Ill.), Davis (Rep., Minn.), Dixon (Rep., R. I.), Dolph (Rep., Oregon), Faulkner (Dem., W. Va.), Frye (Rep., Me.), Gallinger (Rep., N. H.), Gibson (Dem., Md.), Gordon (Dem., Ga.), Gorman (Dem., Md.), Gray (Dem., Del.), Hale (Rep., Me.), Hawley (Rep., Conn.), Higgins (Rep., Del.), Hill (Dem., N. Y.), Hoar, (Rep., Mass.), Hunton, (Dem., Va.), Lindsay, (Dem, Ky.), Lodge (Rep., Mass.), McMillan (Rep., Mich.), McPherson (Dem., N. J.), Manderson (Rep., Nebr.), Mills (Dem., Tex.), Mitchell (Rep., Oregon), Mitchell (Dem., Wis.), Morrill (Rep., Vt.), Murphy (Dem., N. Y.), Palmer (Dem., Ill.), Pasco (Dem., Fla.), Platt (Rep., Conn.), Proctor (Rep., Vt.), Quay (Rep., Pa.), Ransom (Dem., N. C.), Roach (Dem., N. Dak.), Sherman (Rep., Ohio), Smith (Dem., N. J.), Squire (Rep., Wash.), Stockbridge (Rep., Mich.), Turpie (Dem., Ind.), Vilas (Dem., Wis), Voorhees (Dem., Ind.), Washburn (Rep., Minn.), White (Dem., La.), Wilson (Rep., Iowa).—53.

Against repeal—Allen (Pop., Nebr.), Bate (Dem., Tenn.), Berry (Dem., Ark.), Butler (Dem., S. C.), Call (Dem., Fla.), Cockrell (Dem., Mo.), Coke (Dem., Tex.), Colquitt (Dem., Ga.), Daniel (Dem., Va.), Dubois (Rep., Idaho), George (Dem., Miss.), Hansbrough (Rep., N. Dak.), Harris (Dem., Tenn.), Irby (Dem., S. C.), Jones (Dem., Ark.), Jones (Rep., Nev.), Kyle (Pop., S. Dak.), Martin (Pop., Kans.), Morgan (Dem., Ala.), Peffer (Pop., Kans.), Perkins (Rep., Colo.), Pettigrew (Rep., S. Dak.), Power (Rep., Mont.), Pugh (Dem., Ala.), Shoup (Rep., Idaho), Stewart (Rep., Nev.), Teller (Rep., Colo.), Vance (Dem., N. C.), Vest (Dem., Mo.), Walthall (Dem., Miss.), White (Dem., Cal.), Wolcott (Rep., Colo.)—32.

When the vote for silver has been tried, and it is found that there is a majority against it on any ratio proposed, there will undoubtedly be several changes from the vote as enumerated, just as in the House the vote for repeal was increased by the discovery that all other propositions were defeated.

The little group that will give the most trouble, as has been anticipated from the first, is that including the Republicans from the silver-producing States. Peffer is not likely to be so obstinate as they. They will oppose any change in the ratio, and then they will oppose repeal, and they will oppose it as long as they dare to filibuster.

The Democrats can not afford to filibuster. The "guerrillas" can afford anything, for they have little to lose.

There is plenty of such matter in the metropolitan press. It is too voluminous to read. Here is the World again of September 4, 1893:

[New York World, September 4, 1893.]

THE MAJORITY MUST RULE.

"This is a country," said Gen. Gradt, "where the will of the people is the law of the land."

What a mockery to call the will of

A BAND OF SPECULATORS

in Lombard street the will of the people of America! I shall discuss what is the will of the people of America and how it has been expressed before I take my seat.

If this is not always ture, it should be. The principle of majority rule must never be regarded as "old-fashioned," as Senator VOORHEES intimated that in some quarters it apparently now is. When the mandate of the people can not be made law, popular government is a failure.

"Mandate of the people!" We will examine that and see what is the mandate of the people.

The vast majority of the people desire and have decreed the repeal of the silver-purchasing act. The States which voted for repeal in the House represented a majority of over 23,000,000 of the population.

The Democratic members who were recorded for repeal represented a majority of over 1,500,000 of the Democratic votes cast for Congressmen last year. With the Republican affirmative vote added the popular majority for repeal is over 4,000,000.

It is known and conceded that a majority of the Senate is in favor of repeal. President Cleveland is justified, therefore, in urging that the minority should not be permitted much longer to deny the relief which the country needs and which the people demand.

It is to be hoped that the motion to-day for earlier meetings of the Senate will be adopted. When a great public duty is pressing all means necessary to its speedy accomplishment should be adopted. Mere obstruction in the Senate ought not to be permitted. It is time to execute the people's will.

[New York World, September 3d, 1893.]

VOTE! VOTE!

The Senate ought to pass the repeal bill this week.

A month of talk is too much to give to a question upon which every Senator has probably made up his mind. It is far too much when the country suffers while it waits, as now it does.

Except a closing speech for the repealers, nothing more needs to be said on that side. Nothing can be added to the speeches already made by Senators VOORHEES, SHERMAN, MORRILL, HILL, GORDON, and CAFFERY.

The anti-repeal side has also been adequately presented in the speeches already made.

The minority concedes that repeal is inevitable. It should not be permitted to delay it out of mere wantonness. An order to meet at 10 o'clock in the morning, and to hold evening sessions would probably bring the matter to an issue.

The cry of the country is, Vote! Vote!

[New York World, August 31, 1893.]

THE COUNTRY WAITS—THANKS TO THE HOUSE—NOW FOR THE SENATE.

The 138 Democratic Representatives who supported the repeal bill received 2,649,818 votes.

The 77 Democratic members who resisted repeal received 1,117,404 votes.

The majority of the popular vote on the Democratic side, as represented by the members in favor of repeal, was 1,532,414.

The percentage of the Democratic popular vote in favor of repeal was 70 to 30.

These figures show in a clear and striking manner the great preponderance of Democratic sentiment in favor of stopping the compulsory purchase of silver.

They afford an additional reason why the Democratic Senators from the South should follow the example of Senator GORDON, and—

Obey the people's will.

Fulfill the party's pledge.

Sustain the Democratic Administration.

Support the Democratic majority in the House.

Give immediate relief to the country.

The House has done its duty. Business is already reviving under the inspiration of its splendid vote. The country waits upon the Senate. It should not be compelled to wait long.

[New York World, September 1, 1893.]

THE COURTESY OF THE SENATE.

The rule of courtesy observed in the Senate fixes no limit to debate.

The only reason for suffering legislative proceedings to be governed by a rule of courtesy instead of a written rule is an assumption that honorable Senators will not abuse courtesy, but will be reasonable in using their liberty. It has been assumed that they would not persist to the point of obstruction in resisting the right of the majority to conclude debate by a vote.

The minority has usually been permitted, in the history of the Senate thus far, to determine for itself when it had fully presented its case and defended its intended action. But this privilege would not have existed so long if the minority had at any time announced a purpose to prevent a vote on a measure of vital public importance.

It is desirable that this particular courtesy shall continue by the consent of all Senators, but this will require that the Senators who profit by the courtesy of the majority shall be themselves courteous and not reward freedom with usurpation. Whenever the latter condition is brought about those who misapprehend and misuse courtesy will be responsible for the necessary substitution of a more arbitrary rule.

The majority of the Senate to-day is unquestionably in favor of the prompt repeal of the silver-purchase act. That majority should not permit the welfare of the country to be sacrificed to a misused tradition. After a reasonable time for debate—which does not mean a long time—if a vote is not conceded it should be compelled. Senator VOORHEES gave distinct notice yesterday that he will act upon this view, making no effort to abridge genuine debate, but promptly moving for a closure rule if, after debate is done, speech-making is continued for the evident purpose of delaying action.

[New York World, September 2, 1893.]

THE TWO REPEAL BILLS.

There is hardly substance enough in the difference between the Voorhees and Wilson repeal bills for a serious dispute.

Each bill repeals the purchasing clause of the Sherman act, and that clause is the most important cause of the country's present financial ills. The thing to do is so evident that anyone who favors doing it ought not to hesitate over the form of words in which the end is accomplished.

The Voorhees bill adds a stump speech to the repealing clause. It is a mere repetition of a proviso already on the statute books which nobody proposes to disturb. The law now declares that it is the policy of the Government to maintain the parity of the two metals, gold and silver. This provision has been interpreted by the present Administration to impose upon the Secretary of the Treasury the duty of maintaining silver at par with gold at any cost. Thus far it has been of service. The Voorhees bill would simply make the law say this over again. The Wilson bill would leave the law as it is.

It is certainly crude and illogical lawmaking for Congress to repeat the declaration. However, the important thing is repeal, and if the Senate will vote that any the sooner for the repetition, let the repetition be made.

A harmless absurdity ought not to stand in the way of repeal.

[New York Herald, September 2, 1893.]

HURRY UP THE VOTE.

Senator VOORHEES gave the Senate warning yesterday that fair discussion of the repeal bill would be permitted, but no talking against time would be countenanced. In other words, he would press for a vote after reasonable debate.

In this emergency fair discussion is limited discussion, and reasonable debate is brief debate.

The question of repeal has been thoroughly discussed by the country. It has been fully debated in the House. The subject has been exhausted. All the argument, reason, and logic that can be advanced for or against has been advanced. The question has been decided and the verdict rendered. It is that the Sherman law must be repealed and the purchase of silver stopped.

It only remains for the Senate to sanction that verdict by its vote. The majority is ready to do so now. The sooner it is done the better for the country. Prolonged debate is useless and mischievous.

The country calls for action. It demands a vote. Let the Senate hear from the people.

[New York Herald, September 1, 1893.]

STOP TALKING AND GO TO VOTING.

There is no doubt that a majority of the Senate is in favor of repealing the Sherman law and ready to vote for repeal now.

The silver Senators, who are uncompromisingly opposed to repeal and determined to use every means in their power to defeat it, constitute but a small minority.

Shall the majority or the minority rule? That is the simple question which confronts the Senate and the country. It sums up in a nutshell the whole situation at Washington.

It is not to be supposed for a moment that the silver-mining Senators can prevent the repeal of the law which has proved so disastrous and so dangerous to the country. The people have commanded repeal in a voice which their representatives in the House were compelled to obey and their rep-

resentatives in the Senate dare not disobey. In spite of all opposition and obstruction, the Senate must and will repeal the Sherman law.

Powerless to prevent repeal, shall the silver Senators be permitted to delay it by interminable harangues, obstruction, or filibustering?

It is vitally important not only to stop the ruinous purchase of silver, but to stop it at once. Every day's delay is a detriment to the country. It is a menace to financial, commercial, and industrial interests. Capital and labor, trade and industry, are suffering for relief. The people are calling for action. In such a crisis it is simply intolerable to see the Senate wasting precious time in useless talk and inaction.

There is no earthly need of long-winded speeches and no excuse for them. It has been settled beyond all doubt or occasion for debate that the Sherman law must be repealed and the purchase of silver stopped. That was forcibly shown by the vote in the House. Then why debate, why delay, why hesitate?

We have said that a majority of the Senate is in favor of repeal. Under the Constitution and by popular consent the majority rules. It can not only pass the bill, but can order a vote without delay. It can cut off debate, stop obstruction, and prevent filibustering.

It is time for the majority to exercise its power. This is demanded by the public interests and the popular will. It has become the patriotic duty of the majority to order an early vote and repeal the ruinous silver-purchase law.

That the Senate may realize and feel the force of popular sentiment, every wire to Washington should be made hot and every mail heavy with messages from chambers of commerce, boards of trade, banks, merchants, manufacturers, and workingmen, calling upon Senators to quit talking and go to voting—to repeal the Sherman law and stop buying silver. The vital fact should be impressed upon the Senatorial mind that the people want action and will not tolerate delay.

The country has already been through a long and trying ordeal. It needs financial relief by the immediate repeal of the silver-purchasing law, and having secured that it will need a breathing spell. Repeal the Sherman law at once and then give the country a rest.

[New York Times, August 30, 1893.]

FORTY-ONE MILLIONS FOR REPEAL.

Two-thirds of the people of the Union, speaking through their Representatives in Congress, demand the immediate, unconditional repeal of the silver-purchase provision of the Sherman act. As their will was recorded in the vote taken on Monday in the House of Representatives, 41,000,000 of the population of the United States desire the repeal of the act, against 19,000,000 who oppose repeal. The tables prepared by The Times and elsewhere published give the details of the vote by Congressional districts and population. For the repeal there were recorded the votes of 239 Congressmen representing districts having in the aggregate a population of 41,000,000, according to the census of 1890. Against the repeal there were 109 votes, cast by members representing 19,000,000 of population.

The Wilson bill goes to the Senate, therefore, accompanied by the imperative demand of the country that it pass at once. Rarely have the people spoken with the emphasis of such a tremendous majority. The pluralities of Presidents are measured in thousands and in fractional percentages. There is a majority of 22,000,000 for the repeal of the Sherman act. It is unprecedented and compelling in its magnitude.

It would be wanton impudence on the part of the Senate to defer obeying this command of the people. There is no call for a Senate debate, no wish to hear further argument. The country's mind is made up, it has spoken plainly, and it expects its servants in the Senate to hear and obey. Immense pecuniary loss will result from every day of postponement. The Senators must lay aside their silly delusion that they are as a body too dignified and ponderous to be hurried. Precedent and practice are demolished by such a pressure as now besets the Senate. The repeal is a question of the utmost urgency.

There is no impediment to its passage save obstinacy; there can be no excuses for delay save such as have birth in solemn stupidity. Immediate repeal is the duty of the Senate.

[New York Times, September 3, 1893.]

THE SENATE IS TOO SLOW.

If we read aright the signs of the times, this country is about ready to resume business in the customary volume and with its usual energy. Trade conditions are mending. We have seen the worst of the financial stringency. Money is getting to be easier and cheaper. In industries where there has been stagnation, life stirs again. There is going to be work to do for hands that have been idle. There will be men and capital for old enterprises and new ones. The recovery may be prompt or gradual—opinions differ as to that. We print this morning some interviews with well-informed men on that subject, which will be read with attention. On the whole, conditions seem to us to favor a somewhat more speedy return to business activity and prosperity than has been looked for in any quarter up to a very recent date.

The one great obstacle, the chief element of doubt, is the dawdling of the Senate over the Wilson repeal bill. That measure went to the Senators with the indorsement of a two-thirds majority of the House of Representatives, representing in the aggregate population of their districts more than forty millions of people. The great majority for the bill was in effect a command to the Senators that they should pass the bill without delay. The Senate of the United States, however, has always refused to be commanded by anybody, even by the people. It has sometimes obeyed, against its will, but grudgingly, and without admitting the fact. In respect to matters of politics, even in respect to matters of principle, it has usually been possible to indulge in the Senate's liking for dignity and deliberation. Its present behavior can be tolerated only at a great material loss.

The repeal of the silver-purchase act is not a party measure, but we may be permitted to point out that any Democrat in the Senate who obstructs or delays the passage of the Wilson bill is guilty of the plainest disloyalty to his party. The bill passed the House as a Democratic measure, and Democratic votes gave it a majority sufficient for passage, even had the Republicans abstained from voting. It is an Administration measure, and it is supported by the leaders of the Democratic party. The Republican-Populist silver Senators are responsible to no one for their behavior. Senators who still call themselves Democrats may be held to a certain accountability. We suppose the country must put up with some further speechmaking from the silver side of the Senate, though it is mortally weary of the old and empty arguments. But if there is any Democratic Senator who is still undelivered of his speech on that side, he will seize the first opportunity to make it, and will make it short if he takes a loyal interest in the welfare of the Democratic party.

Some of the earnest friends of the Wilson repeal bill are inclined to criticise the course of Mr. VOORHEES as the leader of the Senate in this matter. They say that he is allowing too great license to the silver Senators in the way of debate and is in danger of being entangled by them in some parliamentary complications which will delay repeal. We think that these criticisms are so far unfounded. Mr. VOORHEES has not yet reached the point where the real test of his skill and devotion will be made. He could not, if he would, shut off debate immediately. It would be bad policy to do so if he could, for such speeches as VANCE and TELLER and STEWART and WOLCOTT, and COCKRELL and VEST have made and will make for some days yet do not strengthen the silver cause a particle. They only awaken public sentiment against it. The test of Mr. VOORHEES's strength will come when the attempt, which is inevitable, is made to saddle the Wilson bill with amendments. If he successfully resists that, he will be amply vindicated.

[American Grocer, August 30, 1893.]

THE PATHWAY OF DUTY.

Unconditional repeal is the pathway of duty, said ex-Speaker REED. And so said Senator HILL of New York. And so said the House of Representatives, irrespective of party, by a vote of 240 to 110. Now let the Senate promptly vote for unconditional repeal, and confidence will be quickly restored. It matters nothing whether we are in favor of a single or double standard; the absolute free coinage of one or both metals; the fact is that the common people, as well as the money-lenders of the world, have lost confidence in the currency of the United States, and lost it through the operations of the Sherman bill. It has been the tool to create distrust at home and abroad, and distrust is the forerunner of disaster. Let unconditional repeal be the cry until the Senate follows the lead of the House of Representatives and votes for the repeal of the Sherman act. Let every one wire or write to their representatives in the Senate and urge unconditional repeal.

I will not occupy the time of the Senate at the great length I desire on this subject, because I do not want any suggestion made that I am speaking for delay. I am speaking to bring before the Senate

THE AWFUL RESPONSIBILITY

of disobeying the voice of the people and taking a snap judgment, as I shall show before I get through.

The press that is held to be the guardian of liberty has not always been so. It is not so now, and it was not so in former times. I do not think I can do any better than to read from Alison a short chapter showing the vile service the press has done for tyranny and oppression. Ordinarily it is one of the guardians of liberty. Free speech and a free press are what we prize as American citizens. Unfortunately a press may sometimes be bought, and it may be sometimes in the interest of the enemies of the people; and this is not the first time. I will read from the first volume of Alison's Europe, second series, page 16:

It is generally supposed that the powers of thought, if allowed free expression, are the best guaranty against the encroachments of despotism; and that the loss of freedom is never to be apprehended as long as the liberty of the press is preserved. But though that is often it is by no means always true; on the contrary, the selfish measures of class government, and the destruction of free privileges by military power are never so effectually secured as by the support of a corrupted or hireling press. Beyond all question the rude despotism of Cromwell in England, the nicely constructed chains of imperial power in the hands of Napoleon in France, never could have existed but for the cordial and interested support of an impassioned press in both countries. The utter ruin of the West India Colonies; the deep depression of agricultural industry in Great Britain and Ireland, in consequence of the free-trade system; the general and long-continued distress of the whole class of producers in both countries from the monetary laws, never could have been effected if these measures had not been advocated by able and indefatigable journals in the interest of the moneyed class and the consumers. Those who lay the flattering unction to their souls that genius is the eternal enemy of oppression, and that liberty is safe if its expression is secured, would do well to look at the condition of Rome when every successive emperor was lauded in the eloquent strains of servile panegyrists; of England, when the mighty genius of Milton was devoted to defending the measures of the regicide and Long Parliament; or of France, when the sonorous periods of Fontanes celebrated in graceful flattery the despotism of Napoleon.

If there ever was in all the world a more intolerant and a more cruel exhibition of the power of the press, emanating from the money centers of this country, to coerce Congress to perform an act which will consign the masses to poverty and misery, I should like any man to name it.

Much is said about the position of England on this question and England's influence here in the Senate Chamber,

ENGLAND'S INFLUENCE

in securing the legislation of 1873, and there are somewhat confused ideas about it. There are two Englands, one the enlightened, philosophical, generous, benevolent, and noble England; the other the cruel, money-getting, bondholding, grasping, tyrannical, and wicked England. They are distinct. England, if you can reach the great heart of the people, in learning and philosophy surpasses any other country in the world; but when you turn to her concentrated money power you find the great enemy of civilization and the cruelest monster that has been created in any age. I will call your attention to one England and then to the other. The learned and honest England produces such men as Balfour, Goschen, Archbishop Walsh, Foxwell, Molesworth, Frewen, Houldsworth, Thompson, Chaplin, Montague, and Grenfell.

If the Senators who are leaving the Senate Chamber would take a little time to read the productions of the men I have named they would talk more intelligently; they would not be staying away without knowing the first principles of monetary science; they would not be talking about "intrinsic value." Do you suppose that any of the persons I have mentioned would use such a term as that?

INTRINSIC VALUE,

As if value is intrinsic in the thing. If it was in there would it not stay? Suppose all the rocks were gold, would it have the

same intrinsic value? Intrinsic applies to quality; value is an estimation of man. Here Senators leave the Chamber and will not listen to me, who have not learned the meaning of the term "value," who have not gone through their A B C's; and the President of the United States talks about intrinsic value, and that we must get gold because it has value in it and it can not be got out of it.

The values of everything change with circumstances, and the value of gold changes more frequently than the value of wheat. I have seen the value of gold on the board in New York change 10 points in twenty minutes, back and forth. Value is the estimation of man, and yet Senators get up here and talk about intrinsic value. Enlightened, intellectual, and scholar-like England does not talk in that way. I will read a very recent utterance of one of the most experienced men in England to show you how a philosophic and experienced English statesman views this question. I read from a letter by W. H. Grenfell, one of the ex-governors of the Bank of England.

[The Times-Democrat, August 30, 1893.]

CONTRACTING THE WORLD'S CURRENCY.

We publish elsewhere a letter from Mr. W. H. Grenfell, formerly governor or president of the Bank of England. Mr. Grenfell is an Englishman, and discusses the financial and commercial situation from the English standpoint, the closure of the Indian mints to the coinage of silver being a more important matter to him than the repeal of the Sherman law; but it so happens that the financial question just now is the same over the entire world, and what Mr. Grenfell says is as applicable to America as it is to Europe. As a matter of fact, his argument is decidedly American, for it is the view taken by the overwhelming majority of the American people.

Mr. Grenfell declares himself strongly in favor of bimetallism, and insists that the world can not get along with gold alone. "I feel convinced," he says in warning words, "that the attempt to make gold alone do the work that has always been performed by gold and silver is a folly and a crime."

This is a strong expression, but Mr. Grenfell gives his reasons for it briefly but vigorously. We are producing less gold to-day, he points out, than we did forty years ago, and more of it is lost in the arts, in jewelry, gilding, and dentistry, an enormous amount being diverted from coinage in these ways. With less gold in circulation, the demand for it is much greater. India is trying to get on a gold basis, and the United States will set up a further demand for gold. "Where is it to come from?" he asks.

And as trade and population increase—and they have never increased as fast as now—as the needs of the world grow greater and greater for more money, "we are throwing away what is practically half the money of the world by demonetizing silver."

"The fight against falling prices and stock depreciation is an impossible one," he declares; "men are holding on in hopes for better times, but no better times, taking trade and commerce as a whole, can come in gold countries while gold appreciates. The pitiable army of the unemployed must increase through no fault of their own. I believe that if England had not refused to coöperate with other countries at the recent conferences, owing to a wrong, selfish, and utterly mistaken policy, we should have escaped and other countries would have escaped the misery, suffering, and despair which have been so prevalent during the last twenty years, owing to the fatal policy of contracting the currency of the world."

The Times-Democrat pointed out these same facts Sunday, and showed the widespread and deleterious effects that have already resulted and would further result from the desertion of bimetallism.

BIMETALLISM—VIEWS OF A PROMINENT ENGLISH FINANCIER OF WHAT THE RESULT OF DEMONETIZING SILVER WILL BE.

The Manchester Guardian publishes the following letter from W. H. Grenfell, ex-governor of the Bank of England, to Albert Simpson, of Elmhurst, near Garstang:

"MY DEAR SIR: Your idea of a party to hold aloof from party squabbles and to devote all their energies in the first place to placing trade, commerce, and agriculture on a sound footing appears to me admirable, and I am willing to assist in any way that I can. The first necessity for attaining this sound footing is a stable measure of value. I have not missed much that has been written on currency subjects during the last nine years, and feel convinced the attempt to make gold alone do the work that has always been performed by gold and silver is a folly and a crime. In 1852 the gold produced in the world was thirty-six millions; now it is twenty-three millions. Since 1852 (when the world was practically bimetallic) Germany, the United States, Italy, and other countries have set up an extra demand for gold, which Mr. Goschen, in a paper read before the Bankers' Institute, estimated at a fresh demand for £200,000,000 upon gold. Austria is now trying to get £35,000,000. India is apparently struggling to get on a gold basis, and the United States will also set up a further demand for gold. Where is the gold to come from? As trade and population increase we want more money; by demonetizing silver we are throwing away what is practically half the money of the world. The demand for gold for the arts—watches, jewelry, dentistry, gilding—is enormous, and is increasing with the spread of civilization. Sovereigns are melted and gold is hoarded; gold is appreciating at some 6 per cent per annum; it is more profitable to hoard it than to invest it in commercial enterprises and in machinery, etc., which is depreciating, measured by gold, as gold appreciates. The fight against falling prices and stock depreciation is an impossible one; men hold on in hopes of better times; no better times, taking trade and commerce as a whole, can come in gold countries while gold appreciates. Employers of labor can not hold out forever against losses; and what will happen to the wage fund?

"The pitiable army of the unemployed must increase, through no fault of their own or their employers, and the work will be less well performed as the wages bill is cut down (in agriculture this is especially the case; the land is being starved of labor and the laborers are being driven into the towns). There is no question before the public of one-tenth part of the importance of the necessity for a stable measure of value. Local option may be good, the disestablishment of the Church in Wales may be good, the creation of parish councils may be good—these matters will be wrangled over for months; but supposing they were all passed into law to-morrow week, what appreciable effect will they have on the prosperity of the country? Or will any one say that all three together would have a result fit to be mentioned in the same breath as the closing of the Indian mints to the coinage of silver? I am dead sick of all this straining at gnats and swallowing camels. The first object of any government should be the prosperity and welfare of the country, and the prosperity and welfare of the country can not be secured unless the trade, commerce, and agriculture of the country are on a sound basis. Then can come the question of the proper and fair distribution of wealth and the hundred other questions which divide opinion. But the wealth must be there before it can be distributed. In my opinion, there is no greater obstacle to the creation of wealth than an unjust measure of value. An appreciation measure of value checks industry, stifles enterprise, and robs the industrious classes, while the bondholder, annuitant, and money lender thrives on the artificial cheapness. I believe the quantitative theory of money to be indisputable. I believe the evil of restricting the currency and causing an artificial fall in prices to be indisputable, and I believe that the fact that the present depression, agricultural and commercial, is mainly caused by alterations that have taken place in the currency laws is also indisputable. I also believe that if England had not refused to coöperate with other countries at the recent conferences, owing to a wrong, selfish, and utterly mistaken policy, we should have escaped and other countries would have escaped the misery, suffering, and despair which have been so prevalent during the past twenty years, owing to the fatal policy of contracting the currency of the world.

"Yours truly,

"W. H. GRENFELL.

"TAPLOW COURT, MAIDENHEAD, *August 5, 1893.*"

Mr. Grenfell is one of the ex-governors of the Bank of England, and I am told that every ex-president of that bank and every professor of political economy of the present day of any standing in England is a bimetallist. They have one or two statisticians who are in the employ of the gold men, but the leading thinking men of England see what is coming just as well as we do.

I have in my hand a contribution by Prof. Foxwell, in which he states the consequences to the masses, to the laborers, and to the whole human family

IF THIS GREAT OUTRAGE

is finally consummated. I wish Senators here knew as much about it as the leading men of England do, and I believe if they would not spend as much time in the cloak rooms, but more time in studying it, they would vote differently. They have not given this subject study. I am sorry to say it has not had the consideration it should have, and we do not compare in knowledge to the people of England. Our learned men who govern us are no more than children. I have here collected the pamphlets of different Englishmen who have elucidated this subject, showing that they understand it thoroughly. I am speaking of intellectual, honest England now. I will speak of the other England by and by.

I hold in my hand a contribution by the clearest-headed and ablest divine in the world,

ARCHBISHOP WALSH, OF DUBLIN,

the man who has done so much for the liberation of Ireland, for home rule in Ireland; the man who differed with his own church and stood by the people, who when the present home-rule bill came in criticised it. He looked at its provisions and felt called upon to furnish his first interview, in which he points out that home rule must necessarily be a failure if the policy of gold monometallism prevails. He alludes to the efforts previously made when the bill passed some twenty years ago, turning the matter over to the courts to determine what would be a reasonable rent when the lease was taken for twenty years. He says they made a rule that the rent should be about one-third of the crop. At first it was regarded as a great relief to Ireland, but it now takes more than two-thirds, on account of the appreciation of gold. Then he goes on to show that the provision in the home-rule bill for fifteen-year leases and forty-nine-year purchase will operate in the same way. He also shows how this affects the people of England with their mortgaged homes; how it depresses production, and how it is building up

THE COLOSSAL GOLD POWER OF ENGLAND.

Every American citizen ought to read the pamphlet of Archbishop Walsh. He is a great, good man, and I am rejoiced that any church can produce such a man, who has real sympathy with humanity. I am glad that pamphlet was written by a bishop in a church. It shows that even in the churches they can turn aside to think of the oppressions of humanity.

When we have on the one side this luminous contribution to the science and learning of this subject from England, we have coming from the other side that dark, cruel, revengeful force that is enslaving mankind. Take Egypt, for example. I will read what an Englishman says that this power did to Egypt. I read now from a little work entitled "The Economic Crisis," by Moreton Frewen:

To those who profess a convenient belief that, although the fall of prices increases the burden of national debts, yet that a lessened cost of production avails to right the balance, I would recommend a short study of Egyptian finances to-day. There is a nation of peasants, cultivators, 6,000,000 of people farming 5,090,000 of acres, whose agricultural implements are neither better nor worse than at the time when Joseph was sold by his brethren; nor is the tide of the same Nile, which to-day brings to market the produce of the same fields in similar barges, either faster or less fast than five thousand years ago. Twenty-five years since Egypt was free of foreign debt, but in an evil hour the ex-Khedive Ismail borrowed about a hundred millions sterling at enormous rates of interest in London and Paris. This money was not spent on internal improvements, but was squandered on the construction of twelve royal palaces in Cairo, and in the purchase of pictures and furniture for these palaces. The Levantine contractors who built the palaces made immense fortunes, and for the most part reinvested these fortunes in loans to the fellahin at rates varying from 2 to 6 per cent per month.

Truly a vicious circle! The Khedive pledged the homesteads of his subjects to borrow money in London. This money passed on to foreign mid-

dlemen, who in turn lent it at usurious rates to the peasantry, who were themselves the security for the original loans. The cultivators were in the pleasant position of having to pay, first, 7 per cent to the foreign financier, and a further 30 per cent per annum on the same money to the foreign contractor. To pay the interest on this national debt each acre of cultivated land in Egypt has to convert enough of its produce into gold to send almost a sovereign yearly to the foreign creditor. In addition to this, each acre has to contribute a further share to the expenses of the home government. The taxes of Upper Egypt are collected not in money, but directly in produce. The lower prices fall the greater the amount of produce which is appropriated from each acre to pay the sovereign required of it. Since the time the debt was contracted the prices of the staple products of Egypt—cotton, sugar, wheat, and beans—have fallen more than 50 per cent. The revenue for the current year shows a small surplus over the Budget estimate, simply because cotton has risen nearly a penny per pound and sugar about 3s. a hundredweight. But if prices are to fall still further, the gold payments which Egypt owes to England can only be exacted from a starving nation by the most merciless exactions, and by the free use of the kourbash. Here is an instance, an extreme instance, I admit, of that "appreciation of gold" about which philosophers with fixed incomes write so complacently, and which is said to be for the advantage of England, the creditor nation.

Then he speaks of other countries. I have looked at the finances of Egypt, and I find that they not only have to pay out of their 5,000,000 acres of land $25,000,000 in taxes to the English but they are taxed to raise a revenue to support the English army and carry on the Government between $27,00,000 and $28,000,000 more, making from $8 to $10 an acre each year. That is

THE HUMANITY OF THIS CRUEL ENGLAND.

That is the Government of England when she has the power. These speculators bought the bonds. The extravagant Khedive sold them. He failed to pay the interest, and then this concentrated power in England sent the English army there, sent the ironclads and battered down Alexandria, and placed English officers over them as collectors. I saw a year or two ago a strong protest from that other England against the use of the lash in Egypt. It was referred to the war department for report. They reported that the lash was necessary to collect the interest, and there the matter stopped. It only marks the conduct of the monster England that is ruling us to-day. It was only one step in this history.

Look at India. The history of wrongs there never had a parallel on earth. The other day the money power of England demonetized silver in India. What does that mean? It means that the thousand million dollars or thereabouts of uncoined silver which the Indians have hoarded from time immemorial, and which they worship and which they convert into coin when the hour of necessity comes,

SHALL BE CONFISCATED

and shall not be coined into rupees. It means that the Indian debt shall be doubled and paid in gold. It means more taxation, more slavery, more cruelty, more oppression, more hard times, more suffering. See what England has recently done to Austria. She made Austria, her debtor, change her $2,400,000,000 of 5 per cent bonds, payable in silver, into $2,800,000,000 of 4 per cent bonds, payable in gold. That is the way she deals with her debtors.

What has England done to Italy? Let the starving multitudes of that country answer. It was England alone that forced all these countries upon a gold basis because they were her debtors and she wanted to increase the obligation—I mean unrelenting, tyrannical England. This was the England for which Gladstone spoke when he said the outside world

OWED THEM TEN BILLION DOLLARS,

and it would be great folly in them to remit one cent; they must not only have the pound of flesh but the last drop of blood of these oppressed nations.

What has England done for us now? She has thrown us into a condition of panic. She has drawn out the gold to carry out her scheme of plunder in Austria, and for other purposes has created a panic; and the gold comes here to buy back the same securities at 40 per cent discount. That is the England with which we are dealing.

In this connection I should like to call attention to the mode proposed to get even with the tyrant England—not the learned, decent, generous, humane England, but the tyrant England. How are we going to get even? Every morning we find in one of the

ORGANS OF THE GOLD PARTY

down here—the Post—the following:

THE SURE ROAD TO BIMETALLISM.

The way to force Europe to agree with us upon international bimetallism is for the United States to stop buying silver and buy gold.

The repeal of the Sherman law is only the first step. If we follow it up by getting our share of the gold of the world, we will compel England to come to our terms.

That is the proposition. Now, the teachings of the Senator from Indiana [Mr. VOORHEES] before he went over to the gold side of the question have done much good, and I can pardon almost anything in him, because he instructed his people upon this great question so that we see the fruits of it. I hold in my hand a pamphlet written by a

MR. WOLCOTT, OF INDIANA.

which states the condition we will be in in not trying to get the gold away from England. I ask the Secretary to read it, omitting the portion which I have marked through, which is not quite pertinent. I ask the Senate to pay attention. The writer has figured it out better than any of us have done.

The PRESIDING OFFICER (Mr. PASCO in the chair). The Secretary will read as requested.

The Secretary read as follows:

NO INTERNATIONAL BIMETALLISM INCLUDING GREAT BRITAIN IS POSSIBLE.

In England, since the time of the civil war in the days of Cromwell and Charles I, near two hundred years ago, the steady workings of agriculture, manufactures, and other productive employments have had little direct disturbance from military interference, and the exchanges of the merchants have been unhindered. During the same time, in continental Europe—France, Spain, Italy, Germany, and other nationalities have been fought over many, many times. Mutually they have devastated and wasted their fields of agriculture; their manufacturing cities have been captured, sacked, and burned, and their stores of merchandise have been seized and carried away. These countries have been impoverished by withdrawal from the industrial pursuits of millions of men who have been engaged in war, and they have been further impoverished by the direct and vast expenditures of war.

On the other hand, England, safe in her insular seclusion, rich in an abundance of coal and iron, the valued and necessary elements of mechanical and manufacturing force, with a people of great capacity and energy, has for nearly two hundred years sold her surplus productions to the governments and people of the different European nations in time of war at war prices.

In all ages history informs us the nations of wealth have been the manufacturing and commercial nations. England, with the special advantages she has possessed, has become, beyond all example in history, the richest nation in the world in money wealth. Fifteen years ago Ricardo, an eminent political economist and statistician, estimated that the people of Great Britain enjoyed investments among other nations to the amount of $7,500,000,000, on which was paid to the people of England in interest and dividends 5 per cent per annum, or $375,000,000. Mr. Gladstone in a recent speech in Parliament in opposition to bimetallism estimated the amount of investments by people of Great Britain in other countries at $10,000,000,000.

At 5 per cent this would give the English an interest and dividend account from nations foreign to Britain of $500,000,000 a year. Mr. Gladstone further said "the amount was constantly increasing; that they owed nobody, and everybody owed them, and with such advantages as they possessed it would be folly for them to adopt bimetallism." It would be so great a folly for England, that England is sure to maintain the advantage which she enjoys in the single gold standard. There is no chance for universal international bimetallism, with England wedded to the single gold standard, by her vast money interests and the profits derived therefrom. The annual income of few nations of Europe equal their annual expenses. Such do not really own themselves. It is estimated that 22,000,000 of soldiers are maintained, at an annual expense of $800,000,000, by different nations of continental Europe. England, now owning of securities and properties of other nations to the amount of $10,000,000,000, with annual income from them of $500,000,000, is probably as rich in money as all the rest of Europe combined, as nearly all European nations are heavily indebted, and most of them have no money surplus. England insists upon the single gold standard; and England is able, from her condition of universal creditor, to maintain her position. Therefore no international bimetallism including Great Britain is possible. Under present conditions the United States has not free choice. Necessity is dictator. The gold basis is but a trap.

There is an insufficent supply of gold to meet the wants of this nation with money actually on a gold basis, and of the other nations which are striving to get on a gold basis, as is proven by the struggle for the possession of gold and by the distressing derangements extensively prevailing in different parts of the world, wholly owing to an insufficent gold supply for those seeking gold. Witness the downfall in the securities of the Argentine Republic and the ruin of the old and once rich banking house of Baring Brothers, of London, England; the financial wreck of Italy, striving for a gold basis; the purchase of gold for a money use by agricultural Austria, with the expense of her great armies, near 2,000,000 men—a gold basis which Austria will never be able to maintain any more successfully than did Italy; and the widespread, extensive bankruptcies and financial ruin in Australia. All these indebted and overborrowed nations were encouraged by the great money-lenders of Europe to assume to be upon a gold basis, without the possibility of gold to maintain such basis. But for such encouragements the efforts to become established on a gold basis could never have been tried. In the wreckages of the great properties, securities, and estates which the money-lenders have wrought, they can buy at their own price things of greatest value.

What matters it to them what destruction they bring upon others if they secure their many "pounds of flesh," and blood as well? More near and more interesting to us is the financial condition of our own country. Ever since the close of the late civil war the United States has presented to European money-lenders the safest, most extensive, and most profitable fields for investments of money. South America, Africa, and Australia, compared with the United States, have not been very inviting fields for investments, and while these countries have, as we know, received some European moneys, the United States has received very much more.

Hugh McCulloch, Secretary of the Treasury, in his report for the year 1868 estimated that Europe then held $850,000,000 of American securities, "on the greater part of which interest was being paid in gold." He says railroad and other stocks are not included in this estimate. He further says: "We are even now increasing our debt to Europe at the rate of $60,000,000 to $70,000,000 per annum in gold-bearing bonds." He further says: "Of the $1,300,000,000 of the gold and silver products of California and the Territories, produced since 1848, we have exported $1,100,000,000."

WAS THIS VAST EXPORT OF GOLD AND SILVER, LARGELY GOLD, IN ANY PART REALLY DUE TO THE SHERMAN SILVER LAW, ENACTED IN 1890?

The monetary commission appointed by the Government of the United States in 1876 estimated that the foreign indebtedness of the United States could not then be less than $2,000,000,000. Since 1876 foreign investments, mostly English, have continued to increase very largely.

Mr. Gladstone claims for Great Britain ownership outside of Britain to the amount of $10,000,000,000, which is mostly on a gold basis. That indebtedness, including ownership of different properties, can not now be less than $4,000,000,000 or $5,000,000,000 in the United States.

As there are in all the world but about $3,600,000,000 in gold, in money, on a gold basis, Great Britain completely dominates the world. World-wide financial disorders are prevailing, owing to the efforts of money-lenders for their own profit to establish gold as the single and universal money standard, without the gold being in existence to meet such extensive and universal use, even if gold were equally distributed among the nations of the earth.

Much more serious than a general lack of gold for all the world's monetary uses is the unequal distribution of gold among the various nations. Some have much, others but little, some none.

As related to us, Great Britain has the financial strength of a great creditor nation; the United States the financial weakness of a great debtor nation. Our gold can be called from us whenever the interests, necessities, or caprices of foreign investors or creditors dictate the call. And we are helpless to resist these calls as long as we, in practice, maintain the single gold standard; as witness the current financial history of the day. On the single gold standard, with the present great demand for and the limited supply of gold, no debtor nation can maintain such gold standard, as against a creditor nation, except by sufferance.

Practically the United States are borrowing gold on call. In this regard we have no independence whatever. Let the United States, by legal enactment or otherwise, make gold the exclusive money basis, and we will be a completely ruined people. As the result of what has been done by the Government of the United States already, and as the result of what is foreshadowed, the industries of the country have been paralyzed; business men have been bankrupted; laboring men have been thrown out of employment, and a universal depreciation of property values has occurred East, West, North, and South; everywhere throughout the United States, and to an amount, within the last six months, equal to the whole money cost of the late war. For whose benefit is this? Not the people of industry, for they are suffering. This wreck and ruin is for the profit of the money-lenders of Europe and the United States. Out of the depreciated property values in railroad and every other kind of investments, the money-lenders select their prey at their own prices and those who before were exorbitantly rich become richer at the expense of and by sacrificing the men of industry, who are the stay and support of the nation.

The money-lenders and their advocates say they do not want cheap money. For once they have not lied. They do not want cheap money. They want it as dear as by any possibility they can make it. But there is no cheap money in the United States. Of whatever material it may be; in whatever form it may exist; to whatever issue in money form, the laws give the money function; all is equally money in the United States, to pay all debts and obligations, and to purchase all kinds and forms of property. What can our people desire more? What can they have better?

In the effort to exclude silver from the money use in the United States, which the money-lenders falsely call cheap money, the money-lenders have made cheap labor, cheap farms, cheap factories, cheap wheat, cheap corn, cheap cotton, cheap everything among us that has its value measured by money; and a cheap nation, for all we have seems to be in the market at the depreciated prices fixed by the money-lenders.

The gold monometallists falsely claim that the export of gold is caused solely by the existence of the silver certificates issued under what is called the Sherman law of 1890. The Director of the Mint in his report for 1892 (page 42) states: "The heavy export of gold commenced in 1888, aggregating to July, 1889, $61,435,989. In the summer of 1890 another movement commenced, which continued for two months, with a total export in that brief period of $15,672,982."

THE SHERMAN LAW HAD NOT THEN BEEN ENACTED.

As a result of the collapse of the Argentine Republic's securities in 1890, the failure of the English banking house of Baring Brothers in 1891, gold was exported to the amount of $70,233,494. No Sherman law in this. Gold was taken because it was needed.

Besides we have had large balances of trade against the United States. English failures in Australia have occurred, and also gold demands in Austria. These are the sufficient causes for the export of gold from the United States; not the Sherman law, which has had no more necessary influence than the "idle wind." * * * If the United States shall have such a supply of money as will properly represent its property values, and such as is required for the best condition of its productive interests and exchanges, imperative necessity demands that the basis be broad in proportion to the extent of the country, the number of inhabitants, the amount of property and business which require a money repres entation, regardless of all interests except the interests of the people of the United States. There are methods by which we can meet our foreign obligations without the folly of self-destruction.

The purchasing clause of the Sherman law should not be repealed, except in favor of some law that will assure to the American people a fuller supply of money for Americans, and that would be a coinage law, with the coin to circulate. With Great Britain's holdings of $10,000,000,000 of investments outside of Great Britain, with probably one-half of all such holdings in the United States, much of them calling for gold payments, with but $3,600,000,000 of gold among all the nations of the earth, we have conditions that leave the money markets of the United States subject to being cornered at any time; which is in effect a corner of all our pro erty of every kind that is in the market, causing the stoppage of business and the destruction of values, as we are now sadly experiencing. On a gold basis, under the condition now upon us, we can not avoid these disasters whenever the gold-holders choose to inflict them. Therefore, as we have no inde endent power to control the supplies of gold, no single gold standard is practicable nor possible for the United States.

Witness the recent large exportation of gold, which we would not have permitted if avoidable, creating a money corner of great stringency, to which designing men have added a destructive and terrible panic by misrepresentations designed for such effect.

Recently there has been added to the single gold standard countries vast and populous India; two-thirds as populous as all Europe, a people, too, known to be great hoarders of money.

If the gold supply for all the nations (only $3,600,000,000) was before much short of what was needed, how will other nations fare with India's 200,000,000 of people added to those striving for gold? Those, now short of an adequate supply of gold, will be reduced to increased destitution of that scarce metal.

But the supreme evil in our unfortunate situation is that our rulers do not appear to apprehend our financial conditions.

The Sherman law, which, though faulty, need not here be criticised, was by the Administration of President Harrison, and is by the present Administration enforced contrary to the plain and proper sense of one of its most important provisions; that which declares that it is the policy of the Government of the United States to maintain the parity of gold and silver.

Whoever has received from the Government a silver certificate, or otherwise obtained the same, has taken it subject to the law of redemption in silver. Such holder has neither legal nor moral right to insist upon anything but silver in the redemption of such certificates. The Government under the circumstances should do as a private individual would do, where it had both legal and moral right on its side; it should be governed by its own interest and convenience.

The Government had abundance of silver; it had not abundance of gold. On the contrary, the lack of gold amounted to financial distress, affecting our whole country and people. The payment of gold to the holders of silver certificates, under the facts as they have existed, was a maladministration of the law. Fifty million dollars of gold needlessly paid, where silver was due, has done much to shorten the Treasury supply of gold and to produce the panic.

The intention of the Treasury Department to continue this policy is a present national calamity.

It is not a maintaining of the parity of gold and silver, or even an attempt at so maintaining such parity. The enemies of silver have been permitted to work their will against it.

The occasion of recent gold imports has been no general balance of trade in our favor. It has been of gold sent here to pay for our securities, sold to foreigners, at the lowest prices of a destructive panic. It is robber money sent by foreigners to obtain the property of Americans at half their intrinsic value.

The question of complete bimetallism is a question of vital interest to all the people, of property, industry, and labor in the United States.

We are now virtually a financial dependency of Great Britain.

The history of Britain, in the treatment of those in her power, has been a long history of cruelty and oppression. We are now victims. How long are we to remain such?

A. WOLCOTT, *Wolcott, Ind.*

Mr. McPHERSON. Who is the author of that paper?

Mr. STEWART. A. Wolcott, of Indiana. He signs himself A. Wolcott, of Wolcott, Ind. The Senator from Indiana need not be ashamed of him; he is from his State. I know him only by this paper, and if men are to be judged by their works, if "by their fruits ye shall know them," he is a great man, because he has given facts that show a very strong case against the folly we are asked now to perpetrate. He has shown in this paper that we propose ta make a contest with the money power of England, that has at its command all the bonded indebtedness of the world, that has a demand on us for from $3,000,000,000 to $5,000,000,000. It is proposed to make a demand upon them for the purpose of bankrupting them, to take their gold away from them; and the way it is proposed, by the promoters of this scheme and by pretty nearly all who have advocated the repeal of the Sherman act, is to borrow more gold. Suppose we should borrow $150,000,000 a year, we shall have to pay them back with interest. They can afford to lend us the interest. If they would lend this country the interest we would have to pay them back again, and allow the debt to remain as it is; and on the present debt, if we do that, we would have to increase our national debt from $150,000,000 to $300,000,000 and make it $300,000,000 a year.

Do you suppose we can deprive them of gold by selling bonds and

BORROWING MORE GOLD OF THEM

and paying them more interest? That is the proposition, and this gentleman from Indiana has made a statement of it that Senators ought to examine. He has shown how completely all the nations of Europe, except perhaps France, are absolutely prostrated at the feet of this money power. He has shown that this money power has already created this panic and has abundant power to create a panic whenever it will suit it. He has stated facts that are open to the examination of everyone, and that shows the proposition to repeal this act and borrow gold the most wicked and monstrous ever suggested for any legislative body.

This same monster, this cruel tyrant, moneyed England, has been operating

TO DEFEAT THE CLAIM OF BIMETALLISM.

It brought the United States to monometallism; it made it discard silver. That I abundantly proved yesterday. The Senator from Ohio [Mr. SHERMAN] said in March, 1876, that it was English influence that secured the demonetization of silver in this country. We know it was at the command of England that Austria was put on a gold basis last year. Her English creditors demanded it. We know it was the action of England that put India on a gold basis. Did not that suit the money power of England? Now you propose to make them quit by giving them supreme power, to make them quit by giving them the opportunity to put the people of the United States where the people of Egypt, India, and Austria are.

I said it was England's influence, and I said, by the authority of the man who demonetized silver in this country [Mr. SHERMAN], that

ENGLAND SECURED THAT DEMONETIZATION.

I say, further, that England appeared at your monetary conference in 1878 and broke it up. She again appeared at your monetary conference in 1881 and broke it up. She again appeared at your monetary conference in 1892 and broke it up. There is one thing about it, the present Executive is not going to play this farce any further. I said it was a farce when we attempted to play it last year. I am thankful to President Cleveland that he does things straight. He says what he is going to do, and he will not engage in a farce.

HE IS A MONOMETALLIST,

honest, consistent, vigilant, affirmative. His surroundings are all monometallic. He believes in the New York policy and carries

it out; but he does not believe in any fraud or farce in attempting to get England to help carry it out. There was a good deal of talk about this when he was President before, and he sent some commissioners over to Europe to see whether there was anything in it. I read now from his annual message sent to Congress in December, 1885. The President's message can always be found anywhere, and I need not give a reference:

To this end I delegated a gentleman well instructed in fiscal science to proceed to the financial centers of Europe and, in conjunction with our ministers to England, France, and Germany, to obtain a full knowledge of the attitude and intent of those governments in respect of the establishment of such an international ratio as would procure free coinage of both metals at the mints of those countries and our own. By my direction our consul-general at Paris has given close attention to the proceedings of the congress of the Latin Union in order to indicate our interest in its objects and report its action.

It may be said, in brief, as the result of these efforts, that the attitude of the leading powers remains substantially unchanged since the monetary conference of 1881, nor is it to be questioned that the views of these governments are in each instance supported by the weight of public opinion.

The steps thus taken have therefore only more fully demonstrated the uselessness of further attempts at present to arrive at any agreement on the subject with other nations.

We have had one trial since that, and it is still further demonstrated. I said it was a farce at the time, and it has proved so. Now it is said that if you will only prostrate yourself, rob the people, adopt the gold standard, you can impoverish your creditors, to whom you owe $3,000,000,000, by taking the gold away from them so that they will want you to have cheaper money. Others have said all you have to do is to sell your products cheaper and cheaper and buy gold and you will bring them to terms.

But all agree that the United States should be at the mercy of the Shylocks; all agree that before there can be any relief, Shylock must have his pound of flesh, and that there is nothing nominated in the bond which prevents him from taking the heart's blood. That is the position into which they propose to drive the United States.

A MORE WICKED,

relentless, and cruel proposition never has been suggested than that we, a debtor nation, should abandon our own monetary system, adopt England's, and attempt to get her gold.

Now, see what we are and what we might have been but for the act of 1873. We have had since the war nearly thirty years of abundant harvests without anything to impede our progress. So far as our country is concerned, so far as the seasons are concerned, so far as the health of the community is concerned, and so far as the unlimited resources of the country are concerned, everything but the trick of 1873 has been favorable. But for that trick, we would have been the greatest financial nation in the world; we would have been stronger in money than any other. We have produced an average of about $65,000,000 in silver and $33,000,000 in gold, or nearly a hundred millions a year of the precious metals, for the last twenty-seven years. If that amount had been coined, and the people had it as a basis,

WHAT NATION ON EARTH COULD RIVAL US?

We have vast mineral resources of all kinds, greater in extent than any other country in the world, particularly gold and silver. Our near neighbor and our friend on the south, Mexico, has furnished more gold and silver for the world than any other country. Her mines are being reopened, until we have a continent of wealth. When this fatal act of 1873 was passed, silver had been better than gold as money for all the ages, and our silver dollar had 3 per cent more silver in it in proportion to gold than that of any other country. Our mints were open.

What we should have done was to reduce the quantity of silver in the silver dollar so as to have had a uniform ratio with Europe. But that was immaterial. Just before the fatal act was done, notwithstanding we were in suspension, notwithstanding there had been only a little over three million silver dollars coined since the foundation of the Government, when the Comstock and other mines were developed our miners commenced to take their silver to the mint. If they had not been cut off, if they had continued to take it in the same proportion that they did from the 1st of January to the 12th of February, 1873, we should have coined about two and one-half millions that year. There it was, and

THE MANIPULATORS OF EUROPE

understood it. They understood that we would be compelled to borrow money of them if they could close our mines.

The crime of 1873 was committed secretly, so as not to arouse the attention of the American people to the robbery. For twenty years the American people have struggled to get back their rights. What a monstrous proposition, that in the dark, secretly, the great mining interests of the United States should be at once confiscated and the people of the United States denied the right to mine and coin their own money, and be compelled to borrow money of Europe! Being so compelled, they have done it, and the indebtedness has been doubled in the last twenty years, and goes on increasing year by year. The more it increases the harder times become,

THE MORE PROPERTY FALLS,

and the more labor and suffering are required to pay the demands of Shylock and his associates in this country. That is the situation.

Now we are called upon by a solemn act to sanctify and justify that crime of all the ages. The attempt of this extra session is to take a snap judgment on the people. You dare not submit this question to the people, and yet you have the audacity to tell me that a subsidized press, which surrounds this Capitol and keeps the news of what is going on from the people, is the voice of the people!

Let us see what were the issues of the last campaign. The platforms of the Democratic and Republican parties have been frequently read, and both declare for bimetallism. What is proposed here as to that issue? I stated yesterday that I told my people that it was

A FALSE PRETENSE

to claim that the tariff and the force bill were the real issues. I repudiated the managers of both political parties for their insincerity to the people, and said that I would support neither party; and I was right. Here is what the press said as to the issues on which the Democratic party came into power. I take the New York World, which is cracking the whip daily over the Senate and seeking to make it a blind tool and servant of the money power of Europe. The New York World of June 27, 1892, says:

AN ISSUE ELIMINATED.

It is the general opinion of conservative men that the Democratic silver plank is stronger than the Republican.

Whatever the platforms may say, however, the silver issue is not in the present campaign. As the World has urged, this issue has been sent to the rear, behind the tariff, the force bill, and billion-dollarism. * * *

Not only is the silver question not an issue in the present campaign, but there is a wholesome sign in the excellent Democratic plank that when it comes up for serious consideration, it will be dealt with on business principles and will not be made the sport of politics.

[New York World, June 30, 1892.]

THE REAL ISSUE.

Neither party could escape the tariff issue if it would. Neither party has shown any disposition to do so.

The candidates and the record of the two parties make up the issue. * * * Neither the resurrected old "free trade" bugaboo on the one side, or the iridescent dreams of idealists on the other will divert the voters from the real issue * * * and it is upon this that the World bases its confident assurance that the next President will be a Democrat.

[New York World, October 6, 1892.]

FUSION A DUTY.

There are several States in the Northwest where the Republican party is in the minority, but where the Democratic party is not in the majority. * * * Although there may be differences of opinion on questions of principle between Democrats and their allies, there is agreement on the essential principle—hostility to the robber tariff. * * *

This duty first attended to, other problems can be settled.

That was the duty to be first attended to, and yet from the mouth of every gold advocate the cry now is that the first duty is to repeal the Sherman act

AND ESTABLISH MONOMETALLISM.

What insincerity! Talk about the voice of the people, when you lie to them in that way during the campaign!

The Democratic party comes in here like a Trojan horse, prepared to destroy the country; it comes in disguise into this Capitol, with armed men, to strike down the liberties of the people. Pretending to be a harmless thing and just going to fight the tariff and tariff battles, when it gets in power it turns out that it is the enemy of mankind and seeks to strike down the people's money and reduce the masses to poverty and want.

I believed this would be so from what I saw before I left here last year, and I acted upon that belief, that if either party got into power under the pretense that the tariff was the only issue, they would strike a deadly blow at the most fatal part of our financial system, would

SANCTIFY THE INFAMOUS ACT OF 1873,

and leave us in the grasp of the money power of Europe. I have not been deceived,

[New York World, October 17, 1892.]

THE WESTERN REVOLT.

* * * The conditions are wholly different in the two sections. At the South the Democrats who have been in revolt are in sympathy with their party upon the main issues before the country—the tariff, the force bill, and the black Republican record generally for the past four years. * * * In the West the revolt of the farmers was, and is, against the cardinal principles and the current policy of their party. They are against the high tariff.

[New York World, November 5, 1892.]

A LAST WORD TO THE WEST.

The telegraph can carry to the Democrats of the Northwest this last appeal: * * * Complete the revolution begun two years ago. Down with high tariff! Down with trusts, monopolies, and plutocratic rule!

When they get here they raise the flag of plutocratic rule and say it is the will of the people. In November it was "Down with

plutocratic rule;" but no sooner had the victory been won than you raised the flag of the plutocrats of the world and said that it was your purpose and that you were sent here to double the obligations of contracts, increase the power of the plutocrats, and humiliate and degrade your own people. Talk about obeying the will of the people! It is a mockery and an outrage that you should claim you were elected to demonetize silver when you were elected for a wholly different purpose.

I select these papers because they are leading the crusade to stampede the Senate and to deny to it the right to exercise its legitimate function to-day. They say, "Vote first, and discuss afterwards." I am not surprised that they should dread discussion with such a record as this to be presented to the country.

[New York Herald, June 24, 1892.]

* * * The [Democratic] platform is squarely representative of Democratic principles. It is right on tariff, right on silver. * * *

[New York Herald, June 28, 1892.]

* * * It is to be a battle of political policies. * * * The banner of one army will represent high taxes, while that of the other will represent the lowest taxation consistent with current expenses of the Government. * * *

[New York Herald, September 14, 1892.]

In the letter which appears in this morning's Herald, Murat Halstead concedes the claim of the solid South. * * * The force bill brass band bellowing has had influence in the South. * * *

That is true. You told the people of the South on every stump and everywhere that they must stand by the Democratic party to prevent negro domination, and that they must sink all other questions. All of you told them that. I read your speeches, and saw what position you took. You told them that they should send you here to protect them from negro domination, to protect them from unreasonable taxation. You showed them your constant record

IN FAVOR OF BIMETALLISM,

and they believed you. Will you now say to this people "We deliberately deceived you; we have got into power under false pretenses, and we will rob you of the most sacred right which you have demanded for the last twenty years in every convention and on every stump?"

[New York Herald, September 26, 1892.]

* * * Nor is there likely to be any radical change of policy. * * * There is but one issue in which the people are practically interested—the tariff.

[New York Herald, September 27, 1892.]

* * * That tariff reform is the vital issue of the campaign in the estimation of Mr. Cleveland, is made clear by his letter of acceptance.

Vital issue! He has said not a word about it except incidentally. The fact is that now the vital issue is to take away the constitutional right of the people to coin their own money; and the vital issue has been made since he got into power.

The New York Tribune concurred with the Democratic press as to what the issue was, and the Republicans came here with the same claim that the Democrats did: that they would carry out the views of the party on the issues of the campaign.

[New York Tribune, June 14, 1892.]

WHAT BUSINESS MEN WANT.

* * * The influence of all conservative business men will be powerfully exerted during the next five months to prevent the unsettling effects of a Democratic victory for so-called tariff reform. * * *

[New York Tribune, June 16, 1892.]

ISSUES OF THE CANVASS.

* * * The chief issue which his [Cleveland's] party will advocate is peculiarly his own. * * * "The people's cause of tariff reform" will be the cardinal doctrine of the Democracy in this canvass. * * * "The consecrated cause of tariff reform." * * *

Protection is a stronger policy to-day than it was in 1888, and it was a winning issue then. It is a winning issue now.

[New York Tribune, June 21, 1892.]

* * * Behind Cleveland is a party which in the last three years has declared for free silver in thirty-one State platforms, and in two Congresses has voted for free silver bills with substantial unanimity.

[New York Tribune, June 23, 1892.]

THE DEMOCRATIC PLATFORM.

Everybody knows that the great majority of the convention [Democratic] was disposed to adopt an unequivocal free-silver platform, * * * but on the great questions of the hour the Democrats have not dared to speak the truth. They mean what they do not dare to say. It is a free-silver platform. * * * It is a free-trade platform. * * *

[New York Tribune, November 2, 1892.]

THE VITAL QUESTION.

The vital question this year is whether an American or a British industrial policy shall prevail. * * *

[New York Tribune, November 10, 1892.]

* * * But we desire to be perfectly frank on this subject also. The election [Tuesday, November 8] means, we suppose, that a majority of the American people is made up of those who are not unwilling to see the economic doctrine of the Democratic platform put into practice. * * *

Thus they met the issue, and thus they have changed it. Can anybody say that we are not now here to take a snap judgment upon the people? How dare any newspaper, which said through the whole canvass that the tariff was the only issue, come forward now and say that the people of the United States demand this legislation?

All public men of all parties

SINCE SILVER WAS DEMONETIZED

have claimed that they were bimetallists. The only question was how to accomplish bimetallism. They dared not speak their real sentiments, if they were monometallists, for "there is no vice of so simple a form but assumes some form of virtue in its outer part." It is the old idea that those who claim to be bimetallists would not let the country have bimetallism, but they had to pretend that they favored it. It is the old-fashioned way of putting on "the livery of the court of heaven to serve the devil in." Many of them have done that, but they had to assume to be bimetallists to get here. All of you had to do that.

Now we are impudently told that we have come here to do England's will; that that is the demand of the American people. I have here the New York Times, and I might take all the papers and show how they misrepresent their constituencies. That paper goes on to say how nearly 40,000,000 people were represented in the House of Representatives by those who

VOTED TO DEMONETIZE SILVER

the other day. They voted to carry out the edict of the money power, but they are held up to us as men who obey their constituents, and we are told that only a few million people are represented by those who voted the other way.

What a comment it is on the fidelity of the representatives of this Government to the will of the people that those who represent 40,000,000 voted to sanctify and ratify the act of 1873, which all have condemned and nobody has excused, which has been condemned in every canvass and on every stump! It is an issue which they dared not submit to the people squarely in a Presidential campaign and which they claim was not a party issue. Nearly everyone who has been elected to either House of Congress for the last twenty years has been elected as a bimetallist in some form; but now they say that voting against bimetallism and voting for the single gold standard is fidelity to the people, while voting as they promised for twenty years and as the people have demanded all that time is infidelity to their constituents!

THE EFFRONTERY AND THE AUDACITY

of such a proposition surpass the comprehension of man and presuppose that the Senate is ignorant of the history of the country.

Then, on top of that, they say "Vote first and discuss afterwards." If we would not expose this enormous rascality, if we would not expose this duplicity, if we would not expose this betrayal of the dearest interests of the people here on this floor, we should be unfit to represent the people.

The situation has been well set forth in a publication in the New York Daily Indicator of August 30, 1893, which I desire to have read. I will ask my friend from Oregon [Mr. MITCHELL] to read it for me.

Mr. MITCHELL of Oregon read as follows:

AFTER SILVER, WHAT?

It is possible to expect too much to result from the repeal of the purchasing clause of the silver act of 1890, even admitting that the repeal is practically assured. The mistake having been made in assuming that the silver law was responsible for every disagreeable thing that has happened, it is more than likely that there will be more or less disappointment over the results to follow the repeal of the law. It is even possible that the repeal may take a different shape from that now suggested by the action of the House of Representatives.

It may be that the Senate will agree to the Wilson bill, although we should not be surprised if it brought forth a compromise measure, just as was done in 1890, when it was a question of free coinage, or what? Now it is no silver coinage or what, and if the Senate should bait a silver hook with an abolition of the tax on State bank notes, for instance, there might be a new phase put upon the question. With all the bell ringing over the big majority against silver in the House, the fact remains that the party in power has a very strong leaning toward silver, and any plausible excuse would cause a majority to take sides for silver. In 1890 the Democrats in the House voted 112 for free coinage and only 12 against. On Monday 100 voted for free coinage and 114 against. This would indicate a sweeping change in the sentiment of Congress on this question but for the fact brought out many times during the discussion that every trick of influencing, by threat and by promise, was played to catch votes for repeal. The distribution of "pie" was frequently alluded to, and reference to the "pressure" brought to bear upon refractory Congressmen was made in no doubtful terms. In spite of it all the dominant party barely records a majority against free coinage.

More than this, that part of the country whence comes the greater proportion of the representatives of the President's party is largely represented by silver men. At the very last ditch, when all was up with silver and the final vote on the bill to repeal the purchasing act was taken, we find Alabama voting 6 against the repeal, 3 for; Arkansas, 5 against, 1 for; Florida, 1 against, 1 for; Georgia, 4 against, 6 for; Kentucky, 2 against, 8 for; Louisiana, 2 against, 3 for; Maryland, none against, 6 for; Mississippi, 6 against, 1 for; Missouri, 12 against, 1 for; North Carolina, 7 against, 1 for; South Carolina, 4 against, 1 for; Tennessee, 5 against, 3 for; Texas, 9 against, 4 for; Virginia, 2 against, 8 for; and West Virginia, none against, 3 for; a total of 66 against, and 50 for repeal.

He would be very unwise, indeed, who refused to heed the sentiment of those fifteen States, and that sentiment was more strongly expressed in the vote on restoring the old act of 1878, the total vote of those States being 90 in favor, against 34 opposed. That the silver question is not settled, and will not be settled by the repeal of the silver-purchasing clause of the act of 1890, is almost certain, even assuming that the Senate will follow the example of the House.

Back of this question is, What are we going to do with our currency system? We have a national-bank currency, which is of prescribed volume and can not be extended very much under the present system. We have a silver currency, which will also be limited to the present amount as soon as the Government stops purchasing silver. We have a legal-tender currency, also limited to its present volume unless Congress enacts new laws to increase the issue of Government notes. Remaining, there are only gold coin, which may be minted to any amount within the capacity of our mints, and gold certificates, which may be issued to any extent not to exceed the gold deposited therefor.

What, then, is our currency to be hereafter? If we are to have increased issues of money, what kind of money is it to be, and how much? It must be seen that we have just got to the beginning of our currency legislation, instead of to the end of it. After silver, what? Well, it will require all the wisdom of the greatest minds of this country to solve the financial problems that are now about to present themselves.

Mr. STEWART. I have another communication here from James H. Monroe, who was chairman of the committee on resolutions at the meeting of bimetallists in New York a few days ago. Mr. Monroe is an eminent law writer, and has written one of the best books on what he terms The Two Sides of the Silver Question, of any American. He understands the situation well, and in his letter he sums up the present status in such a way as to throw much light upon the subject. I should like to have that read by the Secretary to go in the RECORD. Inasmuch as it is constantly said that we are not obeying the will of the people, the present status is very important to show where we are and what we are doing.

The PRESIDING OFFICER. The paper referred to will be read in the absence of objection.

The Secretary read as follows:

NEW YORK, *August* 30, 1893.

RESPECTED SIR: I respectfully address you as the chairman of the mass meeting of the bimetallists of New York City, a city whose representatives in the Congress of the United States have so lately repudiated the national platforms of both the great parties of the country, and that, too, while hundreds of thousands of their constituents are being prevented from starving through the charitable gifts of bread doled out to them one loaf at a time, because the number of hungry people are so much in excess of the means of those who so generously seek to aid their starving fellow-citizens of a country where bread is selling for less than its cost of production,

I read with regret and humiliation this recent action of the lower House of Congress on the great financial question now before the country as regards the unconditional repeal of the Sherman act.

The New York World says that "the fourteen silver State Senators represent, all told, a population of 1,253,735, or less than 2 per cent of the population of the United States." The World also states that "the New York Senators represent a population of 5,997,853, or 9¼ per cent of the population of the country, and five times that of the seven silver States." According to this statement the New York World ignores the sentiments of the highly respectable and influential Cooper Union mass meeting of over 3,000 citizens and about 3,000 who went away unable to get in, the same that our members of Congress have done by voting for the unconditional repeal of the Sherman law.

I deny the above statements. When the New York Senators vote for the unconditional repeal of the Sherman law they do not represent one-third of the people of New York, and, furthermore, they do not represent the majority of the people of the United States who are in favor of bimetallism, which should be enacted in connection with the repeal of the Sherman law, as a substitute therefor. If the Sherman law is repealed unconditionally it may require years of incessant effort on the part of the people to overcome the influence and maneuvers of the unscrupulous gold advocates, whose influence over certain officials are of a very peculiar and masterly nature.

No member of Congress represents the majority of the people of the United States who shall vote for the unconditional repeal of the Sherman law, and this assertion is maintained by the platforms of both the great parties of the country, which reads as follows:

Democratic platform asserts that—

"We hold to the use of both gold and silver as the standard money of the country, and to the coinage of both gold and silver, without discrimination against either metal and without charge for minting."—*Chicago Democratic Convention of 1892.*

Republican platform asserts that—

"The American people, from tradition and interest, favor bimetallism, and the Republican party demands the use of gold and silver as standard money."

Those Democratic and Republican members of Congress who vote for the unconditional repeal of the Sherman law not only repudiate their respective party platforms, but they disregard the instructions of both the Democratic and the Republican voters who elected them as their special representatives, and not, in any sense whatever, as the representatives of those who advocate the gold standard of market values.

It is the effort to enforce the gold standard that has caused banks and merchants to fail, factories to suspend operations, a premium to be paid for currency, a reduction of wages, a general discharge of hundreds of thousands of industrious workmen, and last but not the least of the direful misfortunes that have been inflicted upon the American people, is the demoralizing and degrading necessity of charitably supplying bread for the hungry, to prevent their starving in a country where an immense surplus supply of food of all kinds is being sold daily at less than the cost of production.

Members of Congress who serve the gold men instead of their constituents pretend that the bankers are the debtors, and therefore their advocacy of the gold standard is to be considered as against their greedy creditors. If our bankers are so badly situated is it meet for our Government officials to act under their advice in a financial sense? If the bankers are debtors instead of being creditors, they are most assuredly insolvent, and, being so, their resultant practical want of financial ability should deter all honest men from accepting their instructions upon such an important question as that of bimetallism and the financial interests of the starving people.

It is the attempt to reduce the market value of labor and products to a gold standard that has inflicted upon us the present financial distress. With the view of reducing the people to a condition of absolute servitude the gold men have insisted upon the repeal of the Sherman law, for the sole purpose of preventing the people obtaining the benefits to be derived from a regular increase of Government currency to the amount of $4,500,000 monthly, and thereby cause a greater stringency in the money market, with a corresponding depression of business and an oppressive effect upon those who are dependent for their living upon their daily toil.

The fact that the Secretary of the Treasury of the United States has been advised to illegally reduce the monthly purchases of silver proves conclusively to all unprejudiced minds that the gold men are unscrupulously attempting, through his instrumentality, to starve the people into the support of the gold standard, by thus reducing the monthly supply of Government notes to such an embarrassing extent as to compel the employers of wage-earners to either pay a ruinous premium for currency, or discharge their employés, because they can not obtain the money required to pay them their weekly wages.

Those members of Congress who voted against the amendment to the Wilson bill, providing for the coinage of gold and silver upon a parity of 16 ounces of silver to 1 of gold, have thereby repudiated the platforms of both the great parties of the country, and have deliberately disregarded the desires of their constituents, and proved recreant to their obligations toward all mankind.

Those members of Congress who, having announced their adherence to bimetallism, but, nevertheless, voted against the Bland amendment of the bill repealing the Sherman law, have thereby stultified themselves, and have also destroyed any confidence that the people may have possessed in their ability to defend their personal rights as citizens of the United States, or being capable in their honest desires to maintain such rights in a patriotic and practical manner. Men who speak one way and act another are shorn of all rights of respect and confidence in a political sense.

Honest money measures wheat at $1 or more per bushel. Dishonest money measures wheat at 60 cents or less per bushel. Silver and gold upon a parity of 16 to 1 restrains the rich man's greed and supplies the workingman's need.

An inflated value of money is more demoralizing than inflated market prices, because inflated money enriches the gold owner and impoverishes the gold earner. The people of all parties and sections of the country voted for bimetallism. Members of Congress can not ignore that fact with impunity.

Respectfully,

JAMES H. MONROE,
Chairman Committee on Resolutions.

RICHARD LACEY, Esq.,
Chairman Cooper Union Mass Meeting.

Mr. VOORHEES: I rise to inquire whether the Senator from Nevada expects to conclude to-night?

Mr. STEWART. I would rather be excused from concluding to-night, as I have not got as far along as I had hoped to do.

Mr. VOORHEES. Then, with the permission of the Senator, I move that the Senate proceed to the consideration of executive business.

Mr. STEWART. I thank the Senator.

The PRESIDING OFFICER. The question is on the motion of the Senator from Indiana.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After twelve minutes spent in executive session the doors were reopened, and (at 5 o'clock and 12 minutes p. m.) the Senate adjourned until to-morrow, Thursday, September 7, 1893, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate September 6, 1893.

SURVEYOR-GENERAL.

Charles H. Dickinson, of Plaquemine, La., to be surveyor-general of Louisiana, vice Charles B. Wilson, to be removed.

MELTER OF THE MINT, DENVER, COLO.

Walter Allen, of Colorado, to be melter of the mint of the United States at Denver, in the State of Colorado, to succeed Safford R. Hainer, resigned.

ASSAYER AND MELTER, CHARLOTTE, N. C.

William E. Ardrey, of North Carolina, to be assayer and melter of the assay office of the United States at Charlotte, in the State of North Carolina, to succeed S. W. Cramer, resigned.

SUPERINTENDENT OF THE MINT, SAN FRANCISCO, CAL.

John Daggett, of California, to be superintendent of the mint of the United States at San Francisco, in the State of California, to succeed William H. Dimond, resigned.

COLLECTORS OF INTERNAL REVENUE.

Frank P. Bond, of Tennessee, to be collector of internal revenue for the fifth district of Tennessee, to succeed David A. Nunn, resigned.

John T. Essary, of Tennessee, to be collector of internal revenue for the second district of Tennessee, to succeed A. B. Bowman, resigned.

Rudolphus O. Randall, of Alabama, to be collector of internal revenue for the district of Alabama, to succeed Robert A. Moseley, jr., resigned.

Paul B. Trammell, of Georgia, to be collector of internal revenue for the district of Georgia, to succeed W. H. Johnson, resigned.

COLLECTOR OF CUSTOMS.

John A. Michel, of Texas, to be collector of customs for the district of Brazos de Santiago, in the State of Texas, to succeed Robert B. Rentfro, removed.

PROMOTIONS IN THE ARMY.

Infantry arm.

First Lieut. James A. Irons, regimental quartermaster, Twentieth Infantry, to be captain, August 25, 1893, vice Hamner, Twentieth Infantry, appointed paymaster.

First Lieut. Frank de L. Carrington, regimental adjutant, First Infantry, to be captain, August 30, 1893, vice Armstrong, First Infantry, deceased.

Second Lieut. Edward M. Lewis, Eleventh Infantry, to be first lieutenant, August 31, 1893, vice Morrison, Twentieth Infantry, appointed regimental quartermaster.

Second Lieut. Richard C. Croxton, Fifth Infantry, to be first lieutenant, September 1, 1893, vice Brant, First Infantry, appointed regimental adjutant.

POSTMASTERS.

John C. Devine, to be postmaster at Alliance, in the county of Stark and State of Ohio, in the place of Harper Brosius, whose commission expired March 27, 1893.

Robert Galbreath, to be postmaster at Edmond, in the county of Oklahoma and Territory of Oklahoma, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

William F. Boyle, to be postmaster at Freeland, in the county of Luzerne and State of Pennsylvania, in the place of Owen Fowler, removed.

William W. Carr, to be postmaster at Philadelphia, in the county of Philadelphia and State of Pennsylvania, in the place of John Field, resigned.

Charles H. Dorr, to be postmaster at Berwick, in the county of Columbia and State of Pennsylvania, in the place of Robert S. Bowman, whose commission expired March 20, 1893.

George W. Fink, to be postmaster at Irwin, in the county of Westmoreland and State of Pennsylvania, in the place of Benjamin Steele, resigned.

Byron H. Frampton, to be postmaster at Clarion, in the county of Clarion and State of Pennsylvania, in the place of John B. Patrick, whose commission expired March 29, 1893.

Charles C. Graeber, to be postmaster at Ashland, in the county of Schuylkill and State of Pennsylvania, in the place of George S. Keiper, resigned.

Ira M. Harvey, to be postmaster at Lock Haven, in the county of Clinton and State of Pennsylvania, in the place of Robert S. Barker, whose commission expired April 1, 1893.

William H. Hay, to be postmaster at Meyersdale, in the county of Somerset and State of Pennsylvania, in the place of William H. Zufall, whose commission expired April 1, 1893.

Michael T. Hogan, to be postmaster at Emporium, in the county of Cameron and State of Pennsylvania, in the place of Cornelius B. Gould, whose commission expired April 1, 1893.

Urbanus B. Hubbs, to be postmaster at Mount Pleasant, in the county of Westmoreland and State of Pennsylvania, in the place of Daniel S. Jordan, resigned.

Thomas F. Kennedy, to be postmaster at State College, in the county of Center and State of Pennsylvania, in the place of Joseph E. Mitchell, deceased.

Henry E. Kulp, to be postmaster at La Plume, in the county of Lackawanna and State of Pennsylvania, in the place of Isaac F. Tillinghast, removed.

George A. Rehr, to be postmaster at Orwigsburg, in the county of Schuylkill and State of Pennsylvania, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1893.

William A. Shrum, to be postmaster at Latrobe, in the county of Westmoreland and State of Pennsylvania, in the place of James Ogden, whose commission expired April 1, 1893.

Eden A. Townsend, to be postmaster at Apollo, in the county of Armstrong and State of Pennsylvania, in the place of David D. P. Alexander, whose commission expired April 1, 1893.

Frank M. Vandling, to be postmaster at Scranton, in the county of Lackawanna and State of Pennsylvania, in the place of David M. Jones, whose commission expired March 29, 1893.

Frederick O. Whitman, to be postmaster at Lewisburg, in the county of Union and State of Pennsylvania, in the place of John V. Miller, removed.

Joseph F. Windfelder, to be postmaster at St. Marys, in the county of Elk and State of Pennsylvania, in the place of Henry A. Parsons, jr., resigned.

CONFIRMATION.

Executive nomination confirmed by the Senate September 6, 1893.

COLLECTOR OF CUSTOMS.

Thomas J. Black, of Oregon, to be collector of customs for the district of Willamette, in the State of Oregon.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *September 6, 1893.*

The House met at 12 o'clock m. Prayer by Rev. ISAAC W. CANTER, of Washington, D. C.

The Journal of the proceedings of Saturday last was read and approved.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. SOMERS (on motion of Mr. BARWIG), for two weeks, on account of important business.

To Mr. LILLY (on motion of Mr. WRIGHT), indefinitely, on account of sickness.

To Mr. HARTER, indefinitely, on account of sickness in his family.

To Mr. TAYLOR of Tennessee, indefinitely, on account of sickness in his family.

To Mr. COBB of Missouri, for one week, on account of important business.

To Mr. BLANCHARD, until October 1, on account of important business.

ORDER OF BUSINESS.

Mr. TALBERT of South Carolina. Mr. Speaker, I ask unanimous consent to introduce the bill which I send to the desk and to have it referred to the Committee on Banking and Currency.

The SPEAKER. The Clerk will report the title of the bill, after which the Chair will ask if there be objection.

The Clerk read as follows:

A bill for the enlargement of the volume of the currency and the distribution of the same.

Mr. BROSIUS. Mr. Speaker, I call for the regular order.

THE RULES.

The SPEAKER. The regular order is demanded, which is equivalent to an objection. The regular order is the further consideration of the report from the Committee on Rules. The Clerk will report the pending amendment.

The Clerk read as follows:

Amend Rule XXIII, paragraph 2, by striking out, in lines 2 and 3 of said paragraph, the words, "which shall consist of 100 members;" so that the clause will read: "Whenever a Committee of the Whole House finds itself without a quorum the Chairman shall cause the roll to be called," etc.

Mr. CATCHINGS. Mr. Speaker, I desire to say that since the House took its recess last Saturday a great many members on this side have expressed a desire that the Committee on Rules should accept the pending amendment. Many gentlemen have expressed this desire who will vote to sustain the committee if the committee should refuse to yield to this request. As this proposition from the committee was not fundamental at all in its character, but looked simply to the expedition of public business, we have thought best to yield to this request coming from so many gentlemen on this side. The committee does not at all mean to be understood as assenting to the idea that their suggestion was subject to the objections which have been made against it. We are still of opinion that the proposition was a wise one, and that if agreed to by the House it would result in great expedition of the public business. But we have no desire to force anything upon the House that it does not wish, and we have thought that under all the circumstances it is best we should assent to this request coming from so many sources on this side of the House and accept the amendment offered by my colleague [Mr. KYLE].

Mr. DOLLIVER. Mr. Speaker, I had taken the floor on Saturday, just prior to the adjournment, with a view to saying a few words in favor of the proposition from which the Committee on Rules is just about to retreat. Our biennial discussions about the rules have been for a long time, and promise to be for a long time to come, a very entertaining part of the business of the House. The Fifty-first Congress was made notable by the adoption of a good many reforms that had been suggested, many of them, a long time before, but never before adopted by the House as a rule of its faith and its practice.

I think rather the most interesting thing I have seen in the House has been the effort—gentle, but up to this moment very firm—of the Committee on Rules to deliver, if possible, their less enlightened brethren from their surviving prejudices against the Fifty-first Congress. The gentleman from Mississippi [Mr. CATCHINGS] and the gentleman from Ohio [Mr. OUTHWAITE], until this moment, have been the unconscious instruments of a process of education which in time promised to enable the Democratic party to believe that they were the authors, instead of the screaming and struggling victims, of our reformed procedure. [Laughter.]

I count myself fortunate that I came to the House in the ses-

sion when the bondage of usage and tradition gave place to common sense in the rules and government of this body. We found the House handicapped by a system of obstruction, including a partisan refusal to participate in current proceedings, the studious use of certain easy and convenient parliamentary motions, and the inherited notion that the Constitution preserves the quorum of the Committee of the Whole with the same care by which it preserves the quorum of the House itself. These weapons of obstruction, even in the hands of inexperienced statesmen, were effective to kill the progress of business, and left the House, notwithstanding the pressure of its responsibilities, stranded and helpless.

Of course we might have gone on, as many Congresses had gone on year after year under the old régime, spending most of our time calling the roll and waging an unequal warfare with a little group of statesmen that had already grown famous on motions to adjourn. We might have done that; but fortunately for ourselves, and I have always believed fortunately for the country, we found a strong leadership in the Fifty-first Congress that enabled this House to correct the abuses of precedent and custom and to restore the almost obsolete right of self-government. We have been very much gratified, indeed, at the gradual approach of the Committee on Rules to the true standard.

It is admitted that you have disguised your approbation of the reforms of 1890, mutilating them, if I may use a familiar figure, as gypsies used to treat children they had stolen, so that their friends would not recognize them. At the same time, we are able to discern from your movements that the reign of the filibuster in this House is over, and that hereafter he lives, if he live at all, by the grace of the Committee on Rules; that is to say, the Democratic party managers reserve the right to revoke his license at their pleasure. I must express my regret at the retreat of the Committee on Rules, insufficiently covered by the words which have just fallen from the lips of the gentleman from Mississippi. We were going on smoothly in a direction that led even the dullest man in the United States to perceive that only time and a little closer pressure of party convenience were necessary to make the Democratic party indorse the entire record of the historic Speakership of the Fifty-first Congress.

And yet, Mr. Speaker, it is only four years since this House was filled with a clamor which, I venture to say, was never equaled in the French Chamber of Deputies, and hardly surpassed by the recent fist fights in the English House of Commons, and all because of the fact that the majority of the House undertook to assume the duties which were imposed upon them in the transaction of the public business. Few of us on this side of the House will ever be able to forget the day when my friend from Indiana [Mr. BYNUM] rushed into the area in front of the Speaker's chair, gesturing like a madman, declaring that the day would never come when he would submit to despotism in the American Congress. And when the gentleman from Kentucky [Mr. BRECKINRIDGE] on Saturday last sent to the desk a record of a speech of his delivered in 1890, and asked to have it read, in order to show that in the vicissitudes of time his devotion to the Constitution, at least, was unshaken, many here recalled the day when he stood in his place and denounced as "revolutionary, usurpatory, and corrupt" an orderly decision of as brave and true a man as ever presided in this House. [Applause on the Republican side.]

The SPEAKER. The time of the gentleman has expired.

Mr. BRECKINRIDGE of Kentucky. I ask that the gentleman may be permitted to proceed until he concludes his remarks.

The SPEAKER. In the absence of objection, the gentlemen from Iowa will proceed for five minutes longer.

There was no objection.

Mr. DOLLIVER. All of these things it does not take a very long memory to recall to our minds, and we remember also that in the midst of the noise and tempest of disorderly tongues the Speakership of the House and the person of the Speaker passed through the ordeal without the loss of prestige or confidence in the public mind. They called him a revolutionist; yet our highest courts of justice have affirmed his judgment. They called him a usurper; yet everybody knows that he preserved all rights except the right to defeat the progress of public business.

In the heat of party passion they did not hesitate to attack his personal character; yet behind him stood the solid support of his party associates, and behind them the conservative good sense of the people everywhere. [Applause on the Republican side.]

I congratulate him to-day that he is permitted to see so many tokens of his victory over the mean and stubborn prejudices that once assailed him, and I congratulate the House that in so large a measure it has entered into the liberty of action secured to it by the courage and genius of the gentleman from Maine. [Applause on the Republican side.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed without amendment joint resolutions of the following titles:

Joint resolution (H. Res. 6) to make the 18th day of September, 1893, a holiday within the District of Columbia; and

Joint resolution (H. Res. 7) to permit the use of certain ensigns, flags, and signal numbers to decorate the Capitol and its approaches September 18, 1893.

ENROLLED BILL SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled the bill (H. R. 4) to provide for certain urgent deficiencies in the appropriations for the service of the Government for the fiscal year ending June 30, 1894, and for other purposes; when the Speaker signed the same.

THE RULES.

Mr. CATCHINGS. Mr. Speaker, I am not surprised at this outbreak on the part of my friend from Iowa [Mr. DOLLIVER]. He has to-day witnessed a spectacle on this side of the House which could never have occured on the other side. He has had evidence, sir, that the power of the Speaker of this House is not to be used for the purpose of compelling the adoption of such rules as the Speaker himself thinks are just and proper. He has had evidence, sir, that on this side of the House we recognize the right of every gentleman to interpose his objections, and when they become of a serious character, as in this instance, he has seen the Committee on Rules willing to assent or yield its views to the pressure of opinion brought against them. It is something, I say, which was never witnessed on the other side of the House, at least since I have been a member of Congress, and I have been here now during four terms.

Our friends on the other side are quite fond of having the idea go out throughout the country that we have been following in the train of the Republican leadership in the rules we propose for the government of this House. Why, sir, after most careful inspection of the rules and with the disposition which we have manifested to take from them everything which we believe to be good, we have found but two things that we were able to accept. One was the method providing for the introduction of bills, and the other the proposition to make one hundred a quorum in Committee of the Whole.

But everything else contained in the Rules of the Fifty-first Congress, except those things which have been common to all Congresses, have been rejected by the Committee on Rules. Indeed, the Committee on Rules have never for one moment contemplated suggesting them to this House for adoption.

Mr. Speaker, the rules of this House, as they have been proposed and as they will be adopted, recognize freedom of debate in its fullest extent. They are based upon the conception that no rules are good which do not yield to the individual members of this House the fullest freedom of discussion and debate. They recognize that there can be no wise legislation which is not accompanied with this freedom of discussion and debate.

But more than that, Mr. Speaker, they expressly reject and repudiate the idea that supreme power shall be vested in the Speaker. Under these rules the power, in the last resort, is left where it should always be, with the majority of this House. While we have a power which will put an end to discussion and to debate, and bring any measure to a vote, that is a power which can only be exercised when it is fairly considered and acted upon by a majority of the members of this House.

We have no rule which indulges the fanciful theory that a member who is actually absent may be theoretically present. I wish to call attention to the difficulty in which the distinguished gentleman from Maine [Mr. REED] found himself when he had made his famous quorum count. We learn from gentlemen on the other side that it was farcical and absurd to say that a man could be physically present and at the same time theoretically absent; and yet we found the gentleman from Maine [Mr. REED] soon driven to accept the reverse of that proposition, and to hold that a man, though physically absent, was theoretically present; and his explanation of that was of the most technical and flimsy kind. I allude to the explanation given by him a few days since in this House. He said that there had to be some time when a man should be taken to be present, and he fixed that time as being the time when a yea-and-nay vote was ordered.

Now, Mr. Speaker, that was an arbitrary assumption on his part. As a matter of fact gentlemen were physically absent, and yet were constantly, day by day, counted by him as being present; and if it was absurd to say that a man could be physically present and theoretically absent, it was just as absurd to say that he could be physically absent and theoretically present. And yet

that was the performance to which our attention was invited almost every day during the Fifty-first Congress.

It goes to show, Mr. Speaker, the dangers which will be encountered whenever we depart from the ancient rule that a man's presence is to be determined by his answering to the roll call. Of course, a man may answer to the roll call and then leave the Chamber and not be present when the vote is announced; but during the whole of the pendency of the roll call it is not required that he should be present; and there is no safety in fixing any other time as indicating his presence, except that time when his name is called and when he answers.

Now, Mr. Speaker, it was often the case here that when a yea-and-nay vote was ordered, members would leave this Hall; and yet they were counted as present, though physically absent. That was something which the distinguished gentleman from Maine did not contemplate, perhaps, when he made his famous quorum-count rule. His idea doubtless was that we would remain in our seats and submit ourselves to this proceeding, so that we could be counted, but when he discovered that we left the Hall, then he was driven, in order to make his proceeding effective, to go one step further and indulge in the very absurdity which he and those standing with him had so bitterly criticised.

[Here the hammer fell.]

Mr. SPRINGER. Mr. Speaker, I desire to make one statement in reply to the remarks of the gentleman from Iowa [Mr. DOLLIVER] upon this subject. So far as the rules of the Fifty-first Congress are concerned, there was no objection taken to them that was not of a usual character when changes of rules come up in this House from year to year, except upon two propositions. And if the rules of the Fifty-first Congress had not assumed the powers granted in those two rules there would have been little exception taken to them at the time.

The first of these rules is that which is found in Rule XVI, clause 10, and is as follows:

No dilatory motions shall be entertained by the Speaker.

That was a departure from the parliamentary precedents of the past. In fact, I challenge the production of a precedent, in a parliamentary body in this country or Europe, where the Speaker was clothed with the absolute power to decide any and all motions to be dilatory. Under the authority of this rule the Speaker of this House was absolute in his rule. When a proposition was under debate, when a member moved that the House adjourn the Speaker might say that that motion was dilatory.

If a member appealed from the decision of the Chair the Speaker declined to entertain the appeal. No appeal was therefore permitted. The Speaker was arbitrary. The Speaker could refuse to put a motion to adjourn to the House, and on appeal refuse to entertain the appeal. When a question was under debate and a member moved to lay the proposition or bill upon the table, the Speaker claimed the right to say that that motion was dilatory, and rule it out of order; and also rule out of order any appeal from his decision. This put the whole power of the House, and every member of the House, in the hands of the Speaker. From that decision there was no appeal allowed, and, therefore, he was the master of the situation. Gentlemen speak about giving the right to the majority to rule. I am in favor of that; but I am opposed to giving the right to any one man, whether he be Speaker or member, to pass upon the motives of others and to put a veto upon all our proceedings.

This was one of the things which was unprecedented and revolutionary in its character, and excited most largely the contentions which arose in the Fifty-first Congress.

No proposition has come from any Democratic House or committee to return to that proposition; and so long as this country endures, no Democratic majority, in my judgment, will propose such things to a Democratic House.

Mr. DOLLIVER. I may misunderstand the power to stop filibustering given by the rules as reported, but if I understand them aright it simply transfers from the Speaker to the Committee on Rules the absolute power to prevent any form of dilatory motion after one such motion, and clothes the Democratic party with the power to stop filibustering against it, leaving the Republican party to take care of themselves.

Mr. SPRINGER. The difference is this: That it transfers the power to stop filibustering from the Speaker, who exercised it in the Fifty-first Congress, to the majority. When a question is presented for our action we transfer that power to the majority of the House, and the Republicans can vote upon that proposition to determine when dilatory motions shall be brought to an end, rather than to leave it to the Speaker, as was done by the Republican Congress, from whose holdings there was no appeal whatever.

Mr. DOLLIVER. At any rate the filibusterer is cut off by the new rules.

Mr. SPRINGER. The right to do so was given to the Speaker in the Fifty-first Congress, and he entertained just such motions as he chose to entertain.

Mr. WILSON of Washington. I understood the gentleman to say that the Republicans have the right to vote. [Laughter.] I hope we will have that privilege, and that you have not taken it away from us.

Mr. SPRINGER. So long as the Democratic party has control of this House the Republican party shall have the right to vote. [Applause.]

Mr. WILSON of Washington. Well, is it a fact that the Republican votes are counted?

Mr. SPRINGER. They will be counted.

Mr. WILSON of Washington. When?

Mr. SPRINGER. At the proper time.

Mr. WILSON of Washington. At the proper time! We hope that it will come; we have been waiting a long time.

Mr. SPRINGER. The motion need not be one of those known to the House as a dilatory motion.

The SPEAKER. The time of the gentleman from Illinois has expired.

Mr. SPRINGER. I desire a few more moments.

There was no objection.

Mr. SPRINGER. The motion contemplated in this rule need not be what is known in parliamentary law as a dilatory motion. Any motion that the Speaker saw fit to decide to be dilatory was ruled to be dilatory; and the Speaker refused to put it to the House. So that all motions were dilatory if the Speaker saw fit to decide them such, and from that decision he refused to entertain an appeal: hence every motion that might be made in this body was subject to his will as to whether it should be entertained or not.

Now, the other proposition which was new and, as we thought, revolutionary, was the right of the Speaker to count a quorum when there was a yea-and-nay vote, and when members who did not see fit to answer to their names were recorded as present and the proposition which declared as passed when a majority of those voting were in the affirmative. That was not giving the power of the majority of this House to legislate, but giving the power of the minority to legislate. No man can deny the right of a majority to pass any bill which it sees fit to pass, but we do deny the right of the minority of this House to pass a measure when the measure is presented and has not the consent of the majority, on the record, for its passage. Why, that is frequently seen in legislative bodies; and it happened in the State of Illinois in the last contest for Senator, when if one Republican had voted it would have resulted in the election of the Democratic candidate.

The Republicans would not vote: and if one Republican should have voted, he would have incurred the displeasure of the whole party, having, by voting, caused the election of the candidate of the opposite party. They did not go out of the Hall but they sat in their seats and refused to vote, and no speaker would have dared in that body to have counted those gentlemen as constituting a quorum and to have declared the Democratic Senator elected. It is, therefore, the right of the members of this House to quit the Chamber when we can defeat a bill by so doing, whereas if we remain in our seats we allow the bill to pass.

If the Democratic party in this House has a majority in favor of any measure it must bring its majority here. When it brings its majority here and passes its bill, it has a right to exercise that power; but I deny the right of a less number than a majority of this House to legislate and bind the country by its legislation. I hold that when there is a yea-and-nay vote, the only evidence that members are present and voting is the record of yeas and nays, and that every other record is outside of proper parliamentary proceedings, and ought not to be regarded, because it would enable two or three men to pass a bill while others were present and not voting, but simply counted as present. It would enable three men to pass a bill over the President's veto, if they voted in the affirmative, while a quorum sat here and refused to vote. Thus it will be seen this rule, or this alleged rule, can be reduced to an absurdity by applying it with its full force and effect.

The Democratic party in this House has never advanced in the direction of that rule. Neither has it advanced in the direction of the other rule called the dilatory-motion rule. So far as those two propositions are concerned, the Democratic party has not advanced in that direction and never will do so. They were regarded when introduced in the Fifty-first Congress as revolutionary, as a departure from all rule and all precedent, and on those grounds they were opposed by this side of the House; and, because we are trying now to simplify the rules in other respects, we can not be justly accused of any desire to adopt or even to palliate what we believe to have been the objectionable features of the rules adopted by the Fifty-first Congress.

The SPEAKER. The question is on the motion of the gentle-

man from Mississippi, to strike out the words "which shall consist of 100 members."

Mr. REED. Mr. Speaker, I hardly know myself what I should do unless I had some preconceived notions upon this subject. When I find the gentleman from Illinois [Mr. SPRINGER] and the Supreme Court of the United States in opposition, of course it would be a very puzzling matter to me if I did not have some convictions of my own. [Laughter.] I am sorry that the gentleman can not seem to understand the matters involved in these discussions. I am exceedingly sorry that the Democratic party can not understand them, and I realize the truth of the old proverb that a match for the very gods is lack of knowledge—to put it in no harsher fashion. [Laughter.] It seems impossible to get the fundamental principles involved in this question fairly before the average Democratic mind.

Of course the higher ones among the Democracy, such as are put upon Committees on Rules, can understand more or less about this subject. [Laughter.] They understand some of the better things connected with parliamentary rules, although they may not be able to comprehend absolutely the highest, but in due time all of you gentlemen will be dragged to the light, and you will understand that prejudice even can be overcome, and that in the progress of time the truth must finally prevail.

I should not reply again to these strictures, but they appear again on the record, and, if undisputed, some one might suppose that something strange had been done. Filibustering, except in sporadic cases, is of modern origin and hence has received only modern treatment. You can not go back for a treatment for filibustering to a period before the disease set in. No cholera remedies were ever invented until cholera had made its appearance. But after all, the great principles of medical science which had existed through the centuries were appealed to in that case, as the principles of parliamentary law are appealed to in the treatment of this new enemy of order and decency, filibustering.

The power of the Chair is the power of the House. Gentlemen speak of it as if it was an individual who was doing all these things. How would it be possible for a single individual, for a presiding officer, to do what the House did not want done? How would it be possible for him, without support, to accomplish what the House did not intend? Why, when you state the question to yourselves you can at once see the absurdity of it, and whatever charges are made with regard to the Fifty-first Congress are made against the House itself, and a majority of it, who from first to last sustained the action of the Chair. Now, there is a great deal of talk about the nonentertainment of dilatory motions. Why, that, by general parliamentary law, is the duty of the presiding officer.

Let me give you a plain example of it. In the year 1880, if I am not mistaken in the date—it was in 1880 or 1881—33 members of the House of Commons undertook so to prolong debate as to stop the business of the House. In the House of Commons there never was even a previous question of the character we have here. Nevertheless at the end of forty hours the Speaker of the House, although the proposition was absolutely a new one there, filibustering having commenced with the gentlemen who were undertaking that particular act, announced to the House that he should call upon no more gentlemen to speak, should permit no more motions, but should put the question to the House.

The question was put to the House and was carried; and that was the origin of a real cloture law which now exists in the British House of Commons.

Mr. SPRINGER. Was that the first case in history?

Mr. REED. The first case in history? I think not. I think if you will take Mr. Crocker's treatise on parliamentary law you will find a plain recognition of that principle.

Now, let me say a word with regard to the exercise of this power; and I defy contradiction from any honest man on the other side. In addressing the House upon the adoption of the rules of the Fifty-first Congress—no, I did not address the House—I think it was in the report of the Committee on Rules that I made the remark—that this power over dilatory motions would never be exercised until every gentleman in this House knew the motions which were attempted were dilatory, and that the only danger was that the power should not be exercised soon enough. Now I say that it never was exercised until every man in this House believed and saw that dilatory motions were being used solely for the purpose of destroying time and stopping the public business.

Mr. HENDERSON of Iowa. That is absolutely true.

Mr. REED. That is absolutely true; and every man within hearing of my voice who was present knows it to be true.

Men made confusion in their minds about motives. Why, sir, the presiding officer has nothing to do with motives. When the action attempted is a stoppage for willful purposes of the business of the House, and that is perfectly apparent, it is the duty of the presiding officer to interpose and arrest it; and in my judgment it will be the duty of the present Speaker to do so in the future proceedings of this House, notwithstanding what has taken place upon this report of the Committee on Rules. It is his general parliamentary power.

As to the question of appeals from the decision of the Chair, anybody can see that an appeal can be made a dilatory motion. The present occupant of the Chair, if I am not mistaken, attempted to make an exception by allowing appeals to be regarded as nondilatory motions, and the House voted otherwise, thus recognizing the right on the part of the Speaker—or rather his duty, because the Chair has no rights; he has duties to perform; that is all. This matter will in time become perfectly plain and simple. In time every gentleman will understand it. And I notice with gratification that as these debates go on there is less and less foolishness talked.

Why, sir, the gentleman from Illinois is much more sensible than he was during the period which has been referred to. [Laughter.] His language is much more moderate and reasonable. This does not result from his disposition to be on both sides of a great many questions; it is because the slow process of time has infiltrated him with some knowledge of these affairs, as I know it will the rest of you, gentlemen. [Laughter.] I bid you Godspeed in the progress you have thus far made. I know that Bourbonism is very strong in the Democratic party; I know that "conservatism" reigns triumphant there; but, after all, you will find that the world moves. [Laughter.]

The question being taken on the amendment of Mr. KYLE, it was agreed to; there being—ayes 118, noes 61.

The Clerk (proceeding to read) read the following:

The committee may, by the vote of a majority of the members present, at any time after the five minutes' debate has begun upon proposed amendments to any section or paragraph to a bill, close all debate upon such section or paragraph, or, at its election, upon the pending amendments only (which motion shall be decided without debate); but this shall not preclude further amendment, to be decided without debate.

Mr. ENLOE. I move to amend by inserting after the word "without" in line 7 of the paragraph just read the words "amendment or;" so as to read, "or at its election upon the pending amendments only, which motion shall be decided without amendment or debate."

Mr. CATCHINGS. We have no objection to that amendment.

Mr. ENLOE. Mr. Speaker, the object of this amendment is to perfect this paragraph. As I understand the purpose of the provision here reported, it is to enable the Committee of the Whole to close debate and bring the committee to a vote. It will be seen that without the words which I offer as an amendment, an unlimited number of amendments as to time might be offered and thereby the object of this paragraph be defeated.

Mr. REED. This paragraph is the same that was adopted in the Fifty-first Congress, was it not?

Mr. ENLOE. I have not looked to see. I want to say to the gentleman from Maine that when I am trying to determine what ought to govern this House I do not look to see what governed the Fifty-first Congress.

Mr. REED. I am sorry to hear the gentleman say that. It might imply his disapproval of the rules of the Fifty-first Congress.

Mr. ENLOE. Not as an entirety. There are several paragraphs in the pending code of rules which were the rules of the Fifty-first Congress and were readopted by the Fifty-second Congress upon my motion. And I believe I then received the compliment from the gentleman of being classed as among those intelligent Democrats who were making a little progress. [Laughter.]

Mr. REED. Well, I had forgotten, probably, the gentleman's position.

Mr. ENLOE. And I wish to say also to the gentleman from Maine that I appreciated a compliment of that character coming from him, because I was educated in the school of the Fifty-first Congress, and learned there considerable "parliamentary" law. Every gentleman who served through that Congress ought to be able to throw some little light on the rules that ought to govern the methods of administration in this House, and he should have gained experience which will be profitable in his future legislative work.

I thank the gentleman from Maine for past compliments, and I also appreciate the force and significance of the lectures which he has delivered to us from time to time. We recognize that as his prerogative, for to lecture Democrats is about all he will be able to do in this Congress. [Laughter.]

Mr. REED. I think under the system of rules proposed that is very probable.

Mr. ENLOE. That is one reason why I favor these rules.

Mr. MCMILLIN. Will my colleague allow me to ask him a question?

Mr. ENLOE. Certainly.

Mr. McMILLIN. If the amendment of my colleague is adopted what will be the effect? Suppose, for instance, that the House is in Committee of the Whole and the member in charge of a bill proposes to limit debate say to ten minutes, will not the effect of your amendment be to prevent the possibility of the committee adopting any different time if it sees proper to do so?

Mr. ENLOE. You mean any different time for debate?

Mr. McMILLIN. Yes.

Mr. ENLOE. I think not.

Mr. BURROWS. Why not?

Mr. McMILLIN. It strikes me that that would be the effect of it.

Mr. ENLOE. The committee can vote down the proposition if it does not like the limitation, and adopt some other. But if the proposition to close debate is to remain as it is now in the rule, many other amendments may be offered. The motion may be made to close debate in five minutes, another may be made to close it in six, and so on illimitably.

Mr. McMILLIN. Limit the number of amendments, if you please, that may be offered; but it does seem to me that the House ought not to put itself into the awkward attitude of being unable to vote at any other time than that suggested by the gentleman having the bill in charge. It may not be satisfactory to the House.

There is no such necessity for the House to tie itself up in that way. I am willing to do anything that will expedite business, but I am not willing to see the House put itself in this awkward position from which it can not extricate itself. It ought to be in the power of the House at all times to amend such motions in the first, second, and third degrees whenever it sees fit to do so.

Mr. ENLOE. It occurs to me that the House, if it did not desire to close the debate in the time suggested by the gentleman in charge of the bill, could vote down the motion to close debate, and immediately thereafter another motion fixing a different time would be in order.

Mr. McMILLIN. Why not avoid the whole difficulty by making the motion to close debate amendable? Now, I sympathize with the disposition of my colleague to expedite business. But by this plan as proposed here the House will find itself tied hand and foot. You may say that one or two amendments could be offered to the amendment to close debate, which would remedy the difficulty. But there ought to be means by which other members would be able to get the sense of the House concerning the time, which might be a very different idea from that suggested by the gentleman in charge of the bill.

Mr. ENLOE. I am willing to accept the suggestion of the gentleman if he will put it in the form of an amendment, so as to limit the amendments for closing debate to two.

Mr. McMILLIN. I only made the suggestion with the view of showing that the rule if adopted as proposed to be amended by my friend will have the effect, when the House is in Committee of the Whole, and the gentleman in charge of the bill proposes to limit debate to one, two, or ten minutes, that even if the House wishes to fix the debate at twenty or thirty minutes it will have no power to offer an amendment to that end. Now, I do not think we ought to be placed in that situation.

Mr. ENLOE. I think the committee would vote down the proposition if it was not agreeable, and adopt another.

Mr. McMILLIN. But if it votes it down we then have no proposition to limit debate at all. Whereas if the right to amend exists, the House can, while it is in consideration of the question, limit the debate to some fixed hour.

Mr. ENLOE. I think a new motion might be submitted as fast as the preceding motions are voted down if the committee saw proper to do so.

If you did not close the debate on the motion the House, after it has voted down that motion, can entertain a motion to close debate at any other time, which would be in order. It is a matter that the House could control at any time by different votes.

The question being taken on the amendment of Mr. ENLOE, the House divided; and there were—ayes 26, noes 62.

So the amendment was rejected.

The Clerk, continuing the reading of the rules, read as follows:

Third. On Friday of each week, after the morning hour, it shall be in order to entertain a motion that the House resolve itself into the Committee of the Whole House to consider business on the Private Calendar; and if this motion fail, then public business shall be in order as on other days.

Mr. ENLOE. Mr. Speaker, I offer the amendment which I send to the Clerk's desk.

The Clerk read as follows:

Add to Rule XXIV: "Memorial services in honor of deceased members of the Senate and House of Representatives may be held in the Hall of the House of Representatives on Sundays, and the eulogies may be printed in the CONGRESSIONAL RECORD as heretofore; but eulogies on deceased members of the Senate and House of Representatives shall not be in order at any other time."

Mr. ENLOE. Mr. Speaker, this is another amendment in the interest of economy of the public time, and to promote the business of the session. We have been in the habit and are in the habit of indulging in very expensive grief when any member of Congress or of the Senate dies during the session. In fact, whether the death occurs during the session or not, we are in the habit of setting apart days for pronouncing eulogies, in addition to the time that we lose by adjournments out of respect to the deceased.

I want to try to economize a little of the public time by making provisions for using this Hall for funeral services on Sunday. That day is better fitted for such services than any other day of the week.

We spend from twenty to thirty days of every session of Congress in pronouncing eulogies in honor of deceased members—eulogies which are pronounced to empty chairs. Nobody comes here to listen to eulogies when we pronounce them during the other days of the week; but if we were to fix Sunday for paying tributes of respect to our deceased colleagues, there would be a large attendance of people who would be interested in hearing the eulogies to be pronounced on such occasions. It would answer all the purposes of those who speak, for us to have memorial addresses printed in the CONGRESSIONAL RECORD. It would be no desecration of the Sabbath to do it, because it is perfectly in harmony with the idea of a Sabbath to hold funeral services on that day.

I tried to get this amendment adopted in the rules of the Fifty-second Congress, and I then had the assistance of the distinguished gentleman from Maine [Mr. REED]. I hope that I may have his assistance now in trying to get this House to adopt an amendment which will certainly contribute much to the interest of the services for deceased members, and it will go far to hasten the end of the session by preventing the consumption of the working time of the House.

Mr. CATCHINGS. Why not have these memorial services at evening sessions?

Mr. ENLOE. I would have no objection to following the suggestion of my colleague from Mississippi [Mr. CATCHINGS], that we hold evening sessions for this purpose. I have no objection to evening sessions for this purpose, but I do not believe that the House ought to set apart days during the week for pronouncing eulogies, which nobody will come to hear, except the gentlemen who are to speak.

The SPEAKER. Does the gentleman modify his amendment?

Mr. ENLOE. I think I will let it stand, and if the House wants to modify it, it can do so; and if it wants to vote it down it can do so.

Mr. CATCHINGS. I have no objection to it, so far as I am concerned.

Mr. HOOKER of Mississippi. Let the amendment be again reported.

The amendment proposed by Mr. ENLOE was again read.

Mr. HEARD. Mr. Speaker, I move to amend the amendment by striking out the word Sunday, and insert in lieu thereof the words—

at evening sessions of the House.

Mr. COGSWELL and others. Oh, no.

Mr. HEARD. I offer the amendment as expressing my views of what we ought to do in the premises. Any other gentleman is at liberty to offer any modification he deems proper.

Mr. MILLIKEN. I hope that the amendment of the gentleman from Missouri [Mr. HEARD] will not prevail, because I think the suggestion of the gentleman from Tennessee [Mr. ENLOE] that nobody comes to hear these eulogies when they are delivered on week days, would apply still more forcibly to the evening sessions. I think if it were on Sunday members of Congress would come here to listen to them. In the evening, after we have been through a long day's session, when every one is tired, but few of us will come, and the same thing which happens at other evening sessions will happen then.

There can be no reason that I can conceive of why these services should not be held on Sunday. It is eminently appropriate that they should be. Why, private funerals all over the country are quite as liable to be held on Sunday as on any other day, and I think more so; and it seems to me that the amendment just as it comes from the gentleman from Tennessee [Mr. ENLOE] is a proper amendment to be adopted by the House.

The SPEAKER. The question is on the amendment offered by the gentleman from Missouri [Mr. HEARD] to the amendment proposed by the gentleman from Tennessee [Mr. ENLOE]. The Clerk will report the amendment offered by the gentleman from Tennessee [Mr. ENLOE], and then the amendment offered by the gentleman from Missouri [Mr. HEARD].

The amendments were again read.

The amendment to the amendment, offered by Mr. HEARD, was rejected.

The SPEAKER. The question now is on the amendment to the rules proposed by the gentleman from Tennessee [Mr. ENLOE].

The question being taken, the Speaker announced that the ayes seemed to have it.

On a division (demanded by Mr. HENDERSON of Iowa) there were—ayes 101, noes 41.

Mr. HENDERSON of Iowa. I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 86, nays 117, not voting 150; as follows:

So the amendment was rejected.

Mr. BRETZ. Mr. Speaker, I desire to say that my colleague [Mr. NAGNY] has been called home on account of sickness in his family, and I ask that he be excused indefinitely.

There was no objection.

The following pairs are announced:

Until further notice:

Mr. PEARSON with Mr. WADSWORTH.

Mr. MONTGOMERY with Mr. O'NEILL of Pennsylvania.

Mr. FITCH with Mr. TAYLOR of Tennessee.

Mr. KILGORE with Mr. GROSVENER.

Mr. GOODNIGHT with Mr. LOUD.

Mr. HATCH with Mr. HARMER.

Mr. BLANCHARD with Mr. HENDERSON of Illinois.

Mr. BLAND with Mr. DINGLEY.

Mr. CAMPBELL with Mr. BELDEN.

Mr. HAINES with Mr. LEFEVER.

Mr. LOCKWOOD with VAN VOORHIS of New York.

Mr. STEVENS with Mr. RANDALL.

Mr. MAGNER with Mr. CHICKERING.

Mr. COCKRAN with Mr. SHERMAN.

Mr. SHELL with Mr. MARSH.

Mr. BRANCH with Mr. SETTLE.

Mr. GRAHAM with Mr. LINTON.

Mr. ENLOE with Mr. BOUTELLE.

Mr. EDMUNDS with Mr. LOUDENSLAGER.

Mr. DUNPHY with Mr. WEVER.

Mr. TUCKER with Mr. RUSSELL of Connecticut.

Mr. HENDERSON of North Carolina with Mr. CANNON of Illinois.

Mr. ERDMAN with Mr. WANGER.

Mr. ASPLEY with Mr. RYAN.

Mr. MCETTRICK with Mr. MORSE, until Wednesday next.

Mr. JONES with Mr. SCRANTON, until Thursday next.

Mr. LAPHAM with Mr. DRAPER, for ten days.

For this day:

Mr. O'FERRALL with Mr. WAUGH.

Mr. ELLIS of Kentucky with Mr. WALKER.

Mr. O'NEIL of Massachusetts with Mr. COGSWELL.

Mr. CRAIN with Mr. SWEET.

Mr. STOCKDALE with Mr. AITKEN.

Mr. WASHINGTON with Mr. ROBINSON of Pennsylvania.

Mr. REILLY with Mr. REYBURN.

Mr. BERRY with Mr. GILLETT of Massachusetts.

Mr. STONE of Kentucky with Mr. LILLY.

Mr. CAMINETTI with Mr. POST.

Mr. CARUTH with Mr. HEINER.

Mr. ENLOE. I am paired with the gentleman from Maine [Mr. BOUTELLE].

The result of the vote was then announced as above recorded.

Mr. ENLOE. Mr. Speaker, I desire to offer an amendment.

The Clerk read as follows:

On the death of a member of the House of Representatives, or of the Senate, the Speaker shall appoint a committee to draft a suitable tribute of respect to the deceased member, which shall be published in the CONGRESSIONAL RECORD. Speeches eulogizing deceased members shall not be in order at any time, and the Speaker shall not entertain any motion to fix a time for pronouncing eulogies on any deceased member of the Senate or House of Representatives.

Mr. ENLOE. Mr. Speaker, we have just had an exhibition of the truth of the statement of the gentleman from Maine when he spoke of a certain storm center in the neighborhood of the House of Representatives. On a vote which was not a record vote, the amendment I offered a few moments ago commended itself to the judgment of the House, but on a record vote it did not commend itself to the judgment of the House. [Laughter.]

There is a difference between the judgment of the House and the courage of the House. I do not mean to complain of gentlemen, however, who became stampeded and ran away from the amendment under the idea that it provided for a session of the House on Sunday; but I want to assure them that such was not the fact. It simply granted the use of the Hall of the House of Representatives on Sundays for the purpose of pronouncing eulogies on deceased members. Mr. Speaker, I expect that many gentlemen here belong to different secret orders which hold memorial services over deceased members on Sunday, such as the Masonic fraternity, the Odd Fellows, the Knights of Pythias, and many other good orders of the same character. There is no desecration of the Sabbath in that and there was none in this. Some gentlemen seem to fear a charge of voting to violate the Sabbath who would not, I think, be afraid of violating it themselves if it were not made a matter of record.

Now, Mr. Speaker, I propose, if possible, to get rid of this practice of having the House of Representatives spend twenty or thirty days in each Congress pronouncing eulogies on deceased members. The proposition I have just submitted provides that the Speaker shall appoint a committee which shall

draft a suitable tribute of respect to the deceased member, that it may be printed in the RECORD so that a copy may be sent to the family of the deceased member. That will answer all the purposes of a tribute to the virtues of the dead. It is true it will deny to some gentlemen the opportunity to write up speeches and have them printed in the RECORD, and come here and deliver them when there is nobody to hear them. I know I will encounter opposition when I offer to cut off this precious privilege of airing grief; but the country is getting tired of such expensive exhibitions of grief over deceased members. I hope the House then, in the interest of economy of time, will agree to this amendment.

Mr. COX. I would like to ask a question of my colleague?

Mr. ENLOE. Certainly.

Mr. COX. Do you not really expect that you will die in Congress; and would not you want us to say all the good things we could of you?

Mr. ENLOE. Mr. Speaker, I am glad the gentleman asked me that question. I have no intention, if I can avoid it, of giving any such body as this an opportunity to pronounce a eulogy over me. [Laughter.] I do not want some gentlemen here who I am sure would take pleasure in doing it to have that opportunity. [Laughter.]

The question was taken; and the Speaker declared that the noes seemed to have it.

Mr. ENLOE. I ask for a division.

The House divided; and there were—ayes 51, noes 64.

Mr. ENLOE. I ask for the yeas and nays.

The yeas and nays were ordered, 27 members voting in favor thereof.

The question was taken; and there were—yeas 71, nays 125, not voting 157; as follows:

YEAS—71.

So the amendment was rejected.

The following additional pair was announced: Mr. BRYAN with Mr. COOPER of Wisconsin, until further notice.

Mr. ENLOE. I am paired with the gentleman from Maine (Mr. BOUTELLE). Mr. Speaker, I offer the amendment which I send to the Clerk's desk.

The amendment was read, as follows:

The Hall of the House of Representatives may be used on Sunday for the purpose of holding memorial services in honor of deceased members of the Senate and of the House of Representatives, and the colleagues of the deceased may give notice in open session of the House of such services. The eulogies pronounced on such occasions may be printed in the CONGRESSIONAL RECORD, as heretofore, but eulogies shall not be in order at any session of the House.

Mr. ENLOE. Mr. Speaker, I understand that a number of gentlemen voted awhile ago against a proposition somewhat similar to this under the impression that it provided for Sunday sessions of the House. I do not think the language of that amendment was fairly subject to any such construction, but in order to remove that difficulty from the minds of members I present this proposition, and I hope the House will adopt it.

The amendment was rejected.

Mr. ENLOE. Mr. Speaker, I offer the amendment which I send to the Clerk's desk.

The amendment was read, as follows:

Upon the announcement of the death of a member it shall be in order for members to make remarks on the life and character of deceased, at the conclusion of which the House shall adjourn, and no other memorial services or eulogies shall be in order.

Mr. ENLOE. Mr. Speaker, I have been trying to get some rule adopted by the House that will meet the requirements of this particular branch of our business here, and I think that if we adopt this amendment, then when we do have eulogies there will be some heart and spirit in them. Gentlemen will not go off and spend several days preparing eulogies to be read to empty benches, but each gentleman who feels disposed will rise upon the announcement of the death and will say what he desires to say about the deceased. In that way the matter will be disposed of, and we shall save one day in each case. I hope this amendment will be adopted.

The question was taken, and the Speaker declared that the noes seemed to have it.

Mr. ENLOE. I ask for a division.

Mr. MEIKLEJOHN. Mr. Speaker, may we have the amendment again reported?

The amendment was again read, and it was then rejected—ayes 16, noes 78.

The Clerk read as follows:

RULE XXVI.

2. The second and fourth Mondays in each month shall be set apart for the consideration of such business as shall have been previously reported from the Committee on the District of Columbia, unless otherwise determined by the House.

Mr. HEARD. Mr. Speaker, I offer the amendment which I send to the desk.

The amendment was read, as follows:

Amend by striking out paragraph No. 2 of Rule XXVI, and inserting in lieu thereof the following:

"2. The second and fourth Mondays in each month shall, when claimed by the Committee on the District of Columbia, be set apart for the consideration of such business as may be presented by said committee."

Mr. HEARD. Mr. Speaker, the object of this is to restore the text of the rule of the Fifty-second and preceding Congresses, and the Committee on Rules have agreed to accept the amendment.

The amendment was adopted.

Mr. DE ARMOND. Mr. Speaker, I offer the amendment which I send to the desk.

The amendment was read, as follows:

Amend by inserting the following:

"RULE XXXIII.

"ATTENDANCE AND PAY OF MEMBERS AND DELEGATES.

"No Member or Delegate shall receive compensation for any month in which the House shall be in session until after he shall have presented to the Sergeant-at-Arms a statement, subscribed by him, showing the number of days, if any, of his absence from the House during such month, the cause of such absence, and whether with or without the leave of the House; and the Sergeant-at-Arms shall deduct from the monthly payments of each Member and Delegate the amount of his salary for each day of his absence from the House, unless such Member or Delegate, in his written statement aforesaid, assigns as reason for such absence the sickness of himself or of some member of his family."

Mr. DE ARMOND. Mr. Speaker, if this rule be adopted it will be merely declaratory of the law as it at present exists.

Section 40 of the Revised Statutes reads as follows:

The Secretary of the Senate and the Sergeant-at-Arms of the House, respectively, shall deduct from the monthly payments of each Member or Delegate the amount of his salary for each day that he has been absent from the Senate or House, respectively, unless such Member or Delegate assigns as the reason for such absence the sickness of himself or of some member of his family.

The fact is, Mr. Speaker, there is very great difference here as to the attendance of different members. The law has provided clearly—but it has not been followed—that those who are absent, except on account of sickness of themselves or members of their families, shall not be paid for the time they are absent. I have no notion that it is necessary to put anything into the rules in order to add to the force of this law, or to make this duty any more binding upon the Sergeant-at-Arms.

As a matter of fact, however, deductions have not been made from the pay of members on account of their absence; nor have members been called on to state why they have been absent; but all have been paid alike. There comes to my mind now one notable instance of absenteeism in the last House. One of the members from New York, Mr. Stahlnecker by name, was here at the time of the holding of the Democratic caucus and was here, I think, at the time of the election of officers of the House; he then vanished, and during the first session of that Congress this House knew him no more.

There are other instances, perhaps not so remarkable, not so notorious, but sufficiently numerous to suggest that we should do whatever we can to remedy this abuse. I think that a member before receiving his pay for any month during any part of which the House has been in session should make to the Sergeant-at-Arms a statement showing whether he has been absent and declaring whether he claims that his absence, if any, was occasioned by the sickness of himself or his family. If occasioned in that way he is entitled under the law to full compensation, if not he is not entitled to compensation for the time he is absent, if the law is to be regarded. I think this rule should be adopted.

Mr. RYAN. Mr. Speaker, the gentleman from Missouri, in the remarks just made, has taken occasion to allude to my predecessor, Hon. William G. Stahlnecker, as a special instance of absenteeism during the last Congress. I wish to say, on behalf of Mr. Stahlnecker, that his absence was caused by sickness, and was in accordance with the direct orders of his physician. I deem it proper that this exculpatory statement should go upon the record in connection with the remark just made by the gentleman from Missouri.

The question being taken on the amendment of Mr. DE ARMOND, there were, on a division—ayes 19, noes 87.

Mr. DE ARMOND. I make the point that no quorum has voted.

The SPEAKER. The gentleman makes the point of no quorum. The Chair will appoint tellers.

Mr. DE ARMOND. I ask for the yeas and nays.

The yeas and nays were not ordered; there being—ayes 12, noes 106; less than one-fifth voting in the affirmative.

The SPEAKER. The demand for the yeas and nays is refused; the noes have it——

Mr. DE ARMOND. Mr. Speaker, the point of "no quorum" has been made. The suggestion was made by the Speaker that tellers would be appointed. I then asked for the yeas and nays, but I did not withdraw the point of "no quorum," and I do not now withdraw it.

Several MEMBERS. Too late.

The SPEAKER. Technically, after the adoption of the rules this point would come too late. When no quorum has voted, the demand for the yeas and nays is generally understood to be a waiver of the point of "no quorum;" but in the absence of formal rules the Chair has not enforced this point against several gentlemen during this debate, and will not now enforce it against the gentleman from Missouri. The point of "no quorum" being made, tellers will be appointed. The gentleman from Mississippi [Mr. CATCHINGS] and the gentleman from Missouri [Mr. DE ARMOND] will please act as tellers.

The House again divided; and the tellers reported—ayes 10, noes 172.

So the amendment of Mr. DE ARMOND was rejected.

The Clerk (proceeding to read) read the following:

RULE XLV.

RULES OF THE HOUSE.

These rules shall be the rules of the House of Representatives of the present and succeeding Congresses, unless otherwise ordered.

Mr. WEADOCK. Mr. Speaker, it is already declared in a previous part of these rules that they are to be the rules of the House of Representatives; but no rules which we may now adopt can bind the House in any succeeding Congress; so it seems to me there is no necessity for the declaration embraced in the rule now pending.

Mr. REED. It has been the Democratic custom, just the same, to adopt such a rule.

Mr. WEADOCK. It does no good, and if there has been any custom such as suggested, I do not think we should continue it.

Mr. REED. I quite agree with the gentleman.

The question being taken on the amendment of Mr. WEADOCK, it was agreed to.

Mr. CATCHINGS. I ask consent to go back to Rule XXVIII, on page 29, for the purpose of correcting a misprint. At the end of the paragraph the words "such proposition" were inadvertently omitted, and should be inserted.

The SPEAKER. The Clerk will read the paragraph as proposed to be amended.

The Clerk read as follows:

3. When a motion to suspend the rules has been seconded, it shall be in order, before the final vote is taken thereon, to debate the proposition to be voted upon for thirty minutes, one-half of such time to be given to debate in favor of, and one-half to debate in opposition to, such proposition.

The SPEAKER. If there be no objection, the proposed amendment will be agreed to.

There was no objection.

Mr. CATCHINGS. I now desire to move the previous question——

Mr. BURROWS. One moment, if the gentleman pleases. I desire to make a motion to substitute for the pending rules the rules of the Fifty-first Congress, with one amendment. I ask the Clerk to read my proposition as I send it to the desk.

The Clerk read as follows:

Mr. BURROWS offers as a substitute the rules of the House of the Fifty-first Congress, with this amendment: Amend Rule VIII by inserting, after clause 1, the following:

"Whenever on any question a quorum is found not to be present there shall be a call of the House, and the yeas and nays on the pending question shall at the same time be ordered. The Clerk shall call the roll, and each member as he answers to his name or is brought before the House under the proceedings of a call of the House shall vote on the pending question. If those voting on the question and those who are present and decline to vote shall together make a majority of the House, the Speaker shall declare that a quorum is constituted, and the pending question shall be decided as those voting shall appear."

Mr. BURROWS. Mr. Speaker, just a word in relation to this motion.

I offer as a substitute for the code of rules submitted to the House by the Committee on Rules, the rules of the Fifty-first Congress, with a single modification, which modification, however, we deem to be very important. The practice has obtained heretofore and it will doubtless be continued in this Congress when a question is under consideration, for the minority to abstain from voting, with a view of breaking a quorum and forcing a call of the House, and as the rules which you will probably adopt do not provide for counting those members thus abstaining from voting as present, a motion for a call of the House will be in order.

On that call every member who declined to vote will respond to his name, showing the presence of a quorum; then the question will recur on the proposition, and the minority will again decline to vote, leaving the House without a quorum. Another call of the House is in order, when the silent member will respond as before, and the question will again recur on the original proposition, on which the minority again decline to vote, and so the process continues *ad infinitum*. The amendment which I suggest to the rules of the Fifty-first Congress provides that when a call of the House is ordered the yeas and nays shall also be considered as ordered at the same time on the pending proposition; so that when the members of the House are called, under the call of the House, they are required to vote on the proposition before the House, and thereby the proposition itself can be acted upon and the process of breaking a quorum will be thwarted. This rule was once submitted by Randolph Tucker, of Virginia, and there is no reason why it should not be adopted by a body desiring to transact business.

I have only one word to say in relation to the rules of the Fifty-first Congress. To the new members of the House the body of rules you are probably going to adopt will prove to be a source of serious disappointment. It has been objected that the

rules of the Fifty-first Congress had two serious objections. In the first place, they clothed the Speaker with arbitrary power to determine whether a motion was dilatory or not; but it will be observed that in the body of rules submitted by the Committee on Rules, and which you will probably adopt, the same power is given to the Speaker of this House. Under two of your proposed rules it is provided that no dilatory motion shall be entertained. One is in the case frequently cited of a motion to suspend the rules. That rule is as follows:

8. Pending a motion to suspend the rules the Speaker may entertain one motion that the House adjourn; but after the result thereon is announced he shall not entertain any other dilatory motion till the vote is taken on suspension.

Who is to determine what constitutes a "dilatory motion" within the meaning of that rule? The Speaker of the House, under your own rules. If the motives of members are not to be inquired into, why do you clothe the present Speaker with power to do it? And yet in two different instances, in this very code of rules which you have presented to the House, you clothe the Speaker with absolute power to determine whether a motion is or is not dilatory. So the objections urged against the body of the rules of the Fifty-first Congress, if they are of any validity, are equally forceful when applied to this code of rules.

Another ground of objection to the code of rules adopted by the Fifty-first Congress is that the Speaker is clothed with the power to count a quorum. That is not a just criticism. The rules as adopted by the Fifty-first Congress did not clothe the Speaker with any such power, but simply directed the Clerk, in calling the roll, if a member was present, recognized by the Clerk to be present, and declined to vote, to mark him as present and not voting. That is all there is of it. So that in determining the question whether a quorum was present or not you could add to the names of those voting and those not voting the names of those who were present and declined to vote on either side, and if the three combined showed the presence of a quorum a constitutional quorum was held to be present for the transaction of business. That is all there is in the rules of the Fifty-first Congress about counting a quorum, prescribed by a rule of the House and declared to be legal by the Supreme Court of the United States. But in this body of rules you clothe the Speaker himself, not through the Clerk, but on his own motion, with the power to count a quorum. Let me read you what the rule provides on this subject:

A call of the House shall not be in order after the previous question is ordered, unless it shall appear upon an actual count by the Speaker that a quorum is not present.

You provide in this code a system that gives to the Speaker of the House the right in two instances to determine whether a motion is dilatory or not. You clothe him with power to count and declare whether a quorum is present or not. That is all the rules of the Fifty-first Congress authorized. So the objections you have urged against the rules of the Fifty-first Congress are equally valid when applied to the code of rules we are now considering, and you had better at once adopt the rules of the Fifty-first Congress which stopped filibustering, which provided for the transaction of public business, rather than adopt this system which has the same features, but under which you may make it absolutely impossible to do one stroke of business if a minority interpose. Under this system of rules, except through the intervention of the Committee on Rules, this House will be absolutely powerless: and why?

Mr. TURNER. Will the gentleman allow me to interrupt him for a question?

Mr. BURROWS. Certainly.

Mr. TURNER. The rule which the gentleman cites as embodied in the proposed code is only a preliminary count, and the means of verifying the count of the Speaker still remains. But in the other case, where you refer to the counting of a quorum, that was part of a final proceeding.

Mr. REED. This is part of a final proceeding.

Mr. BURROWS. But in that case the record of those present and not voting is open to correction then and there, and it is just as clear and distinct as the record of the yeas and nays. It is simply a record of those present and not voting.

Mr. TURNER. But that final proceeding is a part of the call of the yeas and nays.

Mr. BURROWS. In this case, under the rules you adopt, after the previous question is ordered, no motion for a call of the House is in order if the Speaker, by a count, determines that a quorum is present. In other words, after the previous question is ordered—for instance, upon these rules, if we were operating under the rules—if I should move for a call of the House after the previous question is ordered the Speaker would be obliged under that rule to rise in his place and count this body to determine whether a quorum was present, because this rule provides for an actual count by the Speaker; and so the very thing you object to you embody in these rules.

Mr. REED. He would either be obliged to do it, or evade it.

Mr. BURROWS. Yes. One word more. Having shown that the things you object to are put in these rules, I want to say in conclusion, if the Chair will indulge me, that under these rules you will find yourself absolutely powerless. I will undertake to-morrow morning to prevent the reading of the Journal of this day's proceedings, and to stop the business of this House under these rules for the balance of the session, unless you invoke the help of the Committee on Rules. Everybody understands that, and I suppose it will be conceded that I can stop all proceedings to-morrow morning, and you can not lift a finger to write a law or pass a resolution, commencing to-morrow morning, unless the Committee on Rules comes in and stops filibustering.

The Committee on Rules is clothed with extraordinary power. Whenever you refer a resolution to any other committee of this House, that committee must report it back within one week; but when you refer a proposition to the Committee on Rules, you do not compel that committee to report at all.

Mr. OUTHWAITE. Will the gentleman from Michigan excuse me for a moment?

Mr. BURROWS. Yes.

Mr. OUTHWAITE. That provision which you speak of refers only to resolutions of inquiry. Committees are not compelled to report on other resolutions referred to them.

Mr. BURROWS. I understand that it refers to resolutions of inquiry. The point I desire to make is that every other committee, if called upon to take action, must report within one week; but the Committee on Rules is not required to report at all.

Mr. OUTHWAITE. The provision the gentleman refers to is simply as to resolutions of inquiry addressed to the heads of Departments.

Mr. BURROWS. The gentleman from Ohio need not repeat that. I understand that perfectly.

Mr. OUTHWAITE. But the gentleman does not make the distinction appear clearly.

Mr. BURROWS. I think everybody understands it except the gentleman from Ohio. These committees must report back within one week, but when you refer a proposition for a cloture, for instance, to the Committee on Rules, they can report it back or not. So as in this case in the last Congress, when we had under consideration the bankruptcy bill, certain gentlemen were anxious to pass that measure. A proposition was made to the Committee on Rules to secure a cloture, so as to force a vote on that bill. The Committee on Rules never reported it. In other words, you clothe the Committee on Rules with absolute power over legislation, and if there is filibustering going on in this House against any measure in which gentlemen are specially interested, and about which they are particularly anxious, you can not force the Committee on Rules to bring the House to a vote unless it is a proposition which is favored by the majority of the Committee on Rules. That is the only kind of a proposition upon which you will be able to secure a vote in this Congress.

In other words, the entire legislation of the House is in the hands of a majority of the Committee on Rules. Suppose a gentleman is very anxious to have a public building in his district. The bill is before the House. He must have it passed or he thinks he can not come back to Congress, and, therefore, it is of vital importance to him. Suppose I am filibustering against it, or suppose some other gentleman is filibustering. You ask the Committee on Rules to stop filibustering. They say, "No, it is our policy to have no public-building bills passed." What is your remedy? You have none. Take any measure of public interest in which committees or individuals are interested. You are tying yourselves up by this body of rules, and placing yourselves absolutely in the hands of the Committee on Rules.

Mr. DOCKERY. We will pass a tariff bill, though.

Mr. BURROWS. So that you might just as well say first as last that all legislation in the House of Representatives of the Fifty-third Congress shall be under the direction of the majority of the Committee on Rules. That will cover the whole matter and do away with the necessity of this voluminous system.

Mr. REED. And if filibustering is Republican, it can be stopped; but if Democratic, it may be permitted to proceed.

Mr. BYNUM. Mr. Speaker, I did not intend to take up the time of the House in the discussion of the rules in a general way, and I should not now take the floor were it not for the purpose of expressing my views concerning the rules of the Fifty-first Congress as compared with the rules that have been presented by the committee.

The gentleman from Michigan calls attention to the fact that there are provisions in the rule by which the Speaker shall ascertain the presence of a quorum by a count. It has always been in the rule since I have been a member of this House, and I pre-

sume much longer. But the counting of the members to ascertain the mere presence of a quorum is a far different thing from the practice which obtained in the Fifty-first Congress, when the Speaker was authorized to count men present for the purpose of passing measures.

When the Speaker takes the chair it is his duty, if he is in doubt of the presence of a quorum, to count the House; but it is a different thing from counting a quorum to pass a bill. That is as far as the rule goes. If the Speaker at any time is in doubt that there is a quorum present it is his duty to satisfy himself before allowing business to proceed. It is not necessary that he shall ascertain it by a roll call. When the absence of a quorum is developed on a roll call the Speaker must stop proceedings and inform the House of the fact, and the House must require the presence of a quorum before any business can be proceeded with. Whenever a vote is taken by yeas and nays, that of itself fixes the status and shows the number present in the House, and the Speaker has no authority and no power to go further. As an officer he is bound by the record which has been made. When the record is made, showing that by the proceeding of the House itself that no quorum has participated, the House is powerless to confer authority upon the Speaker to add to or take from that record. It can not delegate to the Speaker a power it does not itself possess.

In the rule made in the Fifty-first Congress, for the purpose of ascertaining the presence of a quorum, the gentleman says did not go to the extent of transferring the power to the Speaker, except to register their mere presence. The yeas and nays is of American invention. It was no part of the parliamentary practices of other nations, but is prescribed by our Constitution. Suppose it required 166 votes to constitute a quorum, as it did in the Fifty-first Congress, and 165 men voted. Suppose two men declined to vote because they had a personal interest in the measure. Under that rule the Speaker of the House or the Clerk of the House registered these men as present, and thus they were actually voted when they had no right under that rule to vote. It was this giving the right to count men for the purpose of passing measures through the House that was obnoxious, and I care not whether the Supreme Court of the United States has decided that it was legal or not.

So far as I am concerned as a member of this House, I acknowledge no power greater than the House itself to determine its constitutional rights and privileges. The Supreme Court of the United States is not clothed with power to lay down rules for the government of this House, or to prescribe the limits of our consciences, in the construction of the Constitution. That is a privilege that pertains to us as members of a coördinate branch of the Government. And in the formation of rules I shall refuse to look to the decisions of courts to ascertain the extent of my rights or the boundaries of my powers. I am not participating in this debate because I want to criticise especially the rules of the Fifty-first Congress, but I desire to put upon record the differences between them and the old rules and the rules under consideration, so that the difference may be well understood.

Now, in the Fiftieth and previous Congresses it is true we adopted a system of rules that tied the hands of every member of this House. It tied the hands of the House and we were powerless to release ourselves from the filibusterer, because the same motions could be interposed against the report of the Committee on Rules that were used to obstruct other business. Gentlemen talk of the fact that men in the Fifty-first Congress sat here and refused to vote. There was a very easy way of remedying that. You have no right to bring a man here and vote him, but you have the right and the power to bring him here and compel him to discharge his duty, and to punish him if he refuses to do so.

Mr. REED. How long would that process take? Probably a day.

Mr. BYNUM. It would not take long. It might perhaps take an hour or two.

Mr. REED. I am asking this question seriously.

Mr. BYNUM. It would not take long.

Mr. REED. Let me make a supposition to the gentleman from Indiana. Suppose that such a man had a political party behind him; how long would it take to go through one of those things, I will ask my friend?

Mr. BYNUM. It might take a day.

Mr. REED. If it would take a day for one man, and there were 120 men in the party, how soon would the question be disposed of?

Mr. BYNUM. The gentleman is supposing an extreme case.

Mr. REED. It is a case I have witnessed.

Mr. BYNUM. If you want to prevent men from absenting themselves and adopt a rule requiring their presence and that they shall vote or suffer the penalties, and a few of them punished with the admonition that the rule is to be enforced, this sort of obstruction will cease, and that very soon.

You may look over the RECORD and you will find that in these instances where the names of persons present and not voting were recorded there were not over 20 or 30, and sometimes not over 10 were registered as present. The yeas and nays required in the Constitution were provided for the purpose of making a record, so that the people of the country might see how their representatives voted. Now, under the rule in the Fifty-first Congress the Speaker registered certain names as present and not voting, and said that with those voting there were 175 present, so the bill was passed.

There may have been but one single vote cast, and not even that. Now, when you register those men as present, what do you do? Why, you absolutely vote them. You not merely count them as present, but you count them present and voting in the affirmative, because if you did not your measure would be defeated.

Mr. REED. Has not the Speaker this very day, on the voices of only two or three men, declared certain propositions carried?

Mr. BYNUM. Oh, now, the gentleman is dealing with another question entirely. The gentleman's question suggests one of the fallacies that he and those who stood with him have quoted here in support of their action, yet the distinction between the two cases is very clear. The distinction is this: When we are here voting *viva voce*, it is presumed that there is a quorum until the contrary is shown, and it is presumed that a quorum acquiesces in the vote of the majority; and therefore, in the records of Congress as long as they have existed, I presume you will find that a vote has sometimes been declared carried where there were but 25 in the affirmative and 15 in the negative. Why? Because where the members are at liberty to vote or not as they please, in that form of proceeding the presumption is that there is a quorum present and acquiescing in everything that has been done; but that presumption ceases when you come to call the yeas and nays, because the Constitution requires each and every member to put his vote on record in response to his name.

Mr. REED. Does not the presumption that a quorum is present continue when the votes cast and the presence of the men actually demonstrate it? In other words, the gentleman is trying to say that a presumed quorum will work, but an actual quorum will not.

Mr. BYNUM. But you have got no actual quorum. That is the point. What is the Journal? It is nothing but a record of the proceedings of the House. The Speaker is the organ, the mouthpiece of the House, to register the acts of the House, and whenever he undertakes to go beyond that and to make a record of something other than the acts of the House he is simply injecting into the record some action of his own, which he has no more right to do than any man who is not a member of the House.

The House can not delegate to the Speaker the power to do that. Whenever, under the Constitution and the rules, the yeas and nays are called, the record of the yeas and nays is the highest proof of the presence of members, and if any man on such call refuses to vote there is no power in the Speaker to compel him to vote or to record him as voting; nor can the House confer any power on the Speaker to record a member's vote for him: yet that is what you do when you allow the Speaker to count members as present for the purpose of enacting legislation.

Now, as to this matter of dilatory motions, the word "dilatory" need not be in the rule at all where we are suspending the rules, simply because suspension cuts off all motions. Of course, any motion that delays is a dilatory motion in one sense of the word. You might say that after one motion to adjourn no other motion shall be in order, because any motion which delays is dilatory, and therefore the rule practically is that when one motion to adjourn is made and voted down no other is in order until a vote is taken on the main proposition. But under your rules you had vested in the Speaker the power to say arbitrarily whether a motion was dilatory or not. I am not citing an instance which did not occur when I say that late one evening, about 6 o'clock, I made a motion to adjourn, and the gentleman from Maine, presiding in the Speaker's chair, said it was dilatory, and I guess he was right.

Mr. REED. I guess so.

Mr. BYNUM. But a gentleman upon his side of the House arose in about two minutes afterwards and made the same motion, and then it was held not to be dilatory. Now I am at a loss to understand how it was dilatory in the one case and not in the other.

Mr. REED. Well, you confess it in your instance. Now, who was the other gentleman?

Mr. BYNUM. Mr. McKinley.

Mr. REED. Well, I suppose he would confess that his motion was not dilatory if he were here. [Laughter.]

Mr. BYNUM. But, unfortunately, when Mr. McKinley was a

candidate for reëlection the gentleman from Maine went down to help reëlect him——

Mr. REED (interposing). Oh, now, do not introduce anything like that into a beautiful discourse on parliamentary law. [Laughter.]

Mr. BYNUM. Well, I would not, only that the case is so remarkable. The gentleman from Maine in that campaign made five speeches in five Republican districts in the State of New York, and they all went Democratic. Then he went out to Ohio and spoke in a Republican district, and that went Democratic. He went then to Ironton, and that went Democratic. He came over into our State, where the President had only three members out of thirteen, and made one speech at Logansport, and that went Democratic. He went over into Brother CANNON'S district in Illinois, and Brother CANNON stayed at home. [Laughter.] He then went over into the district of Mr. Rowell, the very able chairman of the Committee on Elections of the Fifty-first Congress, and we have seen no more of Rowell. [Laughter.] From there he went to Mr. Gest's district, and Mr. Gest remained at home. From there he went to Chicago, and we have seen nothing of Brother Adams and Brother Mason since that time. [Laughter.] Winding up, he went to Wisconsin, and gave us almost a solid Democratic delegation, and on his way home he stopped to visit Brother Allen, in Michigan, and that melodious voice has not been heard since in this Hall. [Laughter.] Taken altogether it is a very remarkable record of unbroken success for the Democratic party.

Mr. WILSON of Washington. As the gentleman seems to be a prophet, perhaps he can tell us how large Governor McKinley's majority will be this year.

Mr. BYNUM. Now, Mr. Speaker, the gentleman from Michigan [Mr. BURROWS] says that these rules leave us absolutely in the hands of the Committee on Rules. Well, sir, you can not adopt any system of rules that does not vest power somewhere. I agree with the gentleman from Maine on that proposition. The power must be vested somewhere, and I would rather put it in the hands of the Committee on Rules and let them come in and report to the House and let the House say whether the filibustering shall stop, rather than clothe the Speaker with such extraordinary powers as would put him practically in control of all legislation. That is the difference. I am willing to trust the committee. As I have said, the power must be vested somewhere, and we vest it in the Committee on Rules, subject to the action of the House, and not in the presiding officer.

It is true we can not compel that committee to act; nor would I have respect for a committee over which we would have to place a rule so as to drive it into doing what might be deemed proper. I am willing to trust that committee to come in here with their reports at all times and under all circumstances; for the House is the power that is finally to determine what action shall be taken relative to its course of proceedings.

Mr. CATCHINGS. I now move the previous question on the pending substitute and on the report as amended.

The previous question was ordered.

The SPEAKER. The first question is on the amendment of the gentleman from Michigan [Mr. BURROWS] to substitute for the pending report the rules of the Fifty-first Congress with an amendment.

The question having been put—

The SPEAKER. The noes seem to have it.

Mr. BURROWS. We may as well have the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 65, nays 149, not voting 139; as follows:

YEAS—65.

Adams,	Fletcher,	Johnson, N. Dak.	Smith,
Aldrich,	Funk,	Joy,	Stone, C. W.
Avery,	Funston,	Lacey,	Stone, W. A.

Dingley,	Kribbs,	Powers,	

So the amendment of Mr. BURROWS was rejected.

Mr. HENDERSON of Illinois. I am paired with the gentleman from Louisiana [Mr. BLANCHARD]. If he were present he would vote "no," and I should vote "aye."

Mr. DRAPER. I am paired with the gentleman from Rhode Island [Mr. LAPHAM]. If he were present I should vote in the affirmative.

Mr. RYAN. I am paired with the gentleman from Massachusetts [Mr. APSLEY].

The result of the vote was announced as above stated.

The SPEAKER. The question is now upon agreeing to the report of the Committee on Rules as amended.

The question being taken, it was determined in the affirmative.

On motion of Mr. CATCHINGS, a motion to reconsider the vote just taken was laid on the table.

BUSINESS OF WAYS AND MEANS COMMITTEE.

Mr. WILSON of West Virginia. I am instructed by the Committee on Ways and Means to ask the adoption of the resolution which I send to the Clerk's desk.

The Clerk read as follows:

Resolved, That the Committee on Ways and Means is authorized to sit during the sessions of the House and to conduct any inquiry relating to the subjects under its jurisdiction by subcommittee or otherwise that it may deem necessary, the expenses to be paid out of the contingent fund of the House upon the warrant of the chairman of the committee.

There being no objection, the House proceeded to consider the resolution, which was adopted.

PRINTING OF THE RULES.

Mr. RICHARDSON of Tennessee submitted the following resolution; which was read, considered, and adopted:

Resolved, That there be printed 2,000 copies of the rules of the House for the use of Members and Delegates.

On motion of Mr. RICHARDSON of Tennessee, a motion to reconsider the vote just taken was laid on the table.

ADJOURNMENT TILL SATURDAY NEXT.

Mr. CATCHINGS. I move that when the House adjourns today it adjourn to meet on Saturday next. I will state the purpose of this motion. We want to allow an opportunity for the introduction, reference, and printing of bills, so that we may see what legislation should properly be brought before the House at that time.

The motion of Mr. CATCHINGS was agreed to.

Mr. WILSON of Washington. Mr. Speaker, are we now at liberty to introduce petitions and bills in the manner followed heretofore?

The SPEAKER. Petitions and private bills can be introduced through the box, and public bills may be handed to the Clerk, and referred under the direction of the Speaker.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. HENDERSON of North Carolina, for one week, on account of sickness in his family.

To Mr. WRIGHT of Massachusetts, for ten days, on account of sickness.

To Mr. BRYAN, for one week, on account of important business.

To Mr. MOON, for ten days, on account of important business.

To Mr. COCKRAN, indefinitely, on account of sickness.

To Mr. HOUK of Ohio, for one week from the 10th instant, on account of important business.

To Mr. DANIELS, for Saturday next, on account of important business.

To Mr. BRANCH, indefinitely, on account of important business.

ENROLLED JOINT RESOLUTIONS SIGNED.

Mr. HAGER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled joint resolutions of the following titles; when the Speaker signed the same:

Joint resolution (H. Res. 6) to make the 18th day of September, 1893, a holiday within the District of Columbia.

Joint resolution (H. Res. 7) to permit the use of certain ensigns, flags, and signal numbers to decorate the Capitol and its approaches, September 18, 1893.

And then, on motion of Mr. CATCHINGS (at 4 o'clock and 10 minutes p. m.), the House adjourned until Saturday next.

BILLS, MEMORIALS, AND RESOLUTIONS.

Under clause 3 of Rule XXII, bills and resolutions of the following titles were introduced, and severally referred as follows:

By Mr. APSLEY: A bill (H. R. 8) to erect a public building at Fitchburg, in the State of Massachusetts—to the Committee on Public Buildings and Grounds.

By Mr. BRAWLEY: A bill (H. R. 9) to transfer the Morris Island life-saving station, near Charleston, S. C., to Sullivans Island—to the Committee on Interstate and Foreign Commerce.

By Mr. BOWERS of California: A bill (H. R. 10) to amend an act entitled "An act for the relief of certain settlers on the public lands, and to provide for the repayment of certain fees, purchase money, and commissions paid on void entries of public lands—to the Committee on the Public Lands.

Also, a bill (H. R. 11) prohibiting the coinage in the mints of the United States of gold coins of a less denomination than $5, or the issue by the Treasury of notes, certificates or any kind of paper currency of a less denomination than $5—to the Committee on Coinage, Weights, and Measures.

Also, a bill (H. R. 12) to extend the provisions of an act entitled "An act to provide for the adjudication and payment of claims arising from Indian depredations," approved March 3, 1891, to include certain claims presented to the secretary of state for the State of Nevada—to the Committee on Claims.

Also, a bill (H. R. 13) to provide for the erection of a public building at San Diego, Cal.—to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 14) to provide for the purchase of a site and the erection of a public building thereon at Fresno, in the State of California—to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 15) prohibiting aliens from holding offices or places of profit, honor, or trust under the Government of the United States, and for other purposes—to the Committee on the Judiciary.

Also, a bill (H. R. 16) to establish a uniform rule of naturalization—to the Committee on Immigration and Naturalization.

Also, a bill (H. R. 17) to restrict the disposition of public lands to citizens of the United States—to the Committee on the Public Lands.

By Mr. BUNN: A bill (H. R. 18) to provide for constructing a road to the national cemetery near Raleigh, N. C., and for other purposes—to the Committee on Military Affairs.

Also, a bill (H. R. 19) for the relief of the city of Raleigh, N. C.—to the Committee on Claims.

Also, a bill (H. R. 20) to refund to the State of North Carolina certain moneys therein named—to the Committee on War Claims.

By Mr. BRYAN: A bill (H. R. 21) for the erection of a public building at Lincoln, in the State of Nebraska—to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 22) providing for the erection of a public building at the city of Plattsmouth, Nebr., and for other purposes—to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 23) authorizing and directing the Secretary of the Treasury to pay to the city of Lincoln, Nebr., one-half the cost of constructing pavements in front of the public square owned by the United States Government in said city—to the Committee on Claims.

By Mr. COOMBS: A bill (H. R. 24) for the protection of distinguishing flags and symbols used on vessels of the United States—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 25) to refund the certain goods remaining in bonded warehouse October 6, 1890—to the Committee on Claims.

Also, a bill (H. R. 26) authorizing the Secretary of War to procure and present suitable bronze medals to the officers and men who volunteered for the Port Hudson storming column under General Orders, No. 49, Department of the Gulf, Nineteenth Army Corps, before Port Hudson, June 15, 1863—to the Committee on Military Affairs.

By Mr. CADMUS: A bill (H. R. 27) to increase the appropriation for the erection of a public building at Paterson, N. J.—to the Committee on Public Buildings and Grounds.

By Mr. CUMMINGS: A bill (H. R. 28) making Labor Day a legal holiday—to the Committee on Labor.

Also, a bill (H. R. 29) to amend an act to prevent counterfeiting—to the Committee on the Judiciary.

Also, a bill (H. R. 30) to insure preference in appointment, employment, and retention in the public service of the United States to veterans of the late war—to the Committee on Reform in the Civil Service.

Also, a bill (H. R. 31) to provide for and facilitate commercial and political union between the United States of America and the Dominion of Canada—to the Committee on Foreign Affairs.

Also, a bill (H. R. 32) to provide communication from lightships and outlying light-houses to the shore—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 33) to amend an act, approved October 1, 1890, entitled "An act to reduce the revenue and equalize duties on imports, and for other purposes"—to the Committee on Ways and Means.

Also, a bill (H. R. 34) authorizing the purchase of oil paintings for the Executive Mansion—to the Committee on the Library.

Also, a bill (H. R. 35) for the erection of a monument in the city of Washington to the memory of the late Commodore John Paul Jones—to the Committee on the Library.

Also, a bill (H. R. 36) to improve the postal service by limiting the hours of labor of clerks and employés therein—to the Committee on the Post Office and Post-Roads.

Also, a bill (H. R. 37) to establish communication with lightships and light-houses—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 38) relating to the pay and retirement of mates in the United States Navy—to the Committee on Naval Affairs.

Also, a bill (H. R. 39) to increase and equalize the pay of letter-carriers—to the Committee on the Post-Office and Post-Roads.

Also, a bill (H. R. 40) to limit the hours of work of clerks and employés in first and second class post-offices—to the Committee on the Post-Office and Post-Roads.

Also, a bill (H. R. 41) to define the duties of army and navy musicians and to regulate their pay—to the Committee on Military Affairs.

Also, a bill (H. R. 42) granting pensions to certain officers and enlisted men of the Life-Saving Service and to their widows and minor children—to the Committee on Pensions.

Also, a bill (H. R. 43) to amend the contract-labor law—to the Committee on Immigration and Naturalization.

Also, a bill (H. R. 44) relating to the compensation of fourth-class postmasters—to the Committee on the Post-Office and Post-Roads.

By Mr. COGSWELL: A bill (H. R. 45) in relation to the retirement from active service of officers of the Army—to the Committee on Military Affairs.

Also, a bill (H. R. 46) for the erection of a statue or monument

in the city of Washington to the memory of Maj. Gen. Israel Putnam—to the Committee on the Library.

Also, a bill (H. R. 47) to pay certain bounties to enlisted men afterwards promoted to be commissioned officers—to the Committee on Military Affairs.
